Discovery of Platina.—Recent investigations prove that the discovery of malleable platina, which to free population in the different States, in 1850 of the people are slaves, and smallest in Arkans has been variously ascribed to Prout, Wollaston, Fourcroy, Breant, and even to Janetty, belongs to a French chemist, François Chabaneau, resident in Madrid. In the eighteenth century, there was brought to Spain, from South America, not only gold and silver, but another metal in small grains, white, hard, brittle, and infusible, to which was given the name of platina, from plata, silver. In 1780, Chabaneau attempted to shape the platina into ingots, and his efforts were successful. The Spanish King Charles III. was so pleased at the fact of this discovery having been made in his capital, that he struck a commemorative medal in platina, and conferred a pension upon Chabaneau. The letters patent granting this pension are dated in 1785, and thus effectually settle his claims to priority."

The Census of the United States.

Total 6,412,453 3,260,412 8,434,155 3,999,353

If these figures are correct, the population of the free States and territories is 19,050,224, and of the slave States and territories, 12,591,753, including 3,999,353 slaves-the total being 31,641,977.

We have examined the figures of the returns from the border slaveholding States, with a good The Free and Slave Populations of the United deal of interest, to see what hope they afford for a speedy extinction of slavery within their limits. In Delaware, the number of slaves, which, in 1850, was but 2290, has been reduced to 1805. This is only 1.5 per cent. of the whole population, (112,-353;) so insignificant a number that there can be no serious difficulty in making Delaware a free State as soon as her people will that it shall

> In Missouri, the slave population, which, in 1850, numbered 87,422, is now 115,619-an increase of 28,197. In the same time, the free inhabitants of the State increased from 594,622 to 1,085,595a gain of 490,973. The slaves now form but 9.6 per cent. of the whole population; in 1850, they formed 12.8 per cent. This lessening ratio, and the well known progress of the Free Soil sentiment in that State encourages the hope that Missouri will, at no very distant period, be freed from the

Maryland, in 1850, had 90,368 slaves; they are now reduced to 85,382-a decrease of 4,986, while the entire population has increased from 583,034 to 731,565. The slaves form 11.6 per cent. of the inhabitants; in 1850, the proportion

In Kentucky, the slaves constitute 19.7 in each 100, of the inhabitants; in Tennessee, 25 per cent.; n Virginia, 31.1, and in North Carolina, 325. The last named four States contain in the aggregate 1,336,805 slaves, a number so great as to 224, and the 3,526,645 in the slave States, in preclude any reasonable expectation of the removal same period, increased to 12,601,753; the incre of slavery, by any causes now in operation. Not- in the free States being 15,291,314, and in withstanding the vast number of slaves yearly re-slave States, 9,075,108-a total increase of 2 moved from their limits to supply labour for the cotton States around the Gulf of Mexico, there has been an actual increase in the number of those re- and abundance have gone hand in hand with t maining. In 1850, there were 1,211,517 slaves vast increase of numbers, and that the blessings in these States, showing an increase of 125,288, in peace, advancing civilization and good governmenthe last ten years. So profitable a market is found have been hitherto enjoyed by the inhabitants of in the cotton region for all the slaves that can be United States, in a degree perhaps beyond that spared from the more Northern slave States, that any other people, the reflection that the lost cent t is greatly to be feared the latter have no idea of of the United States has, probably, now been take ever, voluntarily, making any changes in their so- is calculated to excite feelings of the profound cial condition that would involve an abandonment regret. It is surely cause for sorrow and humil of a traffic as disgraceful as it is lucrative.

the seven States, which have just seceded from the Union, the whole having a population of 5,494,628, which it has been instrumental in imparing, a including 2,499,742 slaves. Considering that these were Ming Quen. Much valuable property, that it was otive, has studiously avoided taking any step professed christians, and their opponents poor head impossible to remove, was destroyed. It is said

necessarily be attendant upon it.

SUMMARY OF EVENTS.

EUROPE .- News from Liverpool to the 26th ult.

The hostilities at Gaeta were recommenced on the 22d, by the opening of a heavy fire from the besieged. It is said that the King has resolved to hold out at Gaeta, under the advice of the foreign ministers. Typhoid fever was making ravages in the town. The Sardinians had entered the Roman States, and

dispersed the reactionary bands.

Advices from China represent all quiet, and that the first instalment of the indemnity to the silies had been paid by the Chinese. The rebels appear to be gaining ground in China. Twenty-five hundred English troops and a quota of French were left at Tien-Tsin. The

Peiho was completely frozen up.

The proceedings of the Senate and Corps Legislatif of

France is said to be making extraordinary naval pre-parations. The excuse is found in the menacing attitude of Germany towards Denmark, and a late warlike

and a factorinal towards bennand, and a fact warning append of the King of Prussia.

The prospectus has been issued in England of an India Cotton Company. It is proposed to establish agencies in Guzerat, and purchase cotton of the growers direct, and to endeavour to improve the process of picking and cleaning by machinery.

The advices from Manchester continue unfavourable.

There has been little inquiry for goods, and prices were

weak, with very light transactions. The Liverpool cotton market was dull and declining breadstuffs were dull, and the quotations lower. Flour,

28s. 6d. a 31s. 6d.; red wheat, 11s. a 13s. per 100 lbs. The weekly return of the Bank of England exhibits a decrease of £253,000. The money market was slightly

more stringent. Consols, 911 a 913.

The dykes in Holland had broken in various places. sweeping away the houses of thousands of unfortunate creatures, who were wandering about cold, hungry and year. homeless.

UNITED STATES. - The Peace Convention in session at Washington continues to sit with closed doors. Several more States have appointed commissioners to it, including Massachusetts, which at first declined. Twenty-one

by the North.

States are now represented in it.

The Virginia Convention.—The election for delegates to the approaching convention, resulted in the choice of a large number of conservative or Union men. It is believed a majority of the members will oppose secession, until it shall be found that no concession will be made

Affairs at Washington .- General Scott, in a letter to the officers of a New York military company, who tendered their services for the defence of the capital, states that the government does not contemplate calling any troops to Washington, other than the militia of the district, and some detachments of regular troops.—The President replied to the propositions of Col. Hayne, the commissioner from South Carolina, that he has no anthority to treat for the sale or other disposition of the forts and other public property; that it is his duty to defend them to the best of his ability, and that the responsibility for bloodshed will fall on those who attack them. Hayne has returned to South Carolina. Certain distinguished Virginians have telegraphed to Gov. Pickens, requesting him still to forbear commencing hostili-

Secession Movements .- The Texas convention passed

the ordinance of secession on the 1st inst.—yeas, 166; nays, 7. The ordinance is to be submitted to a vote of the people, and, if ratified, will go into effect on the 2d of next month .- On the 4th inst., the custom-house at New Orleans was opened under the authority of the government of Louisiana. The collector of the port of New Orleans has refused to allow any goods imported from Europe to pass on to St. Louis, Memphis, Nashville, or any other port of the interior, unless the duties are paid to the republic of Louisians, or unless the U.S. collectors at the destined ports become responsible for the payment of these duties to Louisiana .- On the 9th inst., the U.S. arsenal at Little Rock, Arkansas, was seized by the revolutionists. It contained nine thousand stand of arms, and a large quantity of ammunition and cannon.—The police of New York having seized a quantity of muskets, which were about being shipped from that port to the State of Georgia, the authorities of the latter retaliated by seizing six New York vessels, which were at Savannah. Upon this the muskets were unconditionally given up, and then the New York vessels were restored to their owners .- A bill appropriating half a million of dollars for the cause of Sonthern independence, has passed both houses of the Georgia Legis-lature.—It is believed that there will be no immediate

will be taken to prevent reinforcements or supplies being sent to the garrison.

"The Confederated States of North America."—The Southern Congress assembled at Montgomery, Ala., has agreed upon the Constitution, and the creation of a provisional government. Jefferson Davis has been chosen President, and A. H. Stephens, Vice President, of "the Confederated States of North America." The Constitution of the confederacy prohibits the slave trade, except between the States. Slaves that escape from one State to another, are to be delivered on the claim of the party to whom they may belong, by the executive authority of the State in which they may be found; and in case of abduction or rescue, the full value of the slave, also all The proceedings of the Senate and Corps Legislatif of the Fench Assembly have been ordered to be placed at the disposal of each journal in Paris every evening. France is said to be making extraordinary naval pre- of the Constitution is nearly identical with that of the

United States.

The Loon Bill.—The President has approved and the twenty-five million loan bill. The Secretary of the Treasury is not obliged by this bill to accept the most favourable bids, unless he shall consider them advantageous to the United States, and any portion of the loan not taken under the first advertisement, he may again advertise according to his discretion.

U. S. Senator .- Ira Harris, of Albany, has been elected U. S. Senator from New York, in place of Wm. H. Seward, whose term will expire on the 4th proximo.

Kansas.—All the accounts from this territory concur in representing the destitution and suffering as very great. Notwithstanding a large amount of relief has been forwarded, it is said to be wholly inadequate to meet the wants of the people, many of whom are in danger of perishing from famine.

New York.—The total mortality of the year 1860 was

22,710-an increase of 1065, compared with the previous

Philadelphia,-Mortality last week, 249. The total funded debt of the city is \$20,962,408. It was increased

\$964,000 during the last year. Boston .- In Boston, the buildings put up during the year 1860, was 984, and their cost \$5,978,161. was less by four millions of dollars than the year previous, but the large expenditure of that year was owing to several blocks of buildings of great magnitude and

Congress .- In the Senate, Johnson, of Tennessee made a strong and able Union speech, in which he de-nounced the secession movement. Wigfall, of Texas, nonneed the secession movement. Wighall, of Texas, replied, and defended the action of the cotton States. The House of Representatives has passed a bill for the breaking off of postal communication with the seceded States, and forbidding the making of new contracts. Several effective speeches were made in the house on the condition of the country; the best, perhaps, by Winter Davis, of Maryland, who pledged that State for the Union. Petitious signed by thousands in all the Northern States continue to be pressed upon Congress, urging that body to adopt some means of conciliation and peaceable settlement of the present political troubles. On the 11th inst., a resolution offered by Sher-man, of Ohio, was passed by an unanimous vote, (yeas, 161; nays, none,) as follows. Resolved, That neither Congress, nor the people, or the governments of the nonslaveholding States, have any constitutional right to legislate upon, or interfere with slavery in any of the slaveholding States of the Union.

Tennessee .- On the 9th inst., an election was held in this State to determine whether a majority of the voters desired that a State convention should be called, and at the same time to elect delegates to the same. Partial returns indicate that the Union sentiment is strong in Tennessee, and that if a convention shall be called. which was doubtful, it would not join in the secession movement.

The President Elect .- On the 11th inst., Ahraham Lincoln, the President elect, left his home at Springfield, to commence his journey to Washington. He did not intend to proceed directly there, but to stop at New York and various other places on the route. Many of the inhabitants of Springfield assembled to witness his departure, to whom be expressed the deep feelings of sadness which the occasion inspired. He also said, "A duty devolves upon me which is, perhaps, greater than that unto you, inamuch as ye have done it unto one of the which has devolved upon any other man since the days least of these my brethren, ye have done it unto me."

—, on the 29th of the First month last, Ressco of Washington. He never would have succeeded except for the aid of Divine Providence, upon which he at all

for the and of Divine restrictive, upon what he itimes relied. I feel that I cannot succeed without the same Divine aid, which sustained him, and in the same Almighty Being I place my reliance for support."

Great Falls of Snow.—The depth of snow, in New attack on fort Sumpter, but the question will be refer- Hampshire, at the present time, is almost unparalleled. Friends.

red to the Southern Congress. In the meantime, care Measurements made of the quantity fallen, show that i all there have been about 70 inches, and travelling i very much impeded. In Western New York, also, a vac amount of snow has fallen.

> For "The Friend." Henry Hull.

(Continued from page 186.)

Religious declension, whether in individuals or communities, is seldom sudden. It generally ins in very little things; and often, long beer things. If we could read the honest details t each indulgence in what was once a subject of traint and self-denial, created an increased apite for greater liberty, and a disposition to quiet compunctions of conscience by persuading himf that scruples formerly felt were ouly the fruit of acation, of circumstances or of imagination, and d no divine authority; thus clouding the spiritvision by the mists of human reasoning, until ar discernment between that which pleaseth d, and that which pleaseth him not, was, in great asure, lost; the tenderness of conscience, once own and peacefully enjoyed, was blunted, and the nd, roving in uulawful liberty became more and re bewildered, and in danger of putting light darkness, and calling darkness light.

Religious society is made up of individuals; and ere a considerable number of these fall into any gree of this spiritual declension, especially if y be such as, from their position or other cirnstances, exercise an influence; their spirit and ample, and the avowal of their sentiments, tend spread the defection. Numbers give strength; is encouraged in undue indulgences by seeing ers yield to them; a godly zeal for the preservaa of the body in its former faithfulness and deation, languishes and dies away; and degene-y gradually overspreads; until the disposition comes prevalent to lower the ancient standard suit modern weakness; to wink, if not to cone, at departures from what Truth requires, and

of these, if we decline to uphold others or any one, connexions in America were brought near to my which Divine Wisdom has appointed, we cannot mind, accompanied by thoughts of my separation advance in the inward life of godliness, but shall from them, while tears of tender and parental afgradually fall away from it.

In reading the journal of Henry Hull, as well as those of other ministers, written at different periods, holy command-be pleased to preserve us in thy we find frequent mention of the departure of the fear, walking in the way that is acceptable unto religious Society of Friends from its early zeal and thee, and keep us from falling into any of the ways devotedness. This is not peculiar to it. The which render unworthy of thy favour, for thou art pious labourers in other denominations have had worthy to be served by us, from whom we have to deplore the same degeneracy among them, received so many blessings. May we never forget and our own observation amply confirms the conclusion that it is no less apparent now, than it to sacrifice whatever thou callest for. Amen. was among preceding generations. The cause, we believe, in all cases, will be found in the indivi-

dual defection of which we have already spoken. The first members of the religious Society of themselves to the regenerating baptism of the Holy the calming influence of the power of Truth stayed Spirit; and were earnestly concerned to live daily in subjection to the yoke and cross of Christ, by there has been any outward manifestation of which they were crucified to the world, its religious, ing away, the inward watch has been relaxed, friendships, riches, honours, and vain customs and fervency of love to God has abated, and the fashious. Abiding under this inward daily work, rit of daily earnest prayer for divine help and and the guidance of the light of Christ, they were servation has been turned aside by the love of made zealous against all sin and worldly compli of preservation to those who were engaged to turn ances, devoted to the promotion of the cause of from the wickedness of their ways. the downfall of the backslider, we should probalike the downfall of the backslider, we should probalike the backslider, we should probable the backslider of the bac their growth in the divine "wisdom and knowledge which were the stability of their times, and strength beasts, knocking each other down with whatever of salvation," as well as the remarkable success, they could lay hold of for the purpose, which attended their labours. "Thus the days they call holy are s

which, faithfully carried out, wrought such blessed results for them; and it only requires a return, and full submission, to the same inward work, and regenerating, crucifying power, to restore the society to its original purity and holiness. Nothing else can accomplish it. All contrivances and modifications to lessen the offence of the cross, and render its requirements more agreeable to the natural mind, will surely fail. Reformations cannot be effected by wholesale. The only way to produce a salutary change in the aggregate, is by operating on the individual mind; and as each one is made willing to submit entirely to that transthey were, and daily to ahide under it, the blessed work will be begun and carried on; the principles and testimonies of the society will become more and more precious in our eyes, and instead of desiring to change them, our chief concern will be, through beads of these deceivers of the people." Divine assistance, so to perfect holiness in the fear by the purity and heavenly mindedness of our lives, to the acceptance of others, that they also may come to realize their preciousness.

Of the further prosecution of his religious en-

fection stole silently from mine eyes. Thou knowest, O Lord, that I left them in obedience to thy how much we owe unto thee, but always be willing

" Second-day morning, 25th, rode to Birr, where we had a good meeting, notwithstanding the rabble compassed the house, in order to disturb us; and the key being left in the door, they locked it, and Friends were persons, who had fully surrendered made a noise at the windows after I stood up. But the minds of the assembly, many of whom were not Friends, so that little notice was taken of the rude behaviour without. The meeting ended with thacksgivings and praises unto Israel's Shepherd, for the continuance of his care over those who put their trust in him, with humble prayers for the blessing gaged, with a fury comparable to that of ferocious

Thus the days they call holy are spent in some The principles of the society new are the same parts of Ireland, the people being kept in ignorance by selfish priests, who teach them to refrain from labour on these days, that they may thus have a pretext for receiving money from them, as a compensation for unavailing ceremonies and services. These popish holidays, instead of promoting morality or religion among the people, make them worse, and expose them to many evils; encouraging idleness, and causing the holy name to be blasphemed, and the way of Truth to be evilly spoken of. No marvel that the priests endeavour to keep the pcople in ignorance, for if they had the privilege to see and judge for themselves, they would find that their teachers were too generally promoters of the forming power, which made the first Friends what kingdom of antichrist, even whilst they are professing to advance the cause of Christ Jesus our These pretended holy days are an offence to the holy God, to whom vengeance belongeth, and who will render righteous recompense upon the

"The 30th of Third month, the Select Quarterly of God, by living up to them, as to commend them, Meeting for Leinster province was held; and on the following day, being the first of the week, a large number of Friends being assembled from the different constituent branches, meetings for Divine worship were held in the morning and evening. settle at ease under the idea that if the great specified and at one of the great specified and at own day, I all the great specified and at own day, I all the meetings were edifying easenons; the presence of passed most off. In the fields and gardens, ob the meetings were edifying easenons; the presence society need not be enforced. But the work of serving the beauties of the creation, as evidenced of Him who promised to be in the midst of the two e religien embraces several parts; and however in the springing forth of the buds and blossoms, or three who are gathered in his name, being evi-suuously we may profess an adherence to some My mind was clothed with solemnity, and my dear don'tly witnessed to stay the minds of the people, ing, there seemed to be an uncommon degree of the of a weak understanding, than of a sound mind; cementing influence of heavenly love over the minds for neither religion nor reason point it out as a of Friends, which had a profitable effect in preparing means to promote the usefulness of the wearer, public gardens, accessible to all ranks and class them for the business of the church. This was The great departure from plainness, which is evil is the best, as it is the most prominent, evidence transacted on the following day in a spirit and dent among many of our young people, is a proof the universal liking which prevails for such are manner, which evinced the prevalency of desire, of their folly and ignorance, rather than of wis- cial assemblages of all that is beautiful and that the church might arise and shake herself from dom; since it is beneath the dignity and nobility lightful in nature. If such a liking were not very the dust of the earth, and put on her beautiful of a christian mind to be so much employed about, general, there would assuredly be no public garments. The parting meeting was also a good and pleased with, the covering of the body. In dens; and we may regard their increase among time in which bundle retitions was also a good and pleased with, the covering of the body. In dens; and we may regard their increase among time, in which humble petitions were put up for some it may be more the effect of the parents' of late years as an indication of a decided impre preservation from the contaminating things of this pride, than that of the children; but this testimony ment in the popular taste and feeling, and as itife, and that when separated from each other, we of our Society to a simple, useful and not expenagging or still further ameliorations in that dir might witness the extension of his help, who had sive manner of dressing and living, is grounded in condescended to be with us while together, that so the Truth, and innovations will never be able to the poor man's landed estate, in which he can we might be enabled to advance the Lord's cause sap the foundation, or overthrow it.
in our respective allotments in life, and in the little "I would recommend to my dear young friends, to recreation and instruction, pleasure and health. to attend the established worship, and wholly remony to the purity of the religion of Jesus Christ,
fuses to permit her to attend Friends' meetings,

choose such.

"The King, or Alake, as he is called, is not, as a civilized countries, the executive; his office seems o be more to preside at all important councils. Ie exercises other functions not well understood y strangers. The government is divided into everal departments. The Elders constitute the idiciary. The officers of the Ogboni,* a secret rder, exercise legislative functions.

"The present Alake succeeded Shodeke, a man o venerated as to he ranked among the demigods. Every one who knew him, has something to recount

f the virtue of Shodeke.

"The support of the king and chiefs is derived rom the offerings of their slaves, and of those who bring controversies to them for settlement."

"In African native cities there are no streets, uch as would be called so in a civilized country The houses or compounds are scattered according o the discretion or taste of their owners; lanes, dways crooked, and frequently very narrow, being eft between them. These dwellings are sometimes very large, including in many instances accommolation for from twenty to two hundred inmates, specially in those of some of the wealthier chiefs, which are sometimes tenanted by over three hunlred people.

"The usual form of a compound is square, and s bounded by a wall against which the rooms are commonly built. The walls are of mud, but are sometimes very straight and smooth. In some of he mission-houses, which are likewise of mud, out plastered, a stranger would not suspect the

naterial.

"In the area within the inclosure are gathered their sheep, goats and so forth, at nights. In almost every one of these dwellings there is a large dove-cot, in which are bred hundreds of common domestic pigeons. They are very fond of raising

chickens, ducks and other poultry.

"The food of the Egbas, as well as of all the tribes between Lagos and Horin, is very simple, consisting chiefly of a preparation called eko: corn is macerated in water until fermentation ensues. It is then crushed between stones, and the chaff separated by washing. The milky liquor is then boiled in large pots until it assumes a consistency somewhat stiffer than cream, which, as it cools, becomes as firm as jelly. The taste is rather unpleasant at first, but one seldom fails to like it after persisting in its use. A portion of it nearly as large as a penny-roll, wrapped in leaves, is sold for five cowries, or about a mill. An adult native consumes from four to eight at a meal, taking with it as a relish a few spoonsful of obé, or 'palaver-sauce,' as the Sierra Leone folks call it. Palaversauce is made by cooking together palm-oil, pepper, ocros, locust-seed, ogiri and several esculent

For "The Friend,"

THE LIGHT OF THE SPIRIT. As I stood on a mountain top, Gazing around, Night spread o'er the landscape A darkness profound ; The star-lights of beauty, Which twinkled above, Were bright proofs of glory And infinite love;

Yet too faint were their beamings, Too feeble their light, To bring out of darkness, Earth's beauties to sight. The fairest of valleys
No verdure could show,

And the wind-rippled river, Ran sparkless below. But soon as the day-stream, Earth flooded with light, Fields, orchards and pastures,

Before me were bright: The homes of earth's children Where love-plantings grew, Life's highways and bye-ways

Came clearly to view.
Then I thought on God's dealings; To man, the dim-eyed, In the night-light of nature,

Must darkness abide. Though the star-beams of Reason With beauty illume, Too feebly they flicker

To scatter the gloom. He may look to the Scriptures, Inscribed on their pages Are lessons of wisdom

God gave the past ages; Yet these lights of his Providence, Shining of old,

The day's present duties But faintly unfold: And until like day's dawning The Spirit gives light, Man gains but dim outlines

Like far views by night. Oh, seek then, poor sinner,
Life's day-break within,
To light up the dark depths

Of weakness and sin; To open the glories

Of God's saving grace, His matchless extendings Of love to thy race; To show thee the life-path

Wherein thou shouldst tread, With love gently guiding His light overhead;

Then with truth, and with glory, The Scriptures will shine, And in Jesus, their lessons

Prove truly divine.
Thou wilt know by the Spirit The Truths they unfold, And the kingdom of glory Thine eyes shall behold; The kingdom of happiness,

Purity, peace, Where love and thanksgiving Have endless increase. For "The Friend,"

of the Yearly Meeting of Philadelphia. (Continued from page 181.)

JOSRUA BROWN.

On First-day, the 17th of the Twelfth month, 1775, Joshua Brown attended the meeting at subjects, and was bowed in prayer to the Lord, that he might graciously prepare their hearts, so that they might receive the good seed of the kingdom, and bring forth fruit unto eternal life. His companion also was largely opened in the ministry. Going to Rahway, they had a meeting there that afternoon. In this meeting, Joshua was led to set forth the enmity of the natural man against the religious one; iustancing from Scripture how, in the time of Ahasuerus, proud Haman was offended with faithful Mordecai, and sought his ruin and that of his people, because he could not render him servile homage. He also related how, in the time of Nebuchadnezzar, the lives of the faithful three were sought, because they could not worship the golden idol, the king had set up in the plain of Dura. From these instances he showed them that the wonderful, preserving power of the Lord, upheld his loyal children, and delivered them from all their persecutors, and he exhorted Friends to bear at this time of trial, a steady testimony for the Truth, the Lord's blessed name, and the peaceable kingdom of the Prince of peace. This was a time of commotion everywhere, in the colonies, among the people of the world, the tide of opposition to the attempted taxation of the British government running strongly, and military preparations going on, and men's hearts gathering herceness in anticipation of strife and bloodshed.

On the 18th, he had another appointed meeting at Rahway, in which he was again enlarged in gospel love, and, on the 19th, attended one at Woodbridge. In this meeting, he uttered the language of the prophet, " who among us shall dwell with the devouring fire? who among us shall dwell with everlasting burnings?" Considering this a query as to who they were who, in times of the fiercest trials and afflictions, would be preserved unharmed through all their sufferings, the prophet gives the auswer, "He that walketh righteously, and speaketh uprightly; he that despiseth the gain of oppression, that shaketh his hands from holding of bribes, that stoppeth his ears from hearing of blood, and shutteth his eyes from seeing evil; he shall dwell on high; his place of defeuce shall be the munitions of rocks; bread shall be given him; his waters shall be sure. Thine eye shall see the King in his beauty; they shall behold the land that is very far off." After commenting on this beautiful picture of the redeemed ones, who, having, through God's grace, been visited, and, through the baptisms of the Holy Ghost and fire, refined from the pollutions of sin, are mercifully prepared to fill their proper places without flinching, even though it should be in the midst of the furnace, heated seven times more than it is wont to be heated, he was led to show forth from Scripture the universality of the extendings of His saving grace to mankind. He then, as ability was given him, laboured to show the weakness of the objections generally urged against the universality of the offers of saving grace. After this meeting, Joshua

DIEO, on the 13th of First month last, at his resider in Philadelphia, FOTHERGILL OGBORN, in the 66th ye of his age. He bore a long and severe illness with t markable patience and christian resignation, at o time remarking, " My Saviour suffered much more; a nothing for himself, but all for the sins of the world. ought to rejoice to be counted worthy to partake of I sufferings." As the solemn hour of dissolution a proached, he spoke of the great comfort it was to h then, to feel that he had endeavoured to walk acceptal before the Lord, saying, that it had been his concern train up his children in His fear, and instruct them His ways; "but," he added, impressively, "none these things save me; it is all mercy, the pure, unmerited mercy of God through Christ Jesus, that gains me an admittance into the abode of never-ending pea me an admittance into the about of never-country per and purity." There was granted him a clear view acceptance, and he exclaimed, "Oh! the way is clear—nothing in the way." After taking an affection ate leave of each one, he turned to a daughter, and wis a look and accent, inexpressibly sweet, said. "Passi may, passing away, my dear, to realism of bliss." It last words were, "Lord, take me—going home, goi home—Saviour—Glory—and so calm and shome—Saviour—Glory—Glory—and so calm and shome—Saviour—Glory—and shome—saviour—glory—glory—glory—glory—glory—glory—glory—glory—glory—glory—glory—glory—glory—glory—glory—glory—glory was his departure, that those present were scarcely se sible when he ceased to breathe.

—, on the 3rd inst., in Utica, New York, at the r sidence of his nephew C. C. Kellogg, Abraham M. U derhill, of Ledyard, Cayuga Co., N. Y. He was sn denly taken ill, on his return from Philadelphia, whe he had witnessed the last moments and penceful depart nre of his father-in-law, F. Ogborn. He had long as acceptably filled the station of elder, and his loss will deeply felt. He was of a meek and quiet spirit, and n obtrusive manners, which much endeared him to b friends. His daily life evidenced his concern to wa with Jesus, yet his hope of salvation rested upon works of his own, but upon the merits and mercy of crucified and risen Lord. When the Bridegroom cam he was found with his lamp trimmed and burning, havis an assurance that his "robes had been washed as made white in the blood of the Lamb." Many consolir expressions fell from his lips. He said to his wife, see my Saviour; my time is come," and nearly his la intelligible words were, "Over the river; I am ready He then quietly passed away as one falling into a swe

We know it has been a source of rough canvas, the manufacturer is able to unite in concern to them, that comparatively few of the this combination the advantages of impermeability parents and guardians having children in these Imputed Righteousness.—We are not pardoned, with those of greater resistance to mechanical schools, manifest sufficient religious care to restrain astified, redecimed or saved, by our own righteous- action, and thus economically to obtain cloths them within the bounds of true simplicity; but we ess, works, merits or deservings, but by the right adapted to the manufacture of sails, and to the trust they will not grow weary in their efforts to coverings of carriages and merchandise .- Late bring about a more general observance of this wellfounded testimony of our religious Society, and that our members more universally will be willing to conform the apparel of their children to it.

The following extracts from the Report, we think, will interest our readers:

"As stated in a former report, the committee have endeavoured to conduct the schools with a gatory upon them at the same time, to maintain their standing as seminaries, in which our youthful members may find the requisite facilities for acquiring a good education. In order to secure this result, well qualified teachers must be employed; and if, as in our principal schools, numerous studies are taught, there must be a sufficie t number of them to take charge of all the different branches, so that the pupils may receive the assistance necessary to their desired progress in learning."

"It has been very gratifying to observe a marked improvement in the boys' school, in respect to regularity of attendance, the average the past year being higher than in any former one; the pupils also much more generally attend meetings on Fifth-

"The lectures on chemistry, natural philosophy and other scientific subjects, which are delivered experiments, are also attended by most of the continues to refuse its consent to a prolonged occupa- of the people voted against the holding of a State conpupils from the girls' school. Good order and harmony have generally prevailed in the schools during the past year, and the committee commend their friends, who have children to educate. There litans ought to be left to settle their own matters themhas been no material change in the course of instruction, which, in the two principal schools, embraces most of the branches deemed essential to a solid and liberal education.

"The instruction and right training of the youth committed to their charge, has always been felt by consistent Friends to be a serious and highly responsible obligation. It was to aid them in the ments, and asking for a Committee of Conference. The performance of this christian duty, that Select Oregon and Washington War Debt bill, appropriating Schools were established by the Monthly Meetings, and we think there can be no doubt they have been a blessing to many of our children, tending to preserve them in an attachment to our religious Society, and a willingness to submit to the salutary restraints our profession requires of its members. But in order that this beneficial influence may be continued, it is important they should be conducted as 'Friends' Schools,' the children attending them, manifesting in dress and demeanour, that they belong to our religious Society. This is a subject to which we desire again its office, expressed himself, as follows: "As a matter to call the attention of the parents and caretakers of opinion, I can say that peace will be preserved, and of pupils, it being very desirable that all of them the Union restored. We have reached the bottom of should co-operate with the concern of the Monthly Meetings, and do their part towards restraining difficulties in a mode satisfactory to all the slave States Treasury, in a communication to Congress, speaking their children from gaiety in apparel. We believe represented, and we entertain no doubt that we shall if this duty was faithfully and affectionately performed, it would often be blessed to the youth, and the parents themselves would be rewarded by the feeling of peace, and the gratitude of their beloved feeling of peace, and the gratitude of their beloved expected time, thus avoiding the public receptions aroffspring, when they come to riper years. We ranged for that city, and in Baltimore. would also tenderly remind our fellow-members, that although good schools may be a great assistance in the right education of their children, the most important part of it must be accomplished at The organic act contains no provision in reference to success against the prevailing recklessness and violence home, and that we should seek for Divine help to slavery. enable us by precept and example to turn their feet into the narrow path which leads to life and peace.

"First month, 1861."

SUMMARY OF EVENTS.

ECROPE .- News from England to the 10th ult.

The French Emperor opened the Legislature on the 4th ult. He gives pacific assurances, and reiterates the non-intervention policy.

Queen Victoria opened Parliament in person on the 5th ult. In her speech, she alludes to the American troubles, expressing a fervent wish for their amicable adjustment.

The underwriters at London and Liverpool had advanced the rate of insurance I per cent. on cargoes from the seceded States.

The House of Commons had rejected the call on the government for a Reform bill.

The bullion in the Bank of England had increased £215,000. The London money market was stringent; no discounts were made below 7 per cent.

The Liverpool cotton market was inactive, and quotations barely maintained. The breadstuffs market was in a similar condition.

The condition of the Bank of France was steadily improving, and a reduction of the rate of discount was shortly expected.

Several powder magazines at Gaeta had blown up, killing a great many men. The garrison had asked forty-eight hours' armistice to bury the dead, to which Gen. Cialdini assected, and offered to supply necessaries for the wounded. The battery of St. Antonio was greatly damaged by one of the explosions, and one side of it had been destroyed by the besiegers. It was reported that a thousand scaling ladders had been sent to from 80 to 96 and \$4,519,000 was awarded at 90 15-100, the forces before Gaeta. Strong columns of Sardinian the remainder at rates ranging from 90 to 96. Some troops were marching through Umbria towards Naples. A portion of them had arrived at Perugia.

A late Constantinople despatch says, that the Porte

tion of Syria by the French.

The telegraph cable, from Atranto to Corfu, has been safely submerged.

England has been invited by France to stop Garithem to the continued notice and kind support of baldi's career, but declines on the plea that the Neapo- sionists.

> UNITED STATES. - Congress .- The House bill authorizing the Postmaster-General to discontinue the postal service in the seceding States, passed the Senate by a vote of 34 to 12. The Senate amendments to the Tariff bill were all concurred in by the House of Representatives, except those levying duties on tea and coffce. the 25th, a message was sent to the Senate announcing the passage of the bill, but insisting on certain amendseveral millions of dollars, to pay debts incurred in those territories, some years since, for the suppression of In-

dian hostilities, has passed both houses. Affairs in Washington .- The Peace conference conti-Aguars in In assington.—The reace contenence continued its assistant and the mean while to attempts will be made in seasons, up to the evening of the 25th, without thaving finally determined anything. Its slow progress is attributed to speech making, that bane of deliberal between the performance of the collectors assume the content of the collectors assume the content of the collectors assume the content of the collectors assume the collectors as a collector assumed the collectors as a collector assumed the collectors as a collector as a co posed by the committee, have, it is understood, been in which they reside, and hold and receive the duties adopted by the conference. Opinions as to say good subject to the same authority. Some of the officers of result from the labours of the conference, vary according to the bias and wishes of the parties. The Baltimore American says, that a distinguished Southern member of the Peace conference, in a letter received at doing so. The mail contractors in the seceded State our troubles, and benceforth our fortunes will be brighter. The conference has met and overcome the territorial overcome all other difficulties, and reach a result on all the points in controversy to the satisfaction of a large majority."—Abraham Lincoln, the President elect, arrived in Washington on the 23d, some hours before the

bill for organizing a territorial government. Its southern line will cut off a portion of New Mexico, containing about 7000 inhabitants, chiefly Spanish and Indians.

Coptured Forts .- The Charleston Mercury gives a list of the various fortifications belonging to the United States, which have been taken possession of by the seceding States. They are 16 in number with 1262 guns, and cost the government about \$6,500,000. California .- San Francisco dates of the 6th state, that

a panic prevailed, on account of several heavy failures, io that city. Trade generally was very dull. Wheat had advanced, large sales having been made at \$1.75 a \$1.80 per 100 pounds.

Mississippi.—The Legislature has levied an additional

tax of fifty per cent. upon the present State tax, and authorized the Governor to borrow two millions of dollars at ten per cent., payable in one, two and three years out of the accruing revenues of the State.

New York .- Mortality last week, 390.

Philadelphia.—Mortality last week, 286. Georgia.—The ships Martha J. Ward, barque Adjusta and brig Harold belonging to citizens of New York, have been seized in the port of Savannah, by order of the Governor of Georgia, in consequence of the arms seized in New York, not having been all released. It is stated that these vessels will be held until the arms referred to are delivered up.

The Southern Congress.—This body has unanimously passed an act declaring the establishment of the free navigation of the Mississippi river. The Finance Com-mittee has been iostructed to inquire into the expediency of laying an export duly on cotton. Another act declares, that all laws of the United States of America, in force and in use in the Confederate States of America, on the first day of November last, and not inconsistent with the Constitution of the said Confederate States, be and the same are hereby continued in force until repealed or altered by the Congress.

The Eight Million Loan .- There were 160 bidders for this loan, and \$14.355,000 were offered at various rates sales of the new loan were made in New York on the 25th, at 93 a 94; but it was mostly held at 94 a 95.

Missouri .- At the election held last week, a majority

vention.

Arkansas .- At the late election a strong Union vote was polled, but the majority appears to be for a convention, and most of the delegates chosen to be seces-

Texas .- Several thousand U. S. troops have been, for some time past, stationed in Texas, under the commant of Gen. Twiggs. On the 25th, information reached the War department, that Gen. Twiggs had surrendered to the revolutionists all the government property, in hicharge as commander of that military department. The federal troops will be allowed to leave the State if they desire to do so. The property thus transferred is valued at \$1,300,000. The secession of Texas has created a panic in various parts of that State. Many of the mos industrious and enterprising of the inhabitants will, i is stated, seek new homes in California and elsewhere.

The Seceding States .- Three commissioners have been appointed, who will be accredited from the "Confe derated States," to the new administration; it is sup posed that in the mean while no attempts will be madcustoms in these States have resigned their commis sions, before assuming new duties, but an equal num ber have entered into the service of the States, withou are continually asking whether they will be paid a heretofore, to which the Post-office department respond affirmatively, stating that drafts will be issued to ther on the postmasters to be paid from the postal revenu collected within those States. The Secretary of th the lawless proceedings in the seceding States, justl observes, that, throughout the whole course of encroach ment, the federal government has borne itself with spirit of paternal forhearance, of which there is no en ample in history—of a republic waiting in the patier hope that the empire of reason would resume its swa nged for that city, and in Baltimore. Over those whom the excitement of passion has the Colorada.—Both Houses of Congress have passed the blinded, and trusting that the friends of good orde wearied with submission to proceedings which they dis approve, would at no distant day rally under the ban ner of the Union, and exert themselves with vigour an

May we all strive to get to the watch-tower,

THE AMBITION OF VIRTUE. Our hearts ne'er bow but to superior worth : Nor ever fail of their allegiance there. Fools, indeed, drop the man in their account, And vote the mantle into majesty.

Can place or lessen us, or aggrandize? Pygmies are pygmies still, though perched on Alps; And pyramids are pyramids in vales. Each man makes his own stature, builds himself. Virtue alone outbuilds the pyramids: Her mouuments shall last, when Egypt's fall.

A Nero quitting his imperial throne. And courting glory from the tinkling string, But faintly shadows an immortal soul, With empire's self, to pride or rapture fired. If nobler motives minister no cure, E'en vanity forbids thee to be vain. High worth is elevated place. 'Tis more : It makes the post stand candidate for thee :-Makes more than monarchs, makes an honest man. Though no exchequer it commands, 'tis wealth; And though it wears no ribbon, 'tis renown :-Renown that would not quit thee though disgraced, Nor leave thee pendent on a master's smile. Other ambition nature interdicts: Nature proclaims it most absurd in man,

By pointing at his origin and end: Milk, and a swathe, at first, his whole demand; His whole domain, at last, a turf, or stone. Young's Night Thoughts.

It is an evil, incident to man, And of the worst, that unexplored he leaves Truths useful and attainable with ease, To search forbidden deeps, where mystery lies Not to be solved, and useless, if it might. Mysteries are food for angels; they digest With ease, and find them nutriment; but man, While yet he dwells below, must stoop to glean His manna from the ground-or starve-and die ! Cowper.

SUMMARY OF EVENTS.

EUROPE.-Liverpool dates to Second mo. 15th. The stock of cotton in port was accumulating, and the consumption rapidly declining; prices had fallen The Manchester advices were unfavourable, with a decline for all qualities of goods. Breadstuffs un-changed. Cousols, 91\frac{3}{4} a 92. The Bank of England had advanced the rate of interest to 8 per cent. On the

duction of their existing armaments. The Neapolitan forces at Gaeta have capitulated. The Royal family are to be permitted to leave in a French steamer. The garrison are to remain prisoners of war until Messina and other places held by the Royalists are

surrendered.

UNITED STATES. - The New Administration .-4th instant, Abraham Lincoln was inaugurated, with licentical old questions as to terms of intercourse are the usual ceremonies, as President for the next four again upon you." He declared himself in favour of years. An immense concourse of persons assembled in Washington on this occasion; no disturbance was attempted, and all passed off peaceably. In his inaugurempted, and an passet on peaceasity. In an adagga-ral address, the President gave an exposition of the principles which are to guide him, in conducting the government at this critical period in its history. His language was mild and peaceful, and evidenced that he appreciated the serious difficulties of his position. He declared that there was no cause whatever for the alleged apprehension in the Southern States, that their peace and security would be imperilled by the accession of a Republican administration. He held "that the maintainance inviolate of the rights of the States, and especially the right of each State to order and control its own domestic institutions according to its own judgment exclusively, is essential to that balance of power, on which the perfection and endurance of our political troversy about the readition of fugitive slaves; the right of reclamation was plainly given in the Constitution, and the duties arising under it should be faithfully per-formed. In reference to the attempted or actual dis-memberment of the Union, he says: "I hold that, in contemplation of the universal law and of the Constitution, the Union of these States is perpetual. Perpetuity is implied if not expressed, in the fundamental law of "Confederate States of America."—The people of Texas all national governments. It is safe to assert that the government proper never had a provision in its organic law for its own termination. I shall continue to execute all the express provisions of our national Constitution, and the Union will endure forever, it being impossible to destroy it, except by some action not provided for in the instrument itself. Again, if the United States be not a government proper, but an association of States, in the nature of a contract merely, can it be peaceably unmade by less than all the parties who made it? One party to the contract may violate it—break it, so to South if all the plans of confliction fail. speak—does it not require all to lawfully rescind it?

The Peace Conference.—This body adj I therefore consider that, in view of the Constitution 27th, having previously adopted, by a bare majority, the and laws, the Union is subroken, and to the extent of plan of settlement recommended by the committee, in a my ability, I shall take care, as the Constitution expressly enjoins on me, that the laws of the Union be faithfully executed in all the States. Doing this I deem to be only a simple duty on my part, and I shall perform it so far as practicable, unless my rightful masters, the American people, shall withhold the requisite means, or in some authoritative manner, direct the contrary. trust this will not be reparded as a menace, but only as the declared purpose of the Union, that I will constitutionally defend and maintain it. In doing this there need be no bloodshed or violence, and there shall be none, unless it be forced upon the national authority. The power confided to me will be used to hold, occupy

rulers take counsel together against the Lord, and and possess the property and places belonging to the against his anointed; saying, Let us break their bands asunder, and cast away their cords from us but He that sitteth in the heavens, shall laugh; the Lord shall have them in derision. Whatever confusion and distress may be permitted to come competent resident citizens from holding federal offices, may be a constant of the cart, these reaches the competent resident citizens from holding federal offices, may be a chiefe will be no attempt to force obparious strangers. compusion and distress may be permitted to come competent resident citizens from bolding federal offices, upon the inhabitants of the earth, there must be a curtailment of the sway of the prince of darkness; and it will be found by the Powers that be, that their stability depends upon their acting in harmony with the immutable principles of the blessed with the contemplate of perfect security which the most favorable and calm thought and reflection on the part of the covernment can either them. and only Potentate, who has had given him the the government can give them. The course here indirience shall show a modification or change to be proper, and in every case and exigency my best discretion will be exercised according to circumstances actually existing, and with a view and a hope of a peaceful solution of the national troubles, and the restoration of fraternal sympathies and affections." A separation between the North and South is, he contends, not merely unwise and uncalled for, but an impracticable thing. He says: "Physically speaking, we cannot separate. remove our respective sections from each other, nor the readition of fugitives from justice, was rejected by the state of the s then, to make that intercourse more advantageous or then, to make that intercuries unless as taking one as statisticity after separating than before? Can illeus make treaties easier than friends can make laws? I take the Senate, by the requisite two-third Can treaties be more faithfully enforced between alices to the senate, by the requisite two-third to the constitution of the senate of Can treaties be more faithfully enforced between aliens than laws among friends? Suppose you go to war, you cannot fight always, and when, after much loss on both sides, and no gain on either, you cease fighting, the holding a national convention of all the States, for the purpose of considering whether any amendments of the Constitution of the United States were now needed, and closed with a forcible and earnest appeal to his dissatisfied countrymen, entreating them to think calmly and well upon the whole subject, and suggesting that even if it were admitted they hold the right side of the dispute, there is still no reason for precipitate action. Intelligence, patriotism, christianity, and a firm reliance on Divine providence are, he asserts, still competent to ANNUAL MEETING OF THE CONTRIBUTORS T

on Divine providence are, he asserts, and compretent adjust in the best way all our present difficulties.

"The Southern Confederacy,"—The Southern Congress bins passed an act to raise mouely for the support of the government. It authorizes the President to borrow \$15,000,000, payable in ten years, with interest at 8 per cent., and directs the levying of an export duty of \$\frac{1}{8}\$ cent per pound on cotton exported after Eighth month 1st, to create a fund to liquidate the principal and interest of the loan. The act to raise military forces for the confederacy directs that the President shall take charge of all military operations between the confederacy and other powers. The Charleston (S. C.) papers announce that all ports in States north of South Carolina are now considered foreign ports, and goods arriving from such ports, must be entered at the custom-houses of the "Confederate States of America."—The people of Texas legates have been admitted to the Southern Congress .-Captain Hill, who is in command of fort Brown, Texas, has refused to evacuate the fort, or to surrender the

U. S. property.

North Carolina .- Returns from forty-seven counties give a majority of eight thousand against holding a convention. The result in the entire State is doubtful. A majority of the delegates elected are called Union men, but, probably like those of Virginia, will go with the

The Peace Conference .- This body adjourned on the 27th, having previously adopted, by a bare majority, the somewhat modified form. It was strongly opposed by some of the Northern delegations, as well as by part of those from the South. The plan proposed amendments to the Constitution-to effect which two-thirds of both houses of Congress must agree to lay the proposed amendments before the State Legislatures for ratification, and three-fourths of the several States must adopt them. The subject was promptly brought before Con-gress, but that body adjourned without taking the requisite action, hence the whole matter falls to the

ground.

New York.—Mortality last week, 403.

Philadelphia.—Mortality last week, 287.

The New Tariff .- The Senate assented to the House amendment in relation to duties on tea and coffee, the

bill finally passed, and was signed by the President.

Congress.—So much business was, as usual, crowded into the last few days of the session, that our space will permit notice of only a small part of the proceedings. The bill authorizing the President to employ the militis for the purpose of enforcing the laws, was strongly opposed in the House of Representatives as a measure leading to war on the seceding States. It was postponed by a decided vote. A resolution proposing ar amendment to the Constitution, was passed by a vote o 133 to 65, as follows-" That no amendment shall be made to the Constitution, which will authorize or give Congress power to abolish or interfere within any State with the domestic institutions therein, iocluding that o persons held to labour or servitude by the laws of said On the 1st inst., the House voted on the pro positions of the Committee of Thirty-three. The clause providing for the admission of New Mexico into the Union, with or without slavery, as the people may elect was laid on the table, by a vote of 114 to 71. The amendment to the act for the rendition of fugitive slaver was passed; 92 to 85. The amendment to the act for The proclamation for an extra session of the Senate wa read; Vice President Breckinridge retired, and his plac was taken by his successor, Hannibal Hamlin.

For "The Friend."

Education.

The period of life in which children are of a suitable age to go to school, is very brief, and no prudent parent will suffer it to pass unimproved. William Penn says, in substance, "A good education is a good portion;" and truly it is so, when we consider the advantages it confers upon those who have it, by enlarging their opportunities for intellectual enjoyment—extending their spheres of usefulness, and consequently their influence in the community by which they are surrounded. How much more to be prized is a good, solid education, religious, moral and literary, with frugal and industrious habits, than great possessions without such training. Let parents be cautious, then, how they procrastinate on this important point, as the opportunity once lost is not likely to be recalled. When the proper season for school instruction is once gone, children need to prepare themselves for those callings in life which they are intended to pursue, and there are very few who can ever recover the loss they may have sustained by an imperfect education.

Drinking Fountains and Temperance.-The Metropolitan free drinking fountains of Loudon are effecting much for temperance. An association has been formed for the erection of these fountains. It has often been exceedingly difficult for the poor and labouring classes to obtain a drink of pure water, and multitudes have thus been compelled to go to the public houses, and drink ale or beer, when they would not have done so if water could have been obtained. The object of the association is the erection, in suitable public thoroughfares, of neat and artistic fountains, supplied with pure water. One hundred have already been erected. Most of them are beautiful as works of art, and many of them have Scripture inscriptions, outioued by each moving his men from place to Starting from Sandy Cape, near Harvey Bay, the which are read by the million, and which, by God's lace, until he can arrange three of his own on north-east coast runs up to Cape York, which is blessing, may be a word in season to some weary tecessive squares on a line, which feat entitles him the extreme northern point of the continent of souls. The increptions are such as the following: one of his adversary's meen. The effort of each Australia on that side, south of Torres' strait. Louisiana cannot produce more than one-third or two-fifths of the sugar required for our people. Hence the necessity of importing from twenty to forty millions in value of foreign sugar annually.

Five millions of dollars annually paid by the people of the United States on one article of domestic consumption, for the benefit of the people of one

CREATION'S HARMONY.

The stars that deck the spacious vaulted sky, Shine not with equal splendor from on high; The flowers of earth, that gladly drink the dew, Are not alike in fragrance or in hue; And sweet musicians of the feathered throng Are varied to their plumage and their song.

Selected.

Yet all the chords of Nature's harp agree, To form a grand, unbroken barmony, Each creature has an office to fulfil, While all is moulded to a higher will Not one is known with aught to interfere, Nor seeks to leave its own allotted sphere.

To every man a lesson here is taught, With deepest meaning, and with wisdom fraught; 'Tis this—Let each content with what is given, Act well his part, and leave the rest to heaven, So God's sublimest work would swell the song That rises from Creation's countless throng.

Lines written on the margin of some dying expressions of Samuel Fothergill, by George Dillwyn.

Thus, weary seamen, as they ply
Through dashing waves the lab'ring our
Should they the wish'd-for land descry
With shoutings bail the opening shore, On hinder barks cast back an auxious eye, And raise the animating signal high.

The good man has his clouds that intervene; Clouds, that obscure his sublunary day But never conquer; even the best must own, Patience and resignation are the pillars Of human peace on earth.

Selected for "The Friend,"

all the day, undergoing reproach and even scorn, upon. and bitter mockings. What need, I say, of these spirit of life into an unlawful seeking after the en- glorified. joyments of this perishing world, and the daily inventing of new satisfactions to gratify their carnal appetites; so He also did foresee the difficulty all would have in relinquishing and forsaking them at His call; wherefore to induce them to it, He that they should have an earthly Causan, great servatory to all the new houses they now erect, some men who cannot live anywhere without a dignities, long life, and the like; but rather the recognize the growing predilection for the flower-latempt at least at a garden. Manufactures in Manchester, N. H .- Manchester, N. H., built at Amoskeag Falls, in the Merrimack river, is one of the cities of New England, which have had a marvellous growth, rising from feebleness and insignificance to places of great business and industrial importance in a few years. In 1840, Manchester had a population of 3,223; in 1850, 13,392; in 1854, 19,897, and in 1860, about 25,000. Its growth began in 1838, at which time there were, within the limits of the city proper, not more than fifty inhabitants.

We have before us a chart of the statistics of Manchester manufactures for 1860, from which we learn that the capital stock of the manufacturing being now composed of four Republicans, including the companies is \$6,840,000, which run 6154 looms and 229,132 spindles. Number of female operatives, 4870; male operatives, 2490; consumption of cotton per week, 385,000 pounds; of wool, 30,- Hereafter all patents granted will remain in force for 000 pounds; yards made per week, 1,133,500; seventeen years, and there are to be no extensions of payards printed per annum, 17,500,000; 2,300,000 tested the commissioner of patents is in-

Besides the manufacture of fabrics, steam fireengines, locomotives, and all kinds of mill machinery are made here; all kinds of axes, adzes, hatchets, &c., book and newspaper castings, &c. Notwithstanding the large number of mills in operation, it is said that not more than half the waterpower of Manchester has been brought into requisition, and that some operations will be developed ere long, which will greatly increase the population of the city.

The proud and the covetous are never at rest; but the humble and poor in spirit possess their souls in the plenitude of peace.

THE FRIEND.

THIRD MONTH 16, 1861.

SUMMARY OF EVENTS.

EUBOPE .- News from Liverpool to the 26th ult. Cotton had advanced slightly. The London money

market was unchanged. Consols, 91 a 91 a 91 The Emperor of Austria has signed the new Constitution, which, among other things, grants legislative

powers to the Diet.

A bill had been introduced into the Italian Parliament, declaring Victor Emmanuel King of Italy. The number of troops taken prisoners at Gaeta is 11,000, with from 700 to 800 cannon and 60,000 muskets. Francis II. and the ex-Queen of Naples would take refuge in Bavaria.

The fortress at Messina had not yet surrendered to the

Sardinians.

The suppression of the convents in Naples had given rise to disturbances. The rioters attacked several convents, but were dispersed by the National Guard.

The proclamation for the emancipation of the serfs in

Russia, was to be issued by the Emperor on the 3d inst.

The French government, it is stated, has borrowed one million sterling for the Bank of France. Money was abundant in Paris, and the rate in open market 41

termination.

The inauguration of the Italian Parliament was celebrated in several towns in Venetia.

In the British House of Commons, a motion had been made for more equality in assessing and levying the made for more equality in assessing and levying the treachery of Gen. Twiggs, their late commander, the income tax, and carried by a majority against the go-steamer Empire City was despatched on the 8th inst.,

The Daily News says, that the Great Eastern will leave early this month for Norfolk, Va., where she is guaranteed a cargo, chiefly of cotton, for Eogland, the freight on which will amount to \$75,000.
United States.—Congress.—The new Senate, which

convened on the 4th inst., in special session, consists of

5th inst., the Senate confirmed the Cabinet appoint- to secession. ments of the President, as follow:

Secretary of State, William H. Seward, of New York the Treasury, Salmon P. Chase, of Ohio. War, Simon Cameron, of Pennsylvania. the Navy, Gideon Welles, of Connecticut. ** the Interior, Caleb Smith, of Indiana.

Attorney-General, Edward Bates, of Missouri. Postmaster-General, Montgomery Blair, of Maryland.

The votes by which these appointments were confirmed were unanimous for all, except Bates and Blair, who than that there is no apparent danger of immediate se-had each a few negative votes. The nomination of cession. Norman B. Judd, as minister to Berlin, was confirmed, also a number of inferior appointments. The standing committees of the Senate have been re-organized, each Chairman, and three Democrats .- The late Congress passed one hundred and eighteen acts and fifteen joint resolutions. The new patent law, as it passed at the very last hour of the session, makes some radical changes. seamless bags per annum are woven here. The dents inaugural address was denounced in the Senate has monthly pay roll is \$139,200. by some of the Southern Senators, and defended by Donglas, of Illinois, who contended that it breathed peace and conciliation. He thought the President's patriotic efforts for the preservation or restoration of the Union ought to receive a cordial support from all. The Secession Troubles .- The belief seems to be gain-

ing ground that the new administration designs to pursue a very cautious policy in dealing with the embar-rassments, which surround it. The seceding States cannot be released from their obligations by the President, but he will probably endeavour to show them that he has no desire to precipitate a collision, or inflict any injury upon them. Recent advices from Major Anderson at fort Sumpter, state that the supplies of all kinds were running very low. Gen. Beauregard, the officer despatched by the government of the Confederate States to take command at Charleston, had arrived at his post, and after examination expressed perfect confidence that the fort could be taken. In view of the impracticability of reinforcing fort Sumpter, without a sacrifice dis-proportioned to the importance of the object, it is said the U.S. government will probably soon order its eva-cuation. Two commissioners from the Southern confederacy have been some days in Washington, awaiting the arrival of the other member of the commission be fore proceeding to open negotiations with the government. They of course cannot be officially recognized.

The Southern Confederacy .- The following is the Ca-The market for breadstuffs was dull and declining binet of the Southern confederacy, as at present consti-

tuted Secretary of State, Robert Toombs, of Georgia.

The Jacobs and Marker Marker Company.
The Jacobs and Marker Marker Company.
The Jacobs and Marker hibiting the importation of slaves into the confederacy from the United States, except those owned by persons emigrating for settlement and residence .- An act has been passed, authorizing the issue of treasury notes to

the amount of one million of dollars. Georgia .- Governor Brown, of this State, has released the bark Adjuster, of New York, in consequence of representations made to him by the British Consul at Sarannah, that the cargo she held belonged to the subjects of Great Britain. He subsequently attached the stock in the Macon and Western railroad belonging to

Northern stockholders, amounting to about \$1,000,000. per cent.

The French occupation of Syria will be prolonged two diagnet transferring to the government of the Conferred three mouths beyond the time originally fixed for its desired States the saum of \$553,000, the amount of customers. toms received, and money seized by the State, the property of the United States.

Texas .- The U. S. troops in Texas having been disorganized, and left almost without supplies, by the

from New York, with army stores for their relief. She would also bring away a portion of the men.

Tennessee.—At the late election, the proposition for holding a convention was voted down. There were 54,156 votes for, and 67,860 against a convention. The ladelphia Monthly Meeting.

Union feeling is strongest in East Tennessee.

North Carolina.—This State has voted against the of First month, 1861, ELIZABETH BONSALL, in the nine 29 Republicans and 21 Democrats, with 18 vacant seats, holding of a convention, by a majority of about 1000. fourth year of her age.

fourteen of which are from the seceded States. On the About two-thirds of the delegates elected were opposed

Missouri .- The debates in the convention, sitting at St. Louis, have manifested a strong Union sentiment. The speakers, however, deprecate any attempt at coercing the seceded States. The preservation of the Ucion by peaceful means is urged.

Virginia .- The secession party io the convention at Richmond, appears to be active and able. In the great diversity of views advanced by the leading members, it is difficult to form an opinion as to its final action, other

New York .- Mortality last week, 398. The number of iomates in the various public institutions of the city last week, was 9111. The number admitted during the week, was 1923, and the number discharged, or who died, was 1960

Philadelphia .- Mortality last week, 276.

The Grain Trade.—The export of grain from the United States to Europe during the last year, amounted to 23,820,820 hushels. This is said to be the largest quan-

za,pzu,pzu nushels. This is suid to be the largest quan-tity ever exported in one year.

Distribution of Szeds.—Upwards of one million papers of vegetable and flower seeds have been recently put up at the agricultural division of the patent-office, Washington, and sent to members of Congress for distribution. The seeds were selected in Europe with grea care, and comprise many varieties heretofore unknown in this country. Each collection comprises one hundred and fifty-four different varieties of vegetable seeds, and nearly the same number of varieties of flower seeds The members of Congress from the seceding States had sent to them the quotas to which they were entitled a: if in the Union.

RECEIPTS.

For our Young Friends.

The great benefit of patient religious exercise,-Dear young Friends, our hearts are warmed with love to you. We desire that it may be your frequent concern to seek for an establishment on the only sure foundation, and to wait in humble watchfulness for the teachings of the heavenly Instructor. If conflicts of mind should attend you, and prove painful and humiliating in their nature, this is no cause for dismay. Those who steadily pursue the path of a true disciple, will, through the goodness of the Lord, at times be permitted indubitably to feel that they are the objects of his paternal regard. Thus they will have cause to acknowledge the great benefit of patient religious exercise. They will, from their own experience, know an increase of true faith in the power and perceptible support of the Holy Spirit. Ascribing this to the free gift of God in Christ Jesus our Lord, they will become firmly persuaded that the tendering power of Redeeming love, though undervalued by too many, is above all things precious. We are consoled in the belief, that the feet of many of our beloved young Friends have been turned into this path. And it is our earnest desire, that neither the fear of man, the offence of the cross, an aversion to the simplicity of the truth, nor the activity of their own wills, may interrupt their progress; but that they may through the unfoldings of Divine counsel, come to know an establishment in that faith, which giveth the victory.- London Epistle, 1817.

Value of Gold Sweepings .- The New York correspondent of the Philadelphia Press writes:-"Happening in at the publishing house of Harper & Brothers, I was not a little surprised at a fact that transpired during my chat with one of the the language. Coming to a native compound, in the boson of most, of whom was immediately ceeds of gold dust swept up from the floor, and essayed to attract attention by the use of the kindled the strongest desire, again to be united to their long-lost relatives and friends. One of these visits was to "the a passage was involuntarily opened to her, she pump-room," (a fashionable place of resort,) at went up to the speaker, and thanked her, in her Bath. And as there are but few accounts left us own name, and in that of all present, for the faithof the manner in which she, with her communica- fulness with which she had borne testimony to the tions, was received, except what is contained in her truth. The lady added, 'I am not of your pershort description of the same from another pen. Both of which are subjoined :

SARAH LYNES TO ANN PUMPHREY.

"Melksham, First mo. 20th, 1802.

"My Dear A. P., - My love towards thee is undiminished, though the correspondence between us is not so frequent as before thou wast married. I have often had thee very present with me in spirit, well aware, that although the dispensation we are individually under is, in some sort, different, we can unite in the acknowledgment that this is a inheritance, it is worth all the present suffering; so

ledge that one of these overtook my poor tribulated John Pemberton. soul at Bath, a few days since; for after having five meetings there, I was required to go into the pump-room, amongst the giddy and the gay, (a great number of whom were there,) and stand as a sign for a while, without saying a word; and then to declare, as the Lord by his Spirit gave utterance, for about twenty minutes; beginning with these words-'I deem no further apology necessary for this conduct, which may appear so strange to some of you, than that I am here in pure obedience to my God.' Oh! my dear Ann, the conflicts this sacrifice cost me, were thoroughly equal to any capacity given me to endure.

"I have been almost worn out; my animal spirits much exhausted; but a day or two mostly recruits me. We are to hold a public meeting here this forenoon, one at Devizes this evening, &c.
"The truly affectionate, S. LYNES." "Thy truly affectionate,

VISIT TO THE PUMP-ROOM AT BATH.

"As my mother grew better, she frequently took me with her to the pump-room, and she sometimes told me anecdotes of those she had seen there when a child. On one occasion, when the room was thronged with company-and at that time the visitors of Bath were equally distinguished for rank and fashion-a simple, humble woman, dressed in the severest garb of the Society of Friends, walked into the midst of the assembly, and began an address to them on the vanity and follies of the world, and the insufficiency of dogmatic, without spiritual

For "The Friend.". religion. The company seemed taken by surprise, and their attention was arrested for a few moments: There are perhaps, in modern times, few more as the speaker proceeded, and spoke more and vocating the cross and cause of her dear Redeemer, one lady with a stern yet high toned expression of ing lines for insertion in that instructive and valua than is furnished to us in the letters of Sarah countenance; her air was distinguished: she sat journal. erect, and listened intently to the speaker. The In the early period of her life and ministry, she impatience of the hearers soon became unrestrainown journal, it is interesting to be able to select an suasion, nor has it been my belief that our sex are allusion thereto from one of her letters, and also a generally deputed to be public teachers; but God who gives the rule, can make the exception, and He has indeed put it in the hearts of all His children to honour and venerate fidelity to His commission. Again, I gratefully thank you.' Side by Our flame is transport, and content our scorn side with the Quaker, she walked to the door of Ambition turns, and shuts the door against her, the pump-room, and then resumed her seat. This lady was the celebrated Countess of Huntingdon. -Life of Mary Ann Schimmelpenninck.

Professors of the Truth should be conformable to their profession .- Were the professors of the blessed Truth more generally redeemed from the spirit world of trials, a fight of afflictions; and oh! my and friendship of the world, and did they live and dear, if we are but working our way to the fairer appear more conformable to their profession, light Gay Fortune's, thy van hopes to reprimend. would spread, and Truth prosper more. But the that I wish we may let patience have its perfect eager pursuit after earthly treasure, and employing work, while it is our chief concern that obedience in schemes of trade and business, talents, which, if keeps pace with knowledge. My heart is enlarged sanetified by an humble submission to the Truth, in best affection towards thee, dear creature.

"We have indeed used all diligence of late; scattering the darkness which now prevails, is cause holding meetings very quickly in succession, and of sorrow. Much labour is wanting in this land, Gold glitters most, where virtue shines no more; travelling hard: but one of these trying exercises and some mourn the fewness of rightly exercised we had together, is more wearing to the frame than servants. So much barrenness prevails, that I a great deal in the usual way; and I may acknow-sometimes think it scarcely quits cost to travel .-

Selected.

A HUNDRED YEARS TO COME. Where will be the birds that sing,

A hundred years to come? The flowers that now in beauty spring, A hundred years to come?

The rosy lip, The lofty brow, The hearts that beat So gaily now? O where will be love's beaming eye, Joy's pleasant smiles-sorrow's sigh,

A hundred years to come? Whu'll press for gold this crowded street, A hundred years to come? Who tread you church with willing feet,

A hundred years to come? Pale, trembling age, And fiery youth, And childhood with Its brow of truth;

The rich, the poor, on land and sea, Where will the mighty millions be A hundred years to come?

We all within our graves shall sleep, A hundred years to come, No living soul for us will weep A hundred years to come. But other men Our lands will till, And other men Our streets will fill:

While other birds will sing as gay, While other birds will some as to-day,
As bright the sunshine as to-day,
T. M. Snowden.

For " The Friend. Reading lately the following "Complaint" of the p Young, on the love and pursuit of riches, I thought contained instauctive and admonitory hints for us at present time. Not remembering ever to have seen th in the pages of "The Friend," I transcribe the fulle

A contemporary poet, on the same subject, thus i pressively invokes his muse, which may well act a prefatory part to the other :-

Aid slighted Truth with thy persuasive strain, Teach erring man to spurn the rage of gain; Teach him that States, of native strength possest, Though very poor, may still be very blest; That trade's proud empire hastes to swift decay As ocean sweeps the laboured mole away ;- Goldsm;

And burns Lorenzo still for the sublime Of life? to hang his airy nest on high, On the slight timber of the topmost bough Rocked at each breeze, and menacing a fall : Granting grim death at equal distance there; Yet peace begins just where ambition ends. What makes man wretched? Happiness denied? Lorenzo 1 no, 'tis happiness disdained. She comes too meanly dressed to win our, smile : And calls herself Content, a homely name And weds a toil, a tempest, in her stead; A tempest, to warm transport near of kin. Unknowing what our mortal state admits, Life's modest joys we ruin while we raise; And all our ecstasies are wounds to peace! Peace, the full portion of mankind below. And since thy peace is dear, ambitious youth!
Of fortune fond, as thoughtless of thy fate, As late I drew Death's picture, to stir up Thy wholesome fears; now, drawn in contrast, see See, high in air, the sportive goddess hangs, Unlocks her casket, spreads her glittering ware, And calls the giddy winds to puff abroad Her random bounties o'er the gaping throng. All rush rapacious; friends o'er trodden friends; Sons o'er their fathers, subjects o'er their kings, Priests o'er their gods, and lovers o'er the fair, As stars from absent suns have leave to shine. Oh, what a precious pack of votaries Unkernelled from prisons, and the stews, Pour in, all opening in their idol's praise All, ardent, eye each wafture of her hand, And, wide-expanding their voracious jaws, Morsel on morsel swallow down unchewed, Untasted, through mad appetite for more; Gorged to the throat, yet lean and ravenous still; Sagacious all, to trace the smallest game, And hold to seize the greatest. If (blessed chance!) Court-zephyrs sweetly breathe, they launch, they fly O'er just, o'er sacred, all-forbidden ground, Drunk with the burning scent of place or power, Staunch to the foot of lucre, till they die.

The Bee Annoyance in California .- Since extensive importation and production of bees California, they have become, in many respects source of great annoyance. The housekeeper, cooking, the grocer and fruit-dealer, all have the swarming by hundreds, and perhaps thousan around their premises, rivalling the house-fly troublesome propensities. A Sacramento co dealer recently obtained a quantity of coal whi had a cask of molasses broken over it. When t coal was brought into the yard, the bees collect in such quantities that he spent half a day with hose in washing off the coal in order to remove t temptation. They have partially destroyed t produce of several vineyards near Sacrament when the grapes were gathered, it was found the little thieves had extracted the juice. As matter of course, a large number of bees are a cessarily destroyed while poaching on forbidd ground. Is there no remedy for these difficultie asks the Sacramento News. Can bees be ke de?-Late Paper.

nind of any such as might be hurried or troubled bout the change of government.'

All Friends, let the dread and majesty of God ll you! And as concerning the changing of times nd governments, let not that trouble any of you; or God hath a mighty work and hand therein. He ill yet change again until that come up, which rust reign; in vain shall powers and armies withtand the Lord, for his determined work shall hat is now come up, should be so, and he will be nrighteousness, and for righteou-ness through nings which are suffered now to work for a seaon; yea, many whose zeal was even dead, shall evive again, shall see their backslidings, and bewail nem bitterly. For God shall thunder from heaen, and break forth in a mighty noise, his enemies hall be astonished, the workers of iniquity conounded, and all that have not the garments of ighteousness shall be amazed at the mighty and trange work of the Lord, which shall be certainly rought to pass. But my babes, look ye not out, reak and divide your enemies, and take away others .- Fencton. seace from them, preserve, and keep you whole, n unity and peace with itself, and one with anther. Amen. 1660.

Machine-Made Chains .- Machinery has been perfected in America, says the London American, or the manufacture of chains of every description. The smallest chains as well as the largest are contructed with a surprising rapidity and exactness. Phose for trimming jewelry, little larger than an ordinary pin, to the largest ship-cables.

The machines for the manufacture of watch and other small chains have been brought from Ameica, and are now used at Birmingham, each doing he work of fifty hands, and more perfectly than

t is possible to accomplish it by manual labour.

The machines for manufacturing cables have not, we believe, been used in this country, though or some time employed to a limited extent in process in the iron districts of England. For this and other purposes a large amount is yearly imported.

If the chain-makers of Wolverhampton desire to retain this foreign trade, or even the domestic and wife, of Westmoreland, were in cutters near rade, they must follow the wise example of the Birmingham gold chain makers in introducing these lers, ran to the bridge, and saw these persons with abour-saving machines. We learn that a compast their heads out of water, clinging to the fragpany has been organized in New York, with a ments of the broken bridge, swiftly floating down more than £60,000.

SUMMARY OF EVENTS.

EUROPE.—News from England to the 2th inst. In the House of Commons, the Syrian question had

heen under debate. The conduct of the French troops in Syria was gene-

rally condemned. Lord John Russell, in his speech on the question, admitted that the occupation by the French army had been

useful, but he thought it desirable that it should terminate as soon as possible. The steamship Great Eastern would probably soon be

ready for another voyage to the United States

The sales of cotton in the Liverpool market for the week, had been 60,140 bales. The market opened acstatement of an eye-witness, taken from the Utica tive with an advance, but the improvement was subsetive with an advance, but the improvement was subsequently lost, and the market closed at the rates of the previous week. There were \$55,000 bales in port, including 795,000 American. The Manchester advices were unfavourable. The market for breadstuffs was dull and declining. The London money market was unchanged, with an active demand. The bullion in the Bank of England had increased £315,500 during the week. Consols, 91, a 912.

During the debate in the French Senate, on the adwhich was high and rapid. The horses, sleigh, dress to the throne, the Prime Napoleon justified the poral and spiritual power of the Pope of Rome, but said the independence of the Pope must be insured. A pastoral letter by the Bisbop of Poictiers, comparing the Emperor to Pontius Pilate, had created a great sensation throughout France, and the government was debating what measure to take in the matter.

The failure of Mires, the banker, is for an immense

private individuals. The Sardinians bad occupied the heights commandran his horse down the river road, and secured the ing the citadel of Messian, and were about commencing only skiff to be found, which a very active young the siege. The representatives of the foreign Fowers at the state of the first Loylin Messian had protested against the opening of bosilities.

until the 2d inst.

It is reported that Austria has given official information to France, that the former will never recognize

Victor Emmanuel as King of Italy, and if France withdraws her troops from Rome, Austria will immediately

replace them by her own army.

United States. - The Executive Department .- It was not known early in the present week, whether the Pre-sident had yet ordered the evacuation of fort Sumpter, though it was believed the garrison must soon he withdrawn, from circumstances beyond the executive consaid they have received such assurances of the pacific intentions of the administration as to leave little doubt that peace will be preserved between the two sections. have not, under these circumstances, thought it expedient to make any official demand in reference to the Southern forts. Cassius M. Clay, of Kentucky, has been nominated as minister to Spain, and Thomas Cor-win, of Ohio, minister to Mexico. These and various other appointments of inferior importance were ratified by the Senate. On the 18th, Charles F. Adams, of Massachusetts, was nominated as minister to England: William L. Dayton, of New Jersey, minister to France George P. Marsh, of Vermont, minister to Sardinia, and James Watson Webb, of New York, minister to Turkey. U. S. Senate .- This body has continued in session

chiefly for the purpose of considering the executive nominations. A resolution was passed, declaring the seats of Senators Brown and Davis, of Mississippi; Mallory, of Florida; Clay, of Alahama; Toombs, of Georgia; and Benjamin, of Louisiana, vacant, and directing the Secretary to omit their names from the roll. A resolu tion was introduced by Senator Douglas, the object of which was, by obtaining a reply thereto, to officially declare the fact that there is no adequate power, under existing laws, to retake and hold the Southern forts, now in the possession of the secoded States, and to show that proceedings to that end would involve a large additional military force, and great expenditure of money, and that therefore, the question of war must be necessarily postponed till the next session of Congress. The resolution was debated and opposed by Wilson and others as unnecessary and embarrassing to the administration .-Breckinridge, of Kentucky, deprecated any attempt to maintain the authority of the federal government over the withdrawing States, by force of arms. If peace is to be maintained, and any hope left of reconstructing the Union, he thought all the forts should be given up, and the troops taken from their limits.

The Supreme Court .- This tribunal has decided an important case in which the State of Kentucky was the complainant, and the Governor of Ohio, defendant. It is a case to compel the Governor of Ohio, by writ of mandamus, to surrender a fugitive from justice from Kentucky. And the Court says the demanding State has a right to have every such fugitive delivered up; that the State of Ohio has no right to enter into the question whether the act of which the fugitive stands accused is criminal or not in Ohio, provided it was a crime in Kentucky, and it is the duty of the Governor of Ohio to deliver up, upon any proper proof that the act charged is a crime by the laws of Kentucky; that the act of Congress of 1793 determines what evidence is to be submitted to the State of Ohio; that the duty of the Governor is ministerial merely, like that of a sheriff or marshal, and the Court appeals to his good faith in the discharge of a Constitutional duty for the reason that Congress cannot impose any federal duty on the officers of a State, and that where such officers are called upon by any act of Congress to perform such duty, it relies upon good sense and good faith on their part. And, on these grounds, the writ of mandamus is refused.

New Humpshire .- At the election held in this State last week, all the Republican members of Congress were elected. The Republican candidate for Governor was

elected by a majority of about 4000.

New York.—Mortality last week, 397. The export trade of this city is large, being thus far in advance of that of last year. The imports show a material falling off. From First month 1st to Third month 16th, the total of imports was \$39,575,547. In the corresponding portion of 1860, the amount was \$52,210,808.

Philadelphia.—Mortality last week, 285.

The Southern Congress.—A permanent Constitution for the Confederated States has been adopted by the Con-

gress, some of the provisions of which are as follow :-Under the first census, Sonth Carolina is entitled to five representatives in Congress; Georgia to ten; Alabama to nine; Florida to two; Mississippi to seven; Louisiana to six; and Texas to six representatives. Each

sures relative to the peasantry, would not be published State to have two senators. Both branches of Congress may grant seats on the floor of either house to the principal officer of each executive department, with the privilege of discussing the measures of his department. The representation of three-fifths of the slaves is continued. Congress is not allowed, through the imposition of duties, to foster any branch of industry. The foreign slave trade is prohibited. The President and Vice President shall serve for six years. The principal officers of the departments and in the diplomatic service. to be removable at the pleasure of the President, and other civil officers removable when their services are unnecestrol. Crawford and Forsyth, the commissioners from sary, or for other good causes and reasons. Other the Confederate States, remain at Washington. It is States to be admitted into the Confederacy by a vote of two-thirds of both houses. The Confederacy may acquire territory, and slavery shall be acknowledged and protected by Congress and the territorial government. An act passed by the Congress in relation to the African slave trade, has been vetoed by President Davis. The President states that he objects to the sixth section of the act, which authorizes the sale of Africans to the highest bidder, as in opposition to that clause of the Constitution which forbids such trade, and contains a mandate requiring effectual legislation to prevent the same. A motion to pass the act over the veto was lost by a vote of 15 yeas to 24 nays. A tariff act has been discussed to go into operation on the 1st of Fifth month. As compared with the tariff of the United States, most of the 30 per cent, duties are reduced to 25 per cent... and the greater portion of the 22 and 19 per cent. duties to 15 per cent. There is a large 10 per cent. schedule, and a very small free list. Georgia .- The State convention has ordered the trans-

fer of all the forts, arsenals, arms and munitions of war within the State, to the Confederate government. The reported seizure of the Northern stock in the Macon and Western railway, as published in the Charleston papers, was incorrect.

Alabama.- The Alabama State convention has ratified the permanent Constitution of the Confederate States.

by a vote of 87 to 5.

Louisiana .- The State Convention has adopted the permanent Constitution of the Confederate States. proposition to submit it to the people of the State for ratification or rejection, was voted down in the convention

Texas .- Fort Brown and all the other fortifications held by the federal troops in this State, have been surrendered to the Texan anthorities. Arrangements have been made for the U.S. troops to leave the State, as soon as the means of transportation arrive.

The Markets.—The following were the quotations on the 18th inst. New York—Chicago spring wheat, \$1.16 a Sl.18; California, Sl.25; red wheat, Sl.30 a Sl.35; white wheat, Sl.42 a Sl 59; oats, 32} cts. a 34 cts.; corn, white and yellow, 67½ cts. a 69 cts. Philadelphia

Red wheat, \$1.25 a \$1.28; white, \$1.35 a \$1.42; rye, 68 cts.; new, yellow corn, 55 cts. a 57 cts.; oats, 31 cts. a 32 cts.; clover seed, \$4.75 a \$5.00; timothy, \$3.00. Baltimore-Red wheat, \$1.25 a \$1,28; white, \$1.45 a \$1.70; cora, 53 cts. a 56 cts. Cincinnati— Flour, \$4.50 a \$4.60; whiskey, 13_+^a cts.; bacoa, 7 cts. for shoulders, and 9_+^1 cts. a 10_+^4 cts. for sides.

WEST-TOWN SCHOOL.

The Committee to superintend the Boarding-school at West-Town, will meet in Philadelphia on Sixth-day, the 5th of next month, at seven o'clock, P. M

The Committee on Instruction and that on Admissions meet on the same day; the former at four o'clock, and the latter at five o'clock, P. M.

The Visiting Committee attend the semi-annual ex-amination of the schools, commencing on Third-day morning, and closing on Fifth-day afternoon of the same JOEL EVANS, Clerk.

Third mo. 21st, 1861.

WANTED.

A Female Teacher as Principal in the Raspherry street school for Coloured Girls.

Application may be made to HANNAH J. NEWHALL, 528 Sprace street; Mary Scattergood, 413 Spruce street; REBECCA S. ALLEN, 335 S. Fifth street.

TRACT ASSOCIATION.

The Annual Meeting of the Tract Association of Friends, will be held in the Committee-room of Arch Street Meeting-house, on Fourth-day evening, the 27th inst., at eight o'clock. CHARLES J. ALLEN, Clerk.

Philad , Third mo., 1861.

FRIENDS' INDIAN INSTITUTE, TUNESSASSAH.

A man and a woman Friend are wanted to aid in con ducting this Institution. A man and his wife would h preferred, one of whom should be qualified to teach i the school. Apply to EBENEZER WORTH, Marshalton, Chester Co., Pa.

THOS. WISTAR, Fox Chase, Philadelphia Co., Pa. JOEL EVANS. Oakdale P. O., Delaware Co., Pa.

Philad., Second mo. 5th, 1861.

WEST-TOWN SCHOOL.

A Friend and his wife are wanted to fill the station of Superintendent and Matron at West-town Boarding School.

Application to be made to either of the following Friends: NATHAN SHARPLESS, Concord; JAMES EMLEN West Chester; SAMUEL HILLES, Wilmington; HENEY COPE OF WILLIAM EVANS, Philadelphia.

Twelfth mo. 10th, 1860.

MARRIED, on Fourth-day, the 13th inst., at Friends Meeting-house, Buckingham, OLIVER PAXSON, of New Hope, Bucks Co., Pa., and Ruth Anna, daughter of th-late Elias and Sarah M. Ely, of the same place.

DIED, on the 4th of Eleventh month, 1860, Ann M OLIPHANT, aged 75 years. She was a member of Mans field Particular and Upper Springfield Mouthly Meeting

New Jersey.

—, on First day, the 17th of Second month last STEPHEN WEBSTER, in the 79th year of his age—a mem ber of Frankford Monthly and Particular Meeting.

, at their residence, on the 28th of the Second month, 1861, SARAB, wife of WILLIAM MOTT, in the 60tl year of her age—a beloved minister, and member o Southland Particular and Plymouth Monthly Meeting Washington country, Ohio. She was taken ill about th middle of the First month, and was reduced very low during which time she appeared in a resigned state o mind, expressing her willingness to depart and he re leased from the trials and conflicts of time, if consisten with the Divine will. But it appeared that her day work was not quite finished, nor the time for her releas fully come. She was raised up in a remarkable man ner, and strengthened to attend the Meeting of Minister and Elders, held at Plymouth, as well as the Monthl Meeting held at the same place, on the 18th of the Secon month, in both of which she was acceptably engaged if the ministry; exhorting Friends in a solemn manner to endeavour to draw nearer and nearer unto the Lord, and one unto another. After those meetings, she was free and cheerful in spirit. Shortly after returning home she was again taken sick; her sufferings were great, bu she appeared as one whose day's work was now done and patiently waiting the time of release. She was o a meek and retiring spirit, willing to prefer others to herself; her adorning was not that outward adorning c plaiting the hair, wearing of gold, or putting on of ap parel; but in that which is not corruptible, even th ornament of a meek and quiet spirit which is in the sigh of God, of great price. In these respects, she being dead, yet speaketh, the language of her conduct havin, been very impressively, "Follow me, as I have endea voured to follow Christ." To this dear Friend, it is be lieved, the language may apply, "Blessed are the dead who die in the Lord, from henceforth, yea, saith th spirit, that they may rest from their labours, and thei works do follow them."

-, on the 8th of Third month, 1861, ANN MARI RANSOME, daughter of John and Elizabeth Ransome, is the 55th year of her age—a beloved member and elde of Elba Monthly and Shelby Particular Meeting, N. Y. She was experienced in the things of God, livingly con cerned for the welfare of our religious Society, and true mourner over the divisions thereof. She was o unobtrusive behaviour, meek and lowly in her deport ment, exemplary in her dress, life and conversation, an a regular attendant of Mectings for Worship and Disci pline, and was much beloved by her connexions an Friends. Exhibiting the conduct of one of the wis virgins, whose lamp was trimmed, and light burning she was ready for the coming of her Lord, and her belie was, that if Friends were individually faithful to thei callings and duty in the church, Truth would triump over all. Her end was in sweet peace, after endurin with patience a very trying affliction, and her Friend helicve she is gathered with the just of all generations

JOSHUA BROWN.

house of Benjamin Swett, in Haddonfield, on the enforced. Lodging at Edmund Hollingshead's, he, night of the 10th of First month, 1776, and, on the on the 14th, attended meeting at Evesham, wherein 11th, attended meeting there. Joshua had therein the necessity of each one knowing a being brought to mention the case of the impotent man, who lay out of the house of bondage spiritually, was set at the pool of Bethesda. He was led to treat of forth. He commented on the captivity of the chil-the clear sense the man had of his diseased condition, and of his own inability of helping himself. given them a sense of their bondage, and a capa-He then mentioned the case of Naaman, the Syrian, city of looking unto him for deliverance, when they, and the simplicity of the means employed in curing in the ability he furnished, cried unto him for help, his disease. These instances showed spiritually the He sent them a deliverer. In this day the natural necessity of feeling our own utter inability for any man is in bondage under sin, and Christ, the true good word or work, and of waiting in humble de- and only Saviour, is with them, by his Spirit shinpendence on the Lord Jesus Christ, in whose grace ing into their dark hearts, ready when they cry is an ever health-restoring Bethesda, and knowing unto him in living faith, to deliver them, and guide his Holy Spirit to cure our maladies, to cleanse us, as them even into that glorious country, the land of Naaman was cleansed, from our leprosy. He showed blessed promise. He laboured fervently to stir them that they must be willing to receive and obey them up to give heed to these things, and to mind the simple openings of the Spirit of the Lord Jesus the day of their visitation. After meeting, he went in the heart, or they never could be made whole from to "Old Thomas Evans's," a faithful minister of sin. The meeting did not prove a relieving one Christ, and lodged. On the 15th, he had a meetto Joshua, yet, after a sitting with the family of ing at Upper Evesham, in which the necessity of a Thomas Redman, the next day, he found liberty to belief in the immediate revelation to the soul of move forward, and that day, the 12th, was at the man, through the openings of the Spirit was insistmeeting at Newtown. There he was led to treat led on, and the danger of depending upon any light
on, "be that believeth and is baptised, shall be of nature. Joshua cited proofs from Scripture,
saved." From this, he had to show the necessity that immediate revelation was one of the privileges of a living, saving faith, and of the baptism of the of the church of Christ, and that it was to be con-Holy Ghost and of fire, which prepares through tinued as such. They lodged that night at the the heart, for receiving justification in the sight of at Mount Holly meeting. Here the danger of let-God, and a seal of his adoption as children. He ting man's will, cunning and invention have anytouched also on the inefficiency of water baptism, thing to do in religion were set forth, and the care to effect any change in man's moral nature. He laboured fervently for the good of the people, and hand in building the tabernacle under the old cothe meeting afforded him consolation and encour-venaut, was mentioned. From this he sought to agement. On the 13th, he attended meeting at incite the people in their religious endeavour to Chester, where he spoke of the apostle Paul, build only by Divine direction. He was also led who, being at Athens, found an altar with this in-to dwell on the departure from the faith in the scription, "To the unknown God." The apostle on church of Christ, when man's inventions crept in, this preached to the people there of God, who made as the sprinkling of infants and other ceremonies, the world, and who commanded all men to repent, and the allowance of war. He spoke of the church though their weakness in the days of their igno- coming again out of the apostacy; the many who

God, and after mentioning how that tumult was forms, and how our forefathers were called or The total length of the Victoria Bridge is 9144 appeased, he told them that the tumult raised from these formal sects, to be a separate people into Samaria, and how the prophet manifested a disposition to return good for evil, when at his bidding the king of Israel set bread and water before them. By this instance, Joshua showed them the care of the Lord over his faithful servants, and the necessity of trusting in him, and leaning upon him. He exhorted them to know their religion to be through revelation of the Father by Jesus Christ. The necessity of that christian disposition of not Joshua Brown and companion lodged at the resisting enemies, and doing good for evil was also

THE OCEAN.

Likeness of heaven! Agent of power ! Man is thy victim, Shipwrecks thy dower! Spices and jewels From valley and sea, Armies and banners, Are buried in thee!

What are the riches Of Mexico's mines To thy wealth that far down In the deep water shines? The proud navies that cover The conquering West-Thon fling'st them to death With one heave of thy breast.

From the high hills that vizor Thy wreck-making shore, When the bride of the mariner Shrieks at thy roar, When, like lambs in the tempest Or mews in the blast, O'er thy ridge-broken billows, The canvas is cast,-

How humbling to one With a heart and a soul, To look on thy greatness, And list to its roll; To think how that heart In cold ashes shall be, While the voice of eternity Rises from thee !

Yes I where are the cities Of Thebes and of Tyre? Swept from the nations Like sparks from the fire; The glory of Atheas, The splendor of Rome? Dissolved-and forever-Like dew in thy foam.

But thou art most mighty-Eternal-sublime-Unweakened-unwasted-Twin-brother of Time I Fleets, tempests, nor nations Thy glory can bow As the stars first beheld thee, Still chainless art thou!

But hold ! when thy surges No longer shall roll, And that firmament's length Is drawn back like a scroll Then-then shall the spirit That sighs by thee now, Be more mighty, more lasting, More chainless than thou !

The Growth of Ohio.

At the commencement of the present century, early all the region now included within the State f Ohio, was an unbroken wilderness. What sixty ears of industry, energy and enterprise have acomplished in that wilderness may be learned from ne fourth annual report of the "Commissioner of opulation indicates, in a striking manuer, that excaordinary rapidity of growth which has rendered he last decennial period, the growth of some of the nore Western States has been still more remarkale, Illinois for instance, having more than douled its population.

The following is a comparative exhibit of popuation and its variations, viz:

T 6 011 1 1010 000 700

ul. oi	Onioin	1510,	230,700			
	u	1820,	581,434-	incr.	152	р. с.
	44	1830,	937,903	66	61	"
	ee	1840,	1,519,467	66	62	"
	66	1850,	1,980,329	44	30	"
	66	1860,	2,346,000	"	18.1	4 "

It is seen that the ratio of increase has constantly liminished. This has been the case with all the States, till they reached a density of 50 to a square nile, when the increase of cities and towns dependnt on commerce and manufactures, sometimes car-

ied the ratio up.

Ohio has long maintained the rank of the third State in the confederacy, in point of population. In 1858 But for the large emigration from Ohio westward of late years, its population might probably, ere his, have reached three millions

which this industrial interest has been prosecuted.

he following inferences:

The crop of Indian corn has increased

From 1840 to 1850, 25,410,551, or 76 per ceut.

" 1850 to 1860, 9,652,151, or 16½ "

" 1840 to 1860, 35,062,702, or 107 "

If we divide the last nine years into three peiods, we shall find there has been a steady, equaole increase of the corn crop, viz:

851-2-3 average . . . bushels, 64,257,629 ported annually to eastern markets. 65,852,999 854-5-6 " 67,169,872

This increase has arisen from increase of acres planted. And the ratio per cent. increase per cent. s not as great in the last three years as in the first

whole quantity.

ity in production; yet it is probably caused only by a temporary conformity of bad seasons to the alternate years, and not by a law of production. On the contrary, the year 1860 ended this unipreferred crop will soon be entirely occupied.

age was that of 1850; the least was that of 1859, imagination is substituted for divine revelation," Ac. The advantage in cheapness is more than one Comparing three periods in the growth and pro- Then follows his caution embraced in the following

duction of wheat, as in corn, we have the follow- query: "Is there not the same necessity for us at this day, if we would avoid the same result as before alluded to, to have nothing to do with pamphlets and books, put in print, contrary to the wholesome rules of our Discipline, and which relate to our religious principles and testimonies, or which tend The production in ten years has been 200,000, to discord and disunion?" &c. Now I would hope 000 bushels. The people, at the utmost allowance that the writer does not hereby intend to discourage or condemn the reading of publications, writtity. The balance was exported. This is equiva- ten in accordance with our ancient christian priulent to the bread support of 2,000,000 people for ciples and doctrines, for the defence of the Truth, west the wonder of the world, and yet within that period - or equal to the support of the king- and against heresy! for such condemnation, I apdom of Denmark. The wheat crop of 1860, is prehend, was never contemplated by the framers of "the wholesome rules of our Discipline;"-as The average crop of oats for the last three years to discord and division, they will necessarily occur

But, well indeed had it been for the Society of The crops of ryc, barley and buckwheat have Friends, I repeat, if the caution implied in the corre-pondent's interrogatory, had been generally observed by its members, at least a quarter of a century ago, in relation to publications of an opposite class, which tend to the subversion of our ancient doctrines and testimonies, and lead to the substitution of what another correspondent, on page 205 of the same number of "The Friend, has denominated "a modern and modified Quakerism," Had Friends then been faithful in the due administration of "the wholesome rules of our Discipline," these pernicious publications would have been long since repudiated by the Society generally, and that subtile and insidious "process of heresy" which has so long exercised its baneful influence in our midst, would have been measurably neutralized or altogether prevented.

Oh! may we individually, dear Friends, through deep humiliation and a heart-felt repentance for our transgressions, know a practical recurrence to first principles and a restoration to Divine favour and be again accounted worthy to hold up to the nations a standard for the Truth. Alas! my Friends, both old and young, unless these considerations shall occupy the chief place in our minds, and influence our conduct, I fear that He who declared that His Spirit should not always strive with man, may leave the body under our name to the

desolation of a lifeless profession. In the contemplation of these things now, near the approach of our annual solemnity, my mind has been impressed with the awful language in the parable of the unfruitful fig-tree : - "A certain man had a fig-tree planted in his vineyard; and he "Be not Deceived; Evil Communications Corrupt came and sought fruit thereon, and found none. Then said he unto the dresser of his vineyard, Under the latter clause of this short, but com- Behold these three years I come seeking fruit ou prehensive passage of Scripture, a correspondent this fig-tree, and find none: cut it down: why There is a regular alternation in the large and of "The Friend," of Third mo. 2nd, conveys a cumbereth it the ground? This is not a mere picture. At such seasons, Friends who were sound in the faith could once say, "the Seed reigns." It is still realized among those who rejoice in Christ Jesus alone, and have no confidence in the wisdom, or policy, or artificial knowledge of men. Human policy is not unfrequently mingled with the subtlety of the serpent, which strikes at the simplicity of the Truth. "The world by wisdom knows not God," If this wisdom rules in the visible church, those things which are done to be seen of men, and to please unregenerate men, may engross its deliberations, and exclude a right exercise for the spiritual health of the members. If the course of proceeding which worldly professors take is adopted, fidelity to Christ, and the foolishness of the cross, will be lost. And should riches and worldly greatness bear sway, sorrowful desolation will it make wherever such influence prevails. Those who receive honour of men, and are not seeking the honour which comes from God only, will be likely to strive to carry out the will of those who honour them, and this gives rise to a similar state of division with that in which the Corinthian church was involved.

No mere resemblance of unity and love will

One of the peculiar traits of ancient Quakerism, the putting forth of the Leader of Israel, to know vants.

It was not to be expected that the United States government would recognize the justice of this reabrought about by the treasonable scheming of Such are some of the lessons learned among the many who had been entrusted with its most lucraous principle that would be sanctioned by a quiet acknowledgment of the new "Confederated States." Morever, the aggressive acts of the secessionists, and the insulting tone of their abettors, have increased the feeling of irritation, and disposed many to favour measures of retaliation.

Under these circumstances, we cannot but think it remarkable, and esteem it as a blessing, that so far there has been no act of hostility committed on the part of the United States, and that the Presi-dent who has just retired, and he who now fills the office, have declared their determination to preserve peace, if possible. The Constitution authorizes the President to employ force in order "to execute the laws of the Union, suppress insurrection, and repel invasion," but the setting up of a new government by a number of adjoining States was not contemplated, and the posture of affairs attending its initiation and consummation, renders the President now almost powerless. There is a new government de facto, apparently supported by the good will of the people over whom it exercises authority, and the whole question between it and the United States appears to resolve itself into, whether this new government shall be acknowledged and treated with, or an attempt made to overthrow it by force, and reduce its millions of

It is certainly a most extraordinary occurrence, and one, which in one sense, argues a highly importion of our countrymen, that in a nation of thirty millions, such a revolution, originating from such at before it is begun.

It may be admitted that this successful rending of our vast empire, and the establishment of a new confederacy, if acquiesced in, will be an undeniable admission of the inherent weakness of our republican government, and destroy its prestige abroad; but it is also equally an evidence that that weakness arises from the people retaining power in their own hands, and withholding so great a portion of it from the hands of the Executive, as would be needful at once to put down resistance by force, lest under unforeseen circumstances it might be employed for oppression and the deprivation of their rights. And what more noble and elevating spectacle could the United States exhibit resentment for injuries received, and actuated by a stantinople, growing out of financial difficulties. Ras-turby christian spirit, it should magnanimously stantinople, growing out of financial difficulties. ASPIRATIONS. I ask the rest that spirit knows, Whose will is wholly bowed to Thine; That quiet and serene repose, That can its every wish resign.

I want to labour faithfully Within Thy vine, and all my day; But guided only by Thine eye, Nor dare to choose my work or way.

And yet whenever, in Thy love, Thou givest the command, "Be still," May I as joyfully prepare
To suffer, as to do Thy will.

I ask not comfort, joy, or peace, For self in these oft makes her throne; I only ask, Thon wilt not cease, Until Thy work be wholly done.

I cannot rest until my heart Is purged from every taint of sin, And, through the blood of sprinkling, made Fit for Thyself to enter in.

And well I know the changeless love, Will all Thy loving children cheer, Whenever, on their thorny way, Their spirits droop from doubt or fear.

All this I trust to Thee alone; But leave me not, until there be On every action, word, or tone, The impress, Holiness to Thee.

E. T. King.

Selected. CHILDLIKE TRUST.

"I know not the way I am going, But well do I know my Guide; With a childlike trust I give my hand, To the mighty Friend by my side.

"And the only thing that I say to Him As He takes it, is, 'Hold it fast! Suffer me not to lose my way-And bring me home at last!'

"As when some helpless wanderer, Alone, in an unknown land,
Tells the guide his destined place of rest,
And leaves all else in his hand.

"'Tis home, 'tis home, that we wish to reach: He who guides us may choose the way; For little we heed what path we take, If we're nearer home each day."

Foundered at Sea .- Of the ships lost at sea some are supposed to be fixed in mid-water. Like those fossil remains which we dig out of a rock or near to us, tender our souls with his Divine pre- are of wood, and the population is about 500 a quarry—at once preserved and buried in a stra- sence, and give songs of praise and thanksgiving many of whom are engaged in trade, purchasi core—these submerged but not foundered vessels tures. THE FRIEND.

FOURTH MONTH 6, 1861.

SUMMARY OF EVENTS.

EUROPE .- News from England to the 17th nlt. The Duchess of Kent, mother of Queen Victoria, died on the 16th ult. The parliamentary proceedings have mons had given notice of his intention on an early day to call the attention of government to the expediency of a prompt recognition of the "Southern Confederacy of

The Liverpool cotton market was firm; sales of the week, 58,200 bales. The Manchester advices were favourable. Breadstuff's were firm at the following quovourable. Breadstulis were urm at the following quo-tations: Flour, 28s. a 31s.; red wheat, 11s. 3d. a 13s.; white, 12s. 6d. a 14s. 6d.; corn, 37s. a 39s. The bullion in the Bank of England had increased

The money market was slightly easier. Consols, 921 a 923.

The French Corps Legislatif continued the debate on the address to the Emperor. Some of the members expressed themselves with great freedom, in regard to the

policy of the government in Italian affairs.

The Bank of France had reduced its rate of discount

vail ourselves of 'every good means' to help chasing. The wood is then hardened to the con-long, &c.; make the tree good, and the fruit will sistency of metal, while the impressions remain the payment of the drafts accepted by Mires & Co, on account of the Turkish loan. Intelligence had been rethe French forces had killed 600 of the natives, and taken two of their forts. The French lost but six men.

The citadel of Messina surrendered unconditionally after four days' firing, during which the Sardinian artillerymen caused a great fire in the citadel. A capitula-tion was refused. Four generals, 150 officers, and 5000 men were taken prisoners. 300 cannon also fell into the hands of the Sardinians. Notwithstanding the unconditional surrender, Victor Emmanuel is stated to ed to the garrison which have been agreed upon with Francis the Second, in the event of the place surrender-

ing immediately. Civitella del Fronto would not be able to hold out

much longer. The project of law relative to the assumption of the

title of Kiogdum of Italy, had been unanimously approved by the Chamber of Deputies. An elaborate system of opposition against the new

Cardinal Antonelli had sent a despatch to the Ponti-Guardinal Anothern had sent a despatch to the Ponti-ficial Charge d'Affaires in Paris, replying to M. De la Guerroniere's late pamphlet. He boidly charges the Emperor with being the cause of all the troubles which

beset the government of the Holy See.
Warsaw continued tranquil. The garrison, which only numbered 5000 men at the time of the late out-

break, had been increased to over 20,000; but the troops were confined to their barracks.

A despatch from Posen says the concessions granted by the Emperor to the Poles are : Re-constitution of the Council of State; complete reform in the system of pub-

might be proposed, examined, and ratified.

Turr and Gen. Klapka had been published, exhorting the Hungarians not to compromise the deliverance of Hungary by a premature movement, which they say Austrian agents are fomenting. Gen. Turr urges his vourable circumstances.

The advices from India give sad accounts of the sufferings from famine in extensive districts of that depen-dency of the British empire. The Overland Times and Standard says: "The famine is great in the land. Horrible accounts reach us from the north-west provinces of human beings dying at the rate of four hundred or five hundred a day, while the desolation is not even limited to the vast expanse of country from Lucknow to Labore; for tales are nnw told equally appalling of the extremities to which the population of the native State of Travancore, in the south of India, are reduced by the drought, which has caused all the fruits of the earth to wither. According to a Cochin newspaper, mothers in Travancore are selling their children as slaves for 6d. each, that they may have wherewith to purchase bread, if only for a single day." Measures had been taken, with partial success, to afford aid to the famishing population

Advices from Shanghai to First mo. 24th, have been received. Pekin was quict. The allied troops at Tien-Tsin were healthy. The treaty was working satisfac-torily. The rebels had been defeated by the Imperialists at Ehsin. lu Japan, affairs were peaceful.

The attempt to lay a telegraphic cable, from Singa-ore to Java, failed. The cable was lost.

pore to Java, failed. The war between the natives in New Zealand and the

British continued.

UNITED STATES. - Affairs at Washington .- The extra session of the U. S. Senate closed on the 28th ult. No action was taken on the proposition to refer the dispute with Great Britain, respecting the island of San Juan to the arbitration of Switzerland. A number of speeches were made on the alarming condition of affairs, but the Senate declined offering any advice to the executive de-partment. A long list of Presidential nominations to fill various important offices, was acted on, and the in-dividuals were nearly all confirmed. No numination was made to fill the vacant seat in the Supreme Court. -Cassius M. Clay declined the appointment of minister to Spain, but was afterwards appointed minister to Rusdrew B. Dickinson, of New York, minister resident at Nicaragua .- In answer to a resolution of the Senate, requesting the President to communicate to them the despatches of Major Anderson during the time he has been in command at fort Sumpter, the President replied that, on an examination of the correspondence called for, he had come to the conclusion that its publication would be inexpedient at the present time.

New York .- Mortality last week, 406. statement of the assay office in this city shows during the Third month, that the deposits of gold amounted to \$5,040,000; of silver, \$160,000; gold hars stamped, \$2,368,270; transmitted to Philadelphia for coinage, \$5,658,600. The New York banks held last week over \$41,000,000 in specie. Business continued depressed, and good borrowers could obtain loans at very low rates The idea of separating the city and port of New York from the Union, and from the State, in order to make it a free and independent port, has, it is stated, not been government of Italy had come to figut to the sum of the

in this city held last week \$6,200,000 in specie, which is the largest amount that has been in their vaults for several years. The highest temperature, during the Third month, was 78 degrees, and the lowest 162 degrees. The mean temperature of the month was 471

egrees.

The Grain Markets.—The following were the quotations on the 1st inst. New York-The market for wheat is more active, and prices are in favour of the seller 83,000 bushels were sold at \$1.25 a \$1.27 for Chicagn spring; \$1.29 a \$1.30 for Milwaukie club; \$1.33 a \$1.36 for red Western, and \$1.55 a \$1.60 for white lic instruction; the municipalities to be elected by the Michigan. Oats are steady; sales were made at 33 cts. citizens, &c. Prince Gortschakoff would convoke the principal is dull; 34,000 bushels were sold at 63 cts. a 65 cts. for Polish notabilities, in order that all necessary reforms unmixed Western, and 66 cts. a 70 cts. for Southern vellow. Philadelphia-Red wheat, \$1.31 a \$1.35; white. There appears to be much discontent in Hungary, and \$1.40 a \$1.50; rye, 68 cts. a 69 cts.; new corn, 60 cts. impatience under the Austrian rule. A letter from Gen. old, 61½ cts.; oats, 31 cts. a 32 cts.; clover seed, \$4.62 a \$4.87; timothy, \$2.75 a \$3.00; flaxseed, \$1.50. Virginia.—The convention remained in session, dis-

cussing the question of secession. Many earnest and

Missouri .- The Legislature has resolved that it is inexpedient to take any steps for calling a national conention to propose amendments to the Constitution as

recommended by the State convention.

Texas .- The Legislature has passed a resolution, approving of the action of the convention in deposing Governor Houston. A hill has been passed to raise a regiment of 1000 mounted riflemen for the protection of the frontiers. Since the departure of the federal troops. the Indians, in large numbers, have been devastating the frontiers, killing and driving back the white settlers. Gov. Houston has issued an address to the people of Texas, in which he protests against his deposition, and expresses his continued devotion to the Union; he will, however, submit rather than be the means of kindling civil war in the State. Revenue North and South .- The revenue collected in

all the ports of the seceding States, during the year endg Sixth mo. 30th, 1860, was \$3,491,757; the capear collecting which amounted to \$530,567, leaving a ing Sixth mo. 30th, 1860, was \$3,491,757; the expenses net revenue of less than three millions. amount of revenue collected in all the ports of the United States, was over \$60,000.000. It is, however, contended in the Southern confederacy, that their policy will soon build up a large trade in imports as well as exports.

The New Confederacy .- The appropriations made by the Congress before its adjournment, were on a moderate scale, amounting in the aggregate to \$1,468,190. The largest item was, for the collection of revenue, \$545,000; \$150,000 was appropriated for light-houses for an executive mausion, \$5000. The Savannah Republican announces that the banks of that city have agreed tn take live hundred thousand dollars of the loan authorized by the Southern Congress. The States which bave recently withdrawn, and established an independent government, embrace that portion of the United States, which has been obtained and secured at the heaviest cost to the general government. The following statement of the expenses on their account, is taken from a daily paper: "Louisiana, (purchased of France,) \$15,000,000; interest paid, \$8,385,353; Florida, (pursin.—Carl Shure, of Wisconsin, rone appointed minister chased of Spain, 35,000,000; Interest paid, \$1,430,000; to Spain; James S. Pike, of Maine, minister resident at Texas, (boundary,) \$10,000,000; Texas, (for indemnine the Hague; Robert M. Palmer, of Pennytvanian, minister resident at the Argentine republic; James E. Har \$7,750,000; Iodian expenses of all kinds, \$5,000,000; vey, minister resident at Portugal; George G. Fogg, of to purchase anyt, pay troops, \$5,000,000; all other extenses of the production of

ceived from Cochin China, that in a recent engagement, New Hampshire, minister resident at Switzerland; An-penditures, \$3,000,000; Mexican war, \$217,175,565; soldiers' peasions and bounty lands, \$100,000,000, Florida war, \$100,000,000; soldiers' pensions, \$7,000,000; to remove Indians, \$15,000,000; paid by treaty for New Mexico, \$15,000.000; paid to extinguish Indian titles, \$100,000,000; paid to Georgia, \$3,082,000; total cost, \$617,822,928,"

RECEIPTS.

Received from A. Cowgill, agt., Io., for Aaron Frame, \$2, to 27, vol. 35; from Jehn Fawcett, agt., O., for Benj. Winder, E. Cooper, and Saml. Street, \$2 each, vol. 34, for John H. Stanley, \$2, vol. 31, for Dl. Test, \$2, vol. 32, for Sarah Allison and Dl. Stratton, \$2 each, vol. 33, for H. W. Harris, \$2, vol. 35.

NOTICE.

We have been requested to state that a few Friends attending Yearly Meeting, can be accommodated with board and lodging, by making early application at No. 116 N. Seventh street, above Arch.

WEST-GROVE BOARDING-SCHOOL FOR GIRLS situated on the Philadelphia and Baltimore Central Railroad. The Sessions open on the 1st Second-days in the Fifth and Eleventh months respectively. For information and circulars, apply to

THOMAS CONARD, Principal, West-Grove P. O., Chester Co., Pa.

Fourth mo., 1861.

BIBLE ASSOCIATION OF FRIENDS IN AMERICA.

A Stated Annual Meeting of the Bible Association of Friends in America, will be held at the committee-room, Arch Street Meeting-house, on Seventh-day evening, the 13th inst., at eight o'clock. Friends generally are invited to attend.

FRIENDS' INDIAN INSTITUTE, TUNESSASSAH.

A man and a woman Friend are wanted to aid in conducting this Institution. A man and his wife would be preferred, one of whom should be qualified to teach in EBENEZER WORTH, the school. Apply to Marshalton, Chester Co., Pa. THOS. WISTAR,

Fox Chase, Philadelphia Co., Pa. JOEL EVANS, Oakdale P. O., Delaware Co., Pa.

Philad., Second mo. 5th, 1861.

WEST-TOWN SCHOOL.

A Friend and his wife are wanted to fill the stations of Superintendent and Matron at West-town Boarding-School

Application to be made to either of the following Friends: Nathan Sharpless, Concord; James Emlen, West Chester; Samuel Hilles, Wilmington; Henry COPE OF WILLIAM EVANS, Philadelphia.

Twelfth mo. 10th, 1860.

MARRIED, on the 14th ult., at Friends' Meeting-house, Deer Creek, Harford Co., Md., ABEL J. HOPKINS, of Bal-timore Co., to Jane, daughter of the late Caleb H. Canby, of Philadelphia.

-, on Fourth-day, the 20th ult., at Friends' Meeting-house, Buckingham, ELIAS ELY PAXSON, of Solebary, Bucks Co., Pa., and MARGARET O., daughter of the late Samuel and Hannah Wilson, of Buckingham, Bucks Co., Pennsylvania.

DIED, at his residence in Chesterfield, Morgan county, Ohio, on the 15th of Third month, 1861, in the fortyfifth year of his age, Jesse Jonn; a useful member of Chesterfield Monthly and Particular Meeting. Through the greater part of his life, he appeared to be concerned to be found in the way of his duty, and in a state of acceptance with his dear Redeemer. During a protracted illness which he bore with christian patience and resignation, it was his daily concern to witness a state of preparation for his final change. A short time before his close, he expressed a comfortable hope of be-ing admitted into the kingdom of rest and peace.

For "The Friend."

Henry Hull.

(Continued from page 242.) From this time, it would appear that he kept no

m. I feel disposed to mention them, to show portunities I might have had, to accumulate friends, and rendered them near to me. alth; but a man's life or the happiness thereof, asisteth not in the abundance of the things he ssesseth, and perhaps few have enjoyed more tentment than I have.

"Accompanied by my dear friend John Gurney, ravelled at almost all seasons of the year, both fore and since I returned from England, some pusands of miles in the old settled parts of the ates of Vermont and New York, as well as in nada; and also visited several new settlements ming in divers places, and had many meetings those not of our Society. In company with my ar friend Henry Warrington, jr., I went into the ate of Ohio in the year 1819, attended the early Meeting and a few other meetings in that ate and in Pennsylvania; and at another time was with me in a visit to the meetings in Bucks th me in the second visit I made to some parts Maryland, Virginia and Carolina.

"I have often reflected upon the precious seath Friends, in these journeys, as well as in one mony. performed with dear Enoch Dorland, in Canada;

of me as an instrument to convince some, and to misconstruing and garbling their writings, to make awaken others; by whose example and engage- it appear that their doctrines are the same as those ment in the Lord's cause, many have been brought of George Fox and other worthies; but with all to the knowledge of the Truth, as it is in Jesus, their ingenuity, their filmsy guises are seen through, and several meetings have been settled where no even by many who adhere to them, who candidly meetings of Friends had been held; and my spirit acknowledge that their notions are new in the Sohas glowed with thankfulness for his goodness to ciety; but labour hard to allegorize the Scriptures, me, an unworthy servant.

coming upon me, the cause appears as precious to of walking in the light, it is to be feared, without me as ever; but alas! how different is the state due consideration of the danger of mistaking darkof society! Schism is beginning to make its appearance in an appalling manner; and why is it works of darkness are produced, such as reviling, so? Because all have not kept their first love; persecuting, over 1 speaking, backbiting and evil but giving place to false reasoning, have departed surmising, &c., and all under the specious pretence from the Truth, and made innovations in doctrine of reformation and advancement. Ah! truly, if the miuds of Friends have become alienated one the light in us be darkness, how great is that darkfrom another, and those who should have been ness! examples to the flock, have been the means of "I mourn over the state we are in; but as our leading others astray. The discipline of the church, religious Society was gathered by an outstretched morandums until the Sixth month, 1826, when writes as follows, viz:—

"tooking over my memorandums, I do not find discarded, is much neglected, and endeavours arm, and our worthy predecessors were supported used to weaken this hedge. Discordant sentincents by the invincible power of Jesus, under the deep the distinction of several extensive journeys in the threaten its dissolution. The youth, taking advanting the cause of their Lord and Saviour, so I am vice of Truth, performed since my second mar-tage of the commotion, have, in many instances, at times comforted in the belief, that, however ge, for which my wife freely gave me up, and I taken their flight into the customs and fashions of great the defection, and wide-spread the devastaapprehensive that I did not keep minutes of the world, so that they would not be recognized the defection, and wide-spread the devastam, or if I did, they are mislaid. I performed either by their dress or address, as members of our and apostates to be arrested in their career, and eral journeys on a religious account in the States religious Society. An awful responsibility rests turned backward; and that the blessed Head of New York and Vermont, and in Canada, pre- upon some of those who stand in the fore ranks; the church will raise up judges as at the first, and us to going to Europe; but find no account of and I have often felt willing to investigate myself, counsellors as at the beginning and see wherein I have contributed to this sorrowtt I have spent a considerable part of the best ful change; and now fervently desire not to justify time of peculiar trial, and proving of faith and my days in the cause of my dear Redeemer; myself, by avoiding a close scrutiny, as respects my constancy of the Lord's people, in the Society of boastingly, but in humility, and under some conduct and the doctrines I preach. I am not Friends, among whom, unworthy as I am, I trust icting considerations respecting the present state sensible of holding any sentiments different from I may rank myself. The unsettlement, respecting our Society. It is a comfort to me to think, what I first set out with, and held up to the public which I wrote in 1826, has greatly increased since our Society. It is a comfort to me to think, what I first set out with, and held up to the public which I wrote in 1826, has greatly increased since at I have endeavoured to be devoted to the good in the beginning of my ministerial labours; which that time. Then the disorder was chiefly evinced ise, although I have thereby deprived myself of doctrines had a good effect to unite me to my by the younger members who had joined them-

Thought Imperishable.

Under this head the New York Observer gives

An incident was some time since recorded, in A single room was assigned to her and the the youth; many pertinent remarks were made connection with the loss at sea of the steamship d, bearing all the aspects of a prison, and it thereon, and much salutary advice communicated.

The following circumstance was related in the ture of memory. With kindred facts it is suggesone in the town, without permission. Next meeting, by a Friend who was an eye and ear-tive of thoughts that may well make us serious as ning she was taken to the house of the chief, witness, and who had acted as one of the jurors in we are measuring off, one after another, the periods re she urged her request to see the prince, and the case. Four men were called to be witnesses that mark our lives, and folding up the volumes to be permitted to spend some hours each day in a trial before the court, and were required to which are to be read again by each of us, the vois society. The first part of her requests was take the oath; all were dressed alike fashionably unuse of our own history. One of the passengers unted, but the latter was refused; and this man. On being directed to put their hands upon the latter was refused; and this man. On being directed to put their hands upon the latter was refused; and this man. On being directed to put their hands upon the man to not read gain by each of use the value of the one history. One of the passengers on the ill-fated vessel, after it had gone to pieces, must submit to prison discipline; adding that

them, and the man drove them several versts judge replied, "The time had been, when the mem friend had sent her a present of choice grapes, one of the mines, where she was conducted down bers of that society were known by their peculiar which he found in a closet, and in his childish selfalong the galleries, to where the exiles were dress and appearance; but it is not so now; you king. For a few moments they all gazed on could not be known by your dress, you are like a in amuzement, thinking it a vision; and the slip on the sea or privater sailing under false stances, descreted to be called a crime. His mother laws only hroken, when she rushed into her colours, that it may not be known." band's arms. I dare not attempt to paint this I felt it best to give this circumstance a place above, but the circumstance had passed entirely erview; but the clanking of his chains recalled in these memoirs, should they ever meet the public from his recollection, and he stated that for twenty to a knowledge of his position, and the police eye, to hopes it may prove as a watchword to such, years he had not thought of it once. But when he per proved that he possessed a better heart than who may be tempted to gratify their natural incli-was in the jaws of death, and conscience was leadchief, by removing her from a scene heart-rend nation, by departing from that simplicity into ing his mind back over the past, this sin of his childhood came up so forcibly and so suddenly that he really supposed he heard the same voice accusing him of the unbrotherly act.

A whole volume of facts might be recorded, to show that nothing really passes away from the mind when it has once made even a transient impression; that thought itself is indestructible, and a passing notice. It has reference to the rather a passing notice. It has reference to the rather a passing notice, and showed conclusively that in that is that what we seem to have forgotten has only been a spenionted, who received the ladies, and treated means members of his own family. He did great leading mart. Nothing can be more impressive on this point proper state, with all the distinctness of the ori-

ginal impression.

It is a well known fact, that persons who have been end of two years, they ceased to work in the port, which say that more than two-thirds of the nes, and then were removed to Chita and the whole amount of eloverseed exported from the resoued from drowning, have had the most wonder-United States during the year 1860 was purchased ful activity and power given to their memories, just before they became insensible, so that in a moment packed and shipped from Philadelphia. The following are the figures:

hours approached, by the ringing in his ears of These boxes rest upon the sand. The rain from to be renewed in the spirit of our minds, and t melodies which, in his earliest youth, he had heard the roofs of the houses falls into these boxes, and, experience the putting on of the new man, which in the streets of Konigsberg. "These," Wasianski after filtering through the sand, enters the hollow after the image of Him that made us, is created in went on to say, "kept him awake to unseasonable eylinder, and then becomes a limpid water, pure to righteousness and true holiness; that we can right hours; and often when, after long watching, he the last drop. had fallen asleep, however deep his sleep might be, it was suddenly broken by terrific dreams, which alarmed him beyond description."

On this subject generally, our contemporary re-

Such facts added to our own personal experience and consciousness, teach us that nothing is lost; that the whole past is engraven on our hearts, as on an imperishable tablet. With the mind beclouded as it is in this world, we may be able only dimly to descry the great events, but if not in this world, then in another the mist will be scattered, and we shall be able to read our lives over again, just as they have been spent,

There is but one method by which the painful memories of the past may be removed. The heart that is washed in the aroning blood of Christ, has in his grace an autidote both to sin and sorrow. 'The blood of Jesus Christ cleanseth us from all sin." His love sanctifies sorrow, and makes it, and the memory of it a real blessing. The one who has made the Saviour his trust, and who is seeking to live as he lived, has nothing to fear in the utmost activity of memory. But he who has all the guilt of his sins resting upon his own soul, has reason to tremble. In some dark lane of life, in some hour of gloom, or in the last dread conflict, his sins may meet him again, and overwhelm him with the recollection. Or, if he escape in life, memory, which has recorded all, will be faithful to her trust, and woe be to the soul that has to answer for itself in another world.

To this we may add the following propositions: From the retributive and punitive, as well as the eternal quality of memory, we may infer:

1st. The immortality of the soul.

2d. The judicial power of God, hating sin, and punishing it by an eternal retribution.

3d. The wretchedness of that hereafter which will have nothing but an eternal remorse.

descent of the Holy Spirit .- Madam Guyon.

The Cisterns of Venice. - The collection and the chemicals applied to the daguerreotype plate, preservation of water are becoming of national brought out the impression as distinct and clear as importance. The inhabitants of Venice, (120,000,) placed in the midst of a salt lake communicating ing to thee, a part of a beautiful meditation of the I once visited an aged German, who had been with the sea, derive their supply of water from the in this country for more than half a century, and atmosphere. THE LAMP AT SEA.

The night was made for cooling shade, For silence and for sleep; And when I was a child, I laid My hands upon my breast and prayed, And sank to slumbers deep. Child-like as then, I lie to-night, And watch my lonely cabin light.

Each movement of the swaying lamp Shows how the vessel reels And o'er her deck the hillows tramp. And all her timbers strain and cramp, With every shock she feels: It starts and shudders while it burns. And in its hingéd socket turns.

Now swinging slow, and slanting low, It almost level lies, And yet I know, while to and fro watch the seeming pendule go, With restless full and rise, The steady shaft is still upright, Poising its little globe of light.

O, hand of God! O, lamp of peace! O, promise of my soul! Though weak and tossed, and ill at ease, Amid the roar of smiting seas-The ship's convulsive roll-I own, with love and tender awe. You perfect type of faith and law !

A heavenly trust my spirit calms t My sout is filled with light! The ocean sings His solemn psalms; The wild winds chant; I cross my palms; Happy as if to-night, Under the cottage roof again, Under the cottage tool as....,
I heard the soothing summer rain.

For "The Friend." Letter of John Barclay.

Sixth month, 1817. Whilst thinking of wri worship, acceptably praise, and truly give glory to so infinitely righteous and holy a Being. Thu alone are we brought inexpressibly to feel the beau ty of those scriptural or other writings, which dwel on the works of the creation; thus also are th faculties of our mind opened, enlarged, and quick ened to perceive and to adore the great First Caus of all. What a blessed experience, when ever thing within us and without us, the stars above us the dust under our feet, seem all to join with us and to show forth that Power which has madthem, and which supports and sustains this system this machinery of the universe. Surely the revolu tions and vicissitudes to which the spiritual as wel as the natural kingdom seems subject, the turning and overturnings, the storms and the calms, the darkness and the brightness, the dreary and the cheering prospects, the drooping and the delightfu seasons, are equally in the hollow of His hand who is said to be "all in all." He saith to the raging winds, "peace, be still," and to the foaming billow, "thus far shalt thou come, but no further." What, then, should be the invariable language of our hearts,—what should be the clothing of our spirits day and night, in all extremities, and under all the circumstances to which we are constantly liable, but "the will of the Lord be done." Oh that we might be privileged to continue from day to day and all day long, in such a prostrated humbled, reverential frame of spirit, as would in dubitably evince our belief in the presence, pro tection, providence and power of Him whom we profess to serve.

New Plastic Material. - A new plastic material resembling wood in its finished state, has been in vented. It may readily be moulded by pressure into any form, admits of cutting or carving to any Scotch Sheep in New Jersey .- Several Scotch extent required, may with facility be glass-papered or carton pierre, and in many respects superior.

1708. Forasmuch as some persons, who, by their ll conduct, have justly deserved and come under he censure of the meetings to which they belong, lave thought to get from under the weight of that udgment, by signing a paper of condemnation, and thereby suppose themselves discharged; it is, herefore, recommended to Friends' consideration, hat they be careful not to admit such persons too arly into fellowship, or give them cause to think hey are accepted, before the meeting or meetings re satisfied of their repentance and amendment, otwithstanding such paper be given.

arpenter, who was employed by Mason and Dixon, hen these mathematicians were employed to dene the line which still bears their name. This bservatory was erected for the purpose of ascertining the southernmost point of the city of Phiidelphia.

No conflict is so great or severe, as his who laours to subdue himself; but in this we must be onstantly engaged, if we would be strengthened erfection.

THE FRIEND.

FOURTH MONTH 13, 1861.

It may sometimes be a matter of doubt how far ne individual citizens are accountable for the acts f the government under which they live. ne power is arbitrarily exercised by one man, or here all political matters are in the hands of an ligarchy, or an aristocratic class, the common cople, having no voice in the councils of the naon, can hardly be held responsible for the meaires it may adopt, or the course it may pursue. ut in representative governments, where the real supposed will of the people is made known rough a legislature elected by a popular vote, nd carried into effect by means of an executive oranization, all classes represented are to be supposed ore or less chargeable with the acts of those whom ley have installed in official stations. This is onsonant with the maxim that the principal is as New 1076.

Save 1076.

The conduct of his agents in the lairs for which he employs them. In a republic mountains. The first arow fell about the middle of Noco ours, then, it is annarent that all those who! ke ours, then, it is apparent that all those who ke any part in influencing or controlling the govument, are more or less responsible for its follies nd its crimes, unless they maintain a consistent stimony against them; and that the culpability, erefore, must, in great measure, rest with the

the impress of domestic and social habits, and the lust of power and gain, cling to this debasing institution, and seek to perpetuate its existence and rivet still more firmly the chains of the poor bondsman; let us not look with indifference upon the cruelty and oppression practised by our government, upon the remains of that once powerful peothe intruders the rites of hospitality, and the generous grant of a peaceful home. With what generous grant of a peaceful home. feelings must every sensitive mind reflect upon the query, where are the descendants of that remark-The First Observatory erected in America, was able people now? If we call to mind the course Philadelphia, in Eleventh month, 1763, by a pursued by our government towards the tribes, that, one after another, have been exterminated, war carried on against those in the last fastnesses to which they have been driven, to escape the unsparing weapons of the civilized christian, can we individually feel that our red brethren have not feeling for them, perhaps, too great a contempt, anoth against us? From the shores of the Atlantic Some time before the termination of the sconts, the to the western steeps of the Rocky Mountains, but comparatively few vestiges of the millions of Abothe inner man, and make real progress towards rigines that once pursued the chase over the intervening country are now to be found, and with the same exterminating policy continuously pursued, those remains must ere long become extinct. Are the people as fully aware as they ought to be,considering their implication in the character of the war, carried on against the remaining tribes which roam over the Pacific slope, and which, year by year, is decimating their number, and rendering them more desperate and blood-thirsty?

We take the following extract from the North American, in order that our readers may have

poor Indians are subjected:-

SANTA FE, N. M., March, 1861. The campaign against the Navajos, ordered last fall

by Colonel Fauntleroy, commanding the department of ew Mexico, and commanded in the field, and just closed by Lient. Col. E. R. S. Canby, tenth United States infantry, has been one of the most successful and severe prosecuted against that tribe. Opening in September ognizant of the policy to be pursued, and to be with troops hastily put in the field, and such supplies ore or less chargeable with the acts of those whom all winter among the crags and canons of the Rocky Mountains, and through the snows of a region as cold as New York.

remoter. By the 20th of that month, ice was seven inches thick on standing pools. Tradition had held it impossible for active operations to be had in the Navajo country in mid-winter. The Indians have believed it. They have been better subdined by the hard determi-

nation by which one column after another was moved into the field this winter-the men carrying their blankets and part of the rations, marching day after day in urce from whence the power of the government the deep snow, and sleeping at night without tents, unnates,—that is, the people. This consideration while the thermometer fell ten and fifteen degrees below. usuates—that is, the people. In its consucration while the thermometer fell ten and fitten degrees below [load on band, no crops to be made this year, they must gight to bring home to each one of us a proper zero, without water other than melted snow, suffering perish as a people by starration—they must have peace, use of our accountability, and the need we have often, snow-blinded and frost-bitten, but following the be upon our guard, lest at any time we give our having could feel himself safe—than they could have under great hardships, have not only everywhere done to the contract of the energy and discipline of the tenergy and discipline and the tenergy and discipline and the discipline of the tenergy and discipline and the tenergy and dis a people by the analysis and the tenergy and discipline and the

away to the mission station. After taking promptly to escape our share of the punishment called forth making an aggregate of marching of about three thousand emetic, he ejected all the poison, and in a few by them, because they have been done by the peobours the effect passed off. No death has occurred by sassa-wood among these Cape people for The popular mind in the free States appears to traces of their recent presence were found. In the march early excited upon the subject of slavery, and from Abiquin, a party of sixty was broken up, to wear reactly has been ratified (before made) between Liberians and natives. The latter agree that no judgment of its evils and its sinfulness, so lottning sour to Puerta Similar, a small party was destroyed at among the different classes. But while we should make the dead of the Canon de Chelle. It was here the lamburgh among the different classes. But while we should make the did not be the class of their recent presence were found. In the march every day, the contraction of the class of their recent presence were found. In the march every day, and the march and all their property taken. On the thirty days because of the class of their recent presence were found. In the march every day, and the property taken. On the thirty days is th single companies have made scouts of less duration. In party was attacked, some killed, and large flocks taken. court, and the guilty be punished according to eyes of those, who, through the force of education, On this march both sides of the renowned Chelle canon the impress of domestic and social habits, and the were swept, and insucense trails were followed a bundred and fifty miles, until the Indians were scattered, and forced with their families and flocks upon the arid desert bordering the Colorado.

Affairs of the pickets were of nightly occurrence, sometimes a dropping fire keeping up all night. The men becoming at last so cool that they would let an Indian creep up, holding their fire until they were sure of him. A number were killed in this way. Some remarkple, who, when our ancestors landed on the shores able shots were made with long range rifles. Single of this vast continent, were in the undisturbed indians being hit, to the terror of their companions, at occupancy of its broad domain, and extended to eight bundred yards. Two parties were attacked at different times near the river Vuerco; they were broken up, captives being taken, their provisions destroyed, and the survivors left in mid-winter without food or cloth-A party was similarly routed in Chusca, north of fort Fauntleroy; a camp was found, some were killed, and a number taken prisoners. Two parties were en-

countered near fort Defiance.

Contrary to general expectation, the Navajos have no-where in this war offered battle. They seem to have given or obliged to remove from their hunting grounds up the struggle at the outset. They have fled from to make way for the white man, and the continued whatever force attacked them, and if pressed have deserted not only their flocks but their women and children, rather than fight in their defence. The troops who entered the Navajo country with exagperated ideas of

Indians were coming in begging for peace, and runners had been sent by them to call in the furthermost portions of the tribe. They were ready for any terms.

On the 15th of February a treaty was made, to which, it is said, all the prominent chiefs, thirty-two in number, have become parties, by which they not only bind themselves and their followers to keep peace, but agree to limit themselves to such part of the country os is assigned them, and to join their warriors with the troops for the exconsidering their implication in the character of the termination of any portion of the tribe which does not submit measures pursued—of the continued, relentless It is probable that peace will be permanent. That the Indians desire it is certain. It is equally certain that the border Mexicans will break it for plunder it they

These semi-barbarous half-breeds go, in the face of law and treaty, into the Navajo country as organized bands of robbers, killing and plandering. And when the Navajos chase them, as they always can, and carry the war in their turn into their miserable settlements, some idea of the dreadful sufferings to which the they come howling to the troops about depredations, and claiming, as United States citizens, protection.

It is hard for the Navajo mind to comprehend why the Mexican may plunder and kill him, but not he the Mexican, without the anger of the Great Father at Washington. It is a wise provision of the treaty, that the troops will protect the Navajos from Mexicans. It is difficult to ealize how much the tribe has suffered this winter. We can form some idea from the wretched, starving condition in which they came into the posts-eating the filthiest garbage, even picking the graius of corp from the ordure of animals for food. And by their sad story, the orange of animals for root. And of that six where they had hidden; they dured light no fires; there was much cold, much hunger." This, with a temperature below zero. Think of the women and children.

It is the first time this nation has felt the pressure of a long campaign. They have seen their country en-tered; their enemies unchecked for a day by the inclemencies of their winters, penetrating everywhere to their fastnesses; they have had no rest for months, and they have recognized at last the fact that no ruggedness of their country, or asperity of their climate, can stop their white foes in movements once determined. They feel that if this war is to be continued, themselves chased, their cattle hunted, their planting grounds known, no food on band, no crops to be made this year, they must

the department, that operations which it was thought, must extend themselves to a war of years' duration, have been so conducted that they have terminated in six months, and with a peace that will be lasting .- St. Louis Republican.

SUMMARY OF EVENTS.

EUROPE.-News from England to Third mo. 29th.

Parliament had adjourned over to the 8th inst. The London Building Association strike threatened to assume most formidable dimension. All the great contractors had determined to close their yards if the men continued to refuse their offers, thus throwing some forty-five thousand men out of employment. Preparations were making to import labourers from Belgium, where wages were lower than in England.

sprung a leak when three weeks out. After three days' unavailing efforts, she was abandoned with water up to the main deck. All of the six boats were lost in launching except one, which contained the captain, first, second and third mates, hoatswain, carpenter, five men and four passengers. This boat, after five days' exposure, reached the coast of Kerry. Two of the passengers died on landing, and the survivors were completely exhausted.

Negotiations were on foot for the steamship Great Eastern to convey to New York 1200 Mormon emigrants

from Germany, bound to the Salt Lake settlement.

The exports from Great Britain last year reached about \$675,000,000. Of this amount \$260,000,000 was in cotton goods and cotton yarns; \$80,000,000 in wooleas; \$60,790,000 in iron and steel; and \$33,000,000 in linen goods and yarns.

The Liverpool markets for cotton and breadstuffs fluctuated slightly, without material change

The London money market was active, and the applications at the bank were numerous, and for large sums.

Consols, 915 a 913 The Bank of France has reduced its rate of discount from six to five per cent.

The debate in the Corps Legislatiff clearly showed that there was no intention on the part of France to withdraw the French troops from Rome. It was declared that the French government would neither sacrifice the Pope to the unity of Italy, nor the unity of Italy to the Pope.

The Paris journals had received permission to publish

the Pope's allocation.

The statement that Austria intends aggressions upon Italy is denied. An imperial Austrian decree grants to the congregation of Lombardo-Vecetia the right of electing twenty delegates to the council of the empire. liberal ticket had been elected in Vienna, and the Hunnation to the fullest extent, but will not tolerate any infringement of the rights of the crown. The coronation of the Emperor as King of Hungary was to take place in Buda.

In Russia, the emancipation of the serfs is progressiog, on the following basis, as announced in an imperial decree, dated the 3d ult. "The proprietors of landed property preserve the right attached to the same. The landed proprietors are, however, to cede to the peasants, for their permanent use, the dwellings with the ground, which will be allotted to them anew by law, in consideration of the payment of dues. During this stage of things, which will form a transitory period, the peasants are to be designated 'tributary peasants.' The peasants are permitted by law to purchase their dwellings, and, with the consent of the landlords, the land also. The peasants will then become free landed proprietors. This new order of things is to be carried out throughout the empire within two years, and until then the peasants remain in their former state of dependence upon the landlords."

Discontent and disturbances continued in Poland; the policy of the government appeared to be concilia-children, 174. tory, and various concessions had been made in order to appease the prevalent ill feeling.

The Turkish government was greatly embarrassed for want of funds. The Levant Herald publishes the scheme of a forced loan of twelve millions Turkish pounds, which was under the consideration of the Porte, and likely to

banon, governed by Abd-el Kader, under the protecto-trate of France.

UNITED STATES .- The Political Troubles .- On the 8th inst., the State department at Washington replied to the communication of the Confederate State commissioners, declining to receive them in their official capacity, but expressing deference for them as individuals. The Secretary indicated a peaceful policy on the part of the government, declaring a purpose to defend only when assailed. Notwithstanding these pacific assurances. there is a strong feeling of apprehension in the South that the administration designs attempting coercion towards the seceding States. Extensive naval and military preparations have been going forward of late, under the orders of the federal government. About 2600 U. S. troops and a number of war vessels had been collected at the port of New York. Some of the ships had Many of the Lancashire wavers land turned out for shields wages, and some disturbances were entirelyied. Board troops and military stores. Notice that was a finished to the same of the object of the disconstration. One of the conjection of the object of the disconstration. tures is, that fort Pickens is to be reinforced; another, that the expedition is destined for Brazos Santiago, for the purpose of aiding Gen. Houston in suppressing Indian outrages on the frontier, and checking the exten-sion of disaffection into New Mexica. Fort Sumpter has not been evacuated according to the general expectation, and the authorities at Charleston, S. C., having become impatient at the delay, have concluded to bring matters to a crisis, by cutting off the supply of provisions from the city. A despatch of the 8th says, that Gen. Beauregard had ordered out 5000 troops, and that new batteries were being constructed. A large force was also being concentrated in the vicinity of fort Pickens, increasing the probability of a hostile collision in that quarter.—The Mobile Mercury urges the necessity for precipitate action on the part of the confederate authorities as the only means to check a reaction in favour of the Union. Alluding to the large furces concentrated at forts Sumpter and Pickens, apparently doing nothing but consuming the resources of the Confederacy, says, "The country is sinking into fatal apathy, and the spirit, and even the patriotism of the people, is oozing out under this do-nothing poliry. If something is not done soon, decisive, either evacuation or expulsion, the whole country will become so disgusted with the sham of Southern independence that the first chance the people get at a popular election they will turn the whole move-ment topsy turvy."—The warlike preparations at New York and various other points have acted unfavourably on the Virginia convention, strengthening the secession party in that body. On the 8th, the convention adopted resolutions appointing a committee of three delegates to wait on the President of the United States, with instructions to ask him to communicate to the convention the policy which the government intends to pursue in relation to the Confederate States. Some of the con-servative members declared that if the President's regarian diet was to meet for the first time in twelve years, sponse was unfavourable, they would then go for the The elections were going forward. The Emperor has secession of Virginia. The committee are W. B. Fresdeclared that he will respect the rights of the Hungarian (lon, A. H. H. Stoart and G. W. Kanduph). On the whole, the danger of civil war seems to be increasing.

The Southern Confederacy .- Notwithstanding the reported willingness of various parties to invest largely in the fifteen million loan of the new government, the fact appears to be that very little of it has been actually The banks of Savannah, Mubile and New Ortoken leans are appealed to for liberal subscriptions to the The State convention of South Carolina has ra loan tified the permanent Constitution of the Confederate States, by a vote of 146 to 16. In Texas, there was serious trouble with the frontier Indians, and hostilities were apprehended from the Mexicans on the line of the Rio Grande.

Stray Money Letters .- During the year 1860, 9790 letters containing money, were received at the dead letter-office, Washington. The total amount was \$52,154, being an average to each letter of \$5.32. More than nine-tenths of the letters and money have been sent out and delivered to the parties writing or mailing them.

New York.—Mortality last week, 434.

Philadelphia .- Mortality last week, 302; of consumption, 37; scarlet fever, 22; small-pox, 29; adults, 124

Copital Punishment in Mussachusetts .- The Senate has passed the bill abolishing capital punishment, by a vote

of 18 yeas to 16 nays.

U. S. Supreme Court .- The decease of Judge M'Lean which occurred on the 4th inst., leaves the Supreme Bench of the United States, as follows: Chief Justice be carried out.

It was also reported that the conferences would catron, of Tennessee; Campbell, of Alabama; Clifford, shortly be resumed at Constanticopie, at which a plan of Maine; Nelson, of New York; Giler, of Pennsylvania. will be submitted and supported by France, Russia and There are two vacancies, one in the fourth circuit which

not only to those who commanded the campaign, but to Turkey, for the creation of an independent State in Le- includes Maryland, Delaware and Virginia; and one in

The Eight Million Loan .- The advertisement of the Secretary of the Treasury drew a large number of bids. The offers amounted in the aggregate to more than thirty millions of dollars, at all rates, from 85 to 100. All the bids at 94 and upwards were accepted, amounting in all to \$3,099,000. The Secretary will receive offers for treasury notes, redeemable in two years, for the balance of the loan not taken. These, it is expected, will be taken at not less than par.

The Late Census -The superintendent of the census has informed the marshals in seceded States, that they cannot receive their pay from the government in any way, except by their taking drafts on government money in the possession of the seceding States, though belonging to the federal government.

Imports through the Gulf States .- Advices from the South state that all importations which pass New Orleans for St. Louis and other Mississippi ports, are subject to the supervision of the Confederate custom-house at New Orleans, formal bonds being required that the goods thus passed through will be landed at their destination, and not within the boundaries of the Confederate States.

FRIENDS' HORSES.

Friends coming to the city to attend Yearly Meeting or at other times, on the service of Society, can havtheir horses taken care of at the stable of the Montgo mery Hotel, N. E. corner of Sixth and Willow streets at the White Horse Hotel, Callowhill street, above Fifth at Watson's stable, Marshall street, below Brown; and at Robert Smith's stable, in Bristol, Bucks Co.

Friends, who make their home within the limits c the Southern District, whilst in the city attending th Yearly Meeting, or at other times, in the service of th Society, can have their horses accommodated at Con way's stables, north side of Prune street, between Fift and Sixth streets.

FRIENDS' ASYLUM.

Committee on Admissions .- Samuel Bettle, Jr., No. 14 N. Tenth street; Charles Ellis, No. 724 Market street William Bettle, No. 426 N. Sixth street, and No. 2 S. Third street; John C. Allen, No. 335 S. Fifth stree and No. 321 N. Front street; Horatio C. Wood, No. 61 Race street, and No. 117 Chestnut street; John M. Whi all, No. 1317 Filbert street, and No. 410 Race street Wistar Morris, No. 209 S. Third street; Nathan Hills Frankford; Elliston P. Morris, Germantown, and N. 805 Market street.

Visiting Managers for the month .- Richard Richard son, No. 522 Arch street; Elihu Roberts, N. E. corner Race and Jacoby streets; and Wistar Morris, No. 209 Third street.

Physician and Superintendent .- Joshua H. Worthing ton, M. D.

Have Chosen Thee in the Furnace of Affliction." "The good are better made by ill, As odors crush'd are sweeter still !

"Many of the trials of good men look like mi-ries, which yet, on the whole, appear to have aduced greatly to their happiness. Witness the my prayers which they poured out in these canities, the many seasonable and shining deliverces which succeeded them, and the many hymns praise they sang to God, their deliverer; so that y seem to have been cast into the fire on purse, that the odor of their graces might diffuse elf all around.

"Affliction is the good man's shining scene: Prosperity conceals his brightest ray; As night to stars, woe lustre gives to man.

"Every branch in me, said our divine Saviour, th more fruit. He purgeth it, that it may bring th more fruit. Thus, the pruning knife of aftion is applied to the true branches, to cut off their exuberances, and to render them more undant in the fruits of holiness. Hence it is rthy of remark, that the very trials which take ay the unfruitful branches, do by a skilful opeion of spiritual husbandry, promote the fertility those branches, which derive their nourishment a vital union to the parent stem.

"Afflictions, tho' they seem severe, In mercy oft are sent; They stopp'd the prodigal's career, And forc'd him to repent.

"When we grow wanton, or worldly, or proud, w doth sickness, or other affliction, reduce us e may say with David, 'Before I was afflicted, I nt astray:' and many thousand recovered sin-s may cry, 'O healthful sickness! O gainful ses! O blessed day that ever I was afflicted!' unbolts the door of the heart, that the word hath cisco. sier entrance.

"The heart which bleeds for other's woes, Shall feel each selfish sorrow less; The breast which happiness bestows, Reflected happiness shall bless.

"The Lord's people are not all equally called navigate the deep waters of soul-distress; but is frequently the lot of those whom he designs honor with eminent usefulness in his service; as a great building, the foundation is laid deep in portion to the height of the intended superucture. It is in this school of temptation and ercise, that they acquire the tongue of the learn-, and an ability to speak a word in season to m that are weary. By what they have them no augmentation is anticipated.—*Late Paper*. was passed through, they are taught to symthize with their fellow sinners under similar trials, d, likewise, how to give them advice suitable to afficts with a depraved nature, and the powers of rkness, is sanctified to keep them humble, watch-, and dependent, in their future course.

"Believers have their summer and winter sea-

ually pleasant, are perhaps equally profitable. n do without him."

ner's joys and sorrows, and qualified to bear one free from personal taxation.

another's burdens, to the fulfilling of the law of righteousness, a holy unity and fellowship is known whose fruit is peace and joy in the Holy Ghost. With hearts thus subdued and purified, the members of the one body are joined together in the bond of christian affection, to the banishment of ostentation, estrangement, and bigotry.

Quarters .- It is not our intention to enter into anything like a general report of the operations of the turns. There are, however, some few matters and whether they ought not to enter upon some im-American, and which are not at times sufficiently might 'go forth in this their strength,' in the deep inquired into. We are indebted to James Ross Snowden for his politeness in furnishing us with me. The sittings for business were no less trying have ever been met by that gentleman with kind- at the untempered, (if I may use that expression,) ness, and with frank and ample information. And or rather perhaps unleavened manner, in which and the Rocky mountain region, which may be christian conduct and conversation, are sometimes generally classed as the Kansas mines. During held. Oh! how little of an inwardly gathered the fiscal year ending July 1st, 1860, the amount and retired disposition do we see, how little of received from these diggings was 8622,000. Since that weighty concern and exercise of soul—that numbers,) \$400,000, and there are indications that fear, which were witnessed by those amongst us, they issue \$5 and \$10 pieces. These are of va- young convinced. Often had we the burden of the rious degrees of fineness, from 815-1000 to 838-1000-the standard of American gold at the Unit- acquaintances, and sometimes to strangers also: ed States mint being 900-1000-that of England we were in travail for one another's preservation, 916-1000, and therefore purer.

The silver mines of the Washoe region promise t only the green pastures and still waste, but to be very abundant. Last year they sent \$80,000 nocent, serious and weighty. For "The Friend."

John Barclay. The following memorandum appears under date of Sixth mo. 25th, 1817:

"I attended our Quarterly Meeting held this day, under a weight of discouragement, without all envy, strife, and jealousy, and every feeling of being able to feel anything alive within me. It seemed to some, however, to be an open time, a time of refreshment; the truly hungry and thirsty The Mint and i's Operations-Gold from all were shown what a blessed condition they were in; and they were directed to the Fountain of living waters, the living bread from heaven, whereby United States mint, which is located in this city, they might be nourished up into eternal life. There for our readers are fully acquainted with all the was also a supplication put forth on behalf of some, facts and figures as published in the monthly re- who were under discouragement and doubting things that are naturally of deep interest to every portant duty; and a desire for such, that they many copious and curious details. Our inquiries to me, and, I believe, to some others, who mourn first for the gold that reaches us from Pike's Peak these our meetings for the promotion of good order. that period and up to the present time, (in round abiding under the overshadowing canopy of pure the supply of bullion from that region will be here-after increased. Clark, Gruber & Co. have set a William Penn: 'Care for others was then much small mint in operation at Denver city, from which upon us, as well as for ourselves, especially the word of the Lord to our neighbours, relations, and treating one another as those that believed and felt God present; which kept our conversation inafter our own will and affection. We were bowed and brought into subjection, insomuch that it was visible to them that knew us; we did not think ourselves at our own disposal, to go where we list, or say or do what we list, or when we list: our liberty stood in the liberty of the Spirit of Truth; draw us from this retired, strict, and watchful frame. Our words were few and savoury, our looks composed and weighty, and our whole de-portment very observable. I cannot forget the chaste zeal and humility of that day; Oh! how constant at meetings,-how retired in them,-how firm to Truth's life as well as to Truth's principles! Thus far William Penn, and oh! that we could say, that anything like all this, did really and truly pervade our conduct now, as a religious body."

* Kill your Fish .- A Frenchman, who has recently visited Holland to inspect their fisheries, says, in speaking of them, that being surprised at eat fish that die by languor?

Gillott's Pens .- The works now carried on by Gillott, the English manufacturer of pens, are the Extracts from the Letters and Memorandums of these things. most extensive and most celebrated of the kind in the world. In one year, the number of pens made by them has amounted to upwards of one hundred ally declines; each time I go to see him he appears to two Yearly Meetings with her when quite your and eighty millions, and the weight of sheet steel still worse. This morning, on coming to his bed which to me was a time of favour; and instructi consumed in their manufacture to not less than one side, I thought he could not last the day through; hundred and twenty tons. A strip of thin sheet we see and believe his end is near; his sufferings gotten. I have hoped we may remember the steel of the proper width and thickness, is first prepared, by careful rolling and annealing. In this mur, satisfied with all we do for him. It requires be slack in endeavouring to do our duty to o state it is ready to be cut into pens by means of a some strength of mind to behold all, without be-children and those under our care, which, with t press, in which are fitted the proper tools for cut-ling and the blanks. The use of the press is to give yet to wear away, I hope thou may behold him a regulated amount of pressure to the tools fitted living once more. When the fever is low, he is; us for orace." to it. Two pens are cut out of the width of the quiet, easy, and sensible; his patience is sustained steel, the broad part to form the tube; and the all through, which is a great favour. I do plainly points are cut to such a nicety, that there is but see; though he has been largely afflicted these last piety, but more so as he advanced in life. He was little waste. The blanks are now taken to be four years, yet niercy has been mixed with it, and long be remembered by those who knew him; t pierced, and the little central hole and the side I have a belief in his case, that these afflictions, only remarkable for picty, but humility, self-den slits are cut by another press. These semi-pens which are but for a moment, or have been but as and benevolence. All his fellow-beings in any; are now placed in an annealing oven to make them for a moment, will work for him a far more ex-fliction, either outwardly or mentally, claimed ! softer, after which they are marked, by the sid of eceding and eternal weight of glory.

EVENING PRAYER.

I come to Thee, to-night,

In my lone closet where no eyes can see, And dare to crave an interview with thee, Futher of love and light!

Softly the moon-beams shine On the still branches of the shadowy trees, While all sweet sounds of evening on the breeze Steal through the slumbering vine.

Though gavest the calm repose
That rests on all—the air, the birds, the flower,
The human spirit in its weary hour,
Now at the bright day's close.

'Tis Nature's time for prayer; The silent praises of the glorious sky, The earth's glad orions, profound and high, To heaven their breathings bear.

With them my soul would bend In humble reverence at thy holy throne, Trusting the merits of thy Son alone Thy sceptre to extend.

If I this day have striven With thy blessed spirit, or have bowed the knee To aught of earth, in weak idolatry, I pray to be forgiven.

If in my heart has been An unforgiving thought, or word, or look,

If I have turned away From grief or suffering which I might relieve, Forgive me, Lord, I pray.

Father! my soul would be So would I be to thee.

Not for myself alone

And for my heart's best friends. My warmest prayers ascend.

For my Redeemer's sake.

Four Quaternions of Soldiers.-No book so dom in the short space of eight years, 1852-59, richly rewards study as the Bible. The closer and have exceeded in value the capital of the national more minute one's inquiries, the more striking often

of our colonies and possessions of late years has four, the casual reader would be apt to suppose dents to persons not on the cars. The number more than restored the proportions sent to foreign that "four quaternions" is a mere periphrasis for killed last year was less than half that of any year countries and to British possessions to what they sixteen, just as we say threscore and ten for since 1652, and the number wounded was also were twenty years ago—two-thirds and one-third; seventy. But a more careful reading of the narlies. There has been a gradual decline in the in 1840, foreign countries took £34,000,000, and rative shows that the expression is not a mere numbers of killed and wounded for eight years, British possessions, £17,000,000; and in 1859, periphrasis, but is used advisedly. Let us look at indicating more care by experience. In the past

the strictest manner practised in the Roman military imprisonment. This method was to chain the arm of the prisoner to the arm of a soldier. In case of escape, the laws of the service required the soldier to be put to death. This penalty effectually prevented collusion. Every other chance of escape seemed equally to be cut off. Even should the soldier fall asleep, any attempt of the prisoner to get away would awaken him. In the case of Peter, to make assurance doubly sure, we are told that he was chained to two soldiers, one to each arm. In addition to this, he was locked up in a cell, and the two soldiers with him. More even than this, it would seem that, at the same time, two other soldiers kept watch outside of the cell.

Here then we see why there was a quaternion. He was at the same time in the custody of four soldiers, two inside the cell, chained one to his right arm, and one to his left, and two outside of the cell keeping watch against any attempt at rescue. "Peter was sleeping between two soldiers, bound with two chains, and [also] the [two] keepers before the door kept the prison," that is, kept watch.

But why four quaternions?

The Romans divided the night into four watches, the first from six to nine, the second from nine to twelve, the third from twelve to three, and the fourth from three to six, or until the morning. This explains why there were four squads of soldiers assigned to this duty. Each quaternion was on duty during one watch, or space of three hours, and was then relieved by another.

This gives us also a pretty near approximation as to the time when the damsel Rhoda let Peter into the house where the disciples were assembled praying for him. A casual reading would lead to the supposition that this occurred some time in the early part of the night, say eight or nine o'clock in the evening.

Let us see. "Now as soon as it was day, there was no small stir among the soldiers, what was become of Peter." These soldiers had good rea-son to be uneasy. They knew well the rigor of the Roman discipline. In fact, they were all that very morning ordered to execution for allowing Peter to escape. Does this throw any light upon the time when he escaped? In which watch of the night was it? Not in the first, not in the se-cond, not in the third, for in either of these the discovery would have been made when the watch was changed, and the fresh relay of soldiers came to take charge. It was then in the fourth watch, between three and six o'clock in the morning, that Peter's rescue occurred. It was these last four who were thus miraculously overpowered with sleep, and who woke only at day-light to find their prisoner gone.

That prayer-meeting, then, must have lasted nearly all night, for they were still in session when Peter reached the house .- S. S. Times.

Railroad Accidents in 1860.—There were seventy-four accidents on the railways of the United eight years there have been 977 accidents to trains, Polycarp.

vain customs and fashions of the world, prevail over some of our profession, particularly in the excess of apparel and furniture, this meeting doth earnestly recommend, that all who make profession of the Truth, take care to be exemplary in what they wear, and what they use, so as to avoid the vain customs of the world, and all extravagance in colour and fashion; and keep themselves, in respect thereof, spotless and blameless, adorning their profession in all modesty and sobriety.

Oil Stories .- A practical man of business, who has industriously examined the Pennsylvania oil regions, says that the reports of large returns are inflated by those holding land; that instead of wells yielding twenty-five to thirty barrels per day, five to eight is a nearer amount; that the wells fail soon after being worked; that where one succeeds, two fail; and he believes that two hundred thousand dollars more have been spent than pro duced in the oil region.

THE FRIEND.

FOURTH MONTH 20, 1861.

The Yearly Meeting of Friends held in Philadelphia, is still in session when this number goes to press. The number in attendance is not quite so great as on former occasions. Some account of its proceedings will be given in our next number.

SUMMARY OF EVENTS.

The events now transpiring in the United States, are of so much greater moment than in any other quarter that we shall devote the whole of the space appropriated to the summary to domestic occurrences. These alas have been of a most melancholy character, presaging the immediate commencement of civil war.

Fort Sumpler.—On the 8th inst., an authorized mes-

senger from the President of the United States informed Gov. Pickens and Gen. Beauregard at Charleston, that provisions would be sent to fort Sumpter peaceably, it possible, otherwise by force. Gen. Beauregard communicated this information to the Secretary of War of the "Confederate States," and, on the 10th, received a telegraphic despatch from the government at Montgomery, direction him to demand the evacuation of the fort, and if this was refused, to proceed to reduce it. The demand was accordingly made on the 11th, and not being complied with, the batteries of fort Moultrie, Cumming's Point, fort Johnson, the floating battery, &c., which had been constructed so as to command fort Sumpter, openbeen constructed as a command of the succeeding morning. The bombardment was kept up through the day and at intervals throughout the following night, inflicting great damage on the fort, dismounting several of the guns, and setting fire to the barracks and officers' quarters. On the afternoon of the 13th, Major Anderson surrendered unconditionally. None of his men were killed, and only five wounded, but the rest were worn out, and physically incapable of continuing the contest, having been exhausted chiefly by their exertions in contending with the flames .- A Charleston despatch says, that Major Anderson and his men will be seet by the steamer lashel to New York. Two U. S. war vessels—the Pawnee and Harriet Lane-were off Charleston harbor during the bombardment of fort Sumpter, but took no part in the engagement.

Fort Pickens.—Gen. Beauregard, who made the mili-

tary arrangements by means of which Sumpter was so quickly reduced, has been ordered to conduct the attack on fort Pickeus. The naval expedition, which recently sailed from New York, was, it appears, intended to strengthen this fort. At the latest dates, a large force and an attack upon it was likely to occur at any moment

Proclamation of the President .- On the 15th inst., the

President issued the following:
"Whereas, the laws of the United States have been

1703. Under a deep sense that pride, and the pressed by the ordinary course of indicial proceedings, under arms, and ready to move at a moment's notice or by the powers vested in the marshals by law.
"Now therefore, I, Abraham Lincoln, President of the

United States, in virtue of the power in me vested by the Constitution and the laws, have thought lit to call forth, madness and folly are not wholly reliable, the statements and hereby do call forth the militia of the several States of the Union, to the aggregate number of seventy-five thousand, in order to suppress the said combinations, and to cause the laws to be duly executed. The details for this object will be immediately communicated to the State anthorities through the War department.

"I appeal to all loyal citizens to favor, facilitate and aid this effort to maintain the honor, the integrity and bours in the United States; that this House, without exthe existence of our National Union, and the perpetuity of the popular government, and to redress the wrongs

already long enough endured.

"I deem it proper to say that the first service assigned to the forces hereby called forth, will probably be to repossess the forts, places and property which have been seized from the Union, and in every event the utmost care will be observed, consistently with the objects aforesaid, to avoid any devastation, any destruction of, or any disturbance of peaceful citizens in any part of the country.

"And I hereby command the persons composing the combinations aforesaid, to disperse and retire peaceably to their respective abodes within twenty days from this

" Deeming that the present condition of public affairs presents an extraordinary occasion, I do hereby, in virtue of the power in me vested by the Constitution, con- troops. vene both houses of Congress. The Senators and Representatives are therefore summoned to assemble at their respective chambers at twelve o'clock, noon, on Thursday, the 4th of July next, then and there to consider and determine such measures as, in their wisdom. the public safety and interest may seem to demand.

and cause the seal of the United States to be affixed. "Done at the City of Washington, this 15th day of April, in the year of our Lord, one thousand eight hun-

dred and sixty-one, and of the Independence of the United States, the eighty-fifth.

"ABRAHAM LINCOLN. (Signed,)
"By the President.

" WM. H. SEWARD, Sec. of State."

The Virginia Commissioners .- On the 13th, the commissioners from the convention had an interview with the President of the United States. His answer which was given in writing, was simply a statement that he will endeavour to act according to the inaugural programme, hold the public property, and defend it, waging no war against the seceding States, and maintaining the defensive. He further stated that the postal accommodations might probably be withdrawn from those States.

Preparations for War .- The following are the requisitions of the President upon the Governors of the several States for military to act in the defence of the Union. New York is called on to furnish 17,000 volunteers Pennsylvania, 16,000; Illinois, 6,000; Indiana, 6,000 Missouri, 4,000; Kentucky, 4,000; Ohio, 3,000, &c. amounting in the aggregate to 75,000 men. On the 15th the Legislature of New York passed a bill appropriating \$3,000,000 to equip thirty thousand volunteers, in addition to the present State force, and the Governor issued his proclamation accordingly. Prompt measures were also taken in Pennsylvania, Massachusetts and other States to furnish the contingent required of them. The banks of Philadelphia promptly offered the Governor the use of all the funds required for the purpose. In Maryland, the feeling appeared to be of a divided character It was declared on one hand, that there would be a determined opposition to the passage of Northern troops through Baltimore—yet the prevailing sentiment was in favor of sustaining the U. S. government. The course of Virginia remained doubtful. On the 13th, it was openly stated in debate in the convention, that the Southern army would march through Virginia to the North, and thousands would join them. Active preparations were being made at Washington to repel the apprehended attack from that quarter.

The Southern Confederacy.—The capture of fort Sump-ter is stated to have produced a state of wild excitement at Montgomery. A formal declaration of war against of the Confederate troops were assembled in the vicinity, the United States was expected as soon as the Congress could be called together. In a speech made by Walker, the Secretary of War, he declared his belief that the Confederate army would soon have possession of Washington. A despatch of the 15th states that parties in New Orleans had offered to take the whole of the Confor some time past, and are now, opposed, and the exe- federate State Loan of fifteen millions at par. Another tor some time pass, and are now, opposed, and the exe-jederate loads to intend minions at join Annual cution thereof obstructed in the States of South Cares lates that Gov. Magolin, of Kentucky, and Senator lina, Georgia, Alabama, Florida, Mississippi, Louisiana, Brecking and given assurances of their sincere symmet Texas, by combinations too powerful to be sup-jetthy with the South, and that thousands of men were

from the War department at Montgomery. It should, however, be borne in mind that the telegraphic offices are in the hands of the secessionists, and in this time of being, probably, highly coloured, if not false.

What our neighbours think .- When the intelligence of the bombardment of fort Sumpter reached Halifax, the Legislature, amidst intense amotion, passed the following resolution by an unanimous vote. "Resolved, that this House has heard with the deepest sorrow and regret of the outbreak of civil war among their friends and neigh tween the contending parties, sincerely lament that those who speak their language, and share their civilization, should be shedding each other's blood, and desire to offer up their fervent prayers to the Father of the uni-

verse for the restoration of peace."

Southern Anticipations.—Information having been received at Montgomery, that Virginia would probably very soon secede, Vice President Stephens telegraphed in reply, should Virginia unite with the Southern Confederacy, it is understood that President Davis will va cate his seat at Montgomery, and the Vice President will assume his duties, and make Richmond the head quarters within ten days. Gen. Beauregard will be made second in command. Gen. Bragg will take care of Pensacola, by authority. Gen. Pillow has just arrived here. and offers President Davis a division of the Tennessee

The Effect in the Northern Slave States .- The President's Proclamation has, it is said, produced a strong feeling of indignation in Virginia, North Carolina and other States. Their secession is said now to be almost inevitable.

RECEIPTS

" Mansfield, Ninth month 1st, 1832.

Truly, I think an awful responsibility rests n some of the promoters of the schism. They e come out in open violation of the commands Him, whose kingdom is not of this world, and se servants cannot use violence, even to secure hemselves their civil rights. The humble faithfollowers of the Lamb, whose allegiance to him ure, are bound to observe the command, 'all gs, whatsoever ye would that men should do ou, do ye even so to them.' But Friends have a deprived of their meeting-houses and other veniences, by those who have departed from the h of their ancestors. Their fruits manifest of om they are, and from whence their faith comes. ay who are in their ranks have been deceived, are to be pitied, seeing they are in danger of aki g with them of the plagues of their self-, undue liberties and other hurtful things, the ts of unbelief. If ever the tender minds, who among them, partake of the heavenly sap which s from the true vine, and bring forth good fruit, must come out and be separate from them; that there are tender plants among them, I e no doubt. Never before now, whilst contendfor the faith once delivered to the saints, have It more grateful for the privileges which are to enjoyed in our religious Society; and I esteem invaluable favor to possess true faith in 'Jesus Vazareth, King of the Jews;' who suffered un-Pontius Pilate, who rose again from the dead, ever liveth to make intercession for us, and is the preserver and protector of his people."

"Pleasant View, New Jersey, Ninth mo. 15th, 1832.

Piety is the brightest ornament, and the best

For "The Friend." John Barclay.

The following remarks penned in the Fifth month, 1817, are deserving the serious considera-

tion of our younger readers especially:

"I think I have heard a remark, made by some amongst us, tending rather to the injury and prejudice of them that give place to the sentiment,namely, that persons should not let their outward profession and appearance outstep their inward and real condition and character. This sentiment sounds very well, and perhaps is sound with some qualifications. It is, however, in the neighborhood of error; and therefore should be cautiously received and acted upon. For, verily, the reason why I or any others have adopted a strict appearance in dress, address, or other particulars, is not that we thought ourselves better than those who have not found this strictness expedient for them; nor is this strictness of profession among men, any certain or safe mark of taking up the cross of Christ.
"The cross that we have daily to take up, as

followers of a crucified Saviour, is a spiritual cross, a cross to our appetites, passions, affections and wills. The crucifying power will, no doubt, after cleansing us from all manifest wiekedness, cleanse also and purify our very thoughts and imaginations, our very secret desires and latent motives; and amongst these, will it also destroy 'the lust of the eye, and lately returned from a year's visitation of the Isthe pride of life,' with all the fruits and effects land :thereof, which have crept into, and are so apparent, in the daily conduct of men of the world. Thus no doubt remains with me, but that if we, as a society, were more universally subject to the the bona fide property of the black people. Estioperation and purifying power which we profess to believe in, there would be found more strictness these men who were but recently slaves, had even in minor matters than is now seen, and greater accumulated landed property worth £1,050,000. necessity for circumspection, scriousness, and a Valuing the houses they had built at only £10 continual standing in awe."

A Sparrow Caught by an Oyster .- The Birmingham Daily Post narrates the following incident, which occurred on the premises of - Potter, A neighbour, passing through the yard, observed a in number at least, belonging to the black people, sparrow fluttering in a frantic manner on the top release himself from the unpleasant detention. He people were gaudily dressed, for in fact the congreof a heap of oyster-shells, as though struggling to found that the leg of the poor bird had been caught Put down the value of their clothes at £1 each firmly in the grip of a young oyster which was attached to the outside of one of the discarded shells. person, it would give £386,000. Valley of Baca.

Who passing through the valley of Baca make it well.-Ps. lxxxiv. 6.

The valley here metaphorically spoken of, situated in the northern part of Palestine. It extensive, stretching from the Mediterranean t wards the upper end of the sea of Gallilee, and famous for the multitude of its mulberry trees. T Arabic name is Buha'a, which has the same sign fication as the Hebrew Baca. Henry S. Osbor in his late work on Palestine, says: "The wo Baca originally signified neither 'weeping' n 'mulberries,' as has been supposed to be the mea ing in this passage, but simply 'distilling in drop just as the same form in the Arabic at present s nifies. This seems to be the radical meaning. B the desolate spirit, distilling its sorrows out in tea suggested to the oriental imagination this term describe 'weeping;' the tears being the drops d tilled from a sorrowing heart, they were adopt as a secondary meaning of Baca. The mulber tree, when bruised or pierced, always distils sap out in drops—a fact which is familiar to man This would naturally suggest the idea of tears.* Thus the sentiment appears to be, ' Happy are th who, passing through the humiliation where wee ing abounds, yet can make sorrow a source refreshment.' The various meanings are doub less all derivative from the signification giv-

The joy arising from sorrow is thus beautiful expressed in a cluster of the finest oriental figure "Who passing through the valley of Baca make a well; the rain also filleth the pools."

The Breweries of London,-Of the sevente great London breweries, the house of Truema of the list, having consumed 140,000 quarters malt, and paid to the excise £180,000, or enoug to build two ninety-gun ships, at the usual cost a thousand pounds per gun. The visitor in proceeding through this establishment realizes, perhaps, bett than in any other place, the enormous scale which certain creature-comforts for the use of the town are produced. As he walks by the hu boilers in which 1600 barrels are brewed near ever day, or makes the circuit of the four gre vats each containing 80,000 gallons of liquor, loses himself among the labyrinth of 135 enormo reservoirs, which altogether hold 3,500,000 gs lons-he begins to fancy himself an inhabitant we know not, but it is an ascertained fact that t depth of water in the London wells has for the la twenty-five years been diminishing at the rate of Men love to act from their own judgment, and foot a year. "It is comforting to reflect," said o a half of people."-Late Paper.

The report of the committee on the Treasurer's account was read, and the sum proposed to be raised for the use of the meeting during the cur-rent year was approved. The committee also proposed a Friend to succeed the former Treasurer, now released; who, being united with, was appointed to the service.

The business being all gone through, and the minutes read, the meeting settled into solemn silence, and after thus sitting for a short time, it concluded; to meet again at the usual time next

SUMMARY OF EVENTS.

The Coming War .- Fort Pickens has been reinforced, and has now a garrison of 800 men. The attack apon it had not commenced at the latest dates, but telegraphic communication with the South is now irregular. A large force of Confederate troops had been collected in the vicinity of Pensacola.

Harper's Ferry, Va.—The U. S. officer at Harper's Ferry having received intelligence that a force of 2500 troops had been ordered by Gov. Letcher, of Virginia, to take possession of the U.S. armory and public buildings at that place, and finding his position untenable, destroyed, on the 19th inst, all the munitions of war, arms, arsenal and buildings by fire. He withdrew his small command under the cover of night, and, almost in the presence of a large body of Virginians, retreated into

The Southern Confederacy .- On the reception of the Presidential proclamation calling upon various States for volunteers to defend the capital, recapture the U. S. fortresses, &c., Jefferson Davis, President of the Confederacy, issued his proclamation inviting all persons, who may desire, to apply for commissions, or letters of marque and reprisal, to enable them to act as privateers, and capture vessels belonging to citizens of the United States. A despatch from New Orleans states, that several vessels were being fitted up for that purpose, and would soon sail. Orders have been issued by the Navy department at Washington to the officers of the various United States vessels, that all persons found sailing under the letters of marque and reprisal issued by the Southern Confederacy, should be treated as pirates.
President Lincoln has also issued a proclamation aunouncing a blockade of the ports of the revolutionary He says that a competent force will be posted States. so as to prevent the entrance and exit of all vessels from

the said ports. The War Spirit has been aroused into fearful activity throughout the entire land. As soon as it became obvious that the National administration was determined to maintain the authority of the United States in the seceded States, there appeared a general determination in the more Northern slave States to make common cause with them, and present a united South in opposition to the government. The Governors of Virginia, North Carolina, Tenoessee, Kentucky, Missouri, &c., promptly and decidedly refused to comply with the President's and decidedly refused to comply with the resolution of the decided of troops, one of them, in replying to the ed together again by the Governor. They are required secretary of War, said that his State (Tennessee) would to assemble on the 30th inst.

The Latest.—On the 23d, there had been no intelligence of the corresponding to the control of the corresponding to the correspondin necessary for the defence of their Southern brothers. The number of men under arms in the slave States is believed to be very large, and they are said to be well prepared for the contest, and eager for its commence-ment. On the other hand, the demand for volunteers has been freely responded to in all the free States; in giments held possession of Annapolis, and it is stated various places many more men offering their services than were called for. All party opposition has ceased, and the spectacle is presented of the noited North against a united South. There is also seemingly the determination on both sides that the struggle shall be sharp, short and final.

Maryland .- It had been threatened that the passage of Northern troops through Baltimore would be resisted, but some of the first detachments of volunteers from Pennsylvania were permitted to go through on their way to Washington, without molestation. On the 18th way to washington, without molestation. On the 18th inst., a regiment from Massachusetts arrived, closely followed by a large number of volunteers from Philadelphia. The street through which the cars passed, was filled with an excited mob of angry men, who assailed the troops with stones and firearms, killing several, and wounding many more. The Massachusetts volun-

were compelled after much ill usage, to return to Phila-delphia. Gov. Hicks subsequently informed the Go-teron of Penanyl vania by telegraph, that no more troops would be allowed to pass through Baltimore. The bridges of the Philadelphia, Wilmington and Baltimore Railroad Company, between Havre de Grace and Baltimore, and also those of the Northern Central Railroad, have been burnt or destroyed in some way, by the secessionists, so as to prevent the passage of troops on vols, 33 and 34, those lines.

Virginia. - The ordinance of secession was passed with closed doors, and, it is said, with only seventeen negative votes. The public property at Richmond was immediately taken possession of. The New York steamer Jamestown and a schooner belonging to Maine, were seized. The main entrance to the barbor of Norfolk has been obstructed by order of the Governor of Virginia, in order to prevent the departure of the government vessels lying there. The navy-yard has not yet been taken possession of by the revolutionists. The war vessels will probably endeavor to defend it. The Governor has ordered all the military of the State to hold themselves in readiness for immediate orders, and to be prepared for efficient service. A large force is reported to be assembling at Harper's Ferry, it is supposed, preparatory to a move upon Washington.

The Defence of Washington. - Notwithstanding the hostility of Maryland, many troops from the North have in various ways reached Washington, and many thousands more were on their way. On the 21st, a fleet of steamers left New York, with about 4000 men on board, intending probably to ascend the Potomac, or land below Annapolis, Md. The garrison at forters Monroe has been strengthened by the addition of 1000 men from Massachusetts. It is said that about 35,000 men will be required to defend the capital, and keep open its communication with the North. There is understood to be a want of the various munitions of war on such a large scale, as it is anticipated they will be needed.

Kentucky.-Ex-Vice President Breckinridge addressed a large audience in Louisville, on the 20th. He denounced President Lincoln's proclamation as illegal, and proposed that Kentucky should present herself to Congress when it meets on the 4th of Seventh month, and protest against the settlement of the present difficul-

es by the sword.

The Star of the West loaded with provisions belong. ing to the United States, was captured off ladianola, Texns, by volunteers from Galveston. The vessel was

noarmed, and made no resistance.

Communication with the South.—The Secretary of the

Treasury has directed the Collector at New York to grant no more clearances at the custom-house for ports south of Baltimore. This will probably cut off the war supplies which the revolted States have so far been receiving freely from the North. The Northern railroads refuse to carry munitions of war to the South. The Secretary of War has informed the President of the Baltimore and Obio Railroad that a refusal to carry the troops or volunteers of the United States is treason, and that to transport the troops of the rebels will be regarded as a like crime.

Pennsylvania. - In consequence of the threatening aspect of affairs upon the southern border of the State, the Legislature, which has just adjourned, has been call-

gence from the South for several days, by either mail or telegraph. Persons who left Washington on the 21st, report that the greatest cause of apprehension felt there, arose from the hostile feeling in Maryland. In Baltimore, the secession mob ruled. One of the Massachusetts rethat several thousand men from Pennsylvania, under the command of Colonel Delafield, of the U.S. army, were, on the 22d, at Cockeysville, thirteen miles north of Baltimore. It is reported from Washington, that a correspondence has been opened with the Baltimore authorities resulting in an undertaking on the part of Baltimore to repair the railroad bridges and telegraph lines and to keep open the communication for passengers mails and despatches, us well as the troops. Fort M'Henry near Baltimore has been reinforced. Another report, apparently authentic, is to the effect that the Norfolk and Gosport navy-yards had been destroyed by fire to prevent their falling into the hands of the Virginians, who were preparing for their capture. In addition to the destruction of property in the yards, all the vessels there, including the ships Pennsylvania, Columbus, Delaware, Raritan and Merrimac, were scuttled and sunk and finally rot through and reached Washington, but arms on them thrown overboard. The only vessels re-

whatever way may appear most likely to advance the Pennsylvanians who were generally without arms, tained, with which it was intended to carry away the

Philad., Second mo. 5th, 1861.

DIED, in this city, on the 19th of First month last, MARY L., daughter of Isaac and Rachel Hibberd, of Marshalton, Chester county, Pa., aged nearly twentyfour years. Her amiable disposition, unobtrusive man-ners, and circumspect walk through life caused her to be much beloved by those who knew her. The night previous to her decease, she was fervently engaged in prayer that some evidence of acceptance might be given her, which was graciously granted. The family being collected, with childlike simplicity, she spoke of that city, an admittance into which she was permitted to an assurance of, and exhorted those around her to be good, that they also might be received therein. After a renewed season of conflict, being again favored with quiet assurance, she spent some time in giving advice to those around her, and leaving some for absent friends, the purport of which was, that they might be faithful to the instructions of the inward monitor, and thereby secure an entrance into the mansions of rest. Soon after this, she was permitted to pass quictly away, as her friends have cause consolingly to believe, into everlasting rest.

- on the 22d of Third month, 1861, at the resiof her nephew William Kite, in Birmingham township, Chester county, Pa., MARY KITE, a minister of the gospel, in the sixty-nioth year of her age. She had been, from early life, of an orderly, circumspect walk and having endeavoured to serve the Lord faithfully, in the work to which she was called, whilst ability of body was afforded, she was permitted to look at the termination of her earthly pilgrimage with holy hope. "Not by works of righteousness which we have done, but of his mercy he saveth us, by the washing of regeneration and the renewing of the Holy Ghost."

—, on the 13th of Third month, 1861, in the eighty-

fourth year of her age, LYDIA STOKES, widow of the late Joshua Stokes; a valuable and beloved member

BIOGRAPHICAL SKETCHES

Of Ministers and Elders and other concerned members of the Yearly Meeting of Philadelphia.

(Continued from page 237.) JOSHUA BROWN.

On the 18th of the First month, 1776, Joshua Brown and companion were at a meeting at Burlington, wherein he had to incite those present to obedience to the knowledge they had received. He pressed them to examine the foundation on which they were building, that as a time of trial seemed cause of thankfulness, as was also the sense that near, even at the door, they might be enabled to withstand all that might assail them. He exhorted them to live and act consistently with the peaceable principles of the gospel of Christ, bearing a faithful testimony against war and warlike feelings. On the 19th, they attended a meeting at Mansfield-neck, in a school-house, near Samuel Woolman's. Here Joshua mentioned the saying of our Lord to Peter, "When thou wast young, thou girdedst thyself, and walkedst whither thou wouldest: but when thou shalt be old, thou shalt stretch forth thy hands, and another shall gird thee, and carry thee whither thou wouldst not." Commenting on this, he showed the necessity there was for brought upon them, with christian firmness and us all, to refrain from following the promptings of the natural man, and to witness a being led by the Holy Spirit, which would open the way for us into all righteousness. The unspeakable importance of committees were labouring in many places with lars. New York ships cost about sixty dollars per witnessing a real change of heart, was also set their members to incite them to faithfulness in all ton. In Maine, the average is from forty-five to forth. On the 20th, they had a meeting at Old their religious testimonies, and to walk in obedience fifty dollars per ton. There are six or eight ports in Springfield, in which he laboured to persuade the people to come under the direction and govern labours, and the powerful visitations of the Holy ment of the Holy Spirit, which would redeem them Spirit, acting without doubt the more powerfully, in from the spirit of the world, the spirit of war and this season of sorrow, when outward comforts seemed unsettlement. He pressed on Friends to endea- so much abridged, was visible throughout the counvour to keep their minds quiet and composed, out try. Simplicity in language and demeanor inof the agitations which prevailed amongst those creased, the attendance at religious meetings grew around them. They lodged that night at the more abundant; a growth in grace seemed appahouse of William Lovett Smith's, and on the 21st, rent in many, and the spring of gospel ministry had a meeting at the Mount. In this meeting he was more freely opened, and many were called to was led to treat of the former dispensation, and labour therein. Joshua Brown had a large share how the Lord taught the old world, by appearing of labour, and not a small one of suffering, durto the patriarchs and instructing them, giving them ing these days when, through sorrows, the heaventhe covenant of circumcision and "the law by the ly visitation of boundless love was extended to the disposition of angels." He then referred to the church. new covenant dispensation, which had been spoken of and foretold by the Lord's prophets, and was introduced by the coming of the Lord Jesus Christ himself. In this the Lord was the teacher of his people through the spirit of his dear Son. This dispensation was more glorious than that of the law, reaching in its effects to the thorough purifying of the heart through the new birth unto holiness, which, through submission to the baptisms of very fact of being in a different province from that the Holy Spirit, might be witnessed by every hu- in which he resided, would be considered as a susman being. The necessity of this regeneration, in picious circumstance, at such a time. order to obtain favour with God, and an entrance into his everlasting kingdom, was closely pressed and believing that he who called him forth, would At a meeting at Upper Springfield on the 22d, the either protect him in the service, or strengthen him At a meeting any property of believing in and submitting to the ef-to bear whatever might befall him, he spread the fectual baptism of Christ, and knowing the work matter before the Friends of his meeting, and obof regeneration to be perfected in the heart, were taining their sympathy and unity, manifested by spoken to. Spending the night at the house of the necessary certificates, he prepared for the jour-Sarah Newbold, they, on the 23d, were at Mansfield Meeting, wherein the audience were incited to seek after a preparation for the approach of death, which, he told them, was a trial even to the righteous. The Lord would prepare his dependent ones for the great change of putting off mortality. He was now, by his dear Son, speaking to us, even as was declared by the prophets should be the a vein of coal, of unsurpassed quality, and appacase, under the new covenant dispensation.

Lodging at Joseph Dewer's, they, on the 24th attended Bordentown Meeting, in which Joshua's

Joshua was constrained to lift up a voice of supplication for the people.

Lodging at Benjamin Linton's at Crosswicks, they, on the 25th, attended meeting there, then rode to Burlington, and on the 26th, reached Philadelphia. They found great difficulty in getting a passage over the Delaware, the river being full of running ice. They attended meetings in Philadelphia on the 27th, and on the 28th, rode towards their homes, which they reached on the 29th. Joshua says, "Found my family well, which was the great Master had been with me in my long journey, supporting me with strength of body and of mind to labour so as to obtain peace. To the Lord of all our mercies be thanksgiving and praise forever-nothing is due to man, or to the sons of position in ship-building during the same time men, but all glory and honor be ascribed to the Anthor of all good, both now and forever."

It was now the opening of the Revolutionary War, and Joshua was, during 1776 and 1777 much engaged near home in gospel labour for the strengthening the hands of his Friends in the support of their christian principles, and in encouraging them to bear the trials which faithfulness

resignation.

This season of affliction was a season of renewed

Towards the close of the year 1777, he gave way to a persuasion of duty he had long felt, of visiting, in gospel love, Friends and some others in Virginia, North and South Carolina. It was a perilous time to be far from home, contending armies were likely to cross his path, and he knew not but that one or the other party might take his life or deprive him of his liberty, on false charges. The

However, as the concern was not of his own will,

USEFUL ANNA. "What a useless life I live!" Thought a tender little one, have nothing I can give, And the errands that I run.

Are so trifling and so few, They but little helpings prove; Oh, I wish that I could do, Greater works of use and love."

Anna has a bumble heart, But the love which nestles there, Does sweet thoughtfulness impart, And for usefulness prepare. Ever prompt, as flies her days, Little helpings to bestow, In an hundred different ways Does her loving-kindness flow.

Does she see her mother need, Or her needle or her thread, Softly nimble is her speed, E'er a hinting word is said. Thus it proves when mother turns, And by eye or tangue inquires, By her side she oft discerns

Just the thing that she desires. There is never child so small, But if love thoughts warm and true, From it floweth out to all Kindly actions it may do.

E'en a gentle little word, Which its loving lips can speak, May, with pleasantness, be heard, By the sorrowful and weak,

This is gentle Anna's way, Though she feels of little use, Her small kindness every day, Does great comfortings produce. So her father and her mother,

Do with smiles her works approve, And her little baby brother Crows to see her looks of love. Every kindred heart o'erflows,

In our loving Anna's praise As the sweetest flower that grows, By our pleasant household ways. Thus she proves our greatest joy, And our brightest smile of peace,

Whilst in love her sweet employ, Ever seemeth to increase.

For "The Friend."

Steel Pens.

Our readers will probably remember the article inscrted two weeks ago on the manufacture of el pens, by one of the largest makers in Engad, from whence and from France, nearly the sole of the pens used in this country are ex-

It is a remarkable circumstance that up to a ry recent time, our country has been almost en-

ely dependent upon foreign supplies of this usel and almost indispensable article. We have w a manufactory almost in our midst, in which, th machines of the newest description, and the d of experienced hands from England and France, ought over with a view to instruct our own people, whom they are now employing a considerable mber, they have succeeded in producing pens in ery respect, it is believed, equal to the best imrted. This is as it should be-and we hail the tablishment of such a branch of manufacture th satisfaction, as another element in our national ogress, although it may be comparatively subor-pate. They are turning out a large quantity of r friends, R. Esterbrook & Co., will be rewarded the ready preference for these pens accorded by e American public. Their factory is just across e Delaware, opposite the Market street ferry, d is for its novelty quite an object of interest, ing the only establishment of the kind in the

THE FRIEND.

FIFTH MONTH 4, 1861.

Are we performing our duty to those around us? This is a very serious inquiry, and worthy of the most attentive consideration of us all; yet it is with no desire to press it at this time except on one point, that these lines are penned. The report of the book committee, as read in our Yearly Meeting, shows a diminution in the number of books, setting forth the doctrines and principles of Truth as most surely believed by us, distributed

a blessing from the Divine Source of all goodness, as to prove of lasting advantage to the reader. remember to have read of a bookseller, who, on being called upon by a very foppishly dressed man for a play-book, handed him a religious work instead. The man used some profane language, and properly dressed, and after expressing his gratitude to the bookseller for persuading him to take the book, and his thankfulness to his heavenly Father, who had incited him to do it, he ordered a number of copies of the same work for distribu-

It is related that Venn, the author of "the Complete Duty of Man," was so pleased with the kind conduct of a waiter in an inn, in the west of England, who, whilst the other servants were laughing at the embarrassment a driver of some refractory pigs experienced, went out promptly and assisted him, that he gave him a copy of his own publication. Many years after, a person, being in the west of England, found an innkeeper, who was a religious man, and on inquiring found that he was the waiter, who had received the present but his wife and some of their children, had received deep, religious impressions from the book, work of regeneration mercifully carried on within ing of attachment to the Union. them

Many instances are recorded of individuals convinced of the principles we profess, by reading the writings of our early Friends. Those writings have lost none of their truthfulness, from age, and to the soul thirsting after Divine knowledge, they may still, through the Lord's assisting spirit, prove as cool water in a time of drought.

SUMMARY OF EVENTS.

The Revolution .- The Virginia ordinance of secession The Revolution.—The Villams definition to Secessian does not go into effect until ratified by a majority of the votes of the people of the State. The election is to be held on the 23d inst. The warlske preparations in the North have caused much alarm in Virginia. Governor Letcher has, it is asserted, notified the President that no troops from Virginia will be permitted to attack the capital, and that he will not permit troops from the Confederate States to cross Virginia for that purpose.

Maryland.—On the 27th ult., telegraphic communica-tion with Baltimore was re-opened after a week's suspension. Up to that day, about 12,000 Northern troops had arrived at Annapolis on their route to Washington. The railroad was guarded throughout its whole length, and the transit over it for the volunteers and army supplies was uninterrupted. On the 26th, the Legislature assembled at Frederick. In his message to that body, the Governor states that he had earnestly, but in vain, remonstrated with the federal government against the cause of humanity. passage of troops across Maryland for the defence of Washington; recommends them to act prudently and cautiously in dealing with the difficulties in which the neutral position in the impending contest. It is reported that a majority of the Senate is averse to secession, but that the Southern Rights party have the control of the House of Representatives.—The Pennsylvania volun teers who were encamped at Cockeysville, were ordered quoted at 68£ 20c.
back to Pennsylvania, in order to avoid another conflict at Baltimore.

Destruction of Public Property .- The burning of the navy-yard, ships of war, &c., at Norfolk and Portsmouth, Va., is confirmed. The destruction was very great, but taken for its reorganization were debated on the 18th not complete, much valuable property having fallen into ult. Garibaldi made a speech so violent, that it excited

were about 5000 of the Confederate troops there, who his comrades in arms, and said that the formation were suffering seriously from sickness and exposure. three divisions of volunteers as decreed, was not suf Eight U. S. war vessels were lying there, ready to assist in the defence of the fort.

Washington .- The Northern troops were daily arriving from the landing at Annapolis, and a formidable force would soon be collected at the capital. The U.S. stead. The man used some protate language, intimating what he would do with it; but, on further conversation with the bookseller, took it, promising to read it. A few weeks afterwards, the further conversation with the bookseller, took it, promising to read it. A few weeks afterwards, the further are all the conversations were making by the revolutionists to erect a battery on the river near Mount Verson, but it was runnored Governor purchaser returned to the store, much more soberly Lettler had refused to allow any interruption of the navigation of the river. A proclamation has been issued by the President, placing the ports of Virginia and North Carolina under blockade.

The Southern Confederacy .- The Richmond Enquirer of the 23d states, that the government at Montgomery had issued several letters of marque to privateers on the 18th ult. Jefferson Davis, the President, and A. H. Stephens, Vice-President of the Confederacy, had visited Richmond, Va. Troops from South Carolina and Georgia were entering Virginia. About 1500 had reached Norfolk and Richmond, and many thousands more were expected.

Pennsylvania.—On the 28th, the War department at Washington made a requisition upon the State for twenty-one more regiments in addition to the seventeen previously ordered, making a total of 29,500 men. Governor will propose to the Legislature that a reserve force of 10,000 men should be called out in addition.

The War Spirit appears to prevail throughout the free States, without any exception. In the South, the people of Missouri and Kentucky appear to be less imbaed from Venn. He deemed that not only himself, with it, and in Virginia and Maryland, they seem to be awakening to a conception of the dire calamities that must fall upon them in the event of a war of invasion. Even the Charleston Mercury carnestly protests against which impressions, through submission to Divine any attempt to capture Washington. In Vignia, west tute Grace, had been greatly blessed to them, in the of the Blue Ridge, there is said to be still a strong feel-

Bultimore .- A large Union meeting was held in Baltimore on the 29th, at which the strongest Union resolutions were adopted. The rule of the secession mob was believed to be nearly over. Regular daily com-munication with Philadelphia has been re-established, by means of steamers to Perryville, there connecting with the Philadelphia, Wilmington and Baltimore Railroad.

New York.—Mortality last week, 422. Philadelphia.—Mortality last week, 259.

FOREIGN .- The Liverpool dates are to Fourth mo. 20th Great Britain .- In the House of Lords, it was stated that the government was engaged in no negotiations whatever towards the reconciliation of the King of Italy with the Pope. Their policy was not to interfere in Roman Catholic questions. The Italian question in general was debated, the French occupation of Rome was deplored, and the prospect of a collision between Austria and Italy deprecated by all the speakers.

In the House of Commons, Lord John Russell stated that all the foreign ministers except the American, had left Jeddo, to be protected by the ships of war, in consequence of intimidation having been used towards them, which the Japanese government had not endeavored to

A report that President Lincoln was dead, had been circulated in England, and American news was anxiously looked for

The London Times editorially reiterates hopes for the maintenance of peace, and says that when the soil and the seas of the New World are likely to be stained with blood, foreign nations may surely remonstrate in the

The Paris correspondent of the London Daily News says that Russia has informed France that, in consequence of the events in Warsaw, it will be impossible to State is involved, and advises against secession. He join France in any measure for the settlement of the thinks the only safety of Maryland lies in preserving a Eastern question. The alleged reason for this refusal is that Russia regards France as an accomplice in the Polish disturbances.

France.—Heavy commercial failures are reported in Marseilles. The French funds were higher. Rentes are

Itoly .- Garibaldi took his seat in the Italian Parliament, and the business was temporarily suspended by the applause of the members. The action of the ministry in dishanding the Southern army, and the measures taken for its reorganization were debated on the 18th the hands of the Virginians. At Harper's Ferry, also, a tumult in the chamber. He made offensive allusions valuable machinery and other property, including several thousand muskets, escaped destruction.

Fort Pickens.—The latest date from Pensacola was the sitting was suspended for a brief interval. Garibaldi, in

rusal of a good book has been attended with such 21st, up to which time no attack had been made. There resuming, spoke with more moderation. He defends cient for the National armament .- On the 19th ultim Garibaldi was again received with loud applause. excitement of the previous day had subsided. Words concord passed between Cavour and M. Bixio, whie were applanded by all. Garibaldi expressed himse satisfied.—There has been an attempted reaction in Ca Jabria. Troops were despatched to the town of Yonas which has been delivered from the Bourbonians.

Austria,-Continued Austrian movements on the Pe pear Ferran, are recorded. It is said that an attac near Ferran, are recorded. It is said that an attact is possible, commencing with the invasion of the Duch of Modena, which will not be an infraction of the treat of Villa Franca. The Hungarian Chamber of Deputie has been definitely constituted. A Vienna paper denie positively that there will be an independent ministr granted to Hungary. The Imperial concessions, in fa vor of the Protestants, gave great satisfaction.

Russia .- Advices from Warsaw say that matters ar daily growing worse, and it is feared that the exasperation of the people will lead to fresh disturbances. Vig orous measures had not intimidated them. The troop had been bivouacked in the public squares. The Rus sian force in Poland is to be raised to 100,000 men.

Spain .- The recent seizure of the territory of the Do minican Republic by Spanish troops, is approved. Th Spanish official paper says, that the Spanish governmen will accept the annexation of St. Domingo as soon a confirmed by a vote of the people, if no foreign powe

Australia.-Australian advices report the massucre of twenty-six of the crew of the American whale ship Su perior, by the natives of Solomon's Island.

Java .- Fearful inundations had occurred in Java Many thousands were drowned, and whole villages de stroyed. Fifty thousand people had been made desti

The Liverpool Markets .- The cotton market was activ at an advance. New Orleans fair was quoted at $8\frac{1}{3}d$. Mobiles, $7\frac{7}{3}d$. The Manchester advices were favorable prices had an advancing tendency. Breadstuffs wer dull. Flour nominally, 28s. a 30s. 6d.; red wheat, 11s 2d. a 12s. 9d.; white, 12s. 3d. a 14s. 6d., per 100 lbs. be communicated. Think of it, reader, and take hundred wax candles, and its intensity may be in creased by augmenting the supply of gases. A Mercies in rich abundance are showered down compared with the illuminating power of commo

ABOVE THE MIST. For "The Friend."

Daylight seemed scarcely to exist, Though night had long been banished; The near half shronded lay in mist, The distant all had vanished.

Twas mine to journey through the gloom; Thick summer fog was o'er me And vision reached no pleasant bloom, Or verdant fields before me.

'Twas wet and chilly as I went; From trees, the damp was dropping, Till, rising up a slow ascent. The fog at once o'ertopping

I stood in sunshine warm and bright, Whilst round, devoid of motion, In pureness lay the vapor white, A soft and waveless ocean.

From its pure surface of repose, White cones of smoke uplifted, Which from some hidden cots arose, Like snow heaps high updrifted.

Above a coal pit far away, A larger mass up-mounded, In true and fair proportions lay, Like hay-stack smoothly rounded.

The scene was beautiful, I gazed Far o'er the sea of whiteness, Whilst on the trees around me blazed, Damp drops in rosy brightness.

Eastward the soft sea stretched away, With isles in fair disorder, Till forest-crowned the highlands lay, A green and lovely border.

Oft, in the mental world of ours Are joy's gay prospects clouded, And the soul's loveliest plants and flowers, By care's low fogs enshrouded,

When but a little left of hope, Would give the inner vision, Clear prospects of extensive scope, With light and bloom Elysian.

Riding to Monoquasy, he had a meeting, and delphia. Of his services on this occasion, James on of blood. The spectator was greatly surprised also a sitting with the family of Richard Richard. Pemberton says, "We had the company of, and a y this incident, and being induced to try the effect son, at whose house he had lodged. He then passed short, tender exhortation from Joshua Brown, of Nottingham."

(To be continued.)

The Livingstone Expedition.

The Cape Monitor of Second mo. 21st has an interesting account of the adventures of an indefatigable traveller and hunter, named Baldwin, who is the first white man who has penetrated to the Zambezi from this coast, and is the second white man who ever saw the celebrated Victoria Falls, which Dr. Livingstone discovered five years ago. After a most eventful and successful hunt as far as the Mosenkaboo country, he left his wagons on account of the fly, and his people having refused to accompany him, he proceeded thither alone on foot. With that steadfast friend, his gun, and a pocket compass, he struck for the Victoria Falls, having no guide but a map and Dr. Livingstone's description. After much distress, owing to searcity of water and ignorance of the country, interruption from wild animals, &c., he, to his own great astonishment, hit the river not three miles above the Falls. As soon as possible he was off to the far-famed Falls, the roar of which was fearful even at three miles' distance. On his return to the Kaffir village, he was summarily taken prisoner, and the most unpleasant part of the business was he had no idea for what offence. He describes this part of his adventures as causing him a great deal of uneasiness. He remained in this position several days, when most opportunely and unex-pectedly Dr. Livingstone arrived, accompanied by his brother Charles and Dr. Kirk, with a retinue of seventy Makololos, all armed with double-barrelled guns. The Doctor was on his way to Sekeletu, from Tete to Linyanti, seventy-six days on foot from Tete. The only animals they had with them were two donkeys, the use of which Dr. Kirk and C. Livingstone were often glad to avail themselves of; but Dr. Livingstone had footed it the whole distance. He was in good health and in ex-cellent spirits. The Livingstone party were not a little astonished at finding Baldwin there, who asked Dr. Livingstone's good services to get him out of the quandary he was in, when the explanations were singularly amusing. The Kaffirs said, this man comes here in a most wonderful manner; and the first thing he does is to jump into the river, which is like death. Next he goes to the Falls, and attempts to go where a monkey would not dare venture. We were sure he would kill himself, and then some one would come and ask where he was, and they would not believe he killed himself, hut would say we killed him. So we took care of him, as he was seeking his death. The doctor set matters to rights, and they stayed several days together. The doctor told Baldwin that he had penetrated to latitude 14° 1' south, and discovered Lake Shirwce, ninety miles long, and another lake, which, from description, must be more than three hundred miles long. In the neighbourhood is a table mountain twenty miles long. The surrounding country is most salubrious, and good for cattle, sheep, &c. A great quantity of cotton is grown by the natives; and sugar and coffee, and in fact all tropical productions thrive here, and a finer field of colonization is not to be found in the world.

The Way .- I can truly say, that I never coveties, was likely to be put out of the protection of return of grateful acknowledgment had been made ed heaven's glory, more than I desired to walk in he present power, and therefore it behooved all its to the great Controller of events for the undescrived the way that leads thereunto. Smoke from Gas Lights .- It is pretty generally imagined that the smoking of ceilings is occasioned by impurity in the gas, whereas, in this case, there is no connection between the deposition of soot and the quality of the gas. The evil arises either from the flame being raised so high that some of its forked points give out smoke, or more frequently from a careless mode of lighting. If, when light ing the lamps, the stop-cock be opened suddenly and a burst of gas be permitted to escape before the match be applied to light it, then a strong puff follows the lighting of each burner, and a cloud of black smoke rises to the ceiling. This, in many houses and shops, is repeated daily, and the inevi-table consequence is a blackened ceiling. In some well regulated houses the glasses are taken off and wiped every day, and before they are put on again. the match is applied to the lip of the burner, and the stop-cock cautiously opened, so that no more gas escapes than is sufficient to make a ring of blue flame; the glasses being then put on quite straight, the stop-cocks are gently turned, until the flames ings will not be blackened for years .- Late Paper.

In the ruffled and angry hour, every appearance is viewed through a false medium.

SUMMARY OF EVENTS.

Maryland .- The most important measure, which has claimed the consideration of the Legislature, since it met, has been the proposition to establish a Committee of Public Safety invested with almost unlimited powers. It was strongly urged by the secession party, but met with so much resistance in the Senate, that it was recommitted. It is asserted that the Union feeling is gaining ground throughout the State.—At a special election in Washington county, held on the 4th inst., for a member of the Legislature, the Union candidate was elected by a majority of over 4000 votes. At Annapolis, also, and in many other parts of the State, the Union feeling is predominant.—In Baltimore, the more active participreconstitut.—In Battimore, the more active paractic pants in the late outrages have left the city, or retired from observation. It is reported that the government has decided to occupy Baltimore. The army of occupa-tion will move in four columns: one from Perryville, one from Harrisburg, one from Annapolis, and one from Washington.

.Washington .- Northern troops have continued to reach the capital, by way of Annapolis. On the 6th inst., the number collected there and on the route, was estimated at 50,000 men. There is said to be also an ample supply of ammunition and provisions. Measures are in progress under the orders of the government for restoring the bridges on the Northern Central, and Philadelphia, Wilmington and Baltimore railroads, so as to open the communications with the north by those roads, which will probably for a time be retained under the control of the War department. A body of U.S. troops, on the 5th inst, took possession of a portion of the Baltimore and Ohio railroad, in Maryland, so as to cut of the connection between Baltimore and Harper's Ferry. Southern forces, which are collecting at Richmond and other points, are said to be not nearly so numerous or well armed as at first reported. It is also said that the insurrectionary movement upon Harper's Ferry was not authorized by the Governor of Virginia, who desires to act only on the defensive.

The Policy of the Administration .- On the 4th instant Wm. H. Seward, Secretary of State, addressed a letter of instructions to W. L. Dayton, the new minister to France, in which he says: "You cannot be too decided or too explicit in making known to the French governor too explicit to making known to the French govern-ment that there is not now, nor has there been, for will there be any, or the least idea existing in this govern-ment of suffering a dissolution of this Union to take place in any way whatever. There will be here only one nation and one government, and there will be the same Republic and the same Constitution that has al ready survived a dozen national changes, and changes ports of the seceding States. For this purpose, it is said of government in almost every other constry, and these that at least fifty war vessels of all kinds will be will stand bereafter, as they are now, objects of human juried. Ten vessels of the feet are nearly ready for

ed to accomplish that purpose; and, though the expression of this opinion is not called for by the resolutions of your honorable bodies, yet, having had the opportunity to ascertain its entire accuracy, and because it will explain much of the military preparations and charged, and to be mustered into service as infantry and He directs the regular army to be increased Virginia,-Gov. Letcher has issued his proclamation,

announcing that the State is threatened with invasion by the authorities of Washington, and calling upon the citizens to prepare for the impending conflict.-Union meetings have been held at Wheeling and Clarksburg, Western Virginia, in which resistance to secession is taking an organized shape.—It is proposed to hold a convention of the Union party in Western Virginia, where there is a strong opposition to secession. Several districts will probably return members to Congress at the next election.

Kentucky .- At an election in Louisville, on the 4th inst., the Union candidates to the border State convention were elected by very large majorities. The people of this State are much divided in sentiment, some volunteers having entered the service of the Southern Confederacy, and others that of the United States. The Southern feeling doubtless predominates.

Missouri .- Four full regiments of volunteers have been formed in St. Louis, and mustered into the U.S. service. There is said to be little excitement in St. Louis, and entire freedom of speech is permitted.

Tennessee .- General Pillow is mustering a large secession force, at Memphis, Tenn., of volunteers from that State, Arkansas and Mississippi. He is supposed to me-ditate an attack upon the Illinois troops stationed at Cairo.

Pennsylvania .- In his message to the Legislature which convened on the 30th ult., the Governor recommends the immediate organization, disciplining, and arming of at least fifteen regiments of cavalry and infautry, exclusive of those called into the service of the United States. He also recommends the passage of a law to prevent the sacrifice of property by forced sales in the collection of debts.

Louisiana .- This State is very slow in furnishing its quota of troops to the Southern Confederacy, in consequence of the planters and farmers fearing a "rising" of the slaves. The plantations were being watched with great vigilance, and this service required most of the young men. It is said that 1500 free coloured persons have enrolled themselves as soldiers in the Confederate the school. Apply to army, in New Orleans.

The Southern Confederacy .- The few items of intelligence, which reach us from Montgomery, show that the utmost exertions were being made for war. difficulties appear to be want of money, and danger from the servile population. According to the statements of the Southern journals, they can concentrate a force of 60,000 men in eight days on any part of the Northern border. Great excitement and alarm prevails, and some allowance must be made for exaggeration.

Blockade of the Southern Ports .- Great exertions are being made to effect a complete blockade of the sea-

who, from the stations they filled, ought to have wonder and human affection. You have seen on the sailing. Vessels in blockaded ports when the blockaded

sels, were pursued and captured by the State forces. They were allowed to join the army of the Confedera tion, or take an oath not to serve against the South.

The Supreme Court .- Judge Campbell, who resides i Alabama, has sent in his resignation.

Fort Pickens has been so reinforced and otherwis strengthened as to make its reduction improbable fo six months, for which time it has been provisioned.

New York.—Mortality last week, 386. Dwelling houses are said to be from 20 to 30 per cent. lower tha

last spring. The reduction in the rent of large stores i still greater. Philadelphia .- Mortality last week, 254; small-poz

20; scarlet fever, 20. Forgues.—Valparaiso dates to Fourth month 3d, hav been received. The town of Mendoza, Chili, was de stroyed by an earthquake on the 20th of Third month and 8000 people killed. The same earthquake destroy ed the town of San Juan, and the bed of the river wa turned on the site of the town.

EUROPE.-Liverpool dates are to Fourth mo. 26th. The Lundon money market was active; the rate for the best bills was from 4½ to 5½ per cent. Consols, 9

The Liverpool market for breadstuffs was dull, with out much change in the quotations. The cotton marks was firm and active, with prices tending upwards. A prospectus has been issued at Liverpool, with in

fluential support, for a company to run a line of steamer from that port to New Orleans. Another company ha been formed for Charleston.

A French fleet has been ordered to be fitted out t convey the French troops home from Syria.

A commercial treaty between France and Belgium i

said to have been signed.

The Italian Chambers, by a large majority, hav agreed to consider Garibaldi's project of arming th country. The ministry voted for the resolution. The latest from Turin, to the 25th ult., states that

perfect reconciliation had taken place between Gar baldi, Cavour, and Cialdini.

The Independence Belge states decidedly that the nege tiations between Paris and Turin, for opening Rome t the Italians, approach a favourable conclusion.

It is stated that the Pope is more than ever resolve not to quit Rome.

This was chargeable.—Isaac Penington

For "The Friend." Musings and Memories.

OUT OF SORTS. I have been musing this morning on a little acler Von Humboldt, whose splendid career has lately ish robber had violated this church, and, having count I lately read, illustrating what some people losed. The expedition was to the Ural Moun-ains. Before setting out, Ehrenberg, like many his skin nailed to the church door, as a terror a company of children met on one occasion, all other scientific men of the day, had been wonder to evil-doers. The action of the weather and seemed happy, and were pleasantly employed, exully impressed by a work which our Robert Brown other causes had long ago removed all traces of cept one, who sat by herself, neither partaking of and just published: "A brief account of microseo- the stretched and dried skin, except that from the labour nor joyfulness of the busy group. One collen of plants, and on the general existence of which the door was studded, fragments still peeped rendering this as the reason why she was sullenly ctive molecules in organic and inorganic bodies." out. It was one of these atoms, obtained by draw-sitting alone, in-tead of participating with them in Following on the path here opened, Ehrenberg ing out one of the old nails, that was subjected to their employment. After doing some act which once more raised the microscope into European microscopical scrutiny, and it was interesting to forced the other children to seek elsewhere for the notice. His numerous revelations of minute plants and that the wonder-showing tube could confirm pleasure she had interrupted, and refusing to actual animals, and of the share which these had in the tradition with the utmost certainty; not only in company them, she was left to mope and distress he formation of the solid crust of our earth, at the general fact that it was really the skin of a man, herself as much as she pleased. After a time she racted general attention. In 1838 appeared his but the special one of the race to which the man grew tired of being out of humor, and seeking an great work on the Infusoria—a work too costly belonged, namely, one with fair complexion and aunt of hers, she sat down by her crying, and or private purses, but one which, for the beauty light hair, such as the Danes are well known to acknowledged to an inquiry from her kind relative, "I am all out of sorts." Conscience began to stir in is revelations, and its general accuracy, will always remain a monument of skill and labour, of the microscope in legal investigations. "Not one of the sins mentioned in the Bible, anuty?" long ago, a murder was brought home to a crimity of the microscope in legal investigations. "Not one of the sins mentioned in the Bible, anuty?" long ago, a murder was brought home to a crimity "Not by that name," was the reply. The work pointed out by its recent commentators, viz.: the lal by this instrument. Much circumstantal evierror of supposing that the infusoria are perfect dence had been adduced against him, among which on in the heart of the child, and at last she spoke

but intend to set my readers to thinking over their own conduct, and incite them to an earnest endeayour for an abiding under a sense of the loving Spirit of our gracious heavenly Father, which will keep us from harsh speeches and unreasonable actions. This will preserve us, as well, from severe estimates This will preserve us as a constraint of the actions of others, as from over anxiety to defend our own. We shall have an atmosphere of the constraint of the Spirit and mercy arrayed, the one of Christ's loving believers on early the constraint of the christian of the c love about us, and whether condemning or justifying the actions going on around us, we shall give evidence that we are not "out of sorts," that our Oh, Love! of the christian the crowning delight! unity or disapprobation is the utterance of a spirit Truth, justice, and mercy divinely unite desirous to support the Truth in the love of it.

Forest Mice .- It was during this year [1814] especially, but to a certain degree also in the preceding and succeeding ones, that this forest and the New Forest were visited with an enormous num-ber of mice. They appeared in all parts, but particularly in Haywood inclosure, destroying a very large proportion of the young trees, so much so that only four or five plants to an acre were found uninjured by them. The roots of five years' old oaks and chestnuts were generally eaten through just below the surface of the ground, or wherever their runs proceeded. Sometimes they were found to have barked the young hollies round the bottom, or were seen feeding on the bark of the upper branches. These mice were of two kinds, the common long-tailed field-mouse and the short-tailed. There were about fifty of these latter sort to one of the former. The long-tailed mice had all white breasts, and the tail was about the same length as the body. These were chiefly caught on the wet ground in the forest, and the short-tailed were caught both on the wet and dry grounds. A variety of means were resorted to for their destruction, such as cats, poisons, and traps, but with little success. - Broad, who had been employed by the Admiralty, and had been successful in killing the rats and mice in the fleet, was sent down, and tried several plans, all of which failed. At last a miner, living on Edge Hills, named Simmons, came forward, and said that he had often, when sinking wells or pits, found mice fallen in and dead, in consequence of their endeavours to extricate themselves, and he had little doubt the same plan would succeed in the forest. It was tried, and holes were dug over the inclosures about two feet deep, and the same size across, and rather hollowed out at the bottom, and at the distance of about twenty yards apart, into which the mice fell, and were unable to get out again. Simmons and others were employed, and paid by the number of tails which they brought in, which amounted in the whole to more than 100,000. In addition to this it may be mentioned that polecats, kites, hawks, and owls visited the holes regularly, and preyed upon the mice caught in them; and a small owl, called by Pennant Strix passerina, never known in the forest before or since, appeared at that time, and was particularly active in their destruction. The mice in the holes also ate each other .- The Forest of Dean, by H. G. Nicholls.

Early piety .- From the time she was twelve years of age, it was her frequent practice to retire alone to her chamber, to wait upon the Lord, and hold communion with Him who had graciously touched her heart with His love, entering into a close examination of her conduct during the day; and such was the sweet peace and comfort she derived from this christian duty, that she found even her bodily pains mitigated, when she could retrospect the past with an approving conscience, and offer the evening oblation with innocency and acceptance.—Memorial of Hannah H. Hartshorne.

For "The Friend." BE LOVING AND MERCIFUL.

Oh, child of the Spirit! Oh, born from above ! Let the poor and the needy be never unbeeded, To thy brothren around thee owe nothing but love, And give it with freeness where'er it is needed.

Thus shalt thou, oh, christian! establish thy birth, With the badge of discipleship ever displayed.

Fulfilling the law and the gospel of peace!

Thy reign and dominion to spread and increase.

GHLF-WEED

A weary weed, tossed to and fro, Drearily drenched in the ocean brine. Sparing high and sinking low, Lashed along without will of mine, Sport of the spoom of the surging sea; Flung on the foam, afar and anear, Mark my manifold mystery,— Growth and grace in their place appear.

I bear round berries, gray and red, Rootless and rover though I be; My spangled leaves, when nicely spread, Arboresce as a trunkless tree; Corals curious coat me o'er, White and hard in apt array; 'Mid the wild wave's rude uproar Gracefully grow I, night and day.

Hearts there are on the sounding shore, Something whispers soft to me, Restless and roaming for evermore, Like this weary weed of the sea Bear they yet on each beating breast
The eternal type of the wondrous whole: Growth unfolding amidst narest, Grace informing with silent soul.

C. G. Fenner. Selected.

THE CROWDED STREET. Let me move slowly through the street, Filled with an ever-shifting train, Amid the sound of steps that heat
The murmuring walks like autumn rain.

How fast the flitting figures come The mild, the fierce, the stony face-Some bright with thoughtless smiles, and some Where secret tears have left their trace.

They pass to toil, to strife, to rest— To balls in which the feast is spread— To chambers where the funeral guest In silence sits beside the dead.

And some to happy homes repair, Where children, pressing check to cheek, With mute caresses shall declare The tenderness they cannot speak.

And some, who walk in calmness here, Shall shudder as they reach the door Where one who made their dwelling dear, Its flower, its light, is seen no more.

Youth, with pale cheek and slender frame, And dreams of greatness in thine eye! Guest thou to build an early name, Or early in the task to die?

Keen son of trade, with eager brow ! Who is now fluttering in thy snare? Thy golden fortunes, tower they now, Or melt the glittering spires in air?

Who of this crowd to-night shall tread The dance till day-light gleam again?
"Who sorrow o'er the untimely dead?
Who writhe in threes of mortal pain?

Each, where his tasks or pleasures call, They pass, and heed each other not. There is who heeds, who holds them all In His large love and boundless thought.

These struggling tides of life, that seem In wayward, aimless course to tend, Are eddies of the mighty stream That rolls to its appointed end.

From the Leisure Hour. The Greatest Thoroughfare in the World.

The city of London seems to be the great filte through which the bulk of our enormous stree traffic is constantly strained, and London Bridg seems to be, at present, the only outlet to relies the city. Our population has added more tha twenty per cent. to its numbers-or nearly or fourth-in the course of the last ten years, an the persons passing through London Bridge Rai way Station during the same period, have increase from six hundred and twenty-four thousand, thirteen millions and a half. This accounts, some measure, for the constant pressure at th point. Most of these railway passengers are pasing to or from the city and the western parts London: and nine tenths of the whole number cro London Bridge from eight in the morning unt eight at night. Sixty thousand foot passenger and twenty thousand vehicles, make this bridg passage during the working day; the foot traff dividing itself into two streams on each footwaybackwards and forwards-and the road traffic bein divided by the city police into two streams of " fast and two streams of " slow" traffic, one of each flow ing one way, and one of each the other.

It has further been ascertained that a large pro portion of these railway travellers, when they ar discharged from the London Bridge Railway Sta tion, are crossing the bridge to reach those part of London which lie west of Holborn and Templ Bar; and hence they have to burden the alread overburdened city with their persons, their vehi cles, and their luggage. The humbler classe mostly proceed westward by the penny river boat plying from the Surrey side of the bridge to Hun gerford pier; but the extent to which the thorough fares are crowded by this traffic may be gathered from the fact that more than 2000 omnibus jour neys alone are performed daily between the Lon don Bridge Railway Station and places west c Temple Bar, the whole of which pass through the

city by the Poultry and Cheapside.

The pressure at the Exchange, in Cheapside Ludgate Hill, Newgate Street, Holborn Hill, and Temple Bar, is, at certain hours, as severe as or London Bridge, though the number of vehicles passing is not nearly so great. Most of the stree "blocks," with which every London traveller is so painfully familiar, are caused by the frequent stop page of omnibusses to take up and set down pas sengers, and of cabs and luggage vans at shops and warehouses. If we take the thoroughfares running north and south, we there find the pressure com-paratively moderate, as the great bulk of London lies chiefly along the valley of the Thames, and the principal traffic is east and west, in lines running nearly parallel with the river. So sensitive is this main street-traffic throughout its long winding length—so easily affected at one end by what oc curs at the other-that a cart-load of bricks thrown across the upper part of Cheapside, by the statue of Sir Robert Peel, would stop the circulation of six thousand vehicles, during one busy hour of the day, in about the same number of our principal thoroughfares. It has been found that during this busy hour of the day there are nearly 1900 vehicles of all kinds passing over London Bridge; 1400 passing through Cheapside; 1200 along Ludgate Hill; 1100 through Temple Bar; 1000 up and down Holborn Hill; 900 along Newgate Street; 700 along Bishopsgate Street Within; 650 along the Aldgate High Street; 560 along Gracechurch Street; 540 along Cornhill; 530 along Fenchurch Street; 500 along Finsbury Pavement; 340 through Smithfield Bars; and 300 along Aldersgate Street. Though the same vehicles appear, at different parts

the same bour, in different streets, this gives a lat of road journeys amounting to more than one by Brixton, whose twenty-four vehicles make 240 tion, "The heart is deceitful above all things and marked and sixteen thousand. male portion of the community are generally stout, fine black hair. They shave the upper front part of the head; the rest, at the sides and back of the head, is nicely combed up to the top of the head, where it is tied up into a sort of a wig, about four inches long; this is secured to the top of the head, reign convention, or to take any measures for organizing and looks odd but very neat-much more so than their dirty neighbours, the Chinese. Many of them wear nothing but a sack or cloth, which is secured just above their hips, leaving the rest of their person, above their hips, and below their knees, exposed. The wealthy portion of them dress very neat, in silks, crapes, etc., in their native costume, which sometimes consists of the large trousers, hat, gown and searfs. A large number of the poorer classes are trained for the ring, and their only employment is wrestling, etc. Some of them wear scarfs or bandages around their persons, bearing large characters, denoting to what prince's or high mandarin's household they are attached. In the streets and in the outskirts of the town (Nagasaki) may be seen several small Japan shops, in which sweetmeats, cakes, saki, etc., are exposed for sale, Within are to be seen large numbers of both sexes engaged in dancing and singing, while some hard-looking customers play an accompaniment upon a violin or banjo. The females of Nagasaki are of the ordinary height, and some of them are very handsome. The married ladies are known from

The promulgation of truth, and the encouragement of good, are usually more effectual against error and evil, than controversy and denunciation.

THE FRIEND.

FIFTH MONTH 18, 1861.

SUMMARY OF EVENTS.

The Great Rebellion .- The Nashville Banner of the 8th inst. announces the arrival at New Orleans, from Europe, of a vessel with 250,000 stand of arms for the Confederate States .- The Congress at Montgomery has held its sittings for the most part with closed doors. It is understood to be engaged in arrangements for a vigorous prosecution of the war, and placing the Confederacy in the best possible condition of defence. On the 6th instant, an act was passed by it, recognizing the existence of war with the United States. The act autho-The act authorizes the granting of letters of marque and reprisal, and further provides, That a bounty shall be paid by the Confederate States of \$20 for each person on board any armed ship or vessel, belonging to the United States, at the commeacement of an engagement, which shall be burnt, snak or destroyed, by any vessel commissioned as aforesaid, which shall be of equal or inferior force, the same to be divided as in other cases of prize money -and a bounty of \$25 shall be paid to the owners, officers and crews of the private armed vessels, commissioned as aforesaid, for each and every prisoner by them captured and brought into port .- One of the features of the rebellion is a general repudiation in the secoding States of the indebtedness of individuals to citizens of the United States. The Governor of Georgia, by pro-clamation, has forbidden the payment of such debts in that State, and has ordered the debtors instead of discharging their obligations, to pay the money into the State treasury. The Legislature of Mississippi has made an enactment of similar tenor. The amount of indebtedness thus unjustly withheld is very large, amounting, it is supposed, to an aggregate of much more than one hundred millions of dollars. A striking indication of the insecurity and alarm already pervading the South in consequence of the rebellion, is found in an acknowleagment of the Richmond Examiner, which says: " We want a dictator, for the reason that assurption of power Treasury has advertised for proposals till the 22d inst.,

An American's Report of the Japanese, -The by the chief, for the preservation of the people from rob- for the remainder of the stock of the United States, is bers and murderers, will be reckoned as genius and sned under the act of Second month last, amounting t well-built men, many of whom bear the marks of patriotism by all sensible men in the world now, and by every historian that will judge the deed hereafter. the small pox. They all, or nearly so, have very This want the South is in a fair way of having supplied.

Arkansas.—The secession ordinance in Arkansas was accompanied by a decree, confiscating the property of citizens of the United States, held in that State.

Maryland .- The Legislature has resolved that under the blockade of Charleston, S. C. More reinforcement existing circumstances, it is inexpedient to call a sovethe militia. It has also passed resolutions protesting against the war upon the Confederate States, and announcing a determination to have no part or lot directly or indirectly in its execution, and declaring that Mary land earnestly and anxiously desires the restoration of peace.—The bridges on the Northern Central Railroad have been rebuilt, and troops now pass through Maryand on that road. The bridges on the Philadelphia. Wilmington and Baltimore Railroad have also heen repaired. Northern troops are permitted to go through Baltimore without molestation, the Union feeling being now uppermost in that city. Many volunteers have left Baltimore and other parts of Maryland, to join the se-cession army in Virginia. A strong force of U. S. troops is encamped at the Relay House near Baltimore, and about 1200 men are posted at fort M'Henry.

Virginia .- In all that part of the State east of the mountains, there is apparently a united determination to resist the authority of the government. Large bodies of house stated that the government recognized no right troops are collected at Richmond, Lynchburg, Harper's or obligation to interfere in the conflict unhappily com Ferry, Norfolk and other points. The heights on the menced in the United States, either diplomatically o Maryland side of the Potomac at Harper's Ferry, have otherwise. been seized and fortified by the Virginians. The secession force at that place, on the 9th inst., was estimated South Carolina. The Richmood Dispatch recommends the Virginians to adopt a guerilla warfare in addition to the usual field service.

The weather in England has been five to the usual field service. handsome. The married ladies are known from the single by painting their lips either green or a held in Western Tigrinia, in which, it is supposed, about bright red, and their teeth a jet black.—Letter in the New York Herald.

Tennessee .- At a late election, the people voted against the calling of a State convention by an immense majority, yet the Legislature, in this time of confusion and excitement, has declared the State out of the Union. The General Assembly has also resolved, "That in view of the dearth of the past two years, and the probable extraordinary demand for cereals and forage, to supply the absolute wants of our State and of the entire South. that the agriculturists of the State be, and they are hereby requested to devote the breadth of arable land in the State to the culture of grain and grass."

Missouri .- The position of affairs in this State appears critical. The attachment to the Union is strong, especially in the city of St. Louis, but the Governor and a majority of the legislature seem disposed to take sides with the South. Several regiments of U.S. troops have been formed in St. Louis; and a camp was being formed in the outskirts of the city, of volunteers for the State service, under the authority of the Governor. The com-mander of the U. S. forces regarded this as a hostile movement, and, on the 10th, marched his troops to the camp, surrounded it, and compelled the men, about ton, M.D. eight hnadred in number, to surrender themselves prisoners. They were subsequently released after making an engagement not to take up arms against the United States. A tumult arose when the U.S. troops brought their prisoners into the city, in the progress of which their prisoners into the city, in the progress of the soldiers fired upon the people, killing, it is said, about twenty persons, several of whom were women and children. On the next day, another collision occurred between the troops and the populace, in which several lives were sacrificed. The legislature has passed a bill to arm the State forthwith.

Pennsylvania .- The Legislature has passed a Star law, and a bill authorizing a State loan of three mil-lions of dollars for war purposes. The Stay law prohibits the issue of execution for interest on judgments of less than \$500, for debts contracted prior to the pas-sage of the act. It also prohibits the sale of collaterals. An application made from private parties in the Eastern States, to Gov. Curtin, to permit bodies of armed free blacks to pass through Pennsylvania, has met with his unconditional refusal.

New Jersey.—The Legislature has passed a bill au-thorizing the Governor to raise four more regiments for the State service, to purchase a quantity of cannon and small arms, &c. Another bill authorizes a loan of two millions of dollars for war purposes

Movements of the Government .- The Secretary of the

nearly nine millions of dollars.—The preparations for the effective blockade of the Virginia waters having been completed, Captain Pendergast has given the pre cantionary notice of fifteen days for all vessels to leav the ports of that State, either with or without cargoes The U. S. steam frigate Niagara has been sent to enforce and supplies have been sent to fortress Monroe, camp has been formed at Cairo, Illinois, at the junction of the Ohio and Mississippi rivers. Five distinct bat teries have been constructed, having a sweep of thre miles on the Mississippi, and two miles on the Ohio ri ver. An order has been issued that, on and after th 13th inst., all boats passing this point will be stopped and no provisions or munitions of war for the secede-States will be allowed to pass.

Philadelphia. - Mortality last week, 297; of scarle

fever, 36; small-pox, 17; diptheria, 11.

FOREIGN.—The steamship Great Eastern arrived a
New York on the 12th. She left Milford Haven on th evening of the 1st inst., and had a passage of nine day and thirteen hours to the bar.

The commissioners of the Southern Confederacy has reached England. A motion had been made in th House of Commons for the recognition of the Confede racy, but it had been postponed for two weeks. In an swer to a question in the House of Lords, Lord Wode

From the Leisure Hour. Physical Forces.

Words and combinations of words there are, which, though harmless in themselves, get tabooed, and cast aside as a bad lot, because of their associations. Let the reader, therefore, well mark that other windunils, seems to say, "I amongst all ame frect of heat is expansion. Most people know what the title of the paper he now reads is not Physical! the one." That giant of a fellow is devoted to an Italian heater is—a sheath of iron into while Force, but Physical Forces, I beg of him not to imagine that pictures of war and ruin will be produced for his contemplation-not even a street row -not even the more legitimate exercise of physical the Maas. force which some of us experienced in our school days. The ever-acting forces which influence matter, which subject it to our will, which give motion to our mill and factory wheels, which speed our messages along the telegraphic wire, which impel our ships across the blue waste of ocean-the forces, in short, which stir up matter, so to speak, from its inertia and make it work-such are the aspects of physical force which will be touched upon in this paper.

When man, fairly tired of getting physical force out of his own bones and muscles, seeks an aid, his length delivered into the ocean. first resource is to command the physical force of animals. If we carry our mind back to the period when the Ancient Britons roamed these isles, the of wind. The water may either be applied under picture would not be correct if we should feign either windmills or watermills; man and horsepower were the only kinds of physical force brought

into operation then.

What a change now! Throughout these isles it is most rare to find machinery impelled by horsethe only example of it at this time is furnished by the tread-mill. Perhaps, after animal power, wind power follows most naturally. As the agent of physical force to be employed for the propulsion of ships, it has held a time-honoured place ever since ships were invented; and it still holds its own at sea, even against steam, that great competitor. The application of wind to direct propulsion is a selfand still are doing good service, mathematicians force from the minimum of wind,

The advantageous points in favour of wind as a motive force, are its cheapness and its universality. Anywhere a windmill may be erected, under the certainty that it will work whenever the wind blows are the fickleness and the irregularity of it. For these reasons, wind power is very badly adapted to all, no modern invention. such operations as weaving and spinning, though it serves well enough for grinding corn, pumping water, and sawing timber. For the two latter pur-poses, windmills are employed by our neighbours the Dutch, to an extent which no person would imagine who had not seen the sloppy land where Dutchmen

" Feed like cannibals on other fishes. And serve their finny brothers up on dishes,"

as the poet, using rather more than the ordinary amount of poetical license, expresses himself.

Nowhere in the whole world are windmills seen extremes meeting, nowhere windmills of such puny dimensions, except perhaps in La Mancha and Castile. Spanish windmills are so exceedingly than he would after a mere perusal of Don Quixote. weight of a charge of gunpowder has to do with

drainage purposes-drainage of Rotterdam, which fits a bar of iron. The latter being inserted hot stands on so low a level that its sewage water, in imparts heat to the sheath outside. Sometimes it certain states of the tide, has to be pumped into occurs that the bar fits too accurately, that is to

low agricultural districts of Holland, are for drain- when hot, because heat will have expanded it. In age purposes too. The whole surface of the country like mauner, whenever the artilleryman desire is drained by them. They do not carry off the to load his cannon with a red-hot ball, he uses the water by pumping, as is ordinarily supposed, but ball of low guage, as the term is, that is to say, by setting in motion little water-wheels, to the cir- ball smaller than he would have employed under cumference of each of which buckets are attached, common circumstances. The buckets dip in water as the wheel goes round, and deliver it into a channel a few feet higher than the one from which the buckets took it. In this way, by a series of successive lifts, the water is at

force is a more obvious affair than the application the wheel, half way up the wheel, or above the Love divine will fill thy storehouse, or thy handful still wheel, whence arise the three varieties of undershot, breast, and overshot wheels. In the last variety of water-wheel, the overshot, weight rather than impulse of water, may be considered the motive agent. Water-mills seem to have been first empower, and as to man power used that way, almost ployed by the ancient Romans, about the period of Julius Caesar, not earlier. This fact is somewhat extraordinary, when taken in connection with the high mechanical skill of the Romans, but so it was. Help to bear thy brother's burden; God will bear both Beckmann, in his "History of Inventions," comments on the error some people have fallen into in respect of the term water-wheels, which frequently occurs in Roman history, before the epoch of Julius Cæsar. He remarks, that the water-wheels in obvious matter: more elaborate does the problem question were not mill wheels-not for imparting become when it is desired to impart rotatory mo- motion to mill-work, but simply to raise water, tion by the force of wind. Though windmills have just as water is raised in Holland at the present now been so long invented, though they have done time by buckets attached to a rotatory wheel, worked by the wind. In certain parts of the south have not been able to determine absolutely the best of Spain, wheels of this sort are common enough, pitch or inclination which ought to be given to mill even now, as they are also in the East; they are vanes, in order to impart to them the maximum made to rotate by a sort of treadmill arrangement, differing from our criminal treadmills, however, in the respect that the stepwork is inside, not outside the wheel. Occasionally, in Roman History, we hear of slaves and malefactors being attached to water-wheels: it is the sort of water-wheel I have in its locality. The disadvantages of wind power just described—a treadmill wheel in point of fact; whence we perceive that the treadmill is, after If the Romans were a long time without water-

wheel force, they were still longer without wind-mills; indeed, Beckmann confidently asserts that

Romans.

If we analyse the ultimate nature of the physical force derived from wind and water, we shall find I used to kiss two soft lips—loved to hear them speak it ultimately referable to weight. If air were Theo, merry was the playing on our parlour floor; devoid of weight, it could have no impulse, and of Now, naught is left but silence—silence evermore! course there would be neither wind-propelled ships nor windmills. The same of water. The physiciscd, is limited by the weight of him who pulls.

diminutive that the traveller, whose eye has alighted upon them, marvels less that the crackbrained knight of La Mancha should have mistaken one weight, truly, but the weight of 'it has no more to those pleasures which lay up bitterness and sorrow

of them for a giant, and given battle accordingly, do with setting a steam-engine in motion than the Travellers in Holland can hardly fail to be struck the propulsion of a ball. This must be obvious with the size of an enormous fellow of a windmill when reflected on. What causes the elasticity, the say, fits the sheath exactly when cold. So surely The pigmy windmills, so invariably seen in the as this happens, the bar will not enter the sheat

Potato Disease.—(D. P. A.) Prof. Bollman's remedy is simply drying the potatoes. Some seven ayer of air is of equal or greater density than a hower, there will be a downward current toward tions which are pressing upon every considerate, Siberia. They were put back of the stove used for heating the Professor's study, and forgotten, till they were shrivelled up-so dry, in fact, that it was feared they would not grow. They did grow, however, and were free from disease, while all the potatoes in the neighbourhood and throughout the country (Russia) were seriously affected. This afterwards to dry his seed potatoes. Varieties which were usually affected, were by this simple process found to be free from the disease. In 1857, upwards of three acres were planted with kilnprietors.

Religious Meetings, and drawing near to God. -I thought it an unspeakable privilege, which I portunity of thus meeting in companies, though Amid all the commotions and discouragements small, to retire from all, even lawful concerns, and by which we are surrounded, let us lift up our with the best ability that we have, to wait upon Another cause of disturbance is found in the dif-heads in hope, in the belief that the Lord God omni-green effects of the same degree of heat upon land potent reigneth, who will cause even the wrath of Oh! how refreshing to the drooping mind, to exand water. The land absorbs the sun's rays more man to praise him; and the remainder he will resperience from time to time, that the Rock of our apidly than the water, and also more rapidly train, turning the hearts of his people, as a man salvation remains unshaken, though the floods, the tweet was up the heat which it has received. On a turneth the water-course in his field, until they winds and the rain may beat upon the poor taberthe joy of God's salvation .- Mary Capper,

Discipline in Childhood,-Young people who have been habitually gratified in all their desires, will not only more indulge in capricious desires. but will infallibly take it more amiss, when the feeling or happiness of others require that they should be thwarted, than those who have been practically trained to the habit of subduing and training them; and consequently will, in general sacrifice the happiness of others to their own selfish indulgence. To what else is the selfishness of princes and other great people attributed? It is in vain to think of cultivating principles of generosity and beneficence by mere exhortation and reasoning. Nothing but the practical habit of overcoming our own selfishness, and of familiarly of others, ever enables us to do it when required. And, therefore, I am truly persuaded that indul-gence infallibly produces selfishness and hardness of heart, and that nothing but pretty severe discipline and control can lay the foundation of a magnanimous character. - Lord Jeffrey,

THE FRIEND.

FIFTH MONTH 25, 1861.

SUMMARY OF EVENTS.

The Great Rebellion .- The Montgomery (Ala.) Advertiser says, that the Confederate Congress has resolved to remove the capital to Richmond, Virginia. patch of the 18th from Montgomery, states that the Congress has passed a number of bills, including the following: A bill authorizing the issue of fifty millions of dollars in bonds, payable in twenty years, with inte-rest not exceeding 8 per centum; or in lieu of bonds. the issuing of twenty millions in treasury notes in small sums, without interest; a bill to organize the patent office; a bill regulating the telegraph lines; a bill defining the limits of the port of New Orleans; an act abolishing the mints at New Orleans and Dahlonega. On the 18th, Arkansas was formally admitted into the Southern Confederation, and delegates from the State took their seats in the Congress .- Southern debtors are not all willing to avail themselves of the opportunity of repudiating their debts. A merchant at Boston received, a few days since, two letters, containing remittances for debts. One letter was from Charleston, and the other from Georgia. The writer of the latter says, notwithstanding the proclamation of the Governor, he considers it his duty to pay his honest debts, and shall continue to do so as long as he has the ability.-Advices from Pensacola state that Gen. Bragg's command near fort Pickens had been increased to about 10,000 men. Notwithstanding the assemblage of so large a force, there is an evident reluctance to begin hostilities. The immense warlike preparations of the federal government appear before engaging in further acts of aggression. All they now ask for is to be "let alone."—The secession forces in Virginia were constantly receiving accessions by the arrival of troops from the more southern States .- The Post-master-General at Montgomery announces that be States on the 1st proximo .- The remaining federal troops in Texas have surrendered to the State forces,

The Doubtful States .- Maryland, Kentucky and Missouri may be considered in this class. The secession feeling is strong in all of them, but is held in check, either by a countervailing Union sentiment on the part of many of the people, or by the presence of U.S. troops. The Governor of Maryland, on the 14th inst., issued his proclamation in obedience to the call of the President the amount on hand, on the 18th inst., is stated at \$39, for four regiments of volunteers—their service to be confor four regiments of volunteers—their service to be confined within the limits of the State, or for the defence of to the stagnation of business, there is little demand for the capital of the United States. Ross Winans, a wealthy money; call loans with collaterals are freely supplied and inflaential citizen of Baltimore, was arrested last week, and sent to fort M.Henry. He was liberated after a short imprisonment on giving his parole of honor that he would do no act, openly or covertly, hostile to

shall acknowledge that there is no joy like unto attack on the Massachusetts troops on the 19th ult. which they are in no wise accountable. The Unite The secession leaders appear to be actively at work in Kentucky, and it is yet uncertain which side the State The Union party is probably the stronger. The Louisville Journal contends that neither Kentucky nor Missouri can secede without being involved in hopeless ruin. General Harney has been appointed to the command of the U. S. troops in Missouri. He has issued an address to the people of that State, in which he says that whatever may be the termination of the present unsettlement in respect to the cotton States, Missouri must share the destiny of the Union; and that so important is this regarded to the great interests of the country, he believes the whole power of the U. S. government, if necessary, will be exerted to maintain Missouri in the Union. The federal troops are chiefly in the immediate vicinity of St. Louis, and are so posted around the city, as to prevent hostile troops and munitions of war from ias to prevent nostile troops and munitions of war from entering it. Many Union men have been driven out of the State, in places where they were the weaker party. Movements of the Government.—Ample means having been placed at the disposal of the administration, pre-

encountering privations and discomfort on account parations for suppressing the treasonable rebellion (as t is called) of the South, are steadily progressing. Gen. Butler has been ordered to fortress Monroe, Va. It is said that an encampment of 10,000 men is to be formed in that part of Virginia. Washington is securely garri-soned; the Chesapeake is commanded by armed vessels, and an effective blockade of all, or nearly all the Southern ports, has been established. Thus far the government has chartered about seventy transports. These vessels are paid for at the rate of from \$100 to \$500 each per The voluntary loan contributions of States and individuals for war purposes, amount to \$31,000,700. The Legislature of Massachusetts has authorized a loan to the United States of seven millions of dollars, if, in the judgment of the Governor, it should become necessary during the recess of the Legislature.-It has been notified to the representatives of the foreign powers at Washington, that if any commissioner or minister from the Southern Confederacy he received by any European power, that this government will not besitate to break off all diplomatic relations with said offending power.

Virginia .- The convention of the north-western counties, which was in session last week at Wheeling, adopted resolutions in favour of calling a general convention on the 11th of next month. The understanding seemed to be, that if the Richmond ordinance of secession was to be, that it the recommend ordinance of secession was ratified by the popular vote on the 23d inst., a State to be called New Virginia should be formed from the counties bordering on Pennsylvania and Ohio. A regiment of U.S. volunteers has been formed in Wheeling, Va. A number of secessionists have been ordered to leave Wellsburg, Va. Three small schooners laden with tobacco and pig lead, which they were taking from Richmond to Baltimore, were captured by the U. S. cruisers, aud sent to Philadelphia. Gov. Letcher has since issued an order to prevent goods for use in the North being sent out of the State.

Southern Intelligence .- Under the prevalent reign of terror, no free expression of opinion or fact is allowed in the Southern press; it is, therefore, difficult to ascertain what is the real state of feeling among the people. While there is an appearance of entire unanimity throughout the cutton States in the support of the revolutionary government, persons in the North having extensive correspondence in those States give it as their belief, that there is still a large and respectable portion of the into have made the secession leaders pause, and hesitate habitants, who retain a warm attachment to the Union, and who will, when a favourable opportunity occurs, make their influence felt. There is also, doubtless, much exaggeration and mis-statement in the Southern papers, regarding their preparations for war, &c., such as the assertion that there had been no less than 3000 appliwill assume the control of all the mails in the seceded cations at the War department of the Confederacy for letters of marque for the purpose of privateering, and that of the Nashville Banner respecting the arrival at New Orleans of 250,000 stand of arms from Europe, for the Confederate army, neither of which statements seems quite credible.

New York .- Mortality last week, 381; of consump tion, 66; scarlet fever, 22; small-pox, 11. The New through faith in the Lord's mercy, and feeling his sur York banks continue to hold large supplies of specie; porting power and presence, he was enabled to look for at 4 per cent. per annum. The balance in the U. S. sub-treasury, on the 20th inst., was \$7,698,309.

Kentucky.—The Governor of this State issued a pro-

that he would do no act, openly or coverily, hostile to clamation on the 20th inst., in which he declares that it the government of the United States. Three merchants is the general wish of the citizens of Kentucky to mains of the same city have been arrested, and bound over for tain strict neutrality, and stand aloof from "an unnatrial, charged with riotous conduct at the time of the tural, borrid and lamentable strife," for the existence of

States, the Southern Confederation, and all States, whe ther separate or united, are solemply forbidden to mak any movement on Kentucky soil, or occupy any post c place therein, until invited or authorized to do so by the proper authorities of the State.

FOREIGN.-Liverpool dates to the 11th inst., have bee received by the ateamship Persia. The Persia bring \$234,000 in gold to New York.

A large quantity of war material was refused a freight for the Persia. It is confidently asserted that letters of marque ha reached London and Liverpool, and vessels are reporte

to have left with them, but this is doubted. Lord Derby expressed in the House of Lords that the forthcoming proclamation by the government will giv emphatic warning to British subjects that if they joi privateers, or become involved on either side, their bloo

will be on their own heads, and that no redress can b obtained from England. Preparations are making for an American Union meet ing in London.

The London Times says that the mediation of England might as well be offered to a burricane as to the United States .

The Liverpool cotton market was active; prices ha advanced \(\frac{1}{2}d. \); New Orleans, [air, 8\(\frac{1}{2}d. \); Upland, 8\(\frac{1}{2}d. \)
Breadstuffs were in better demand, with an advancin tendency. The London money market was unchanged Consols, 91% a 92.

Preparations were being made in the British navy yards for sending a powerful squadron to the America waters. The London Times points out the fact that th United States has heretofore industriously vindicate principles and made precedents, all of which now go t the contraction of her own belligerent rights. upheld privateering, and denied the right of search, anboth these will now be turned against her.

It is stated that American agents had reached Franc to purchase arms and military equipments.

The harvest prospects in France were unfavourable owing to the inclement weather. The fruit crop wa lost, and the wheat had been seriously damaged by

Poland was still in a disturbed state. Alarming symptoms of insurrection in Hungary happeared. A great sensation was caused by the assas sination of Count Tekeli.

A call to diligence and faithfulness in the work of our day.—Our Quarterly Meeting was by many considered a favoured one. The gospel messengers seeming sent with fresh messages, and commissioned to comfort and to promise us "better times," as well as to warn us of the prevalence and effect of existing and crying evils. There is certainly, not-withstanding our manifold weakness and shortcomings, a promise of brighter days. Antichrist may rage, and the brightness of our profession seem almost lost by unfaithfulness and indifference, yet the faith of some is more and more strengthened in the conviction that the time to favour Zion has again come. Doubtless it must be through suffering. Our principles do not flourish in the sunshine of the world. Those who maintain their posts, or wards forced down by steam from below, and allower forced down by steam from above—steam, sical force? This is an error. At least, a pair of thing but steam, being the motive force. In expensions must be taken. There are magnetic again into suffering for their own and the elegraphs and magnetic, commonly called electric by steam; then the steam, instead of being alled electric in the force is the cases, however, the mere way to resempt is condensed thus greating as an expension of the cases, however, the mere way to resempt is condensed thus greating as an expension of the cases. In both these cases, however, the mere way to resempt is condensed thus greating as an expension of the case is a second of the case is a condense fixed on Him who was the case in the case is a condense fixed on Him who was the case is a condense fixed on Him who was the case is a condense fixed on Him who was the case is a condense fixed on Him who was the case in the case is a condense fixed on Him who was the case is a condense fixed on the case is a condense fixed on the case is a c into straight and proving paths. If there was among us more of this willingness to suffer, greater acquiescence in the baptisms that cleanse the heart, a readiness to be stripped of our own fancied possessions, even of everything heautiful and comely in our own eyes, how would the fruits of the spirit manifest themselves in our every day conduct, and clothe our spirits with a calmness and holy quietness that would preach effectual lessons. want of this gathering to the abiding teacher within our own bosoms, and with the life it would heget within us, how painful, and unprofitable, and dry as to spiritual consolation, do our religious meetings often appear. How calculated to clothe our hearts in mourning, and raise the inquiry, "What wilt thou do for thy name's sake."-From an unpublished letter of a deceased Minister.

The Walrus .- The chase of the Walrus is of plication as a substitute for steam. If steam be were in the habit of referring it to electricity also; year 890, gave an account of it to Alfred the Greatised to the pressure of fifty pounds on the square but that notion seems to have pretty well died "Having," he says, "made a voyage beyond Noreh, it is very high-pressure steam indeed, whereas out. Looking on steam-engines, high-pressure and whales, which have in their teeth bones of great

For "The Friend."

There are two spirits abroad in the earth, and our disapprobation of their principles or conduct, light-houses, etc.; for extraordinary illumination only two, whereby the actions of men are characteristic should be done consistently with good manners, may be obtained by ourning several of these terized—the one of Christ, and the other of antisas well as in a christian spirit. Indeed, if our threads of large dimensions at once. christ-the one of love, and the other of enmitythe one of the world, and the other of Truth-the we should rarely, if ever, violate the rules of civione of alienation from God, and the other of unity lity;" for by so doing, how often has the way for with, and dependence upon him, maintained by availing labour been closed up, and the minds of humble prayer, and manifested by christian meek. offenders prejudiced, and strengthened in favour of ness, patience, and charity; long suffering, forbear- their own devious course. By the exercise of a ance and forgiveness-by the exercise of that wisdom rough and ill-natured disposition, towards those which is "first pure, then peaceable, gentle, easy to whose appearance, conduct or principles, may not be entreated, full of mercy and good fruits, without harmonize in all respects with the Truth, how often partiality, and without hypocrisy."

In the character and dealings of the true chris- of the right way, from the giving and taking oftian, there is nothing of the roughness, stiffness, fence! coldness and distance, which are the fruit of a selfish feeling of superiority, but all these are purged the observance of christian conduct and manner, away through submission to the humbling, refining has a gathering and uniting influence, while the operation of the Holy Spirit, whereby the heart is opposite tends to scattering and division; as both enlarged, and qualified to embrace all who love experience and observation do abundantly manifest. the Lord Jesus Christ in sincerity; and are seek- The redeeming and saving power of the gospel, is ing, according to their measure of light and a power of love, whereby alone souls can be gathstrength, to follow him in the way of his leadings; ered unto Christ, and we may seek in vaiu by any even as Luther, who declared that "in whomsoever other power or influence to promote the increase I see anything of Christ, him I love."

whom we love."

And again it is said, " Christian charity increases our own happiness with its own increase. A narrow, contracted spirit, under the influence of prejudice, and blinded by fond partialities, can never enjoy the refined pleasures of christian communion. Such a spirit chills and freezes the soul; it checks exertion, except when party is concerned; and dry air, and is subject to but slow oxidation in a looks shy on those, however excellent, who 'follow not us. "JESUS, MY STRENGTH."

Jesus, my strength, my bope, On thee I cast my care— With humble confidence look up, And know Thou hear'st my prayer. Give me on Thee to wait Till I can all things do-On Thee, almighty to create,

Almighty to renew.

I want a sober mind. A self-renouncing will That tramples down, and casts hebind, The baits of pleasing ill-A soul inured to pain, To hardship, grief and loss— Buld to take up, firm to sustain, The consecrated cross.

I want a godly fear, A quick discerning eye, That looks to thee when sin is near, And sees the tempter fly-A spirit still prepared, And armed with jealous care— Forever standing on its guard, And watching unto prayer.

I want a heart to pray, To pray, and never cease; Never to murmur at Thy stay, Or wish my sufferings less. This blessing above all, Always to pray, I want,-Out of the deep on Thee to call, And never, never faint.

I want a true regard-A single, steady aim, (Unmoved by threatening or reward,) To Thee and Thy great name-A jealous, just concern For Thine immortal praise—
A pure desire that all may learn And glorify Thy grace.

Into Thy perfect love.

I rest upon Thy word,-The promise is for me; My succor and salvation, Lord, Shall surely come from Thee; But let me still abide, Nor from my hope remove, Till Thou my patient spirit guide

Charles Wesley.

Microscopic Phenomena .- Grains of sand appear with Him on whom depends the security of the and burns with a steady and extremely vivid flame. of the same form to the naked eye, but seen through In some photo-chemical investigations by Bunsen a microscope, exhibit different shapes and sizes would be more complete than it is at present. "Oh! it is good to trust in the name of the Lord repose in his arm of strength, his parental tenrness and compassion. It is good to have our ny strongholds invaded, our misplaced confince unhinged, our secret props struck away; that may more closely cling unto that, which is not ourselves, nor of our brethren, but comes only m the Source of all might and of all mercy. il it is good to have all sense of hope and of lp withdrawn; to be laid low in the dust with all r pride and selfishness, that we may feel that ich is good to flow in upon us in the Lord's n time as an unmerited gift, and thus be enabled give the praise to Him alone, from whom comes ace and glory, and every good thing. Oh! how eat is my desire, that the Lord would rather re me darkness and distress; than that, enjoying s favour and blessing, I should be unmindful of the ver, or grieve him by saying or doing anything consistent with his blessed will concerning me." "My mind has been much burdened, and weightily fected with the present aspect of things, relating the growth and prosperity of the ever blessed uth : and not only do I allude to the low state things within my own bosom, and in the circle our privileged Society, but also in the world at rge. Under a very humbling sense of the infinite ndescension, which still spares us from day to day, d from year to year, and of the unfathomable mpassion which still pities, helps, preserves, and ovides for us with paternal tenderness, I am ready cry out,- who will not love, and fear and obey ee, O! Lord; and give themselves to be moulded to accordance with thy blessed will?' But oh e ravages, the desolations, which the enemy hath ected on the face of all the earth; how hath he ighted the blooming bud, and blasted the richest ain, and parehed up the fruitful field; so that e time of harvest is become the hour of desola-on and darkness! Here and there, through the oom of this yast howling wilderness, a patch of een revives the drooping eye, and cheers the dert scene; here and there amidst the straw and ubble in this great field, the earth, a few single rs are to be discovered raising their heads; and just sufficient to show what the glory of the crop id of the harvest would have been, had it escaped e destroyer's hand, and not been tramped down the wild beasts." 1817.

Dr. Livingstone's Explorations.

THE VICTORIA FALLS.

The members of the Royal Geographical Soice President, acted as Chairman.

Dr. Livingstone's first letter to Roderick urchison is dated from Sesheke, September 10, three months accomplished a distance of some Falls, and none below Chicova.

feet, but 310 feet-probably a few feet more, as foot. We have thus kept faith with the Makothe weight attached to the line rested on a slope near lolo." the bottom. The breadth from bank to bank is Dr. Livingstone speak of the discovery of a large not 1000 yards, as I conjectured in 1855, but be- and extensive seam of fine coal, and says, the only

SUMMARY OF EVENTS.

The Great Rebellion .- It is still difficult to ascertain what forces the Southern Confederacy have actually in the field, as well as their condition in other respects. Some reports represent that there are only about 30,000 troops distributed over the whole of Virginia, while others increase the number to 50,000 or 60,000. were constantly arriving from the more southern States at the rate of about 4000 per week. It is confidently asserted that there is no want of provisions or muni-tions of war anywhere in the seconded States. Several privateers which were fitted out in New Orleans, are said to be cruising in the Gulf. They have already made some valuable captures of Northern ships. The British government has made a qualified recognition of the validity of the letters of marque issued by the authority of the Confederacy, hence the maritime feature of the contest will probably be more serious than was at first anticipated. The New York Tribune expresses the opinion that the struggle on the part of the South be desperate, having no parallel in any war on the American continent, during this century. President Davis, in accordance with the recommendation of the Congress, has appointed the 13th of Sixth month as a day of fasting and prayer throughout the Confederate

Virginia .- On the 25th ult., early in the morning, the city of Alexandria was occupied by several thousand federal troops from Washington. They met with no refederal troops from washington. They meet with no re-sistance, and the city was taken without bloodshed. Col. Ellsworth, of New York, was soon after shot dead by a man, from whose house he had just removed a se-cession flag. A company of thirty-five horsemen were taken prisoners; the other Virginia soldiers made good their escape. Martial law has been proclaimed, but the citizens are assured that they will be protected in their persons and property, including slaves. Gen. Sanford, in command of the department of Fairfax, issued a proclamation to the inhabitants of the county, informing them that all of its inhabitants may remain in their homes, and continue their usual pacific occupations in peace and confidence. Strong and extensive intrench-ments have been made by the U.S. troops on the Arlington heights opposite Washington; they have also destroyed the bridges on the road, from Alexandria to Leesburg. Up to the 25th, about 6000 U. S. suldiers fever, 35; small-pox, 13; diptheria, 8 had arrived in the neighbourhood of fortress Monroe. The town of Hampton, near the month of James river, tish government had issued a proclamation, warning its

"Confusion covered me, so that I snake in no wise was occupied by them. At the election on the 23d inst., subjects against engaging in the American war. The as I had before felt." "That the words, which a number of the western counties of this State gave beavy majorities against secession. The Richmond Examiner says, that President Jefferson Davis, who was at uttered them, may not have proved injurious to Pensacola, would come to Richmond, as soon as his business at Pensacola was concluded : that Gen. Beaurewho sincerely desires the growth and establishment gard had been ordered to the command at Norfolk, and Gen. Johnston to the command of the forces at Harper's

Kentucky .- The recent intelligence from this State appears to indicate that it will not be drawn into the whirlpool of secession. The Senate, before adjourning, passed resolutions declaring that Kentucky will not sever her connection with the national government, nor take up arms for either belligerent party, but will arm round about me, I often desire to press their lake up arms for present perfect the present party, and will arm importance on the rising generation. They are as and will tender her services as a can editure to effect a just Importance on ties itsing generation. They are as land will sender her services as a necessary to the legis-ations, which assail us in this trial-state of exist-latore, amending the militia law, and requiring the State United States, as well as that of Kentucky.

Missouri .- In this State, also, the secession movement has been checked, at least for the present. General Harney, commander of the United States troops, and General Price, of the Missouri militia, have come to a mutual understanding and amicable agreement, by which the latter pledges the loyalty of Missonri to the general government, and both resolve to maintain peace, and enforce order in common. In accordance with this treaty, the Missouri State troops at Jefferson city, 4000 in number, have been disbanded by order of Gen. Price

Maryland.—All appearance of opposition to the government has disappeared. U.S. troops pass over the State freely, without molestation by all the usual routes. A quantity of muskets, pikes, powder, ball, &c., which had been collected by the secessionists of Baltimore, has been seized by the U. S. military, and conveyed to fort

garrison have been released and conveyed to New York spring; \$1.26 a \$1.28 for red State, and \$1.60 a \$1.7 They were worn out with the long labour and suspense law were worn out with the long majour and suspense in white Alchigan; oast, 31 cts. as 35 cts. as deep readured previous to their reinforcement. The fort has been so strengthened that the secsion army is deter-core, 14 cts. as 45 cts. for new mixed Western, and 4 ctd from attempting its capture. Gen. Braga had about cts. as 47 cts. for pellow. On the same day, the Public 7000 men under command, and was engaged in the construction of additional batteries. Many of his men had \$1.26 a \$1.38; white, \$1.45 a \$1.60; rye, 67 cts. become tired of the long inaction, and were returning prime yellow corn, 581 cts. a 60 cts.; oats, 30 cts. to their homes. The harbour of Pensacola is strictly blockaded.

The Southern Mails .- The U. S. Postmaster General has issued an order discontinuing the transmission of the U. S. mails in Virginia, and other seceded States, and annulling all contracts for the same. Western Vir ginia is excepted from the operation of the order, and the school. Apply to also Tennessee, as that State has not yet formally se-ceded. This course of the Postmaster General is under the act passed at the last session of Congress:

United States Loans .- The bids for the \$8,994,000 go vernment loan were opened on the 25th, at Washington. The bids ranged from 84 to 89, the principal amounts being offered at 85 a 86. Those at 85 and upwards were accepted, and the remainder was awarded to the bidders for treasury notes at or above par.

The Telegraph.—The U. S. Marshals in Philadelphia.

what treasonable communications had been sent South.

The Blockade .- A number of vessels have been captured by the Atlantic blockading squadron; among them are several British ships laden with tobacco, which were captured, when endeavouring to elude the cruisers Prize Commissioners have been appointed to investigate each case, and determine it upon its merits. Some of the prizes have been sent into New York, and others to Philadelphia.

North Carolina .- The convention passed an ordinance of secession on the 22d, by an unanimous vote.

Steamship Great Eastern.—This "monster of the seas" sailed on her voyage from New York to Liverpool, on the 25th, with passengers and a cargo of breadstuffs, provisions, &c.

were about 2000 more of their people yet to come from the districts mentioned.

Philadelphia .- Mortality last week, 247; of scarlet

FOREMY .- Liverpool dates to the 15th ult. The Bri-

proclamation declares the intention of the governmen to maintain a strict and impartial neutrality between the United States and the Southern Confederacy notifies British subjects that if they enter the militar service on either side, or join the ships of war or trans ports, or break or endeavour to break any blockad lawfully established, or carry soldiers, despatches, o any material contraband of war for either party, the will be liable to all the penalty and consequences, an will do so at their peril, and in no wise obtain protect tion from the government.

The Appalachian Mountain System. (Continued from page 306.)

In the Adirondack group I have cited only the

41.) But it is to be remarked that the heights buckley is but a short distance south of Smoky on by the first are all too great by reason of Dome, and is but 61 feet lower, (baight 3599 feet.) defective nature of the instrument employed, as ch Lake Champlain or the Mohawk river.

Great valley, and in the principal chains which as will be seen by the following: der it. I have already said that the interior Grandfather Mountain, at the sources of Yadder of the Atlantic plain rises gradually from to 1200 feet, from New Jersey to the upper on of the Catawba, near Morganton. The as of the railroads gives us in the Great valley

eries of significant points:

Great valley at Enston, on the Delaware, in 165 ft. Pennsylvania . . . near the Schuylkill, Penn. 250 44

at Harrisburg, on the Susque-328 " hanna at Chambersburg, Penn. 600 11 near Staunton, south fork of Shenandoah, in Central Vircinia . at Salem, in the upper valley of the Roanoke . Newbern, in the valley of New

River . 2065 " Mt. Airy Ridge, highest point near the sources of the 2595 " Holston Abingdon, in South'n Virginia 2071 "

Bristol, on the northern boundary of Tennessee . Greenville, Tennessee . 1581 " Knoxville 898 " Chattanooga "

of the Great valley under the name of Blue Ridge, of the Black mountains: Iron, Smoky, and Unaka Mountains, presents in the same manner an increasing altitude.

Bine Ridge, in New Jersey, about 1000 to Peaks of Otter, in Virginia, the highest White Top, on the boundary of Virginia, North 1500 ft. Smoky Dome, Clingman's Mountain, culminat-ing point in the chain of the Smoky Mountains 6660 " Thunderhead, in Smoky Mountains . Great Bald, highest peak, in Smoky Mountaius, near the cut of Tennessee river . . 5520 " Hangover, highest peak of the Unaka Mountnins, about 5600 # Great Frog Mountain, in Tennessee, highest peak near the south end of the System

These are of course only a very few of the peaks that have been measured in this chain, the object being merely to exhibit the gradual increase of elevation to a certain point. A large number of st elevated point, Mount Tahawus or Mount altitudes have been determined by Prof. Guyot, and rey, which is the only one of the great peaks among them we find some twenty summits of over ch I have as yet measured. I found its height 6000 feet elevation, between White Top, (the cor-9 feet. This height differs from that of Red-leven in the geology of the State of New York, Mount Buckley. Three-fourths of these are be-67 feet,) and from that of Prof. T. Benedict, tween Bald Mountain and Smoky Dome. Mount

ave had occasion to convince myself; and also already been stated, an off-shoot or branch of the t Prof. Bondiet, although provided with a main range of that name, the bifurcation being in the barometer, was only able to make use of the neighbourhood of Christiansburg, in Mongoresponding observations made at a considerable mery county, Virginia. Although an irregular and ance. From Tahawus the height of the peaks broken chain, it forms the barrier between the wainishes both towards the north, and towards the ters that flow directly to the Atlantic, and those th, and the chains dwindle away before they that reach the ocean through the Mississippi. In Virginia, it does not appear to attain a greater 'In the southern part the law of gradual in- elevation than 4500 feet. In North Carolina, howage is still more regular. It can also be exhi-age at the exterior base of the mountains, along south, in Georgia, they gradually decrease again,

The High Pinnacle, which touches the Black 5701 " Mountain Great Hogback, at the sources of the Tucka-4792 " White Side, near the sources of the Chatooga 4931 " Mud Creek Bald, near the head of the Little the Hiwassee river

It appears, therefore, that this eastern branch attains its greatest elevation at a point somewhat further north (about twe-thirds of a degree of latitude,) than the culminating point of the western or main range, namely at Grandfather Mountain, frem which point southward the altitudes gradually fall off again. It is between these two chains that that elevated mass of mountain peaks called the Black Mountains, is situated. We have termed to a mass of peaks; it is more properly a continuous second in altitude of the White Mountain group. Of the mountain ridge, consisting of some fifteen peaks with but slight depressions between them, as will be seen by the following table, which contains all mice in length, forming the main chain of the Black mountains.

"The principal chain along the eastern border the elevations given by Guyot in the main chain

Five of the above altitudes are of the gaps or depressions between adjacent peaks; and two of these gaps, it will be observed, are higher than the summit of Mount Washington.* This ridge, from Potatoe Top at the south end to the summit of Bowlen's Pyranid near the north end, is about eight miles and a half in length; it is slightly curved near the southern end. About a mile beyond Bowlen's Pyramid is Grassy knob, the north end of the ridge, the altitude of which is not stated by Guyot. This Black Mountain chain branches off from the Blue Ridge at High Pinnacle in the latter. The connection between Potatoc Top and High Pinnacle forms Toe River Gap, the altitude of which at the lowest point is 5188 feet.

We return now to the remarks of Prof. Guyot, respecting the general configuration of the system.

"The law of general increase of altitude towards the south-west in all parts of the southern section of the Appalachian system, is thus fully established; but it is to be remarked that the different elements of which it is composed, do not arrive to their maximum of altitude in the same locality nor in the same latitude. The bottom of the Great valley reaches its greatest elevation near the sources of the Holston, at about 37° N. lat. The mass elevation, or terre-plein, culminates in the

* In compiling the introductory remarks to this nr. ticle, some of the gaps whose altitudes are given in Gayot's tables, were inadvertently reckoned as peaks; and inasmuch as between the compiler and the printer, several errors occurred in that paragraph, we will here give the passage in its corrected form, as follows:

give the passage in its corrected form, as follows: Here, within a territory of one hundred and twenty miles in length, from north-east to south-west, and some forty miles in breadth,—extending from the ex-treme sources of the New River to the passage of the Tennessee through the Sundy Mountains of the Ridge,—there are, according to the control of the published by a they will be a some thirty published by a they Movin Washington, and some thirty-

The isolated groups and intermediate chains, cul- in words?" minate in the Black mountains, a little south of 36° N. lat., although, in this region, the principal chains on the two sides do nowhere rise to 6000 feet, while these last, the Blue Ridge and the Smoky Mountains, reach their greatest mean and absolute height at the north of 35° N. lat., between the valleys of the French Broad and Little Tennessee. in the northern part of Haywood and Jackson counties. Although the high peaks of the Smoky Mountains are some fifty feet lower than the isolated and almost exceptional group of the Black Mountains, yet, by their number, their magnitude, the continuity and general elevation of the chains, and of the base upon which they repose, they are like a massive and high citadel which is really the culminating region of all the Appalachian system." (To be continued.)

For "The Friend." Musings and Memories. -

OUR OWN FAULTS SEEN IN OTHERS OFTEN OF-FENSIVE TO US.

I have been led into a train of reflection, which has resulted in the above motto, by some of the prattlings of a little child not yet two years of age. The child scarcely ever sees any kind act done for another, but if the one receiving the favour does not immediately acknowledge it, she will remind them of what she considers as their duty, by looking up at them, and saying "blige." It has been so with her for a number of months past, during which time she has been a faithful monitress to others, vet has not always remembered to practise in her own case, what she seems determined none other in her company should neglect.

How few of us who are happily in the daily experience of kindnesses from the members of our families at home, and from our friends and others abroad, always remember to say "blige" for these

From such reflections my mind passed to consi-

Our blessed Saviour draws the attention of his disciples to the living flowers around them, and argues from the beauty with which God had adorned them, that he would much more care for Flowers are his rational, intelligent creation. sweet proofs of God's goodness and wisdom, given by him to beautify this earth for his children. The Lord Jesus drew lessons from living flowers, when personally on earth, and since then his Holy Spirit has preached saving lessons from dead ones. muel Bradburn, a remarkably useful, religious Englishman of the last century, dates his first soul-awakening visitation of Divine grace from his musing on some decayed flowers. As he gazed thoughtfully upon them, he felt his mind stilled into a seriousness, which, through the retaining help of

the Holy Spirit, was not momentary, but of a life-

long endurance. Flowers are pleasant objects to draw religious instruction from, whilst living, or when their fallen leaves give forth "a sweet, decaying smell." But objects of far less beauty have given occasion for the Holy Spirit, to operate savingly upon the hearts of the children of men. Edward Andrews, when a wild and wicked youth, was awakened to a sea wild and wicker your, was a warmen to a consideration, which, through the Lord's ole are the mercy, proved enduring and soul-saving, by finding a human bone. He thought it would be right inflammable. for him to bury it, and after a time giving up to this impression of duty, his heart thence became more and more open to receive the instruction of it should be, with the white portion, makes a sa the Spirit, so that he grew in grace, and before oil to consume, but of a light lemon colour; th long was an able and fervent minister of the gospel colour, unfortunately, does not coincide with the of Christ.

At all events, there was no odor of brimstone at the above test will infallibly prove whether oil gathered him "as a shock of corn cometh in his perceptible to us. Out of our party of five, my safe to use, let the colour be what it may; but season," we reverently believe, to join the just of all American friend and I were now the only ones who e greatest danger and the least economy attends generations in singing the praises of redeeming love, experienced no other cause of complaint than that

To the top of Teneriffe.

hty-seventh year of his age, SAMUEL BETTLE; Pausing before we began the ascent to our proposed ing, when we were called up to recommence our beloved member and minister of the Monthly resting place for the night, we east our eyes round journey. the vast panorama, bounded by distant rocks of Having bowed in early life to the convicting most fantastic shapes and of different colours, and the air most bitterly cold and light, Fahrenheit's over the tops of those to the southward of us we thermometer standing at 41 degrees. Our guides

the steep side of the Peak, ascending by a kind of saddle, having previously filled the "alforjas" that d to wait to receive that ability from on high, sandy pathway, open on the left hand to a course one of them carried, with provisions and a couple ich only can qualify for usefulness in the church of old lava some depth below, black and rugged to of bottles of brandy. The other carried a staff, Christ. Submitting to the humbling baptisms the last degree. The nature of the road, and its with a flag attached to it, that we had prepared the Holy Ghost and fire, by which the heart is great acclivity, necessitated our making very short in Port Orotava, and I took care to stran on my traverses, zig-zaging upwards for about half an own shoulders my little valise full of cotton, while in to his honour; he was made an instrument hour, when to our great content we reached a small one of the muleteers volunteered to accompany us good to others; and became an eminent minis- piece of level surface projecting from the side of to the summit with the box for specimens. the Peak, with a few tall and unshapely black rocks igently. Being gifted with clear perception and standing upon it; and this was the Estancia de los ling a narrow and very steep pathway on light ound judgment, a mind remarkably well disci- Ingleses, or Englishmen's resting place; where, at pumice-stone and ashes, and before long lost the ned and balanced, and his natural endowments an elevation of 9933 feet, we were to bivouse for benefit of the moonlight, which was intercepted by nctified by Divine grace; he was peculiarly fit-the night. Gladly did we all dismount and stretch the vast mountain before us, the acclivity of which I for service in the Society of Priends, to the our limbs on the earth, admiring the novelty was here very great, and the turns in the pathway lfare and interests of which he devoted himself and majesty of the scene beneath us, where the extremely short. Our beasts frequently slipped th cheerfulness and fidelity during a long course plain we had toiled across was overshadowed by backwards two or three yards at a time, and, at one years. Self-possessed and calm amid surround- our gigantie neighbour, while the eneireling monn-particularly awkward angle, the mule of our Ameexcitement, with great aptitude for discerning tains and more distant elevations yet glowed under rican friend lost its hinder foot-hold, just where the departing sunheams, as did also the summits the road bordered on a deep chasm in the bed of Grand Canary, resting upon a bed of clouds lava, with a degree of peril to his life that we only heaped side by side like flocks of wool of the purest became aware of when we repassed the spot on our sistance was often made peculiarly helpful in whiteness, shutting out the view of the sea.

> they returned with a sufficiency of retama to keep "Alta Vista," nearly seven hundred feet higher up fires, night had closed in, and the full moon was than the Estancia, and from henceforward had to high above the horizon before all the arrangements trust to our own legs alone for the completion of of our encampment were made. Ere these, how- the ascent. ever, were completed, one of our party was taken extremely unwell with faintness, shivering fits, and have mentioned as descending all down to near the violent pains in his head; we soon covered him Cañadas, is joined to its source, if I may so term it, with blankets and cloaks, and raised a blazing fire, for here we had nothing in view but a vast chaos

ristian feeling that he was but an unprofitable ser- over the incidents of the day; but the hour for the cavities where their angles, touching or restanses from all sin; and that his only hope of space separated from our supper room and dormi-named, and over this we had to climb and clamber,

nance, that blessed religion, in which he had ourselved together on the ground, muffled in our of our guides, who steered their course by nothing g endeavoured to live, sustained his mind in cloaks and blankets, for the cold was very search-but small stones that had previously been placed tience and composure, trusting in the Lord; ling to prepare for the toil of the ensuing morning, on larger rocks here and there, to serve as landdefine and composure, trusting in the Lord; ing, to prepare for the toil of the ensuing morning, on larger rocks and there, to serve as island, though not addicted to speaking readily on a solemn a subject, there were times when he expected in a subject, there were times when he expected in a subject, there were times when he expected in a single assurance he felt that death plaints of extreme cold, pains, and sickness of and most of us felt a greater or less difficulty of uld have no sting, nor the grave any victory, stomach. Westretched him near one of the watch-pearing to be borne above all visible things, by fires and gave him some warm brandy and water, above eight or ten steps without stopping to rest, not provided the standard prov

arising from the hardness and inequalities of our couch, and, with the exception of some of the mules Per "The Friend." It was now five o'clock, and as we were already in breaking loose and getting into our eamp, he and the shade, the air began to feel piereingly keen. I slept uninterruptedly till about two in the morn-

The moon was now to the westward of us, and need the great work of regeneration to be begun plainly discerned the summits of the island of Grand informing us that we could ride yet a little further up, and our three sick men being now sufficiently And now we breasted our jaded beasts against recovered, we were all, shortly after, again in the

On leaving the Estancia, we commenced ascenddescent by daylight. Without further accident, Our muleteers, after unloading and securing their however, in about three-quarters of an hour, of beasts, had dispersed in search of fuel; and when this unpleasant mode of travelling, we reached

At this point the stream of lava rocks, that I by the warmth of all which, and the administra-tion of a little spirits, he was partially relieved. For a long time we reclined in the moonshine, derful manner, one over another, without the least thly valued member; yet, as he approached the For a long time we reelined in the moonshine, derful manner, one over another, without the least see of life, with great humility, and under the gazing with delight on the prospect, and chatting particle of earth or sand being perceptible even in ot, be remarked that he had no works of his own thinking of our supper came round. Our two ing upon each other, leave fissures of a kind to trust to—nothing to rely upon but the bound-watch-fires were blazing in rear of the upright make one tremble at the thought of one's leg accitrust to—nothing to rely upon but the bound-s mercy of God in and through Jesus Christ, rocks, and a rude wall of stones, piled one on the Redeemer and Saviour, whose precious blood another by the arriaros, confined their beats to a "Mal Pais," or bad country, as it is appropriately rather than walk, having often to assist our progress But it was now getting late, and we all huddled with our hands, and following closely on the track

leemed Spirit, flowing primarily to his heavenly manner, and required the same treatment as the we issued upon a small plain of powdered pumice ther, and embracing, in its expansive influence, first. They both suffered violently from the incon- and ashes, strewn with large stones and pieces of ery rational soul, desiring the everlasting welfare venience that usually attends landmen in a gale at lava. This was "La Rambleta," the clevation of all. As the ravages of the afflicting malady sea; and this is common to many travellers on the which is 11,650 feet; and here we stopped to rest, dually wasted his physical energies, he calmly Peak, some of whom attribute it to sulphuse sheltering correlves as best we might from the wind, seended to the borders of the grave with holy exhalations in the atmosphere; but I conjecture that blew extremely hard, and was quite benumb-

A short time before reaching this spot, we had tint, speedily followed with brilliant streaks of (who were knocked up,) and moved round to the horizon, which was hard to distinguish at that mo- almost have thought it touched this island; and a glowing more and more under the first rays, while, beneath us; and as the sun went on ascending, less profundity, were illuminated by the coming day. the Peak. Baron Humboldt states the anticipation of sunrise to be 12' 55" between the time of its being visible at 115 miles distance, and Humboldt says it is on the Peak and on the plain, and is the greatest visible from the south cape of Lanzarote at 153; the elevation of any mountain has been known to but supposing we take the medium of 135 miles as produce.

and we shall stand upon the summit, and crown tain. our expedition with success. Alack! it is a hard

a small breach in the side we had ascended by. lands." Here the wind howled about us, and the cold was not yet mitigated by the slanting sunbeams. Both gan to dissolve, and we discovered the Villa, with some of those which men call fundamentals,) and in which the tea is dried by means of a fire beneat Port Orotava below it, apparently almost under yet be a citizen of it, and in the power.—Isaac our feet. Further off, we could only trace the Penington. boundaries of the island by the fringe of white seafoam all round it.

After well scrutinizing all these objects, three of perceived the sky to the eastward assume a pearly us left our guides and two remaining companions, orange and pale red colour, that progressively north side of the cone, from whence we saw Palma orange and pate to cook at a long register of the separated from us by what looked like a mere deepened in tone. Now, at about five o'clock, the separated from us by what looked like a mere for the wants of the prophet, the widow and son, sun burst in all its golden refulgence over the streamlet. Gomera seemed so near that we might fill the days of sore famine their period had run. ment from the mist that mantled upon the sea. little further beyond lay Hierro-all very distinct From moment to moment the sugar loaf of the and clear. The town of Garachico, and that of To yield us, from day unto day, a supply Peak, at the foot of which we now stood, went on Yeod, with its forests of pine trees, seemed directly Lest we cat our last portion in secret, and die! looking downwards from our perch, we saw the every point of view became more minutely distin-whole remainder of the island yet wrapped in the guishable. We next scaled the rocks on the northgloom of night; and it was a very long time before east side, which are the highest of the ridge, and the way of earth's famine, sufficient 'twill be less possible way of large way the valleys and glens, according to their greater or consequently stood upon the most elevated spot on

This mountain has been seen from a ship's deck the distance at which, in clear weather, the horizon To strengthen and cheer till earth's famine is o'er, Here, then, we stood, as I have said, on the lit can be made out from the summit of the Peak, And we enter thy gates, where they bugger no more. tle plain out of which the sugar loaf, or final cone then, by walking round it, the eye can take in the of the Peak, rears itself. One effort more—its astonishing circle of nearly 800 miles of ocean—an height is but 512 feet from our present position- extent quite unrivalled by any other known moun-

Our first employment here was to plant the pole pull upwards for men wearied with their travel and flag we had brought, to announce to our friends over the Mal Pais, and not a little out of wind. in Port Orotava the completion of our journey; a But up we go, on the only practicable side of it, job that cost us infinite trouble, and not entirely (which is the south-east one,) following our guide devoid of risk; for the stones were all moveable and in Indian file, though with less success than he; insecure, notwithstanding their weight (which, of for, not so accustomed to the treacherous looseness many of them, cannot be less than eight or ten of the soil on this steep ascent, we often slipped a cwt.) The outer face of the cone is on this side couple of steps or more backward, though occa-sionally meeting a firmer stepping place on some are high enough above the crater, or caldron, to protruding piece of old lava. As we slowly worked make the possibility of a fall on either side a rather upwards, we noticed several jets of steam and va- unpleasant idea. Add to this the violence of the pour issuing from amongst the stones and sand, wird, which in one or two gusts I really thought and called by the guides "the Peak's nostrils," would have carried us bodily away, and the force would have carried us bodily away, and the force and hereabouts, certainly perceived a smell of sul- with which it flapped the flag about while we were securing the staff, which, though formed of two After a number of short haltings to take breath, stout chestnut poles, nailed and lashed together, we at last attained the summit, which we found was springing nearly to the earth and up again, surrounded with a natural wall of large rocks, thrown promisenously over each other, but having list's Life in Morocco, Spain, and the Canary Is-

The great work of the Ministry .- This is the the guides advised us not to enter the crater, or, in the guides advised us not to eross the ridge of rocks so as is no darkness at all, I John i. 5, and the great to come upon the centre of the summit, as, they work of the ministry is to show men where this San Paulo, near San Bernardo, in Brazil, as said, when the wind blows with so much violence light is, and to turn men from the darkness, wherein large and productive tea plantations. Tea is raise as it then did, it forms eddies in the hollow, which, is the power of Satan, unto this light, and wherein from the seed, which, being preserved in brown so if indeed not dangerous, are at least alarming and is the power of God, Acts xxvi. 18. And he that gar, can be transported to any portion of the course. uncomfortable. They themselves lay down on the comes into this light, and into this power, is owned try. These little teaballs are planted in beds, are lee side of the rocks, wrapped in their blankets, in the light and in the power, wherein is the life of then, in the manner of cabbage plants, are taged and we stretched ourselves beside them long enough all the saints, and the true fellowship both with the ported to the field and placed five feet apart. As to our own island, the all the doctrines about it, and get be a stranger to kets, in which the leaves are deposited when collected by clouds; but as the morning advanced, they be-may want divers doctrines concerning it (perhaps) one by one; 3, open overs, or large metallic par and to dissolve, and we discovered the Villa, with some of these which, men call fundamental, and in which the lear is dried by means of a fire beneat

1 kinos, ch. xvii. A handful of meal and scant oil in a cruse,

We need in our famine of spirit and power, Such barrel and cruse even down to this hour ; .

Oh, fountain of blessing ! dispense to my heart, The gifts of thy spirit true food to impart!

Unbounded thy treasure, dear Saviour, I know ! And the future, with plants of abundance is sown, For I serve a rich master, who leveth his own. I feel, whilst thanksgivings and praises, arise

Though hungry-and needy, I toil here below.

Thy treasure-house open with needful supplies,

"ETERNAL BEAM OF LIGHT DIVINE." Eternal beam of Light divine Fountain of unexhausted love In whom the Father's glories shine Through earth beneath, and heaven above !

Jesus, the weary wanderer's rest, Give me Thy easy yoke to bear; With steadfast patience arm my breast, With spotless love and lowly fear,

Thankful I take the cup from Thee Prepared and mingled by Thy skill-Though bitter to the taste it be, Powerful the wounded soul to heal.

Be thou, O Rock of ages, nigh ! So shall each murmuring thought be gone ! And grief, and fear, and care shall fly As clouds before the mid-day sun.

Speak to my warring passions,-Peace ! Say to my trembling heart,—Be still!
Thy power my strength and fortress is,
For all things serve Thy sovereign will.

O Death! where is thy sting? Where now Thy boasted victory, O Grave?
Who shall contend with God? or who Can hurt whom God delights to save? Charles Welsey.

versary, persuading us to press on and get more or pressed with business, remember the prophet and more of the world's goods and wealth colored the woman to bake the little cake for billing to serve.

How Swiss cheese is made .- The manner in making use of some simple things and feel more and had but little he, the enemy, would sink down which Swiss peasants combine to carry on cheese comfortable. But, dcar Hannah, whether I shall into degradation, and fall from a care, and trust, ever again be well and strong enough to visit the and reliance upon best Help; that some who had people of Norristown, is not known by me. Am begun well and run well for a season would fall from the district of Gruyerc, in the canton of Frey sorry that any of my friends should have unneces- away: he told us the same thing that kept our burgh, to take care of the herd and make the sary trouble or anxiety about the meeting. I be-lieve my friends at home are quite free that I a faithful attention to the pointings of the spirit of and one cowherd, are considered necessary for should retain my minute for a while, to see if I the Truth in our own hearts, daily and however, the work of the cown get shall be able to attend to it. The impression this watchful, waiting state, would keep us from made upon my mind some months since, in regard overreaching, and we would grow in grace from each cow daily. The cheesemen and his assistants to that place was very similar to what thee extended that of a little child to the state of men and womilk the cows, put the milk altogether, and make presses. And that my way should have been made men, fathers and mothers in the church; though so open and unobstructed, in such public opportuniwe were in imminent danger, yet he seemed to have owner receives the weight of cheese proportionable
ties, has many times been a wonder to myself! a view that some would stand and he found in their
to the quantity of milk his cows have delivered.

The gift has had more 'free course,' than even lots and places when the fathers and mothers were By this co-operative plan, instead of small sized, The git has had more 'tree course,' than even lots and places when the fathers and mothers were among 'mine own people,' so that were it not for removed; that the day would come when the umarketable cheeses, which each owner could the remembrance of the past, many a time would have been so and daughters would be touched,— produce out of his three or four cows' milk, he has my heart have failed me. Thou wouldst like to know those of the highways and hedges,—and finding the same weight in large marketable cheeses, supebow I fared in my travel; I can assure thee it was some with whom they could unite, they would not interest made by people who attend no time of rejoicing, but rather of sore travail and to, and so there would be raised faithful witnesses

A Terrific Cavern .- J. W. Atkinson, F. R. G. S., livered a lecture lately, when he described a fearpening by a channel cut into the solid rock; it

Leisure Hour,

deavern which he had met with in the course of Friends.—Dearly beloved youth, lay to heart the charcoal is still in the air. On the brightest and s travels. While travelling along the steppe, great slackness of zeal which appears in too many; sunniest day, when every object can be distinctly arthe footof the Alaton mountains, hesaid be came the brink of one of the dry river beds frequently which spread over our assemblies in this day, and coal in an invisible condition, pervale the sirt, and in those regions. This was the evident trace to break through, many times depriving us of the (Ilass is a beautiful illustration of the transparency the sudden distription of a mountain lake by a heavenly places in Christ Josso our Lord! It is of a compound, which, in truth, is nothing but a arful earthquake at some period. Travelling is on a real the breaks where the control of the rost of three metals. This power of the control of the rost of three metals. This power of the control of the rost of three metals. This power of the control of the rost of three metals. ong the bed of the stream he came to a deep certainly is our own fault, because wrong things matter to change its condition from solid opacity alley, about fifteen miles long and four miles are suffered to prevail. Oh! that our youth may to limpid transparency, causes some rather puzzling ide, surrounded by mountains varying from 5000 be stirred up in a godly zeal to cry out fer phenomena.—Substances increase in weight, with on tail height. This had been a deep cently with the prophet Elisha, "Where is the Lord out any apparent cause; for instance, a plant goes designed spread over its bed. "I also found," dead sells spread over its bed. "I also found," end to be vigilant in ardent end should spread over its bed. "I also found," end to be climber that the same spirit, to atom that is missing from the earth in which it is succeed those honourable worthies who are removed growing. Now, the simple explanation of this is, iffs, showing that the depth was 560 feet. Nearly from works to receive a blessed reward. Consider that the leaves of plants, have the power of withposite to the gorge by which we had entered, that the business of your day is to come up in a drawing the invisible charcoal from the atmosphere, ere was another in the mountains, to the north, faithful succession, maintaining the cause and testing it to its visible, state, in some shape n reaching it I found this was also a deep and timony of God, left with you by your ancestors, or other. The lungs of animals, and a smokeless arrow ravine, and no doubt formed by the earth. Stand fast, therefore, in the liberty purchased for furnace, change matter from its visible to its invisiake; through this the water had rushed, drain. you by great sufferings and the shedding of inno- ble state. The gills of fishes, and the leaves of ake; through this the water had rushed, drain- you by great sufferings and the shedding of inno- ble state. The gills of fishes, and the leaves of ge the lake, and had formed the great watercourse learn blood; be afraid to transple thereon; which plants, reverse this operation, rendering invisible or the plain. We shortly entered the chasm, which all certainly do who turn away from the Truth as glaseous matter visible. Thus the balance in nature is maintained, although the continual change has left great fury. Our way was a rough and danterous one; sometimes several hundred feet above look ightly esteem it, turning their backs.

The same of fishes, and the leaves of glast state and the severse this operation, rendering invisible or instruction and the second matter visible. Thus the balance in maintained by the second matter visible. Thus the balance in the same point of the control of the con e stream, and then descending nearly to the level upon it, violating the blessed testimony thereof in the water. At last we reached a spot beyond its several branches, will, unless they report, be high, to all appearance, we could not proceed wholly rejected and east off, as being unworthy of sons who are unable to write are required to make le were now a little above the torrent, which was so great an honour as that of holding forth a instead of their signature, is in the sign of a cross, idden from our view, and close in front of us standard of truth and righteousness to the nations; and this practice, having formerly been followed by ne rocks rose up like a wall to an enormous beight.

and others will be called and chosen for that great kings and nobles, is constantly referred to as an and glorious work. The Lord is able to raise up instance of the deplorable ignorance of ancient uced me to suppose it was rolling over a deep fall.

of those who may be compared to the stones, and times. This signature is not, however, invariable he old guide told me it was Shaitan's Cavern, to make them Abraham's children, by doing his proof of such ignorance; anciently, the use of this vallowing up the river. The mouth of the cavern works; while those who might have been the mark was not confined to illiterate persons, for

as about thirty feet wide and ten feet deep. A Materials in their Invisible State.—If a piece dge of rocks, about twelve feet wide, formed a of silver be put into nitric acid, a clear and colour less liquid, it is rapidly dissolved, and vanishes le level of the water. When my astonishment from sight. The solution of silver may be mixed ad somewhat subsided, I prepared to explore the with water, and, to appearance, no effect whatever ame wreathing up, giving the spot a most super-atural appearance. Few persons could stand on is utterly inexplicable. Philosophers do not even ne brink of this gulf without a shudder; the roaring broach theories upon the subject, much less do they f the water was dreadful as it echoed in the lofty endeavour to explain it. The substances dissolved the people thereof; be not in too much familiarity arkness. I sat down about fifty yards from the ing once existed never ceases to exist, although it Elizabeth Stirredge.

stants are paid so much per head of the cows in cutrance, and in the twilight made a sketch of the can change its condition, like the caterpillar, which oney or cheese; or sometimes they hire the cows, scene. Having emerged from the ravine, we looked a becomes a chrysalis, and then a gorgoous butterfly, and pay the owners in money or cheese. A similar down on the last low ridge; this appeared about If a pailful of the solution of silver be east into t system exists in the French Jura.—Notes of a, three miles across, and at a short distance beyond the stream, it is apparently lost by its dispersion we saw the fire of our companions blazing brightly." in the water; but it nevertheless continues to exist. So, when a bushel of charcoal is burned in a stove, it disappears in consequence of the gas produced Tender advice, caution and counsel for our young being mixed with the vast atmosphere; but yet the

as formed by a rugged arch, about fifty feet wide children of the kingdom, may by disobedience proanongst the Saxons the mark of the cross, as an
ad seventy feet high. The river entered this voke him to exclude them.—John Griffith. was required to be attached to the signature of those who could write, as well as to stand in the place of the signature of those who could not write.

In those times if a man could write, or even read, his knowledge was considered proof positive or presumptive that he was in holy orders. The word avern by placing my packet of baggage and my is produced; thus, in a pail of water, we dissolve clericus or clerk was synonymous with penman; fle on a rock, and the two Cossacks followed my and render invisible, more than ten pounds worth and the laity, or people who were not clerks, did cample. The guide watched these proceedings of silver, not a particle of which can be seen. Not this great interest, but when he beheld us enter only silver, lead and iron, but every other metal. The ancient use of the cross was therefore universal, excern he was horrified. Having proceeded bout twenty pages, the noise caused by the falling. When charcoal is burned, when candles are ater was fearful, and a cold chilling blast met us, burned, when paper is burned, these substances all from its holy associations, and generally the mark rom this point the cavern extended both in width disappear, and become invisible. In fact, every on this account Charles Knight, in his notes to the Pictorial Shakpeare, explains the expression ons. We cantiously groped our way ou in the be rendered invisible. Matter, which in one conloom for about eighty yards from the entrance, dition is perfectly opaque, and will not admit the approaching to the character of an oath. This hen we could see the river bound into a terrific least ray of light to pass through it, will, in ano-byss—'black Erebus'—while some white vapour ther form, become quite transparent. The cause

The hurt of many .- Beware of the world and ome. It was impossible to hear a word spoken, in water, or burned in the air, are not, however, with them, nor let in their spirit to mix with yours; or could this seene be contemplated long; there destroyed or lost; by certain well-known means which has been the hurt of many who have made as something too fearful for the strongest nerves they can be recovered and again be rendered visi-a good beginning and been going on their way, yet hen trying to peer into these horrible depths. ble; some in exactly the same state as they were have erred for want of watchfulness, and keeping Ve turned away and looked towards the entrance; before their invisibility; others, though not in the to the guide of their youth, the light of Jesus or a distance the sides and arch were lighted up, same state, can be shown in their elementary con-ut the great space and vast dome were lost in dition; and thus it can be proved, that matter have-comes in any other way, is a thief and a robber.— that the dross, the tin, and the reprobate silver, may be purged away. This is the day which hath for years been declared of, in the spirit of prophecy. Yet will the Refiner bring forth a remnant who resemble the gold, with its own lustre, and bearing the inscription of "Holiness to the Lord."—Sarah [Lynes] Grubb.

THE FRIEND.

SIXTH MONTH 8, 1861.

SUMMARY OF EVENTS.

Progress of Hostilities .- The recent movements of the federal forces appear to be designed to compel an early removal of the insurgent army from Harper's Ferry. Troops, to the number of 10,000 to 12,000, have been assembled at Chambersburg, Pa., and a large number of Harper's Ferry from the West. The arrival of the West-ern troops was hailed with enthusiasm in Western Virginia. Before crossing the Ohio, Gen. M'Clellan issued a proclamation to the Union men of Virginia, declaring that the federal troops came as friends; that their homes, families and property were safe under their protection, and that there would be no interference with their slaves. The progress of the Western troops, was effected without opposition. At Philippi, Barboar county, they surprised a camp of the insurgents, 2000 strong, and routed them, capturing arms, horses, provisions, ammunition, &c. The secession army at Harper's Ferry is strongly fortified in its position. The number has been estimated at from 8,000 to 12,000 men. The U. S. forces on James river had been increased to over 10,000 The insurgent army at Norfolk is said to number 7000, and about 4000 were posted at Yorktown on the right bank of York river, eleven miles from its mouth About 200 fugitive slaves from the vicinity have taken refuge in fortress Monroe. Their labour was needed, and Gen. Butler had set them at work, and ordered them to be supplied with the usual army rations. These slaves had been led to think that Gen. Butler and many of the soldiers with him, were coloured men. In the vicinity of Washington and Alexandria, the advance of the federal troops has led to several unimportant skirmishes, attended however with some loss of life, and causing greater vigilance and increased exasperation on both sides. The insurgent batteries at Acquia creek, about fifty miles below Washington, were hombarded by the Pawnee and other war vessels, without any very decided result. At Fairfax Court-house, a collision oc curred on the night of the 30th, between a company of U. S. troops and the secession forces, in which some lives were lost on both sides.

Fort Pickens.—The costly dry dock at Pensacola has been sunk, says the Mobile Tribune, in the channel between the navy-yard and fort Pickens. This will preveot war vessels from entering the harbour. This dry dock was constructed by the U.S. government at a cost of a million of dollars. The Charleston Mercury advises against the long threatened attack of fort Pickens. It says, the batteries creeted against it are a mile and a third distant-too far to breach with certainty. A storming party would have to advance under the fire of the fleet, the undertaking would be desperate, and uncertain in the result, and could not fail to be attended

with great loss of life io any event.

The Southern Confederacy.—An act passed the Southern "Congresa," previous to adjourning, prohibiting the shipment of cotton from the Confederate States except, through the seaports of the said States. The determination seems to be, that no cotton shall come north so long as the Southern ports are blockaded; but as the people of the South have little to sell except cotton, necessity will probably make them as anxious to find buyers as the North will be to discover sellers. Jefferson Davis, President of the Confederacy, arrived at Richmond, Va., on the 30th ult. Gen. Beauregard has gone to Memphis, Tenn., to take command of the Western division of the rebel army. New flour from this year's wheat, has made its appearance in parts of South Alabama and Georgia.

Virginia .- The post routes and post-offices managed In post touce and post-ource managed by loyal citizen and in loyal districts in Virginia, are illinois, the distinguished politician and stateman, died not to be deprived of the mail service under the creent at Chicago, on the 3d inst, aged forty-eight years. Order of the department. If they should be supended — The U. S. Coinage, during the Fifth mount, was as

the Divine hand was turned upon us as a people, upon due sovice of the facts. The port of Alexandria, gold, value \$5,104,415; silver and nickel, 2820,218 new collector having been appointed, has been reopened to the commerce of the country, and therefore vessels will be admitted as heretofore. In the fulfilment of the conclusion to make Richmond, Va., the capital of \$3,250,952, and \$7,777.640 were sent to the U.S. the Southern Confederacy, the clerks of the departments at Montgomery have been ordered to Richmond. From 6000 to 8000 Southern troops are said to be intrenched at Manassas Junction, twenty-seven miles from Washington.

The Southern Army is probably composed of heterogeneous materials, including a large number of men who have entered the service unwillingly, and who embrace every opportunity to desert. The papers of that section are filled with advertisements offering rewards for deserters. The first regiment of South Carolina, now in Virginia, is accompanied by two hundred negroes, who carried their masters' arms, knapsacks, &c., the gnns being strapped on the backs of the slaves. The actual requisitions upon the Confederate treasury for army purposes have, so far, not been heavy, the troops having been equipped and supported mainly at the expense of States or individuals.

Insecurity in the South .- A strong evidence of the alarm which prevails in the seceded States, is found in the fact that large sums of money have been sent from them recently for safe keeping in the Northern States, Canada, and perhaps Europe. Some of the Southern banks have already, it is believed, quietly removed considerable portions of their capital. A Louisville despatch of the 3ist ult. says, that the exodus of Southerners for the North by railroad through Louisville, is unprecedented.

No boats were running in the Mississippi river.

The Blockade has not yet been rendered effective at all points, but measures are in progress, it is stated, for making it so within the present month. The prize commissioners have released several of the captured vessels, it having been shown that they had cleared before the fifteen days allowed by the President's proclamation had

expired.

The U. S. Army .-- According to the New York Herald, there were recently 95,000 volunteers under arms at there were recently 35,000 volunteers that arms at the points designated, viz: on the south side of the Potomac, 21,000 men; Washington, 22,000; fortress Monroe, 9,000; West Pennsylvania, 16,000; Ohio, 13,-000; Illinois, 6,000; Baltimore, 5,000; Philadelphia 3,000. There are various camps, barracks, &c., through out the north and west, at which volunteers are preparing for service, not included in this enumeration. John C. Fremont has been appointed a Major General, and it is understood that he will be assigned to the command of the Western division of the army to act in the Mississippi valley. The government is preparing a number of gun boats to operate on the Mississippi.

Missouri .- Although the secession movement has been Missouri.—Although the secession movement has been checked in this State, there is still great excitement and ill feeling in some parts of it. In those counties in which the terrorists have had full sway, from three to five thousand Union men have been driven off. General Harney was preparing to organize home guards at St. Joseph, Hannibal and other places, to protect the Union men. A portion of the St. Louis volunteers have occupied and fortified Bird's Point, on the Mississippi river, opposite

Tennessee .-- A letter from Tennessee states, that East Tennessee is strongly in favour of the Union. Andrew Johnson, U. S. Senator, has taken a firm stand against secession. The legislature of Tennessee has passed the following bill: Sect. 1. That no person is any nonslaveholding State, or their agents or attorneys in this State, shall have power to sue or collect any moneys owing to or any property claimed by the citizen of any such State in Tennessee during hostilities between Tennessee and the federal government. Sect. 2. That it may and shall be lawful for such debtors to pay such moneys ioto the treasury of the State, which sums shall be receipted for by the Treasurer, and shall be refunded, with interest, apon the cessation of hostilities.

Maryland .- Several leading citizens of the State, of Activates.—Several feating clizens of the State, in doubtful loyalty, have hear arrested by order of the U. S. government. Ex-Governor Pratt was arrested at Anna-polis; and taken to Washington. John Merryman, of Baltimore, is under arrest, and confined at fort Milenry. In this case, Chief Justice Tancy granted a writ of Habeas Corpus, but it was disregarded by Gen. Cadwa-lader. Several inhabitants of Baltimore county, who are charged with aiding in the destruction of the railroad bridges, have been placed under arrest, and conveyed to York, Pa.

Death of Senator Douglas.—Stephen A. Douglas, of

Turning of the Divine hand.—It seems as if temporarily by the general order, they will be restored follows: At the mint in Philadelphia, 385,857 pieces or total, \$5,384,625. The deposits at the assay office, New York, during the month, amounted to \$6,569,000.

mint at Philadelphia for coinage.

Taken by Pirates .- The New Orleans Picavune of the 27th ult. announces the arrival at that port of the privateer Calhoun having in tow the schooner John Adams of Boston, and the brig Panama and the schooner Mermaid, of Princeton, Mass.

Louisiana .- According to the New Orleans Delta, this State had, in the field, on the 25th ult., 7350 men, beside a large number awaiting orders and others armed and equipped for home protection. There is one regiment of 1200 men, composed entirely of quadroons.

Philadelphia-Mortality last week, 283. The mean temperature of the last (Fifth) month was 593 deg. The highest temperature, during the month, was 80 deg. and the lowest, 38 deg. The amount of rain was 6.64 inches. The average of the mean temperature of the Fifth month for the past seventy-two years, is stated to be 62.58. The highest average, during that entire period, (1802 and 1826,) was 71 deg.; the lowest, 1848. was 51.75.

New York .- Mortality last week, 391. The exports (exclusive of specie) from New York, during the first six months of this year, amounted to \$52,453,289. In the corresponding portion of 1860, the amount was \$33,944,853. The number of foreign immigrants dur-

ing the same period was 32,118.

Richmond Negroes.—The Richmond Examiner says. that Richmond contains, at this moment, not less than five thousand unemployed negroes. The tobacco factories are closed, or working short force. All the usual occupations of manual labour are at a stand still.

FOREIGN .- Liverpool dates to the 21st ult. The markets for breadstuffs and cotton were steady, without much activity. The Bank of England has raised its rate

Cassius M. Clay, the American minister to Russia, has written a letter to the London Times on the American struggle, in brief but decisive terms. He says that the revolted States can be subdued, but it is not proposed to subjugate them, but simply to put down their rebe citizens. England's true interest is to stand by the

In the south with this or that point to designate it, without any about to befal them. Paul, however, was calm, they are rarely applied to mountains, although the other object than that of distinguishing it from and full of confidence in the preserving power of Indian name of a river which flows near, frequently every other, since here as elsewhere it is better to his God and Father, although he knew not for extends to a neighbouring chain of mountains, accept almost any name rather than to leave it all what cause he was sought, told them he was the Indian names, designating special mountain peaks, in confusion.' are not common, perhaps because not preserved by the white settlers, who did not live with, but succceded the Indian population. The more modern descriptive names have the defect of great similarity, for in an extent of thirteen hundred miles the topographical characters are singularly analogous. The multiplication of the same name in all parts of the system becomes here, as in political geography, a serious evil. Green, Blue, and Black mountains are found alike at the south, and at the north; White mountain, White face, White side, &c., are also numerous. Chestnut, Oak, Pine mountain and Laurel mountains are found everywhere. In the South, Balsam mountains occur at every step from southern Virginia to Georgia. This name designates a mountain whose summit is covered with Pinus Balsamifera, or with its analogous species, Pinus Frazeri, which only grow on heights, which exceed 5000 or 6000 feet. The Bald mountains whose summits are destitute of forests, a thing comparatively rare at the south, are yet very numerous. It only remains for the geographer, in order to avoid intolerable confusion, to add to such names another name, or epithet, as Richland Balsam, Smoky Bald, and other similar designations.

"These difficulties explain, and excuse perhaps in part, the frequent use in America of names of men to designate places, rivers, and mountains.

This course requires the least effort of the imagination. A river without a name commonly takes that of the first planter, who erects there his cabin or farm-house, and if there is a remarkable mountain near, it is soon designated by the same name. This is the origin of a great number of the names, more convenient than elegant, of the mountains and valleys of the Alleghanies. It is but recently, since scientific measurements have been made, that the names of men, distinguished either in the political or scientific world, have been given to prominent mountains in New England, in the State of

New York and at the south.

"The principles which have seemed to me proper, and which have guided me in the adoption of names of mountains, are to give preference to the name employed in the immediate neighbourhood of the point designated. When more than one name has been given to the same point, as happens when it is seen from valleys on two different sides of the mountain, it seems proper for the observer to adopt that name, which appears most natural or more euphonic. When the choice lies between the name of a man and that of a name, which is descriptive and characteristic, I should choose the latter. In regard to points without established names, but recently named by scientific observers, and not by residents of the country, the right of priority ought to be respected, provided the identity of the points can be sufficiently established, a matter by no means easy, unless the positions have been determined by instruments, or otherwise, with considerable care. But it is evident that popular usage will decide in the last resort, and that the name universally adopted will, in time, become that tion of heart-felt praise to his heavenly Father, other crosses which your heavenly Father may be to accept. When I have Returning to the parlour of the inn, he was sitting myself given names to mountains, I have almost there with his sorrowful wife, when two men enout bearing which the crown of cternal glory with the crown of cterna always preferred a descriptive name to any other; tered, and soon commenced conversation with them. but I acknowledge that the invention of names is One of them said that they were on their way to a thankless and difficult task. TRUST IN THE LORD.

Paul Gerhardt, a religious man and poet, was born in the year 1606, in Saxony. He held a station in Berlin; but, being honest in the expression of his religious opinion, he was deprived of his appointment, and was ordered to quit the country. He had not accumulated property, and, when obliged to leave the home wherein peace and happiness had been his portion, it was with a helpless family, and destitute of the means of subsistence. His faith, however, in his divine Master, was unshaken, and in full confidence that all his afflictions had been meted to him in wisdom and mercy, he determined to take refuge in Saxony, where he hoped he might find friends and some means of subsistence. The family had no means of performing the journey save on foot, and when night came, Gerhardt felt his firm believing heart almost fail, as he looked on his weary, worn-out wife and children. They entered a little village inn, and then his wife, unable any longer to restrain her sorrowful emotions, gave vent to a flood of tears. Concealing his own David, satisfied of his father's better judgment feelings, he endeavoured to comfort her with the passage from the Scriptures, "Trust in the Lord with all thine heart, and lean not to thine own understanding; in all thy ways acknowledge him, dered their estates. Two or three of them becam and he shall direct thy paths." These words inmates of the State prison, and one of them wa spoken by him for the comfort of his wife, took hold of his own feelings powerfully, and retiring to a little garden belonging to the inn, he composed tion is often put in substance to parents, whils some lines, expressive of faith similar to that extension is drawn to the fact that the child hibited in the verse quoted. A part of this com- ren of some highly professing christians, dress in position has been thus translated.

"Commend thy ways, O mortal ! And humbly raise thy sighs To Him who, in his wisdom, Rules earth, and sea and skies.

All means and ways possessing Whate'er he does is right: His every deed a blessing His steps one path of light !

To thee it is not given The tempest's rage to quell; God reigns supreme in heaven, And all he does is well.

True, it may seem a moment, As though thou wert forgot, As though he were numindful Of thine unhappy lot;

As though thy grief and anguish Reached not his glorious throne, And thon wert left to languish In sorrow and alone.

Yet if, though much should grieve thee, Thy faith shall ne'er have ceased, Be sure he will relieve thee, When thou expects it least."

This little poetic effusion ends with the ascrip-

person they were in search of. The strangers then presented a letter from the Duke to Gerhardt, informing him that in consideration of the injustice which had been shown him, he had settled a considerable pension upon him. Great was the thankfulness of the pious couple. Paul turning to his wife, handed her the little poem he had just composed in the garden, and said, "See how God provides! Did I not bid thee confide in him, and al would be well?"

WHY MAY I NOT DO AS OTHERS.

This is a query, which in effect is put to many tate the fashions and follies of the world around them. Dr. Humphrey tells of a religious father o his acquaintance, who, refusing to grant his sor liberty to go rambling about the country, with a hal a dozen idle fellows, who had called to obtain hi company, was asked by the son, Why it was tha he was denied the privileges which other parent readily granted their children? To this the fathe replied, "David, I have lived much longer in th world than thou hast, and I see dangers which thou little suspects. These young men are in bad way. Such habits of idleness, and this goin, about to frolics and horse-races, will ruin them. contented himself at home. In the course of a fer years, the young men above alluded to had all be come of very dissipated habits, and soon squan

Why may I not dress as others do? This ques way the questioners are not allowed to. Ah, suc parents may say, Wait awhile. These young peo ple now allowed such liberties, will not be restrain ed from taking greater. They will soon be scat tered from the simplicity of the Truth in every thing. The cross of Christ will be irksome to thos whose wills have never been made to submit to th wills of religiously minded parents, and unless powerful visitation of Divine grace is granted then they will turn to the world for comfort, and c course will be miserably disappointed.

Indulgent parents, I mean parents who indulg their children in that which they know is wrong to purchase a little present sunshine, are laying u heavy clouds to bring storms for their future live They are preparing their children for ministering affliction to their decliuing years, yea, some ar nurturing them in that which will bring down the hoary hairs with sorrow to the grave. Parent restrain your children according to the Truth, an seek for the assistance of the Spirit, to qualify yo to do it lovingly and yet firmly. Children, obe your parents in the Lord, knowing that for th submission of your wills, even in bearing the cros in your dress, you will receive a present reward of peace, and an increase of willingness to be: never be yours.

Babel has always had men for builders, but th

On the 24th, at monument, and project gushing sheets of bubbling a meeting held at Padger's Creek, he was led to treat on the case of Naaman, the Syrian, and the simplicity of the means made use of, first, in directing him to the prophet, through whom the Lord would heal him, and secondly, in the means employed. He then opened to those assembled the not exterminate them, it is only because they are simplicity, which characterized our blessed Saviour's instructions to the people when personally turn everything to account. Indeed, were the amongst men, and also, now in the cleansing operations of his Spirit, perfecting the new hirth in the soul. At the Monthly Meeting held at Bush River, of incalculable magnitude; for it is the Jew alone settled on the lees," sluggish and sleeping in set on the 25th, he was largely concerned that Friends who can mend a lock, build a house, make gold might keep in that time of commotion to their and silver trinkets, coin money, decorate a room, peaceable principles, and that building upon the or weave silk, all such handlerfalls being regarded sure foundation which the Lord Jesus has laid for by the Mussulman with supreme contempt. Even his church, they might not be shaken, whatever the Sultan himself is obliged to have recourse to them might befall them. On the 26th, it being the first for the collection of taxes or negotiations with day of the week, he was again at Bush River meeting, and, on the 27th, was at one at Little River. In the afternoon, whilst riding towards the dwell-cunning can confer. Every night the Jews are in the first form of Richard Hendroon. ing of Richard Henderson, at which place he had appointed a meeting, he was stopped by the sol. and it is only after sunrise, they are allowed to diers of the American army, near a little town, enter the Mussulman town, where they have their called Ninety-six. After an examination had been shops. The Jewish quarter is called "Mellah," prison in Ninety-six, by Adam Burk.

(To be continued.)

The Artesian Well at Grenelle, Paris .- In the year 1833, M. Mulot was charged by the Municipal Council of the City of Paris with the boring of an artesian well upon the left bank of the Seine, on the Place Breteuil, a vast space of ground extending in front of the Abattoir de Grenelle, not far from the Hotel des Invalides. The workmen commenced on the 24th of September, 1833, and one may be able to form a notion of the innumerable difficuties that the skillful geological engineer must have encountered when one knows that the works of boring and tubage were not completed till the 26th of February, 1841-more than seven years of tribulations, accidents, and deceptions, which would have disheartened most engineers. But M. Mulot promising always success in a manner so certain, and based upon serious geological documents and calculations, the men betook themselves with vigour to the work, and the implements is broken into pieces, and everything he has touched of their apparatus brought away successively the is subjected to a rigorous purification, performed different beds of earth marked upon the geological with many complicated ceremonies. A Jewish map traced à priori. At last the green saud was servant will not eat the meat she has cooked for a reached; it was the last bed of earth, and the water leaped up with impetuosity. The borer had because it has been cooked in Christian vessels.arrived at the extraordinary and predicted depth Revue Contemporaine. of 1790 English feet. It was necessary to add to this depth an ascending tube of 110 feet, so as to attain the height the water was to reach-that is to travel some distance in a stage-coach, fell in with a say, about 1900 feet from its starting-point. this city, and, through the liberality of the railsioner, raising his cane, and holding it with both
fractured tooth, and fearing that the consequences d companies, were forwarded free of expense to hands by the middle, returned the salute with the might be serious, I have had a strong oak fence possible parties residing in Springdale, in the utmost gravity. The inferior officer, much amazed, fixed between his poud and the iron railings, and I tumose gravity. The interior offices much state of the fight, stepping in the determined to remove the broken tooth; this a thousand bushels of wheat and corn were sent a pace back to give the commissioner room to pass. Amount received, including a donation of fifty obeisance. Dr. Smith, instead of passing on, drew a powerful pair of forceps, more than two feet long; up on the opposite side, and lowered his cane at with these I grasped his fractured incisor, thinking, on the opposite state of the the same angle. The functionary, more and more with a firm and determined twist, to gain possess above-mentioned, \$690.51, which was sent bewildered, next moved up-stairs, with his staff sion of that fine piece of ivory. This, however, was advanced, while the author of the 'Wealth of Na- not quite so easily done, for the brute, amazed at tions' followed, with his bamboo in precisely the my impudence, rushed back, tearing the instrument same posture, and his whole soul apparently wrapped from my hands, and, looking as wild as a hippoup in the purpose of placing his foot exactly on the same spot of each step which had been occupied by the man who preceded him. At the door of the and this time held on long enough to cause the hall the porter again drew up, saluted with his loose tooth to shift its position, but was again staff, and bowed reverentially; the philosopher again imitated his motions, and returned his bown no occasion to say, 'Open your mouth,' for this he with the most profound gravity. When the doctor did to the fullest extent; therefore I had no diffi-

seemed to have been acting was entirely broken." Fulse suggestions and temptations .- I have found amongst many other acts and false suggestions and temptations, which the enemy makes use of to deter us from giving up ourselves to the guidance of the Holy Spirit, one which is much talked of and acted upon by many, through their own inexperience, and the deceit of the prince of darkness; namely, that these leadings and secret in-fluences and inspirations, are not distinguishable from the workings of our own mental or rational powers; and if they are distinguishable, that these persons have not felt them or known them. Now in answer to this, which has been my own delusion, I may say, that any one who has for a long season habitually stifled by disobedience this divine monipitually employed on deep theories and abstruse tor, cannot expect to hear or to understand so culations must necessarily be often wrapt far plainly its voice, as those do who have for a long to the sublunary occurrences of every-day life. period listened to its secret whispers, and surren-Stukeley once went to visit Sir Isaac Newton. He dered themselves unreservedly to its injunctions: s shown into a room, and there left. Time these can testify, that they follow no uncertain vased on, and as the antiquarian was hungry, and pour or idle tale; but that its reproofs are to be are how hopeless it was to get Newton away plainly perceived, and its incitements clearly to be m his calculations in any reasonable time, if he felt; and that the peace they witness cannot be pened to be much absorbed, he quietly began imitated, neither can it be expressed to the underdinner upon a fowl that had been prepared for standings, or conceived by the imaginations, of

The Hippotamus with the Toothache. - A letter lowering his staff at the same time in token of but not without a fearful struggle. I had prepared entered the apartment, the spell under which he culty in again scizing the coveted morsel, and this time drew it from his monstrous jaws. One of the most remarkable things appeared to me to be the enormous force of the air when blown from the dilated nostrils of this great beast while enraged. It came into my face with a force that almost startled me."-London paper.

> Encouragement and Caution to lowly, diffident Minds .- With tender love I remember thee, and think of thy lowly diffident mind. There is surely a possibility of dwelling so much upon our own weakness and unworthiness, as to overlook, or sink below the heavenly gift of Divine grace, which is given to every one to profit withal. "The Lord preserveth the simple ;" and I do believe, dear friend, that through merciful kindness, thou art one of the simple in heart, desiring to follow a crucified Saviour. Take courage, then, and think upon a Redeemer's love more than upon thy unworthiness. It is not because of our righteousness, but of mercy, that we come to know the mind of Christ, and deliverance from those things that grieve the Holy Spirit. Take courage, I again say, my tender friend, and give no place to distrust .- Letter of Mury Capper's.

The Congress of Verona .- Whilst looking at friend, and speedily demolished the greater part such as have none of this blessed experience. Nor the cluster of crowned heads, it was impossible not it. At last, the great astronomer came down let any poor, seeking, sincere or serious minds be to remark that the absolute lords of so many milm his study, prepared for dinner; but, seeing discouraged, that they do not upon submission im-lions of men had not only nothing to distinguish y the remnants of the fowl, was much surprised, mediately or very quickly feel what they wait to them from the common race of mankind, but were, excused himself to the doctor by saying, "You feel, even the arising of that secret, influencing, in appearance, inferior to what might be expected doctor, how very abstract we philosophers are; actuating, constraining and restraining power or ally imagined I had not yet dined!" spirit of the Lord. Let them not be discouraged about the condition of the same number of gentlement taken at hazipirit of the Lord. Let them not be discouraged about the condition of the same number of gentlement taken at hazipirit of the Lord. Let them not be discouraged about a real expressive of any great or attractions are the conditions of the condition of th er very absent man. Among the anecdotes told some considerable sacrifices and trying testimonies tive quality in all those who were to be the sources bim in this capacity, is the following:—"He of sincerity, they find not that rich reward of pace of so much happiness or misery toos large a portion s a commissioner of the Board of Customs, which they had expected. Let such remember, it of the civilized world. Yet some of those were at board had in their service, as porter, a stately is written, "he that endureth to the end, the same notoriously good men in their private capacity, and son, who, dressed in a scarlet cloak, covered shall be saved."—John Barclay. vices eminently pernicious to society, or any other than the venial failings of humanity; or, as a wrice, used to mount guard before the custom-house of all, that he could not take the liberty of expressent before the custom-house of all, that he could not take the liberty of expressent terr of no democratic tendency says of them, "all case and commissioner entered, the potter should others in such a prescience—Memorial of Thomas countries submitted to their sway."—Lord Broughton's " Italy."

ture of this beautiful and often sublime phenomenon, a few facts derived from observation and a long train of experiments, must be remembered. have rain, or hail, or snow. The water absorbed by it in evaporation from the sea and the earth's surface, would descend in an imperceptible vapour, or cease to be absorbed by the air, when once fully saturated. 2. The absorbing power of the atmosphere, and consequently, its capability to retain humidity, is greater in warm than in cold air. 3. The air near the surface of the earth is warmer than it is in the region of the clouds. The higher we ascend from the earth, the colder do we find the atmosphere. Hence the perpetual snow on very high mountains in the hottest climates. Now, when from continual evaporation the air is highly saturated with vapour, though it be invisible and the sky cloudless, if its temperature is suddenly reduced by cold currents of air rushing from above, or from a higher to a lower latitude, its capacity to retain moisture is diminished, clouds are formed, and the result is rain. Air condenses as it cools, and like a sponge filled with water and compressed, pours out the water which its diminished capacity the 5th announced that after that date no passports cannot hold

Many have despised our testimony .- The testimony given to us, as a people, in various branches, hath been a stone of stumbling and a rock of ofwithout our cross, and have overlooked and despised the peculiarity of our testimony, or rather the Lord's testimony through us. The language, fashions, and customs of the world, though by many deemed indifferent, are not so to us, but are a part of the growth of that lofty Lebanon, which the day of the Lord is to come upon, as well as the cedars; and when that day comes, it will burn as an oven, with prevailing heat, and leave them neither root nor branch. All who have entered into fellowship with us, by the baptism of Christ, which is the right door of entrance, have found it to be their duty to attend to these testimonies, not from imitation, but from conviction of their propriety .-Richard Shackleton.

The enemy of souls never leaves a man without majority. a pretext for doing wrong.

THE FRIEND.

SIXTH MONTH 15, 1861.

SUMMARY OF EVENTS.

Progress of Hostilities .- At the time of making up this summary, no serious collision had occurred between the bostile armics. The first brigade of Pennsylvania troops, under command of General Thomas, has been advanced southward, in the direction of Hagerstown, Md. A forward movement of the federal troops, in Virginia, under Gen. M'Dowell, was daily expected at Washington; the troops on both sides of the Potomac, it is stated, have for some days, been kept always ready to march at an hour's warning. Gen. Beauregard is reported to be with the rebel forces at Manassas junction, and Jefferson Davis still at Richmond. Reinforcements for the Confederate forces continued to arrive-both it and the federal army had been augmented in numbers during the past week. It was considered doubtful among military men, whether the rebels would risk a battle either at Harper's Ferry or at Manassas junction. At both these places, they were strongly fortified, and, according to some reports, able to resist any attack that could probably be made upon them. There was no change in the position of Gen. Butler's division, which remained near fortress Monroe, in the peninsula, hetween James and York ri-vers. The frigate Merrimac, which was sunk at Nor- at eight per cent. for the Confederacy, has, it appears, folk, when the public property was abandoned, has not actually been taken to any great extent. Parties in

Philosophy of Rain.—To understand the na-been raised by the Virginians, and her machinery found. New Orleans, who had taken fifty thousand dollars to be uninjured. She was reported as ready for sea, the loan, were subsequently forced to sell it, and cou A Washington despatch of the 10th states, that on that obtain only five thousand dollars for what cost their day there was a movement of troops, in the direction ten times that sum. The New Orleans Bulletin say long train of experiments, must be remembered, if Maper's Ferry, several thousand men having passed that one of the most extensive and complete foundri. A large number of America have rain, or hail, or snow. The water absorbed tween Harper's Ferry and Washington—Later advices viewels have been taken into Now Orleans as prices? I were the proposed to the cast's from fortress Monres state, that the U. S. troops had the refer leptivateers. There are several mouths or characteristics. been repulsed in an attack upon the rebel entrenchments at the village of Great Bethel, twelve miles from the fortress. The loss of the federal troops was estimated at thirty killed, and one hundred wounded.

The Finances .- The government has decided that it will not accept any more contributions of money from States; and hereafter will obtain all the funds necessary for the support of the government through the regular channels. The revenue from duties on imports has become very small

Virginia .- The reports from the western part of the State continue favourable. Volunteers were being raised for the government throughout the north-western sec-tion of Virginia, and the people were friendly to the Ohio and Indiana troops, of whom there were about 7000 in aud near Barbour county. Many desertions of Union men had taken place in the secession army at Harper's Ferry. Some of the companies, it is said, had lost half their number. Many Virginians have fled to Maryland, to escape being pressed into the Southern army. The transfer of the Montgomery government to Richmond indicates that the chief contest in the present campaign will be in this unbappy State. The Richmond Whig of would be issued to persons leaving the State, and that no one would be admitted into it, except for reasons of peculiar force.

Maryland .- Although the majority of the people are supposed to be loyal, there is reason to helieve the sefence to many, who have wished for our crown the aid in their power to the Southern cause. The three citizens of Harford county, who were arrested by the military, and taken into Pennsylvania, were released after a confinement of a few days, they first taking the oath of allegiance to the United States. A gun factory in Baltimore has been seized and closed by the U. S. marshal, on suspicion that it was making arms for the South. Gen. Cadwalader, in command of the federal troops near Baltimore has been transferred to a command in the expedition to Harper's Ferry. Gen. Cooper, formerly a senator from Pennsylvania, succeeds him. On the 10th inst., the town of Cumberland, in the western part of the State, was taken possession of by a regiment of Indiana troops. A brigade of Pennsylvania volunteers has been ordered to Frederick to keep the secessionists in check.

New York .- Mortality last week, 395.

Philadelphia-Mortality last week, 266. Tennessee .- At the election on the 8th inst., the people confirmed the ordinance of secceston by a very large

Missouri.— Gen. Harney has been superseded by Gen. had ordered the arming of the home guard of the Missouri towns as U. S. reserves, but Gen. Harney took ground against it, and had done nothing to protect the Union men in those places. Since the superseding of Gen. Harney as commander of the federal forces, Gen. Price has published a letter at Jefferson City, which shows that he himself deceived Harney when he made the treaty, and that he was really plotting treason.

Kentucky .- A convention of delegates from Missouri and Kentucky was recently in session at Louisville. adopted addresses to the people of Kentucky and of the United States, expressing strong desires that the Union should be maintained, but deprecating war and blood-shed for that purpose. Immense quantities of provisions have of late gone south by the Kentucky railroads. Their transit is now prohibited.

The Grain Markets .- The following were the quotations on the 10th inst. New York-Sales of 200,000 bushels of wheat, at \$1.00 a \$1.06 for Chicago spring ; \$1.29 a \$1 32 for red Western, and \$1.53 a \$1.62 for white Michigan; rye, 67 cts. a 68 cts.; oats, 31 cts. a 33 cts. Philadelphia—Red wheat, \$1 23 a \$1.36; white, \$1.40 a \$1.48; rye, 65 cts.; Southern yellow corn, 54 cts.; Western, 48 cts. a 50 cts.; oats, 30 cts. a 31 cts. Cincinnati-Markets very dull; superfine flour, \$4.40 a \$4.50.

The Southern Confederacy .- Soon after the arrival of President Davis at Richmond, he issued a proclamation ordering the federal troops to leave the soil of Virginia within ten days. The much talked of loan of \$15,000,000

nels to the Mississippi, and only the principal one h It will require a much large naval force than the United States now has to spare, make the blockade effective at all points. The Montge mery Mail says, that there is a number of privateers the service of the Confederate government, cruising the Gulf and Atlantic coast, all well armed and manne The sugar crop of Louisiana is said to be unusually premising. In other parts of the Confederacy, the grai and other crops gave prospects, it is said, of an abut dant harvest. A bank convention held at Atlanta, Ga on the 5th inst., recommended that all the Souther banks, railroad and tax collectors receive the treasur outes of the Confederacy as currency, and the State cities and corporations, having coupons payable at New York, to appoint the place of payment south.

FOREIGN.—Liverpool dates to the 1st inst. In the House of Commons, on the 30th, Lord John Russe made a speech on American affairs. He deprecated the exultation with which a member had alluded to "t bursting of the bubble of democracy in America." common with the great bulk of his countrymen. Rnssell) was deeply pained at the civil war, which ha broken out in the United States, and which arose from the accursed poison of slavery left them by England, an which had clung around them like a poisonous garmer from the first hour of their independence.

The House of Lords was debating the expediency encouraging the cultivation of cotton in India.

Count Cayour had been dangerously ill, but at th latest dates he was better.

Prince Gortschakoff, the Governor of Poland, a dis tinguished military commander, is dead.

The Liverpool cotton market was well supplied, an moderately active; sales of the week, 67,000 bale moderately active; sales of the week, 67,000 bale Prices favoured the buyers, except for good stapler Orleans fair, 82d.; Mobile fair, 82d. > For "The Friend." The Appalachian Mountain System.

(Concluded from page 322.) The interesting map of the Appalachian system ich accompanies Prof. Guyot's article, was first blished in Germany, in the summer of 1860. It s drawn in Gotha, by E. Sandoz, from data mished chiefly by Guyot. Besides, a general p of the system, from Maine to Georgia, there chart on a larger scale of the White mountains d vicinity, also, one of the Black mountain re-

The table of altitudes appended to the article, hibits the elevation above the sea in English feet 347 points, in various parts of the system, emacing mountains, peaks, gaps, river-beds, lakes, lages, &c. Of these 347 altitudes, 278 were nputed by Guyot from barometrical observations, , we believe, made by himself, except in four tances; 33, (mostly in New Hampshire,) were ained by measurements with a levelling instrunt, and are chiefly taken from railroad surveys. e altitude is from the U. S. Coast Survey Rerts, and was probably obtained by trigonotrical means; of one altitude the method of obning it is not stated, and the remaining thirtyr were measured by Guyot, by means of a ket level in the following manner, as described himself. "Wishing to measure a mountain in ht, at a moderate distance, and not exceeding Mount Clinton elevation the one on which I stand, I seek, with instrument in hand, a point on a level with the amit of the mountain to be measured. Taking n at that point a barometric observation, I coner the result, corrected for the curvature of the th, and for refraction, as the height of the moun-. With an accurate level, a signal upon the

For "The Friend," Musings and Memories. HUMAN LIFE SOON OVER.

How soon will the hour of death come, even to ose who have the longest term of existence omforts which wealth and a loving household could estow, a few years since sank, by a not very painful sease, to the grave, before reaching a period much eyond what is called middle age. He was not regned to death; and a few minutes before his close, rning to his beloved wife, he ejaculated, " Is life soon over, -is it so soon over?" He would wilngly have given every thing he possessed in the orld, if, as his young children testified, "he could aly get well." But death may not be bribed to epart from us, and neither will medicine protect from his dart. Life seems brief to all! Jacob ould say, "the days of the years of my pilgrimge are a hundred and thirty years; few and evil ave the days of the years of my life been." How appy will it be for those, who through the meres of God in Christ Jesus, are permitted, as this

all never be over, is opening before them. HOW LITTLE WE UNDERSTAND.

rief period of existence terminates, to feel the as-

We drop a hard peachstone in the ground, and vering it with earth, leave it. We know that if e crack it open we shall find nothing within but kernel, with a reddish skin; yet, we confidently spect to see the following spring, a green shoot ercing the ground where we have deposited the one, which will, if left unmolested, soon grow into tree. We cannot understand the process, yet we ave an undoubted faith that it will be so, and ture does not disappoint us. The stone and the ornel were red; the soil whose juices furnish uch of the nourishment to the young growth, is dingy brown, or it may be dull yellow, yet the perations of nature by which these changes are fected; like the ignorant and the simple, he sees id believes without comprehending. The plant ows on. A fresh crop of leaves are thrown forth om the stem every year, and in the third and the stem every year, and in the third and the spring, beside the green leaves, there shoot the crimson blossoms, rich and sweet. The natural ble of entering into sympathy with them ist knows that this varied growth of leaves and flows is fed by the same sap; and whilst watching the eauty and variety, he feels that the subtle chemtry producing it, is beyond his comprehension. agrant rose-tinted blossoms, from whose cups the mb with sweetness. No one can tell the reason that buds from many different peach trees, in-bulated into one, will always bear fruit of the unto me, for of such is the kingdom of Heaven." nd borne by the tree from which the bud was ken. BE KIND TO CHILDREN.

Many individuals who are capable of doing actions, which require considerable personal sacrifice rance, that a life of glory and happioess, which as respects pecuniary matters, to benefit others, do not understand how so to enter into sympathy with them as to do nothing to wound their feelings. Particularly is this the case with some, as respects their intercourse with children. I remember to have read of a case in which a poor child was taken by a kind-intentioned thrifty woman, from a home of destitution and poverty, to bring up in her family. The woman was very willing to take the expense and trouble of giving her a good education, both as respects school learning and house-hold economy. The child was well clothed, well fed, well cared for every way, but she had no one who could enter into her childish feelings, and was often rendered very sorrowful. One of her schoolmates had given her a broken doll, and one evendingy brown, or it may be dull yellow, yet the bung stem comes forth, of a bright lively green. The most acute chemist cannot understand the reations of nature by which these changes are away that nonsense, and mind thy lesson, child." Shortly after, she threw the poor child's doll into the fire. The little one, heart chilled, said nothing, for she did not dare to complain, but when laid

To be really kind to children, one must be capable of entering into sympathy with them. If we cannot feel as they feel, we shall be continually in danger of causing them sadness of heart, even when we are doing them substantial kindness. Ah! if we would minister to their comforts, let us endeayour to look back to the days of our own childhood, and remember how our feelings often suffered from ses draw forth the clear honey, to store their the harshness of those who surrounded us, and let us look on them with tenderness and love, endeahy, though experience daily proves the truth of vouring to feel something of the spirit which dictated the words, "Suffer little children to come

WEEPING MARY. Mary to her Saviour's tomb

Hasted at the early dawn; Spice she brought, and rich perfume-But the Lord she loved was gone. For a while she weeping stood, Struck with sorrow and surprise. Shedding tears, a plenteous flood-For her heart supplied her eyes.

Jesus, who is always near, Though too often upperceived. Comes His drooping child to cheer, Kindly asking why she grieved. Though at first she knew Him not-When He called her by her name, Then her griefs were all forgot, For she found He was the same.

Grief and sighing quickly fled When she heard His welcome voice : Just before she thought Him dead. Now He bids her heart rejoice. What a change His word can make, Turning darkness into day ! You who weep for Jesus' sake, He will wipe your tears away.

He who came to comfort her When she thought her all was lost, Will for your relief appear, Though you now are tempest-tossed. On His word your burden cast, On His love your thoughts employ; Weeping for a while may last, But the morning brings the joy.

John Newton.

GOD IN HIS WORKS. There is a book, who rups may read,

Which beavenly truth imparts And all the lore its scholars need-Pure eyes and loving hearts.

The works of God, above, below, Within us, and around,
Are pages in that book, to show
How God himself is found.

The glorious sky, embracing all, Is like the Father's love; Wherewith encompassed, great and small In peace and order move.

The dew of heaven is like His grace: It steals in silence down;
But where it lights, the favoured place
By richest fruits is known.

Two worlds are ours: 'tis only sin Forbids us to descry The mystic heaven and earth within Plain as the earth and sky.

Thou who hast given me eyes to see And love this sight so fair Give me a heart to find out Thee And read thee everywhere. John Keble.

Suspicion is a shoal on which charity often strikes, and is sometimes wrecked.

Unwarranted censure, and severe criticisms, often wing faith does not require great intellect in its ceiving a plan so vast. A new religious doctrine deter the timid from the exercise of their public

For "The Friend." Extract from P. H. Gosse's "Romance of Natural History."

What is more interesting than an examination, melicerta? The smallest point that you could make with the finest steel-pen would be too coarse and large to represent its natural dimensions, yet it inhabits a snug little house of its own construction, which it has built up stone by stone, cementing each with perfect symmetry, and with all the skill of an accomplished mason as it proceeded. It rallel.

The whole apparatus is exquisitely beautiful. The head of the pellucid and colourless animal unfolds into a broad transparent disk, the edge of which is moulded into four rounded segments, not this flower-like disk is set with fine vibratile cilia, the floating particles of matter, which are drawn into the stream. At every circumvolution of this current, however, as its particles arrive in succession at one particular point, viz., the great depression between the two uppermost petals, a portion of these escape from the revolving direction, and pass off in a line along the summit of the face towards the front, till they merge in a curious cup-shaped cavity, seated on what we call the chin.

The tiny cup is the mould in which the bricks are made, one by one, as they are wanted for use. The hemispherical interior is ciliated, and hence the contents are maintained in rapid rotation. These contents are the atoms of sedimentary and similar matter, which have been gradually accumulated in the progress of the ciliary current; and these, dated, probably also with the aid of a viscid secretion elaborated for the purpose, form a globular pellet, which, as soon as made, is deposited, by a sudden inflexion of the animal, on the edge of a pellet occupies about three minutes.

I say nothing about the other systems of organs contained in this living atom : the arrangements destined to subserve the purposes of digestion, cir- junctions of the Gospel. culation, respiration, reproduction, locomotion, sensation, &c., though these are all more or less clearly distinguishable in the tissues of the animal, which is as translucent as glass. itish settlements on the north, to northern Texas break forth and prevail in thousands, the south. The range of latitude traversed has nd travel southward on the eastern line, and ea embraced within the line of travel .- San Friends to see alike, or even make a sensible apancisco Alta Californian.

For "The Friend." The Cause and the Remedy.

"The original cause of the cloud which covers our once highly favoured but now afflicted society, is disobedience and forgetfulness of God. We live at a period when earthly prosperity furnishes the comforts, and to a large number the luxuries of life, in great abundance. With comparatively little Signed by direction and on behalf of the Meeting- labour, the means are obtained to gratify the appetite for sensual indulgence, and in the enjoyment of the bountiful provision of a gracious Creator, all classes are prone to forget the great Giver, and the sition. Having found acceptance and peace with wing note is said to have been appended by John solemn duty of constant reverent walking before God through the sanctifying operation of the Spirit, and olph to the famous fifteenth chapter of his Him. Self-gratification is more the object of men, and obtained that faith which overcomes the world, ppy of Gibbon's "Decline and fall of the Roman than the daily inquiry," Lord, what wouldest thou great was their care and travail of soul that they mire," and to have been found only after the auth of the orator of Roanoke:

"When the pencilled notes to this and the suceding chapter were written (and, indeed, all the rarely felt in the heart; for if any man love the and that while passing through it, their affections tots, one excepted on volume X., page —), the world, to which pertain the last of the flesh, of the that endure forever, and in the appointed time they phisms of infidelity. Gibbon seemed to rivet is not in him. What then can we expect, but that endure forever, and in the appointed time they phisms of infidelity. Gibbon seemed to rivet is not in him. What then can we expect, but that hat Hume, and Hobbes, and Bolingbroke, and we shall be left to our own choice, and that emptitance, leaving an example which succeeding generalocative and others had made fast, and Satan i.e., noss and confusion in principle and practice, will
cevil principle in our (fallen) nature, had clinchcome over us. Our perceptions and principles will

Now, we too profess to believe in the same glocame the desire of belief; but the hard heart of the cause of our difficulties, attributing them to mense army, marching in one continuous circuit, the Gospel, without modification, which our worthy compassion and mercy, he dispelled like mists bet perhaps three-fourths of the entire number of forefathers proclaimed in his authority to the na- fore the morning sun. sich are found within a range of from two to tions of the earth. Then again should we be a ree hundred miles. Thus, where buffaloes are people whom the Lord had formed for himself, to undant one year they are fewer the next, and show forth his praise, and to draw others to the wer still the next, until the great body having teachings of Christ in their own hearts; and such mpleted its circuit, again makes its appear- a people he will have, though many may despise ce. This circuit is completed in about four their birthright, and be rejected. Others will be ars. Its western limit is the eastern base of the brought in to preach the religion of the gospel in ocky Mountains, and its eastern is bounded by a all its perfectness, for the Spirit that actuated the arginal outline of civilization, extending from the faithful in Edward Burrough's day will, as he says,

The preceding just and forcible remarks are r many years been about twenty-three degrees, taken from a communication which appeared in the teuding from the Cross Timbers of Texas to the "Friend" sixteen years ago. They are revived in butaries of Lake Winnepeg on the north. The the helief that the truths set forth in them, are as deserving now of the close and serious attention rthward on the western, never crossing the Rocky of our renders, as they were at that time. Very ountains. The comparative proximity of these different views prevail, in regard to the proximate thes, being at some points not over five hundred les, accounts for the presence of buffaloes, in the Society is passing; nor have all the arguments and discussions which have taken place, enabled proach towards harmonizing their conflicting opinions. There are, however, certain great truths, God's mercies are as cords to draw us to him; which are generally admitted, and if those who and make them likewise matters of living, heartfelt supreme love of Jesus Christ.

experience, a brighter day would assuredly soon dawn on our religious society. Its early members were not more distinguished for pure simple views of christian doctrine, than for their lives of self-denying dedication. The precious truth that the Lord teaches his people Ilimself, by the immediate manifestation of his saving grace in the heart, being accepted and most surely believed by them, it became their primary concern to keep a single eye to Him, to wait patiently for the Holy Anointing, and yield cheerful obedience to every divine requi-

1; but, praised be his holy name! God sent the become perverted, blindness will prevent us from rious and all important truth, but do we (let all remof his sin, the arrow of the angel of death, seeing our conditions, and the plausible baits of inquire,) show the reality of our faith by a daily, inless ye repent, straight to his heart, and with Satan. We shall come to false conclusions as to earnest, patient endeavour to draw near and wait in solemn stillness of soul for the quickenings and belief withstood a long time, and fear came upon any thing but our own departure from the living illuminations of the Holy Spirit? Do we under a m and waxed great, and brought first resignation God, and to the pride and haughtiness, and cor-sense of our poverty, weakness and destitution of his will, and after much refractoriness, (God be ruption of our own hearts. Could we be brought to all good without ills gracious help, watch unto raised, but never sufficiently, that he bore with see our fallen and degenerate condition, in that prayer, and seek to be continually clothed by the e frowardness of the child of sin, whose wages light which never deceives, and thereby be humbled precious covering of humility and holy fear, which death!) after a longer course of years than the under the hand of the Lord, so as from the depth the blessed Redeemer imparts to his children, and do rvitude of Jacob for Rachel, God in his good of sincerity to cry mightily unto Him individually, we, like them, not only hear but obey his voice? If retude of Jacob for Rachel, God in his good of sheerity to cry mightly unto Him individually, we have them, do my hear out only his voice? If me sent the pardon and the peace which passeth love, which struck out fear. Allelujah!

"N.B.—I have erased more of the notes on is and the next chapter. The rest I let stand a merited shame for myself."

The rest I let stand a merited shame for myself."

The rest I let stand a merited shame for myself."

The rest I let stand a merited shame for myself." the oneness produced by the baptisms and birth precious to us also, and the true unity which beof the Spirit, would spring up in all the children comes brethren of the same household of faith, would Migrations of the Buffido.—There is a feature of the migratory character of the buffalo, not genruptible seed. This would bind us together as the fervent christian charity and love, would then ally known, except to hunters, and that is, that heart of one man, in serving and worshipping God, surely follow, enabling the honest in heart to see, e vast body of the herd is never found in the and list dear son, our Lord and Saviour Jesus eye to eye, and no small part of the troubles and me district of country two seasons in success. Christ, in the way of the cross, and in steadfastly difficulties which now rest as a dark cloud upon upon the buffaloes of North America form an upholding the same doctrines and testimonies of the church, would, it may be hoped in the divine

> Sugacity of Rats .- Incredible as the story may appear of their removing hens eggs, by one fellow lying on his back and grasping tightly his ovoid burden with his fore paws, whilst his comrades drag him away by the tail, we have no reason to disbelieve it, knowing, as we do, that they will carry eggs from the bottom to the top of the house, lifting them from stair to stair, the first pushing them up on its hind, and the second lifting them with its fore legs. They will extract the contents from a flask of Florence oil, dipping in their long tails, and repeating the manœuvre until they have consumed every drop. We have found lumps of sugar in deep drawers at a distance of thirty feet from the place where the petty larceny was committed; and a friend saw a rat mount a table on which a drum of figs was placed, and straightway tip it over, scattering its contents on the floor beneath, where a score of his expectant brethren sat watching for the windfall .- Quarterly Review.

ter states, that "We may preserve flowers for a long time in a fresh state by enclosing them in sealed tubes. At the end of some days, all the oxygen of the air confined in the tube will have oxygen of the air contined in the tube will have ing the past week. The second indeed appeared and become replaced by carbonic acid, so placed as to confine Gen. Butler's command within disappeared and become replaced by carbonic acid, so placed as to confine Gen. Butler's command within If we introduce into the tubes a little quicklime, it removes from the flowers some of their humidity, which facilitates their preservation. Lime also takes up the carbonic acid, and the plant becomes placed in pure nitrogen. All flowers are not alike preserved by this process; yellow flowers are those which are altered the least. It would be very easy for botanists to forward thus fresh flowers upon which they could verify characters difficult men killed, beside a number of wounded and missing. to observe upon a dried specimen."

The purchase money .- How do a multiplicity of things, pertaining to the present life, prevent a full dedication of all to the Most High, that He may work both to will and to do, of His own good pleasure. No doubt the disposition is felt with more than a few, which led one to enquire, "What shall I do, that I may inherit cternal life;" but when it is found that the purchase-money is their all, then comes hesitation and sorrow.-Sarah [Lynes] Grubb.

THE FRIEND.

SIXTH MONTH 22, 1861.

The week before last we inserted some remarks taken from the Ledger, on kerosene or coal oil. The intention of the writer appears to have been to draw the attention of housekeepers to the dangerous inflammability of some specimens of the oil sold, and the proposed test recommended by him, is a good We have since been informed by one interested therein, that the dangerous quality does not arise from an attempt to over-refine or whiten the oil, but from the benzine, which is the first thing which passes over in distilling the crude oil, being allowed to mix with the subsequent distillations. Benzine, which is always present in the crude oil. is also largely present in many of the dark-coloured refined oils as well as in whiter ones, and renders them unsafe to use. Another reason for testing the oil sold is, that many dealers adulterate it, by mixing a portion of spirits of turpentine or burning fluid with it. The oil thus served is of a milky, mottled appearance, and should always be rejected,

SUMMARY OF EVENTS.

Progress of Hostilities .- The movements of the U.S. forces towards Harper's Ferry, which were in progress last week, rendered probable a contest at that point. This was avoided by the retreat of the rebel army, on the near approach of the federal troops. On the 14th inst., the Confederate forces were hastily withdrawn, and, it is believed, divided into two bodies, one of which proceeded to Winchester, and the other, comprising the main body of the army went southward, east of the mountains, it was supposed to join the already formi-dable army at Manassas Junction. Previous to evacu-ating Harper's Ferry, the rebels burned the railroad bridge across the Potomac, and seriously injured the property of the Chesapeake and Ohio Canal Company, by the wanton destruction of their dams. The total loss to the two companies is estimated at about a million of dollars. The government buildings were also destroyed as far as practicable. A considerable quantity of provisions, which the rebels were unable to take with them, was destroyed, and great numbers of small tions of the State. arms and military accontrements were thrown into the river. Some of the large guns were removed six miles Martinsburg, nineteen miles west of Harper's Ferry, was

Preservation of Fresh Flowers. - A scientific wri- ment of Indiana volunteers proceeded from Cumberland, boats were being prepared at New Orleans for privateers to Romney, in Hampshire county, Va., and there sur-prised and routed a camp of 500 secession troops, some of whom were taken prisoners. The large army, under Gen. Butler, at fortress Monroe, has been inactive dur-ing the past week. The secession forces appear to be south, to fortress Monroe, and other quarters. General Cadwalader's division of the Pennsylvania troops has crossed the Potomac at Williamsport, and entered Virginia. A detachment of Ohio volunteers, which was sent out on the Alexandria and London railroad, on the 17th inst., for the purpose of protecting the bridges on the line of railroad, was attacked from a masked battery at a place called Vienna, about twelve miles from Washington. The volunteers sustained a loss of eight

Virginia .- Ex-Governor Henry A. Wise has been appointed Brigadier General in the Southern army, and protect brigatier veteral in the Southern army, and assigned the command of the department of Western Virginia. On the 11th inst., the Union convention assembled at Wheeling. About 40 counties were represented on the basis of their representation in the legislature. A resolution was adopted, declaring that Western Virginia would never submit to the ordinance of secession. On the 17th, a protest and solemn declaration, which had been under consideration for several days, was adopted and signed by all the members. All acts of the conveution, legislature or others assuming to act for the State, which tend to separate it from the United States, or to make war against them, are de-

Tennessee .- At the recent election, East Tennessee gave about ten thousand majority against secession, Philadelphia. A large proportion of them were young but the vote of the entire State was overwhelmingly in girls and small children. favour of going with the South. The Memphis Appeal of the 14th says, a warrant is out for the arrest of Sena-

Kentucky .- The secession party in this State, though restless and dissatisfied, have not ventured on an open ontbreak. Notwithstanding the prohibition, considerable quantities of provisions go south from Kentucky, via the Nashville railroad. A great exudus of Southerners northward is taking place by the same conveyance.

loyal to the Union, but the secessionists are active and both parties from carrying prizes made by them into the aggressive, and may precipitate civil war. Home guards, ports, harbours, or waters of the United Kingdom, or or aggressive, and may precipitate civil war. Home guards, for the protection of the Union men, having been organized in various places by authority of the federal government, Gov. Jackson sought an interview with Gen. Lyon, and demanded that they should be disarmed. and that the federal government should pledge itself not to occupy with its troops any localities in the State not already held by them. He promised if this were done that he would disarm all the companies which had been armed by the State, and that he would maintain a strict neutrality during the contest. Gen. Lyon not acceding to this proposition, the Governor issued his proclamation calling fifty thousand of the militia of the State into active service for the purpose of driving out the U.S. troops. Gen. Lyon lost no time in taking active measures to thwart the Governor's movement. He had thirteen regiments in Missouri, and there were other therefore regiments in answering and there were the strongs in lilinois and flown, whose aid could be had if preferred, one of whom needed. Attempts have been made at St. Louis for the school. Apply to several weeks past to enlist men for the Southern army. and the U. S. authorities there were aware of the fact. In consequence they have made a number of arrests for

Maryland .- At an election for members of Congress held in this State last week, the candidates of the Union party were nearly all elected by large majorities. The only doubtful member will, it is stated, support the U. S. government in whatever measures may be deemed necessary for its defence.

Pennsylvania .- The bids for the State loan of three millions of dollars were opened on the 13th, and more than a sufficient amount was found to have been offered at par. The loan was all taken by citizens or corpora-

Southern Items .- The expectation of capturing fort Pickens having been abandoned for the present, a part up the Shenandoah, and there abandoned. On the 15th, of the besieging force (about 2800 men) have been sent Martinaburg, nineteen miles west of Harper's Ferry, was to Virginia. More U. S. troops have been landed on occupied by a large force of U. S. troops. On the same | Santa Rosa Island.—The blockade of New Orleans was day, the advance guard of Gen. Patterson's army, consist- still incomplete, vessels going to see occasionally within go of ten thousand men, was at Hagerstown, Md. A regi-lout hindrance.—It is reported that several steam tow-

and a large floating battery was getting ready to ge down with a flotilla, and attack the U. S. ship Brooklyn -The privateer Savannah, which was fitted out a Charleston, S. C., captured the brig Joseph of Portland Me., from Havana for Philadelphia, with a cargo of sngar valued at \$30,000, and sent her prize into George town, S. C. On the same day, the U. S. brig Perry fel in with the privateer, and captured her. The vessel was sent to New York, and the officers and crew were put in irons, and confined on board the U. S. ship Minus-sota.—The Savannah papers of the 12th announce the landing of a large force of federal troops on Hilton Head an island near the southern end of South Carolina, and a short distance from Sayannah. The object of the movement was noknown, but it had occasioned much alarm at Savannah,-Intelligence from New Orleans represents its society in a sadly demoralized condition. and the city in a state of bankruptcy and anarchy. The N. O. Delta of last week says, "Personal security is fast becoming a matter of doubtful assurance. Men of high and low estate are met upon the street, assaulted, and in many cases murderously used, with an insoleut disregard for law, which argues an expectation of escape from punishment,"

from punishment."

Philadelphia.—Mortality last week, 233.

Wreck of an Ocean Steamer.—The steamship Canadian from Quebee for Liverpool, struck on the 4th a field of sunken ice, near Belle lale, and went down in hithry-five minutes. There were about 200 persons on board thirty-six of whom were drowned.

Emigration to Utah.—More than a thousand Mormon clared to be without authority and void, and the offices recently passed through Chicago, Illiaois, on their way of all who athere to the said convention and executive, to Great Salt Lake City. These recruits for the More to be vacated. sively, and chiefly in the cities of Boston, New York, and

Capture of a Slaver.—The ship Nightingale which sailed from Kabenda, Africa, with a cargo of nine huptor Andrew Juhnson, for treason against the State of dred and fifty negroes, was captured off the coast on th Tennessee. 23d of Fourth month, by the U. S. sloop of war Sara toga, and taken into Monrovia, where the negroes were landed. At last turning the flank of a mountain, you Henderson saw some which he computed at one searcely less trying to the temper; and if en-observe big clouds of steam curling into the air at hundred and fifty feet; but other travellers have nhered with much baggage, the beasts of burden a distance of about three miles; and if your pulse cut them down to one hundred feet at the utmost,

the furious bubbling of the water in its shaft. This shaft is about six feet in diameter, according to Forbes, with a depth of about forty-eight feet; but it is very irregular in its bore, and contracts considerably: it is also bent in its course, and therefore, as Mr. Miles suggests, resembles the Irishman's gun, which had the faculty of "shooting around a corner." The ejections of the Churn are more numerous than those of the Rager, occurring at least one or twice a day, and though its jets are less voluminous, they last for a longer period, and radiate in a still more tasteful manner.

Now Strokr possesses one interesting property He may be made to discharge almost at pleasure; and not only so, but you may force him to extra activity, and extort an eruption of a much fiercer character than is his natural practice. The way to accomplish this is very simple. Collect a quantity of stones or sods, and shovel them into the pipe of the Geyser. Down they go, splashing into the fluid, which instantly ceases to boil, as if Strokr were astonished at your impudence. And well he may, for stones and sods are things he abominates to such a degree that, collecting all his strength, he soon vomits them forth, and hurries them aloft in a pillar of water, which sometimes appears to reach to twice the ordinary elevation. Henderson who stumbled upon this discovery, states that some of the jets rose to a height of two hundred feet, and that fragments of stone were propelled to a still greater altitude, the column of water being succeeded by a column of steam, which lasted for nearly an hour. This experimentalist narrowly escaped punishment for his temerity; for, whilst ex amining the pipe, the insulted spouter, boiling with rage, shot up into the air a hissing torrent, which swept within an inch or two of his tormentor's face. Need we be surprised if prankish visitors can hardly resist the temptation to tease the Geyser? Spite of the grandeur of the spectacle, son feel a strong propensity to laugh at the idea of rollsing Strokr, and throwing him iuto a profound passion Miles literally "made game" of the spring, and when the exasperated phenomenon sought to relieve himself, was quite delighted to see his waters-stained and blackened with the clodsrising wrathfully to a height of one hundred and thirty feet. Commander Forbes subjected poor Stroke to a still greater indignity, for he compelled the Geyser to cook his dinner. Having invited the peighbouring curé and farmer to a meal, he packed up a piece of mutton in the body of a Dress of the Japanese women.—The dress of flannel shirt, and a ptarmigan in each sleeve, and the Japanese women is simple, but graceful. The then flung the garment into the Churn, which was robe which crosses the breast, close up to the neck, previously primed with a quantity of turf. For or a little lower, according to the taste of the some time Strok took the transaction in such high wearer, reaches nearly to the ground, and has dudgeon that he refused to eject; but finding that loose sleeves leaving the wrist free. This robe is preparations were making for another dose of sods, confined round the body by a shawl, which is tied he launched his waters into the air with unwonted behind in a bow, the ends flowing. Every thing fury, and the traveller soon beheld his shirt flying in Japan, even in dress, is regulated by law; and upwards, "with the arms extended like a head the sumptuary laws have been very strict until and tailless trunk," on its descent to the ground it lately, when contact with Europeans appears to be proved to be in such a scalding state that it was bringing about a slight relaxation. The colour necessary to wait a quarter of an hour before din-based worm by all classes of men in their usual dress is ner could be served, and the nit appeared that black, or dark blowe, of varied parts but the though the mutton was done to a nit energy, the birds women are allowed, and of course are it them. were torn to shreds. The Churn, in fact, was a selves of the privilege, to wear brighter dresses; sort of Papin's digester, where the very twigs of yet their taste is so good that gaudy colours are turf received such a soaking of caloric that they generally eschewed. Their robes are generally came out in a sodden condition. A drunken man striped silks, of gray blue, or black, the shaw some beautiful bright colour, crimson, for instance, wherein meckness and forbearance, and charity, after seething for a short time was thrown up in a and their fine jet-black hair is tastefully set off and brotherly love, have reclaimed a wanderer spray of human fragments.

Caution in the use of positive expressions, is a great preservation against rudeness of manners.

John Barclay.

I can look back upon many a favoured season. many an availing prayer, -sometimes a single sigh after what was good, -sometimes the mental eye turned inward during a few spare minutes of intermission or leisure from the hurry of business. when in my father's banking-house : sometimes as I went and returned to and from town, but especially before dinner. At that particular time, I was in the regular habit of secluding myself for a short season in private, and either devoting that opportunity to reading the Scriptures, or more commonly to silently seeking the Lord, and waiting upon him for support, strength, and sustenance, and whatever he saw needful for me. After this period, the efficacy of the same spirit of dependence and reliance, which the Lord had begotten and kept alive in me was striking; and it has been memorable to me since, when I was engaged in the business of an attorney's office, and lived at lodgings. There the same power, as I was concerned to keep close to it, preserved me through all the difficulties and trials that were strewed in my path. Oh! what sweet First-days have I spent at a disagreeable dull lodging; what meetings have I had, what sweet meetings in the middle of the week, when I gave up everything that stood in the way, and thus procured liberty to attend them. What sighs, what cries unto the Lord in secret corners. when a few minutes could be spared in the midst of the bustle of wordly engagements; when walking through the noisy crowded streets, what songs unto the Lord of all tender mercies, who over shadowed me; - and when occasionally an afternoon was allowed me, wherein to be absent from business, what sweet contemplative walks in the meadows and country, a few miles out of town But how shall I stop, or where shall I end, in speaking of Him, who regards the prayer of the humble, under many circumstance which I have not mentioned. How has the Lord ever had his eye upon and over me, to turn all to good, as long as I have regarded, trusted in, resigned myself unto his preserving power; when I have been enabled to say, "I am thine, do with me what thou wilt." So that surely we may never doubt but that "whosoever calls upon the name of the Lord shall be

On Speaking in Meetings for Discipline.

As I was deeply exercised in my mind about the things of the living God, and the holy order of the blessed Gospel of the Lord Jesus, it was opened to me that all concerned Friends that speak in men's meetings ought to wait for a due inward feeling of the heavenly gift, and as that gave an understanding, then speak and minister in the order of Jesus, which is holy, and all that they speak will be for promoting the way of Truth, and keeping all the professors thereof in faithful ness and true obedience to the Lord. I being thus in travail of spirit, the state of men's meetings, as they now are, was set before me, and I saw three sorts of men speaking, and they were in three paths; one sort was on the right hand, where they ran on in their own wills, and were very fierce for order, but not in a right spirit; they were the cause of long discourses, and greatly displeased the Lord and his faithful people. I saw another path to the left hand, and there was a great darkness, and a stiff-necked people, that were for breaking down the order and good rules that the Lord has established in His Church; then my soul was filled with sorrow and cries to the Lord, seeing the danger both these were in. Then the the was pleased to show me a middle path, and the Lord's people were in it, and had the strong line of justice and true judgment; the Lord's Holy Spirit and power is their guide. I am moved to warn you all that are stiff and steady in your own wills, to stand still, and turn in your own minds to this Heavenly gift; in it is the true wisdom and blessed knowledge, and you will learn to know what the good and acceptable will of the Lord is; and if you speak in the meeting, it will be to please God, and for His honour, not your own ; for you strive for honour in a carnal mind, and seek not the honour of the Lord, but are in great presumption.—From a M. S. by Thomos Wilson, an eminent Minister among early Friends, found among

Bookworms .- In paper, leather, and parchment are found various animals, popularly known as "bookworms." The larvæ of Crambus pinguinalis will establish themselves upon the binding of a book, and spinning a robe, will do to it little injury. A mite (Acarus cruditus) eats the paste that fastens the paper over the edges of the binding, and so loosens it. The caterpillar of another little moth takes its station in damp old books, between the leaves, and there commits great ravages. The little boring wood-beetle also attacks books, and will even bore through several volumes. An instance is mentioned of twenty seven folio volumes being perforated in a straight line, by the same insect, in such a manner that, by passing a cord through the perfect round hole made by it, the twenty-seven volumes could be raised at once. The wood-beetle also destroys prints and drawings whether framed or kept in a portfolio. The "death watch" is likewise accused of being a depredator of books. These details were collected by the experienced keeper of the Ashmolean Museum at Oxford, in 1841.

Musings and Memories.

POOR PREACHING AND POOR HEARING.

I have somewhere read an essay in which the author, probably a preacher himself, after stating that he had heard much about poor preaching, gives it as his opinion, that there is also a great deal of poor hearing. He enumerates first drowsy hearing, the hearers being evidently dull and sleepy, if not soundly asleep. The second is inattentive hearing, when the mind is wandering, and taking little or no heed to what the preacher and peculiar a character that thou canst not see put the matter to the test, it was carried into t and sain finder of to need to what he process his saying. The third is creptious hearing, when how thou art to bold on thy way in patience and pigeon-house, when out of the many niches the listoner keeps his attention alive only that resignation any longer? Or, is thy pecuniary conditiently went into the one in which it had been he listener keeps his attention alive only that the listener keeps his attention alive only that he may find fault. He is a fisherman always on dition, owing to thy own heedlessness, the improhatched. No doubt remained in the mind of t the alert to catch bad fish, and in this business be vidence or dishonesty of others, with the peculiar lady of the identity of the bird." By what extr ing very expert, he is seldom without success. The financial difficulties of the present time, so involved, ordinary power did this interesting bird find fourth specimen of poor hearing of which he speaks, that it appears to thee that the way is completely is hearing for other people. The hearer is apt to hedged up? Whatever thy situation, whatever the say to himself, whilst dissecting the sermon he is peculiar trials which heset thee, and appear to listening to, Ah, this fits John, that is well adapted hedge thy way, remember if thou art a believer in. to Stephen's case, and thus whilst looking round and a true-hearted lover and follower of the Lord the assembly, is distributing all the advice and the Jesus Christ, all thy trials, all thy difficulties, nay, reproof to others, being far too generous to keep all thy bereavements, are in mercy, according to aught so unpalatable for himself. The introduction of this subject to the attention of the LONDON YEARLY MEETING.

* Their knowledge of Friends' principles, it is stated, was derived from books, principally Barclay's Apology, Clarkson's Portraiture, the life of J. J. Gurney, and The committee appointed last year on the subject

of missions, and provided a report, and produced a minute for the adoption of the Yearly Meeting, if ap-Slaves, too, were being armed in many cases. The financial resources of the "Confederate States" being proved of, in reference to that branch of the question which relates to the ignorant and deprayed of our own land; together with an address to Friends, rice and other produce "for the defence of the country. which they submitted for the Yearly Meeting's approval, in regard to evangelizing of the heathen."
The London Friend says, "the address on foreign efforts of a missionary character, is a sound and judicious document, embracing the grounds on which the obligation to such exertions rest, and showing how fully this obligation is recognized in the scriptures and in the epistles of George Fox. In contemplating enlarged and varied action by Friends in the view of aiding the operations, both of our own members, and, so far as we could unite with them, those of others also; but in no case was any course of action recommended that would in any way infringe on acknowledged principles. It was not proposed to interfere at all with the present functions of Monthly meetings, in liberating ministers ary character, he was invited, for the present, to communicate with the meeting for sufferings. Two or three words in the address were objected to by a few Friends, but only one of them, that of " pastoral" applied to some of the epistles of George Fox, was expunged, and the address was finally adopted with considerable unanimity, thankfulness being expressed that the society had seen it to be its duty, not only to recognize, but also to stir up the gifts of its members. Subsequently James Backhouse reported that a fund with which he had been entrusted for the purpose some years since, had been expended in printing 5000 copies of the "Scripture Lessons" in the Bechuana language, which had been distributed among the various missionary stations in South Africa and had proved very acceptable."

(To be continued.)

SUMMARY OF EVENTS.

Progress of Hostilities .- According to a statement furnished by the Secretary of War to the President of the United States, about two hundred and twenty-five thousand volunteers are now mustered into the United States service. About 100,000 of these are, it is supposed, in Virginia, or on the confines of that State.

The movements on both sides are marked by great cantion. In the vicinity of Washington, the pickets of the rebels, and those of the regular army have, at times, been almost within hailing distance, but no hostilities beyond unimportant skirmishing had occurred during the week. The Pennsylvania troops, under Gen. Cadral forces, though large bodies of them were in the vi-

Southern Items.—The report at Savannah, Ga., that U. S. troops had been landed at Hildreth Head, near that city, proved to be unfounded. The wooden drydock at Pensacola, which the rebels attempted to sink near the entrance of the harbour, was recently observed to be affoat. It was secured by Col. Brown, the commander of fort Pickens, and made safe under the gans of the fort. Letters from army officers now holding commissions in the rebel army, to their late comrades, state, it is said, that Jefferson Davis' opposition alone has prevented the secession forces in Virginia from assuming the offensive, and marching upon Washington. The accounts respecting the growing cotton crop, are generally favourable, but the yield of that staple and of tobacco would be smaller than usual, while larger crops of grain were being raised. A body of 1500 tree

of missions, made a report, and " produced a min- lo a daily drill. They were enlisted for general service, way to avoid them. The leebergs are said to be see inadequate to meet the demands of the war, an agent has been appointed to receive subscriptions of cotton, The rebel government will accept all produce so tendered, and give in exchange its bonds promising to pay eight per cent. interest. It is stated that a number of wealthy planters have offered to subscribe one half of their incoming cotton crop, and a few have even offered to contribute three-fourths of their crops.

The Doubtful States .- Missouri has been a point of pecial interest for the last two months. The Governor of the State having finally thrown off the mask, and attempted to assemble the State troops at Booneville, for hostile purposes. Gen. Lyon, the U. S. commander, this direction, it was observed that some external made a rapid movement upon that place, and routed the arrangements might be found desirable, and that rebel army. The secessionists were, however, still acvarious places. They expected aid from Tennessee and Arkansas. A number of lives had been lost in petty conflicts between the rebels and Union troops. The federal forces, under Gen. Lyon's orders, consisted of about 12,000 men, which could be increased from the neighbouring camp, in Illinois. St. Louis and all the most important points in the State, were held by them. -The Legislature of Maryland, in session at Frederick, has passed a resolution declaring that the acts of the to preach the gospel, but in case any Friend should general government are unconstitutional and tyrannical. feel called to other service partaking of a mission- and in favour of the immediate recognition of the Southern Confederacy. Another resolution of the Maryland Legislature declares the debt now being incurred by the general government in prosecuting the war, is unconstiutional and of no binding force upon the States, which do not consent thereto, and that Maryland will not hold itself bound for any portion of its payment .- At the recent election of members of Congress in Kentucky, the Union candidates were elected in nine out of the ten districts. An agreement is reported to have been made between Gen. McClellan, and the Kentucky authorities hy which the latter engage to protect the United States property in the State, enforce the laws of the United States according to the interpretation of the United States courts, and enforce all obligations of neutrality as against the Southern States. Gen. M'Clellan agrees to respect the territory of Kentucky, even though Southern armies occupy it. In such case he will call upon the Kentucky authorities to remove the Southern forces. Should Kentucky fail to do this, he claims the same right of occupation as given to the South; and also if Kentucky is unable to remove the Southern forces, she will call for the aid of the government troops, and if successful in removing them, Gen. McClellan agrees to withdraw. If the administration adopts a different policy, Kentucky is to have timely notice, and if Kentucky changes, the same notice is to he given by this agreement.

Virginia .- On the 23d, Gen. M'Clellan was at Grafton. in the western part of the State, with a considerable body of U. S. troops. The secession forces have been reinforced in Western Virginia. There was a camp of 3500 men at Romney, and numbers in other places. They were resorting to a guerilla warfare, to the great annoyance and injury of the loyal inhabitants. It was presumed Harper's Ferry would be occupied by the federal troops, but the government has possession of the telegraph, and allows nothing relative to the movements walader, which crossed the Potomac into Virginia, had in that vicinity to be transmitted by it. A State con-been ordered back into Maryland. At the latest ac-lyention is in session at Richmund. An ordinance has An ordinance has ocean ordered back into Maryiand. At the latest ac-counts he was stationed at Williamsport, with 6000 been passed by it, adopting the Constitution of the Con-men. A large part of the rebel force which retreated from Harper's Ferry, was encamped near Winchester, Va. Harper's Ferry had not heen occupied by the fede-tic force of the was the control of the State militia, for the disbursabeen passed by it, adopting the Constitution of the Confederate States. The New Virginia convention which has been in session at Wheeling, has tuken measures for ment of the public revenues, providing for the appointment of various State officers, fixing their salaries, &c. Every officer of the State, as re-organized, is to be obliged to swear allegiance anew to the United States, and to repudiate the Richmond convention. On the 20th, Frank H. Pierpont, of Marion county, was elected Provisional Governor, by an unanimous vote of the convention. When inaugurated, he delivered an address urging a vigorous prosecution of the work of redeeming the State from the hands of the rebels.

PROVIDENTIAL PRESERVATION.

A young Cornish miner, who had been savingly reached by Divine grace, was on his knees in prayer, in the mine in which he worked, when three large stones fell out of the roof above, striking the ful, timid little girl. She was rendered awkward floor around him, without touching him. Imme- by her bashfulness, and her embarrassment was diately after, before he had time to rise, a large not diminished to hear herself called silly by some mass of the rock settled down on the stones which who had never suffered from timidity, or had forhad previously fallen, and which alone prevented gotten how they had felt, when enduring the pains his immediate death. The large mass was only of bashfulness. In the company, there was one about four inches above his head as he kneit, and kind-hearted, really polite boy. He felt for her in her principle of divine grace which is manifest for o had he been standing up, he must inevitably have discress, and without appearing to notice her fright, instruction and support. If we go from this, been crushed. He was so closely hemmed in as to he took a book to her, showed her the pitcherus, shall be in danger of falling into wrong practice. been crushed. He was so closely hemmed in as to he took a book to her, showed her the pictures, be unable to rise from his kneeling position until talked to her very pleasantly, and took care not the mass of rock which rested above him, had been to ask questions which would render it necessary removed. This young miner was afterwards, for for her to answer. Her fear soon passed away, many years one of the most effectual labourers and the intelligence of her mind was soon maniamong John Wesley's coadjutors, throughout Corn-fest on her countenance, showing that the term the love and lear of God, how can we be support wall, Wales, and Oxfordshire, working through silly did not rightfully belong to her. When fruit the blessing which attended his labours, a great was handed round, he selected a fine apple, and that the society must decline if it goes from the blessing which attended his labours, a great was handed round, he selected a fine apple, and moral reformation throughout a very benighted whilst the others were busy in ministering to their from whence it took its rise.—John Kendall. region. of Her Majesty's government.

nary efforts which have resulted in the enlarged growth of the past year. This result has afforded temporary relief to the trade, and enabled the country to meet the unusual demand for goods and yarn in the Eastern empire and elsewhere. But the committee fear that this unusual and constrained effort may, as in the plentiful year of

1845, in all probability be followed by a serious

And, if further confirmation be needed, they point to the fact that although in 1840, the crop of the United States was 2,177,835 bales, and in 1860 it reached 4,500,000 bales, the growth has only been doubled in twenty years, while the number of spindles employed in England and on the Continent, in 1840, was 27,266,000, but in 1860, 69,642,000. In other words, while the increase of growth has been doubled, owing to the high prices of an almost exclusive market, the increase of spindles has more than doubled by the enormous addition of 15,110,000, requiring an additional one million bales to give them employment. The position of the trade is, therefore, in 1860, so far as America is concerned, worse by one million bales than it was in the year 1840. But this is bales than it was in the year 1840. not the whole evil. It is estimated "that at least national interest, it is incumbent upon all classes of one million bales out of the present crop will class the community to support the movement now in ordinary or below;" and further, "that the crop progress for promoting the growth of cotton in has been materially increased by the quantity of Africa, Australia, South America, the West Indies low, trasky and dusty cotton which planters have nercial questions of the day. England, in justice and other countries; that as the development of thought it their interest to scrape together and send to herself, and to make her mills and machinery the resources of India is of vast importance to this to market. The dangers of our present dependence upon the United States thus grow more apparent or years using strenuous exertions towards extend- government to give every encouragement to the every year, and the committee are of opinion that unfettered action of private enterprise and public now, in a season of comparative prosperity, it be-We now have recent information from the East companies, whether for the cultivation of cotton, comes the trade to unite for a few years in the Indies, Africa, &c., which shows that these exer- the opening of river navigation, the construction of steadfast and needful determination to aid this As-

Richard Fry approved the minute; but, in view of how much depends on the spirit in which those meetings are conducted, proposed to insert in it the words, 'not in a critical spirit,' This was concurred in by many Friends, but by still more it was thought that the minute. clude the exercise of a healthy criticism."

(To be continued)

SUMMARY OF EVENTS.

Progress of Hostilities .- The general aspect of affairs has changed but little during the week. The federal a very large number, but the rebel armies near them are perhaps nearly as strong, and, it is supposed, better supplied with cavalry and artillery. Their actual condition is, however, not known with any certainty. In Western Virginia, the rehels have concentrated under the command of Ex-Gov. Wise, to the number of five thousand, during the continuance of the war. well armed, posted and supplied. Gen. M'Clellan has about seven thousand of the Western volunteers, in the same vicinity. The advance body of the Southern army near Washington is encamped, from Springfield to Fairfax Court-house, and their scouts frequently approach within a few miles of Alexandria. All the farms, within the reach of the rebels, are visited, the grain seized, and no equivalent rendered. The main hody of the rebel army which withdrew from Harper's Ferry, remains near Winchester. The plan of Gen. Johnson, the rebel commander, seems to be to draw Geu. Patterson's column into Virginia

Southern Items .- The annual appropriations of the rebel Congress for the army are officially given in the Richmond Examiner, viz:—Pay of 100 regiments of infantry, \$29,132,000; artillery, cavalry and voltigeurs, \$550,000; transportation, &c., \$5,500,000; ordnance, machinery, &c., \$4,500,000; medical department, \$329,000; total, \$40,011,000.—A special despatch to the New Orleans Delta, from Mississippi City, on the 25th, says that a steamer anchored off the point, had captured five the legislature in session at Nashville, to p schooners, with which she sailed eastward. The block- peaceable separation from the rest of the State. ade at this point, the same paper states, has been permanently instituted, and that the Mobile mail boats have been discontinued.—The Picayune, of the 25th, says that a U. S. sloop of war, with eight gans, is anchored at Atchafalaya bay, thus intercepting communication to provision has been made for the payment of the half-via Barwick bay with Texas.—A collection to be taken said the school fund has been to be state. It is even up in the churches for the Access of the State. up in the churches, for the benefit of the Confederate States, is recommended in Charleston .- An advertisement announces the re-opening of the Confederate loan at several places in Georgia, and says that only eleven ont of the fifteen millions have been subscribed for .-A British ship, it is stated, recently arrived at New Or- Lyon as a prisoner.

ation, the minute was adopted, though some Friends leans, having cluded the blockade, and landed 20,000 sent to Northern ports.

New York .- Gov. Morgan has issued a proclamation forbidding any more regiments of volunteers to be raised in the State for the present. He states the cost of troops, including the contributions by the State, by the city of 36; small-pox, 20. The coal trade of the Schuylk New York, and by other cities and individuals, is esti- and Lehigh regions for the first half of this year, amout mated to have been about \$10,000,000. New York has ed to an aggregate of 3,186,753 tons, a falling off furnished 50,000 volunteers, about 30,000 of whom have left the State.

Maryland .- The legislature, in which the secessionists have a majority, has adjourned to the 30th inst. John Merryman, who has been for some time past a prisoner at fort M'Henry, has been presented by the grand jury veyed to fort M'Henry. The reason assigned for the ar-rest is, that Kane was known to be an aider and abettor of persons in armed rebellion against the government. which dictated them to boly men of old; all object.

(on. Banks has suspended the powers of the police comtions, however, were overruled, and the prevailing missioners, and appointed John R. Kenly as provost-marked to the production of the meeting being favourable to the production of the meeting being favourable to the production. feeling of the meaning position, the clerk minuted its adoption."

The Loudon Friend says, "Among those averse to it were S. Alexander, C. Thompson, W. Bing, han, J. Sergeant, G. Danson, W. Bennett, J. Armfield, C. Wilson, and others. It was favoured, by much the larger number of speakers, plot had been formed for an outbreak by the secession—by much the larger number of speakers, plot had been formed for an outbreak by the secession—by much the larger number of speakers, plot had been formed for an outbreak by the secession—by the description of the kind, Gen. Banks. To prevent any attempt of the kind, Gen. Banks and sent to for Milenry. It is said that a plot had been formed for an outbreak by the secession—by the description of the kind, Gen. Banks. To prevent any attempt of the kind, Gen. Banks.

Virginia .- The whole number of troops in Virginia. by rebel estimate, is 80,000, of which 55,000 are armed, and may be considered reasonably effective, but not over 25,000 of these can be concentrated at a given point. Their largest number now at any one point is about 18,000 at Manassas Junction. Of the whole number of troops, at least one-third are mounted men, well appointed and valuable. They are quietly and secretly concentratas brought in, was sufficiently guarded, and that ing troops at Yorktown, where they have already a body the words proposed might be misunderstood to ex- of 9000 men. The number at Richmond does not exceed 6000; Norfolk is regarded as impregnable. The leaders avow their purpose not to have any considerable action in Virginia, but rely mainly upon worrying out the patience and endurance of the North in a protracted struggle, barren of results, not harmful to them. administration has recognized the new provisional government at Wheeling as the State government of Virforces, in and near Washington, have been increased to ginia, and opened official intercourse with Gov. Pierpont, in relation to the representation of Virginia in the thirty-eighth Congress. The convention at Richmond has passed an ordinance forbidding the rayment of interest upon such of the State bonds as are held by the United States, or by corporations or citizens thereof,

> Kentucky .- The reported arrangement between Gen. M'Clellan and the Kentucky authorities is denied by the former. He had an unofficial interview with Gov. Magoffin's agent, but disclaimed any power to act heyond the orders of the government, and made no engagement as to the future. The only result of the meeting, as Gen. M'Clellan considers, was a voluntary promise the part of the governor that he would not permit Confederate troops to enter or remain in Kentucky.

> Tennessee .- According to the proclamation of the governor announcing the vote on secession, there were 104,913 votes cast for separation, and only 47,238 against The latter were chiefly in the eastern part of the State, where there is still a strong feeling of attachment to the Union. The Post-office department, in consideration of the loyalty of the citizens of East Tennessee, has made arrangements for furnishing them with increased postal facilities. The mails will bereafter be sent thither by way of Cincinnati, instead of Lonisville Commissioners from East Tennessee have been sent to the legislature in session at Nashville, to propose a

Missouri .- Although there is much excitement and ill feeling in this State, the power in Gen. Lyon's hands the school. Apply to appears adequate to keep the secessionists in check. No purposes. The governor is now a fugitive from the capital; the State Treasurer, State Auditor and Register of Lands have taken onths of allegiance to the United States, and resumed their official duties. The Attorney-General declined to take the oath, and is held by Gen.

Texas .-- All the crops of the season are said to be a usually good. A movement is reported to be on foot separate Western Texas from the rest of the State, as erect it into a Union State. It is settled largely by Ge mans, and the German press warmly urges the me Onro

Philadelphia.-Mortality last week, 289; scarlet fev. compared with last year of only 80,000 tons.

Baltimore and Ohio Railroad.—The loss inflicted this company by the rebels in the wanton destruction bridges, locomotives, cars, &c., it is estimated, exceet two millions of dollars, in addition to the loss of a year business.

The Cherokees .- John Rosa, principal chief of th Cherokees, has issued a proclamation orging his peop to be true to their treaties with the United States, ar to take no part in the war.

Massachusetts Ice .- The exports of ice from Bosto this year, to Sixth mo. 1st, amounted to 60,948 ton: against 74,717 tons in the same period last year.

The Slave Trade .- A late despatch from the English commissary, Judge Crawford, at Havana, just presente to both Houses of Parliament, states "that the slav trade continues to be carried on from this Island upo the most extensive scale, and that, so far from it havin become adious in the opinion of the public, there a more persons, even of capital and influence, engaged it than ever.

Decline of Imports .- The receipts at New York fro customs, during the past month, amounted to \$460,79 against \$2,753,933 for the corresponding month la

The New Congress .- An extra session of Congress to assemble on the 4th inst. In the Senate, but fort six members are left since the secession of most of the Southern States. The number of members of the Houof Representatives will be reduced from two hundre and thirty-seven to one hundred and eighty.

The Mint .- The coinage at the U. S. mint in Phile delphia, during the Sixth month, amounted to \$9,647 100, viz: gold, \$9,267,000; silver, \$377,100; coppe

FOREIGN.-Liverpool dates to Sixth mo. 19th. Ti weather in England was very warm, and all the croj were making rapid progress. The departure of the Great Eastern with the British troops, had been pos poned to the 26th ult. The House of Commons has a ected the bill for the abolition of the church rates the casting vote of the Speaker. The London Time opposes the shipment of troops to Canada, and say there is no apparent reason for it, and the United State is more likely to regard it as a challenge than as a pr cantion.

The Liverpool cotton market was steady. Breadstuf dull and declining.

It is asserted that the recognition of the kingdom Italy by France is an accomplished fact, but there is official announcement.

Some disturbances had occurred in Syria, on the d parture of the French troops, but they were quickly say pressed.

Spain will preserve a strict neutrality in the America war.

The Pope was seriously ill.

The plan for estublishing a telegraphic line connec ing Europe, through Siberia, with the Pacific ocea has been undertaken by the Russian Ministry of Marin It is expected that the entire line from St. Petersburg the Pacific will be completed in five years.

The telegraph cable between the island of Corsica ar Toulon has been successfully laid.

It is stated that the Russian Emperor has issued

decree granting reforms to Poland. The reforms a said to make satisfactory concessions to that country.

From the British Quarterly Review. Iceland.

(Continued from page 346.) Again,-Iceland has its springs of mud as well of water. The fluid which darts from the Geyrs is generally limpid, and has frequently excited tonishment from the fact that it contains a large cantity of silica in solution. How such a refracry substance as flint could be dissolved, and then ecipitated on the simple cooling of the liquid, is considered a kind of chemical puzzle. It is, wever, well ascertained from the experiments of . Fuchs, M. Kuhlman, and - Ransome, on the oduction of water-glass, that if silica is fused th potash or soda, under certain circumstances, will readily dissolve in boiling water, or if flint exposed to the action of a strong solution of regoes its right to be regarded as the emblem of duracy

rgest mineral ingredient, and that soda exists in mpared to cauliflower-heads of exquisite beauty. justice the Roaring Mount. ot only stones but twigs, grass, mosses, and other elicate objects receive such a coating that they

tement by the bubbles of carbonic acid which are ways ascending. Frisky and pungent, it is tolably agreeable, and from the stimulant powers the gas, the place is known as the Ol Kilda, or e Ale Well.

Frequently, however, as already stated, mud is e only liquor in which a spring will deal. And

But imagine the horror of a man reat Geyscr,* it will be seen that silica is the circular mound about four feet in height, from like the first Napoleon, or of any other owner of which a current of steam "escapes with a noise a fire eating army, were he told that, in a few numberst ingreutent, and that sout exists in louder than that of the most tremendous cataract," years, the supply of inter or brinstone might on. When, however, the fluid cools, the flinty and with a force so great, that stones thrown into wholly cease. What groans that individual would atter is deposited in the basins and channels, the aperture are shot out to a considerable height, utter | — what walling there would be amorget his here it forms incrustations which are generally as if fired from a mortar. The natives call it with troops! Would not the poor planet, in their opinion, become quite bankrupt in glory? With our Scarcely less striking than the boiling springs rifles all unloaded, and our cannon virtually spiked, are the sulphur mines of Iceland. There are should we have any more history worth narrating? pear to have been perfectly fossilized.

In some cases the fluid of these wells is still more into a region of fire and brimstone. The most The military mind would make itself quite comngularly charged. What does the reader say to eclebrated of these spots is a mountain about two fortable on this point could it survey the vast derings of soda-water? Such there are in various or three miles from Krisuvik. The ascent has its posits at Krisuvik, and observe how the precious arts of the island, but one of the most celebrated own troubles. Toiling up a slippery bank of c ay exhalations stream from the ground, as if there at a spot about two miles to the north of Rouand sulphur, almost stiffed by the exhaltons were a boundless magazine beneath. There is
unelr. The liquid there occupies two cavities in which the wind probably sweeps full in your face,
the ground, and is kept in a state of constant exyou arrive at a great hollow, where the banks are
thousand battles. Such, indeed, are the sulphurcovered with a fine yellow crust or powder. The ous resources of Iceland, that it could supply all ground is pierced with holes through which steam the armies of Europe, and enable them to take

ing mud. — Bright suffered much pain from an accident of this description, and Dr. Hooker plunged up to his knees in a half-liquid mass of the Danes, who know more of the merits of gunsulphur and clay, and was only saved from further powder, might have been expected to turn the subimmersion by throwing himself upon the ground, stance to lucrative account. A French traveller,

*He found that a gallon contained 31.58 grains of si-2a, 5.56 of soda, 14.42 of muriate of soda, 8.57 of sulrate of soda, and 2.80 of alumina.

be well to keep these valuable localities out of the us that an Englishman, - Bushby, has already purchased the sulphurous sublimations of the southern district, and obtained the refusal of those in the north.

(To be continued.)

Robert Barelay's Proposition XV.

Concerning Salutations and Recreations, &c. Seeing the chief end of all religion is to redeem men from the spirit and vain conversation of this world, and to lead into inward communion with God, before whom if we fear always we are accounted happy; therefore all the vain customs and habits thereof, both in word and deed, are to be fear; such as taking off the hat to a man, the bowings and cringings of the body, and such other salutations of that kind, with all the foolish and superstitious formalities attending them; all which man hath invented in his degenerate state, to feed his pride in the vain pomp and glory of this world: as also the unprofitable plays, frivolous recreations, sportings, and gamings, which are invented to pass away the precious time, and divert the mind from the witness of God in the heart, and from the living sense of his fear, and from that evangelical Spirit wherewith Christians ought to be leavened, and which leads into sobriety, gravity, and godly fear; in which as we abide, the blessing of the Lord is felt to attend us in those actions in which we are necessarily engaged, in order to the taking care for the sustenance of the outward man.

§ I. Having hitherto treated of the principles of religion, both relating to doctrine and worship, I am now to speak of some practices which have been the product of these principles, in those witnesses whom God hath raised up in this day to testify for doing thereof hath occasioned no small sufferings pass them. For it is beyond question, that what his truth. It will not a little commend them, I and buffetings, and hath procured us much hatred ever thing the creation affords is for the use of mat suppose, in the judgment of sober and judicious men, that taking them generally, even by the confession of their adversaries, they are found to be free of those abominations which abound among other professors, such as are swearing, drunkenness, whoredom, riotousness, &c., and that generally the very coming among this people doth naturally work such a change, so that many vicious and profane persons have been known, by coming to this truth, to become sober and virtuous: and many light, vain, in these six following propositions. and wanton ones to become grave and serious, as our adversaries dare not deny: * Yet that they may not want something to detract us for, cease not to not want something to detract us for, cease not to Eminency, Your Excellency, Your Grace, Your accuse us for those things, which, when found lardship, Your Honor, &c, nor use those flatter, among themselves, they highly commend; thus our ing words, commonly called [Comptiments.] gravity they call sullenness; our seriousness, melancholy; our silence, sottishness. Such as have been vicious and profane among them, but by coming to us have left off those evils, lest they should commend the truth of our profession, they say, that superfluities in apparel, as are of no use save for in willing to be like him, aspires beyond what h whereas they were profane before, they are become ornament and vanity. worse, in being hypocritical and spiritually proud. If any before dissolute and profane among them, by coming to the truth with us, become frugal and Christians, under the notion of recreations, which do

LOSSES.

Upon the white sea-sand There sat a pilgrim band, Telling the losses that their tives had known; While evening waned away From breezy cliff and bay

And the strong tides went out with weary moan.

One spake, with quivering lip,

Of a fair freighted ship, With all his household to the deep gone down; But one had wilder woe For a fair face, long ago

Lost in the darker depths of a great town.

There were who mourned their youth With a most loving ruth For its brave hopes and memories ever green; And one upon the west Turned an eye that would not rest, For far-off hills whereon its joy had been,

Some talked of vanished gold, Some of broud honours told. Some spake of friends that were their trust no more ; And one of a green grave Reside a foreign wave,

That made him sit so lonely on the shore.

But when their tales were done, There spake among them one, A stranger, seeming from alt sorrow free: "Sad losses have ye met,

But mine is heavier yet; For a believing heart hath gone from me." "Alas!" these pilgrims said,

" For the living and the dead-For fortune's cruelty, for love's sure cross, For the wrecks of land and sea ! But, however it came to thee, Thine, stranger, is life's last and heaviest loss."

Francis Brown. Selected.

Like to the falliog of a star, Or as the flights of eagles are Or like the fresh spring's gaudy hue, Or silver drops of morning dew, Or like a wind that chafes the flood, Or hubbles which on water stood E'en such is man, whose borrowed light Is straight called in, and paid to-night. The wind blows out, the bubble dies, The spring entombed in autumn lies, The dew dries up, the star is shot, The flight is past—and man forgot!

Slighted convictions, are troublesome death-bed

The way to be made a vessel of honour, and quently expressed herself. In her minority she often earnestly desired that the Lord would be pleased to enable her to come up in doing his will, and that in all things she might be perfectly resigned to answer his holy mind and requirings, and be fully given up in heart in all sincerity, and by his grace devoted to serve and obey him, according to the ability received. He, in mercy and

loving-kindness, heard her humble petitions, and granted the early visitations of his love and goodness, in the pourings forth of his Holy Spirit, and gradually, by the work of his own divine power, so prepared and sanctified her heart, that she was made a vessel of honour. Towards the latter part of her time, being often infirm, she frequently rejoiced in the Lord, and expressed the great comfort, peace, and satisfac-tion which she had in having devoted her youthful days to his service, and being freely given up faithfully to obey his calls and holy requirings, whilst a degree of health and strength was granted, and she was able to undergo such service, often saying an early devotion was very acceptable to God, and the strength of youth could never be so well and profitably employed, as in faithfully serving the Lord in humility and sincere obedience in whatsoever work he in his wisdom may be pleased to qualify them for, and call them into. For wheresoever it happened that any such lived to be attended with the infirmities of old age, the comfort and peace they would enjoy, would be abundantly more to them than all the comforts of this life; for she could, by living experience, say, that nothing in this world was worthy to be compared with it. She often earnestly desired the sense thereof might lay hold of our youth, that they might give up their minds to seek the Lord early, and devote the strength of their time to his service, that in the end they might be made partakers of the comfort and peace, which was her greatest joy and real cause of rejoicing, and became more and more so as she drew near her conclusion. This I publish for their perusal, that if by any means they might be prevailed on, and stirred up to consider how necessary and truly profitable it is to begin early in that great duty recommended by the wise man, "Remember now thy Creator in the days of thy youth, while the cvil days come not, nor the years draw nigh when thou shalt say, I have no pleasure in them."-From a Memorial of Deborah Bell.

made known in less than four weeks .- Ledger.

It may be presumed that no man was ever scolded out of his sins.

A Curious Epistle.

The following curious letter, received some forty-nation, nor learn war any more; he immediately ness which had been transacted in the meeting five years ago by a merchant in Philadelphia, fur-directs the minds of people to the Divine teacher, which they had been deputed to attend. T nishes an interesting illustration of the difficulty in this remarkable language, "O house of Jacob, other minutes followed, and were agreed towhich foreigners must have in learning those deli-come ye, and let us walk in the light of the Lord," on 'Private Retirement,' and the other relates eate shades of meaning which guide us in the Isaiah ii. 5. It is necessary to wait for the directive privileges of membership by birth, which gu choice of the proper word, to express the particu- tion of this light, in all temporal as well as spirit- general, it not entire, satisfaction, because of lar idea present in the mind-a difficulty so great ual concerns; for if in any case we enter lightly explicit statement, that, while the children of me as searcely to be overcome, except by a long and into temporal affairs, without feeling this Spirit of bers are allowed to enjoy all the benefits of chur intimate acquaint ince with the language. An ex- truth to open our way therein, and, through the fellowship, they are not to be esteemed of the tr ample of the kind of mistake often made, is found love of this world, seek for gain by that business! Convinced parrassed condition of North Carolina Yearly portions of these latter set apart for the use of this great and everlasting truth, both by the teing, with the heavy debt of some 23,000 dols apon their bearving sebool."

The British Friend says, "The wearing of tation of that divine principle, which leads those who are faithful to its teachings, from all that would dishonour the name of God, either in word or deed, our ancient friends were conscientiously

at according to the proposed minute, such a Africa, found the advantage of being able to ap-latrous or superstitious original, contrary to the wer would be still possessed. Several speakers peal to the common names of the days of the divine command, the practice of good and holy were wound be suit possessed. Coveral speakers peak to the common names of the days of the driving command, the practice of good and boly added for its continuance, but a much larger week, as of heather origin, when remonstraing men in former ages, and repugnant to the christmeter were of opinion that it should terminate, with the colonists in their treatment of the abortitian testimony borne by our faithful friends and I eventually a modification of the minute was gines." Before giving the close of this discussion, predecessors in the truth, for the sake of which predecessors with a view to the latter it will perhaps enable our American readers more they patiently endured many revilings; let neither ult." The British Friend says, that those clearly to understand the matter, if we give the the reproach of singularity, nor the specious realends who wished Monthly Meetings still to have parts which those who advocated the proposed sonings of such as would evade the cross of Christ, turn you aside from the simplicity of the gospel; "And we think it may be useful and expedient, nor discourage you from keeping to the language n grave-yards, "ultimately gave way, and the "And we think it may be useful and expedient, nor discourage you from keeping to the language ragraph was further altered so that any Friend on the present occasion, to revive in your remem- of truth, in denominating the months and days brance some of the motives which induced our an-according to the plain and Scriptural way of excient friends to forbear the appellations of the pression: thereby following the example of our months and days, and to observe in their conver- worthy elders, and coming up in a noble and hon-

Having seen what was proposed to be omitted "The children of Israel, the people whom God we will return to the account given in the London the example set by the conference in condescension, we believe, to the feelings of highly valued Friends, who were not prepared to omit the subject altogether, from the new edition." The British Friend after stating that some were prepared to have dispensed with the first paragraph, adds. "Some of the arguments for abolishing the entire chapter were well replied to by Josiah Forsconference, that the first paragraph had been recommended to be retained out of condescension to

The paragraph, all that is retained of more than

"It is the advice of this meeting that all Friends keep to the simplicity of Truth and our ancient testimony, in calling the months and days by scripture names, not by heathen. 1697."

(To be continued.)

SUMMARY OF EVENTS. Affairs at Washington .- The extra session of Congress

commenced on the 4th inst., quorums being present in both houses. Thirty-nine Senators were in attendance. and one bundred and fifty-seven members of the House of Representatives answered to their names, including five from Virginia. Galusha A. Grow, of Pennsylvania, was elected Speaker of the House at the first ballot, and Etheridge, of Tennessee, was chosen Clerk. The President's message, which was laid before Congress on the 5th inst., is perhaps the most important paper of the kind ever sent to that body. The message begins with a reference to the situation of affairs at the period of the present administration coming into power, and the progress which the rebellion had already made in seizing forts, obtaining possession of public arms, withholding public money, and other unlawful acts, in furtherance of the design to destroy the Union. Though embarrassed by these acts, the President forbore to exercise any but peaceful means for the restoration of the authority of the laws, and announced there would be no conflict unless the States in rebellion were the aggressors The attack on fort Sumter, the preliminary history of the events which led to it, being related concisely in the message, commenced this aggression, and forced upon the government the necessity of taking up arms in its own defence. This issue the President regards as embracing the question whether a Constitutional Republic can maintain the integrity of its own territory against its domestic foes, and no choice was left but to call out the war power of the government for its own protection. This call has been responded to by all the free States, none of the States commonly called slave States, except Delaware, gave any troops to the defence of the Union, though a few regiments in some of them have been raised by individual enterprise. At first the government called for 75,000 men for three months, but the progress of the insurrection induced it to call for volunteers for three years, a measure the legality of which seems to be doubted; but induced by necessity, he expects Congress to ratify it, as nothing has been done beyond its Constitutional competency. The President instances some of the great benefits which the national Union has conferred upon the people of the United States, and asserts they have as strong motives now for preserving as they once had for establishing the government of the Union. He argues strongly against the doctrine of secession, and asks Congress for four hundred thousand men, and four hundred millions of dollars to enable the government and property belonging to citizeus of the non-slaveholdeffectually to crush the rebellion .- The reports of the Secretaries of the Treasury, of War, and of the Navy are important documents, but our limited space admits of only a brief reference to some of their statements. The Secretary of War estimates the expense of all the new regiments, regulars and volunteers at over \$185,-000,000 for the present year. The Secretary of the Navy says, \$30,690,000 will be required for that branch of the service, in addition to \$13,168,000 already ap- panied by a document from Washington, officially rebe required for the fiscal year ending Sixth month 30th, operation with the general government.

tion had been cut away; but the meeting followed 1862. The duties on imports for the last quarter of the fiscal year just closed, were only \$5,527,246. Some says that the people of Alabama, through their con improvement in the revenue from that source is, however, anticipated, and the Secretary thinks changes may be made advantageously in the present tariff, commends that a duty of 21 cents per pound be levied on brown sugar, 3 cents per pound on clayed sugar, and 4 cents a pound on refined sugar, of five cents a pound on coffee, of fifteen cents a pound on black tea, and and got safe out to sea. She was manned by eight twenty cents a pound on green tea. By means of these five men. One of the Georgia banks having deposite and other changes, he thinks, the revenue may be made ! a quantity of bullion in the United States mint at I'h ter, but with little apparent impression. At length, to reach \$57,000,000. He advises that about twenty ladelphia, and drawn for the value thereof, the U. on its being stated by the representatives of the millions should be obtained by direct taxation of real Secretary of the Treasury has ordered the superinter millions should be obtained by direct taxation of real Secretary of the Treasury has ordered the superinten and personal property, and a small excise duty on distilled liquors, tobacco, ale and beer, bank-notes, plea-sure carriages, &c. It is suggested that the treasury the conscientious scruples of a comparatively small may receive aid from the property of those engaged in number of dissentients, the meeting agreed to that recommendation."

The paragraph all that is retained of more than its distriction and the lower than the commendation of the whole or part of the estates of the offenders. 33 deg. The amount of rain for the month was 3.8 december of the ordinary exponests recommended, inches. a reduction of postal expenses, the abolition of the frankfive quarto pages on this subject, and only that kept in out of condescension to the conscientions and a general reduction of the salaries scruptes of a comparatively small number, runs done, it will however, in his opioion, be necessary to raise two hundred and forty millions of dollars by loan to meet the extraordinary demands of the present crisis. He recommends that subscriptions should be opened for a national loan of not less than \$100,000,000, to be issued in the form of treasury notes of \$50 to \$5000each, payable after three years, and bearing un interest government. of 7 3-10 per cent. An issue of seven per cent, bonds in large amounts payable in thirty years, is proposed, and also treasury notes of \$10 and \$20 each, payable one year after date, to an amount not exceeding in the aggregate \$50,000,000. The present funded debt of the United States is \$90.867,828; at the same period last year, it was \$64,769,703.

Army Movements .- General Patterson's corps. consisting of 16,000 men, entered Virginia on the 2d inst. They crossed the Potomac at Williamsport, and advanced to Martinsburg, meeting with but slight opposition from the rebels, a large body of whom were posted at Hainesville, eight miles from the crossing. On the approach of the federal troops, the rebels retreated in good order, and fell back on the main army, under Gen. Johnston, at Winchester. Reinforcements have been sent to this point from Manassas Junction, to enable Gen. Johnston to maintain his ground. There was a skirmish at Hainesville, in which about fifty men were killed and wounded on both sides.—The main body of the rebel forces, in dull and declining. Red wheat, 10s. 6d. a 12s.; whit Western Virginia, have been concentrated in Barbour 12s. a 13s. 6d. per 100 pounds. county, under the command of Gen. Wise. Beside nine thousand soldiers at the principal camp, there were also troops at Beverly, Huttonville and other points. The federal forces were chiefly at Philippi and Clarksburg, at no great distance from the Southern army .- On the 3d inst., Gen. Lyon, with newards of 3000 men, left Booneville to attack the rebels in South-western Missouri .- No important movement has occurred in the vicinity of Gen. Butler's command near Norfolk .- The rebels at Manassas Junction have encumbered all the roads and field routes between Fairfax Court-house and the Junction, with heavy fallen trees, to hinder the advance of the Northern troops.

Missouri .- The Secretary of Gov. Jackson has called a session of the Missouri legislature to meet at Sarcoxie, for the purpose of passing an ordinance of secession. The rebels of western Missouri were concentrating at that point. Great exasperation prevailed, and the re-bels had hung Dr. Wilson, Dr. Selman and other lead-ing friends of the Union. Gen. Lyon, who has shown much promptitude and vigour in keeping down the secessionists in Missouri, has been promoted to a Major-Generalship.

Tennessee .- The rebels have taken possession of Cumberland and Wheeling gaps, in order to prevent the federal troops from sending assistance to men of East Tennessee. By this movement all the mails to and from East Tennessee are cut off for the present. Arkansas .- The State convention which recently ad

journed, passed an ordinance confiscating money ing States. By this ordinance it is made the duty of all persons owing such debts to report them under oath to the auditor of public accounts. The military board has called out 10,000 men to repel invasion of the federal troops through Missouri.

Virginia .- The legislature of the re-organized State met on the 2d inst., at Wheeling. Gov. Pierpont's message which was sent to both houses, was accom-The Secretary of the Treasury says, that cognizing the new government as the legal government cless of a holy Redeemer, who had been his supperhandered and twenty millions of dollars will of Virginia. country are exhibited and prizes awarded. The The River Niger.—The committee have had

ng made for the cultivation of cotton upon an branch in the western district at Accra. An ar-3d, ready cleaned. The committee feel justified in the of 80,000 acres of land. A merchant has rangement has been made with the natives by the asserting that great progress has already been government for the payment of the poll-tax in cot- made along the entire west coast of Africa, in exton. The Agricultural Society at Acera, in contending and giving permanence to the cotton culjunction with a Lancashire firm, are purchasing ture and export of these extensive regions. this cotton at 2d, per lb., in the seed, and after-wards cleaning and packing it for shipment. Many southwest of Africa, possesses great natural adtons of cotton have been thus accumulated, and vaniages for a large export cotton trade. It is several shipments which have reached Liverpool under Portuguese government; but it has been have been sold at 7d. to 7dd, per lb. An agent found, from the import of twenty-six bales by a has been sent into the interior to advise the people firm who are members of this Association, who to extend their cultivation, and there is now no made a trial shipment, that at present the means doubt that, with the co-operation of the colonial of communication with this country are two infregovernment, an extensive export trade in cotton quent and costly to render it profitable. The Porwill spring up. The agent who was sent into the tuguese are, however, likely to import considerable Egypt .- A report is now in the press, and will juterior reported that in one district alone 70,000 supplies from this quarter into Lisbon for their own rily be published by the committee, giving the people were already engaged in growing, spinning consumption, and they are making efforts in this in progress and present extent of cotton cultimates and wearing cotton. The whole line of the west-direction. This will again relieve the Liverpool from the Egypt, with many valuable suggestions of the means by which the committee may produce the mean of them containing 100,000 inhabitants, in which Portuguese consumption. te an increase of growth in that fertile country, regular cotton marts are established, and from n its present annual average of 100,000 bales which unlimited supplies may be obtained. There the past year ordered a considerable supply of seed 1,000,000 of bales. Funds for this purpose are many millions of Africans whose labour may, for distribution among the Zulus under British rule;
be required, and the committee have every in this way, be actively employed in the service of and steps have been taken to arrange the payment fidence that their efforts in this quarter will be the cotton trade, and among whom manufactures of the hut tax in cotton. Numerous farmers have would find an inexhaustible market.

c two years since begun in Tunis have been rooms.—At all these places the committee are in a fair scale. A sample bale sent by him was sold ortunately checked; but the committee has communication with traders or missionaries who on his behalf by the committee, worth 9d. per lb. n assured that His Highness the Bey of Tunis have been furnished with cotton gins, seed or other In one of his letters he reports that he had already

ly impressed with the great advantages which the present African supplies are obtained; several are of opinion that Natal offers eminent advantae accrued to Egypt from cotton agriculture, he traders have here entered more largely into the ges as a cotton growing country, and they are denimated with a disposition to give the utmost trade, and a considerable amount of machinery for sirous of doing all in their power to aid in their our agement to its introduction among his own cleaning and packing cotton has been sent out dur-ling the past year. During the twelve months pre-ductiva.—In the Island of Madeira, and at tedding March, 1859, 1,800 bales were imported. Society have applied to the committee for cotton area, one of the Bjonga Islands, containing from the west coasts of Africa area with London and seed, which is now being sent out. They state that 100 inhabitants, cotton is being grown.

John Barclay.

The following memorandum is without date. "We are placed here on earth only for a season: like travellers at an inn, we are permitted to take shelter for a night in this frail habitation; it is a strange place, and has but temporary and middling accommodations; and all the comfort it affords, is far inferior to the abundance, which we expect will be dealt to us in our Father's mansion, our heavenly home. None of those numerous objects which we see around, rightly belong to us: they are not our property, strictly speaking; but are lent to us for the supply of our necessities, for our comfort, for the right enjoyment of them. have often wished that this view of life might occasionally occupy our minds. Let us consider what would be some of the consequences of taking such a view of life, as I have ventured to point out. Let us see what ought properly to follow, from the establishment of such a principle as this, that the earth we inhabit is not our rest, that we are but pilgrims and wanderers upon the face of it, that none of those things which our senses can perceive, are our own; but that we are only for a time permitted the use of them. How could we, with this principle in sight, abuse those innumerable blessings, which the great Giver of every good and perfect gift, has been pleased to bestow; how could we do otherwise than apply all those natural things, which are in mercy provided for us, to the pur-poses for which they were intended. Then, among many other good effects, there would be no servile and degrading obedience to custom and fashion; but such simplicity in our way of living, such denial of whatever is superfluons, expensive, useless, or productive of injury to the mind, as is now scarcely thought of or understood."

For "The Friend."

MUSINGS IN VIEW OF THE ATLANTIC OCEAN.

TO S. T.

The breakers' distant roar With soothing mellowed voice, Steals softly from the shore, And bids my soul rejoice.

Not with exulting thrills Of rapture, wildly bright, But the deep peace which fills With thankful calm delight.

Sea-birds with tuneless throats. Flash by on rapid wing, Whilst loud accordant notes For them the billows sing.

Mute are sweet warblings found, Where voice of surge is high, Yet, 'mid its power of sound, Is heard the sca-birds' cry.

They utter calls of joy, Whilst breasting breeze and wave, And loving voice employ When billows loudly rave,

No lengthened song to swell, Wild ocean notes above; But clear glad sounds to tell, Of active life and love.

So sound forth notes of faith, y hopeful christians given ; 'Mid woe, and want and death, Speaking full-voiced of heaven.

Oh, ocean! how I love To gaze upon thy face: Howe'er thy waters move, They speak of power and grace.

The notes thy waves impart, Which evermore they raise, Like love in ransomed heart, Breathe ceaseless peace and praise.

I watch each billow rise, To break and rise once more, Still onward till it dies In beauty on the shore.

They type life's fleeting day; My eyes are filled with tears, As loved ones past away Come back from parted years.

Children once by my side, A fair and precious band. Thrown wave-like from life's tide, To break on death's cold strand.

Though lapsed from loving sight, Not lost are they to me, I know them swelling bright, On Life's eternal sea.

I sorrow not for them. Safe gathered in their youth. White-robed, with diadem Of spotless grace and truth.

Now thoughts of parents come, Whose full day's work was done, When mercy led them home With crowns of victory on.

I saw their lives of love. Closed by sweet deaths of peace, And know their joy above, In life and love jucrease.

Thus thankful thoughts arise, E'en from the ocean wave, With soft, sweet memories, Of loved beyond the grave.

God in his works I trace. They power and wisdom prove, With the all-crowning grace, Supreme all-gathering love.

Billows! whose white caps raise, And break on yonder shore, Ye give me voice of praise, Ye bid me God adore.

Clap! clap your hands ye waves, Shout ye to God above; Let every wind that raves Proclaim his sovereign love.

Where'er the sea and earth. Is arched with starry skies, From all his works sent forth, Let Hallelujahs rise.

Had we but hearts to know, E'en to our senses dim, Would come in ceaseless flow, Thanksgiving's glory llymn.

A Combination against Tobacco .- An antitobacco organization is now forming throughout France, and the men that give tone to society there belong to it, such as physicians, lawyers, savans, state councillors, &c., all resolved to wage unceasing warfare on that enemy to the health and pocket of man. If these reformers curtail its consumption, the result will be felt in the public revenue of France, for the annual income from the government monopoly of tobacco amounts to nearly \$40,000,000.

David's pen never wrote more sweetly than managed, the weeds will quickly spring up, ov when dipped in the ink of affliction.

For "The Friend,

The Why-Butter was Hardened without Ice. In view of the almost absolute want of the pre-

tice of considering the reason why? that preva amongst many young persons,—and of the negle in too many instances, of teachers to instil a spi of inquiry into the minds of their pupils, it is ! much to be wondered at that the editor of "I Friend" should have doubted, as it appears he d the ability of many boarding-school girls to so. in a month the query, (about cooling butter.) must be acknowledged that the business and dut to which most young women are accustomed in t household at home, are not greatly calculated develop the powers of their minds; and this m serve as an excuse for the small show of philo phical reasoning to be observed in the sex, un direct education has brought it to light. That partment, therefore, of the duties of teachers h: ing in view the awakening of the dormant fac ties, and applying them to solutions of the ordin: phenomena of nature, cannot be too carefully a patiently studied. And in connexion I won suggest, as the product of much experience, that method of presenting directly to the view and servation of young persons many of the operation of business, such as the various arts, trades, mar factures, mining, &c., present, is an efficient me: of calling up inquiries, such as why? what fo &c. At the same time, such occasions afford vourable opportunity for the intelligent teacher challenge an investigation of the processes a principles involved in the art or business und observation; or it may be needful he should to a leading part in the investigation himself. Teaing should not be the art of explaining the boo so much as cultivating by observation and inqu a knowledge of the workings of nature's laws the outward visible world, and also in world mind.

Some of my pupils have offered the enclose solution of the butter question, which with the marks above, are submitted.

To the Editor of "The Friend."-Having ticed a question in thy last number, in regard which a doubt was expressed whether any of boarding-school girls could answer it in a month with great respect for the judgment of the editor. we venture to offer the following simple, exte porary solution, in which at least a dozen of fellow pupils concur.

If water is thrown over unglazed earthenwa it, being very porous, will imbibe a portion, wh evaporating, will carry off the heat from the within it, and its mouth being under water, outer air is excluded, and as the water evapora from the pores it steals away the heat from confined air, and then from the butter, which gre hard in consequence.

West Grove B. S., Seventh mo. 8th, 1861.

A Telegraphic Feat.—The President's mess: to Congress at the opening of the extra sessi which was handed in at the Washington off of the American Telegraph Company at 2 o'cle and twenty minutes P. M., was transmitted telegraph, and the whole, amounting to sixty-th hundred words, placed in the hands of the age of the Associated Press at New York, Philadelp and Baltimore, at 3 30 P. M., thus consuming hour and ten minutes in its transmission. This the greatest feat of telegraphing on record.

Wealth is a rank soil, in which, unless careful top the plants and choke the grain.

The first was in reference to the documents in the Yearly Meeting. The recom-

adopted in the paragraph on elders and overseers." "Two recommendations were proposed and adopted in regard to the membership of young persons. By the first, Monthly Meetings are empowered, in case of parents ceasing to be members, and there appearing no probability that the children will be brought up as Friends, to discontinue the latter as members at any time before they are fourteen years of age. By the second, it is in effect provided that where both parents were members at the time of their marriage, and the children are likely to be brought up as Friends, the latter shall be accounted members."

(To be continued.)

SUMMARY OF EVENTS.

Congress .- A bill has been passed to enforce the collection of the revenue at the Southern ports; it is substantially the bill of 1832, with some additional pro-A bill authorizing the Secretary of the Treasury to borrow \$250,000,000, passed the Honse of Representatives, by a vote of 149 to 5. He is authorized to issue certificates of stock, and treasury notes in various forms and denominations, both with and without interest. The Senate, by a vote of 32 to 10, has expelled all the Senators from the seceded States, whose terms had not already expired. It has also, by a vote of the train of next day.

35 to 5, admitted W. B. Wiley and J. S. Carlile as Senators from Virginia, in place of Mason and Hunter, to afors from Vigilia, in pace of ansatu and the state of the results of the resource of short date, the three of the re-organized State. A bill has also passed whole amount was taken in New York, at par and within authorizing the President to accept the services of such number of volunteers, not exceeding 500,000, as he may deem necessary for the suppression of insurrection, and protecting the public property. The volunteers are to serve three years if required. The House of Represenserve three years if required. The Honse of Representatives has passed a bill, making appropriations for the tions on the 15th inst. New York—White wheat, \$1.13 army and navy, amounting in the aggregate to \$191,-000,000. A bill to define and punish coospiracy against the U. S. government, also passed the House with only seven negative votes. A resolution pledging Congress to vote any amount of money, and any number of men, which may be necessary to insure the effectual suppres-sion of the present rebellion, and the permanent restoration of the federal authority everywhere within the limits and jurisdiction of the United States, passed the House, by nearly a unanimons vote.

Army Movements .- The federal forces in western Virginia have thus far kept the rebels effectually in check.

An engagement took place on the 11th inst., at Rich's severely, a large number of them being killed and wounded. A body of 600 of the rebel troops subsequently surrendered themselves prisoners. Gen. M'Clelquently sufrendered themselves prisoners. Gen. McGel-lan had taken in all nearly 1000 prisoners. On the part of the federal troops, 11 were killed, and 35 wounded. The rebel army, nnder Gen. Garnet, immediately after the battle, retreated eastward, being closely followed by a column of the federal forces. The Southern army was overtaken about eight miles from St. George, in Tucker county, and again defeated, Gen. Garnet being among the killed .- A severe engagement took place near Carthage, Missouri, between a part of Gen. Lyon's troops and a large body of the rebels, in which the latter lost several hundred men; that of the U.S. troops is stated at 57 in killed, wounded and missing. The secessonists were in arms in various parts of Missouri, and collisions with the Union forces attended with bloodshed, were of frequent occurrence.-The secession army, under Gen Johnston, at the last accounts, remained near Winchester, Va.; it had been increased, as was supposed, to over 30,000 men. Gen. Patterson's army remained at Martinsburg; it had been reinforced, and numbered about 25,000 men. More Northern troops had arrived at Washington, and a number of additional regiments had crossed into Virginia. Nothing of moment had transpired in the neighbourhood of Norfolk. The incidents of a state of civil war are sufficiently painful, even the convention relative to the straits of the Dardanelles. as thus slightly sketched, but it should not escape our notice as a remarkable fact, that the ravages attending perial household. Five hundred servants were dismissed, it, have, so far, been very small indeed, compared with

the warlike preparations on both sides.

New York.—Mortality last week, 565. Of these, 166
were adults, and 399 children. The New York backs

Southern Privateers .- The privateer "Jeff. Davis." formerly the slaver Echo, has recently captured five Northern vessels, and the Sumter of New Orleans, which lately eluded the blockade of that port, and got to sea, has taken, in a short cruise, no less than eight vessels. seven of which were run into the port of Cienfuegos, and one, a large ship, was burned off the Isle of Pices after being plundered. These last captures make a total of forty-one vessels, which so far are known to have fallen into the hands of the rebels. Commodore Stringham has issued a letter of justructions to shipmasters, which advises such as are coming from the West Indies and the Gulf of Mexico to keep on the onter edge of the gulf-stream, believing they would run much less risk of capture. The U.S. Secretary of State has made a reclamation on the Spanish government for the surrender of the vessels carried into Cienfuegos by the pirate Sumter, and no doubt is entertained of their release with their cargoes, and of the probibition of the entrance of the Confederate privateers into Spanish ports hereafter.

Southern Post Routes .- It appears from calculations at the Post-office department, that the yearly income from postage in the seceded States amounted to only \$900,-000, while the expenses exceeded this sum about \$3,-000,000, all of which is now saved to the United States.

Tobacco and Cotton.—The staples of the South, says a late number of the Indianapolis Sentinel, are arriving in quantities at this point daily, ordered for Eastern shipment. On a single day one hundred and six car loads were despatched, leaving seventy loaded cars for

Government Loans .- The Secretary of the Treasury having last week applied for a loan of five millions of forty minutes after the books were opened. The loan was taken by about forty subscribers, principally by the

large banks The Markets.-The grain markets in our seaports have a \$1.18; red Western, \$1.04 a \$1.10; spring wheat, 70 cts. a 85 cts.; oats, 29 cts. a 31½ cts.; mixed corn, 41 cts. a 44 cts.; white round, 47 cts. a 50 cts. Philadelphia-White wheat, \$1.18 a \$1.25; Pennsylvania red, \$1.10 a \$1.13; prime corn, 53 cts.; mixed, 48 cts. a 49 cts.; oats, 28 cts.

Tennessee .- The legislature refused to take any action upon the memorial of East Tennessee, in favour of a separation from the rest of the State. Troops have been sent from the western part of Tennessee to prevent further movements of the Union party in the east.

The Blockading Fleet is said to consist of 37 regular

men of war and 39 steam gun-boats, with a total armamountain near Beverly, in which the rebels suffered ment of 720 gnns and 10,113 men. The extent of coast, and the number of ports, to be watched, is however so great, that it is impossible wholly to prevent the entrance and departure of vessels.

FOREIGN .- Dates from England to the 3d iost. great fire at London had not been extinguished.

The Liverpool cotton market was active, with a small advance in rates. The Manchester advices were favourable. Breadstuffs

steady, with a fair demand. In wheat, a slight advance in best qualities. Consols, 894 a 892. The London money market was active. The French barvest would be completed by the mid-

dle of the month. Letters from Algeria say, that the grain crops have been totally destroyed in some districts. Thirty-five glass furnaces at Charleroi had been stopped, in consequence of the cessation of orders from the United States

It had been definitely resolved at a cabinet council at Vienna not to accept the Hnngarian address. royal rescript had been sent to the Ilungarian Diet, in which the address is stigmatized as disloyal and hostile to the rights of the crown. The Diet was requested to alter the form and contents of the address, and will be dissolved if it refuses. An English frigate had anchored at Constantinople,

after obtaining from the Porte the firman required by The Sultan had introduced great reforms in the imand the civil list greatly reduced.

RECEIPTS.

uout about \$45,000,000 in specie.

FRIENDS' SELECT SCHOOLS

These Seminaries will, it is expected, be re-opene after the summer vacation, on or near the 1st of Nia month next, the Boys' school being situated on Cher street, west of Eighth, and the Girls' school on Seven street, between Cherry and Race streets.

The Course of Instruction now adopted in the Boy school, embraces, besides the ordinary branches, a sele tion of more advanced mathematical, scientific as classical studies, on the satisfactory completion of whi the pupil will be entitled to a diploma, or certificate scholarship.

During the winter months, lectures on scientific su apparatus and experiments.

The Course of Study at the Girls' school embraces. addition to the elementary branches-Algebra, Geom try, History, Natural Philosophy, Chemistry, Astronom Physiology, Natural History, Botany, Physical Gegraphy, Mental Philosophy, Etymology, Rhetoric, at Composition. Instruction is also given in Trigonom

try, Mensuration, and the French and Latin language As the proper classification of the scholars, early the session, is important, it is desirable that those wi intend to enter pupils for the coming term; should do as early in the session as possible. Application may l made on the opening of the schools, to JOSEPH W. AL RICH, the Principal of the Boys' school, and to MARGARI LIGHTFOOT, the Principal of the Girls' school.

With the present arrangements, it is believed th these schools offer unusual advantages to Friends, f the liberal education of their children, and at a very m derate cost. Their attention is also invited to the purpose the purpose of the Northern and Western District where provision is made for the careful elementary i struction of children too young to enter the princip schools. On behalf of the Committee, JOHN CARTER, Clerk.

16th.—She expressed the desire she felt

are pretty good, and through favour, my mind them and her alone. After attending to a l matter in the writing line, which had been on those about her. Her wonted placid cheerand instructive conversation. Notwithstanding was generally favoured in so remarkable a ner, with peace of mind and holy confidence, she had seasons of close proving; remarked at time, "I have felt tried and proved this mornhad to remember a remark of a dear friend, e deceased, "that the enemy is permitted to ue us to the very threshold of eternity,' was, however, soon favoured to centre down in ble quietness and calm dependence.

th mo. 12th .- Had a suffering time from a re stitch in her side, on which occasion she reked, "do not be too anxious," my case is in hands, "I do not feel uneasy." Daily she aed endeavouring to prepare those about her quiet might be observed, and that things

bt be done decently and in order.

0th .- On being fixed for the night she said, ne thing more I want," being queried with ti twas, replied, "An evidence that allis right."

1st.—She said, "There was a passage of scrip,
unexpectedly brought to my remembrance morning, which I hardly knew how to apply. was feeling desirous ability might be afforded ook into my own state," when this was presented, came not to call the righteous but sinners to entance." It was observed to her, she might comfort in it, "Oh, (she replied,) I never ld class myself with the righteous.'

th mo. 11th .- She said to a relation who was us, "Is it not the practice of Friends in the to bow their shutters after the decease of a nd," being told it was, continued, "If you could easy to omit in this case, I should be glad." had previously spoken on this subject, and she "believed there was great inconsistency

Friends doing so."

1th .- After passing a trying night, she remarked the morning with great sweetness, "Through goodness and mercy of a kind Providence, I a little better." Had a call this day from ee of her beloved friends, members of her meet-; after they left the room she observed "how I they looked" adding "but I would not exange situations with them, and have again to

atend with the conflicts of time."

12th .- This morning after the doctor had gone of the room, she said, "doctor sees he cannot anything more for me." Shortly after, on ofing her her usual medicine, she calmly but earstly remarked, "These things will not keep me re," "you must let me go." Toward evening fering from pain of body, she earnestly desired t her understanding might not fail her, and ortly after put up a short but fervent petition to throne of grace "that a little relief might be ich she observed, "I shall not be here long." great tenderness she then bade some present ewell; after which she was very quiet, her rk appearing to be done, she gently breathed orter and shorter, until her purified spirit derted. Those who were left had the consoling lief that her robes were washed and made white, d she prepared to join the just, in ascribing glory d honour, thanksgiving and praise to Him who teth on the Throne, and the Lamb forever."

If a forbearing temper should be maintained ofessors of religion towards each other.

onth, 1848.

From Hunt's Magazine. The Future Supply of Cotton. (Continued from page 364.)

THE WEST INDIES' AND AMERICA.

Cuba .- At Hayana, an Anglo-Spanish Cotton Company, capital four million dollars, has been established for the extension of cotton cultivation in

Jamaica.-The British Cotton Company are steadily pursuing their initial experiment, and, as we are informed, with the most gratifying results both as to the quality of cotton which has been raised, and as to benefit to the shareholders. is thought that ere long this company will receive that support in Lancashire that will enable it extensively to widen its basis of operations. As the first company started in this country it deserves the he time of trial, expressing the desire she felt special attention and encouragement of the trade.

Tobago .- Barbadoes .- Several land-owners in these islands have planted areas of a few acres

British Honduras and Guatemala,-Experiments are being made in both these countries to introduce the cultivation among the people.

Peru .- In the north of Peru the proprietor of an extensive estate has let out portions of land to four cotton-growing companies, three of which are raising 200,000 plants each, and one 100,000 Governor-General of New South Wales, and also plants, in all 700,000. The estate is capable of to Sir George Bowen, the Governor of Queensgrowing at least 14,000,000 cotton plants. large number of small farmers in the same district are also stated to be growing cotton on portions of their farms to a greater or less extent. Two landed proprietors, also in the province of Chiclago, have began to grow cotton; one of whom has recently visited this country to purchase machinery for a cotton plantation in Peru, and he has engaged a shipload of two hundred and fifty Spanish emigrants, who have set sail for that country, where they will be solely employed in the raising of cotton and its preparation for export. He has constructed and its preparation for export. In as considered a canal, thirty-nine miles in length, to convey water from the Andes to his estate, for the purpose of irrigating his lands. This canal was begun about three years ago, without any idea of cotton cultivation. The operations of the Association having come to his knowledge, and finding that the soil is splendidly adapted for cotton planting, they are going into the cultivation with good earn-

Venezuela,-New-Granada,-The committee have furnished machinery and cotton seed to be employed at Maracaibo, Baranquilla and Sabinilla, where effort is being made to promote the growth and export of cotton, with fair prospect of success.

British Guiana,-In Demerara a missionary of the Church of England has recently been supplied with cotton seed, which he will distribute among the resident farmers. He purposes making orded," which was mercifully the case, after a tour and lecturing in different towns and villages on the advantage of cotton cultivation.

EAST INDIES, AUSTRALIA, CEYLON, &c.

Batavia .- A member of the committee has received information that an extensive proprietor in Batavia has a large extent of land under cultivation. From New-Orleans seed he has raised a crop There are ten to twenty millions of acres of land of 272,000 lbs. of cotton, and from Palembang suited to the growth of cotton in that part of Ausseed nearly 1,000,000 lbs. Arrangements have been made by this proprietor with the laborers on Her remains were interred in Friend's burial his estate to continue the cultivation for five years. ound at Plymouth, on Second day the 15th of 5th The land is well suited to the plant, and as the which has a depth of soil of twenty feet, will grow natives find the cultivation profitable, they have 600 lbs. of clean cotton to the acre. Should this planted largely.

through the Foreign Office five descriptions of indigenous cotton which are reported by Consul PRITCHARD to grow wild in these islands. The plant yields without intermission for ten, twelve or tifteen years. The values of the several samples are 7d., 7 d., 8d., 9d., 11d., 1s. and 1s. 0 d., per lb. About 80 to 100 of these islands are juhabited, the total population being 200,000, 50,000 of whom have been converted to Christianity. One-half the area of one of these islands would grow three to four millions of bales of cotton. In view of these facts. and being informed that an offer had been made by the native king and chiefs of the cession of these islands to the British Crown, the committee felt it to be their duty to represent to Her Majesty's government the suitability of the native Feejee cotton to the wants of the trade. The question of annexation was one into which it was not in the province of the committee to enter. It was never-theless their obvious duty in the interest of the cotton trade, and in view of a faithful discharge of their duty as your executive, to see that a just representation should be made of the utility of such an addition to our sources of supply. From no single quarter of the world has such a collection of graduated qualities been received.

Australia .-- To Sir WILLIAM DENISON, the Governor-General of New South Wales, and also land, the best thanks of this Association are due for the zealous and active interest they have taken in furtherance of the objects of this Association. A considerable quantity of cotton seed, with cotton gins, have been forwarded to Sir WILLIAM DENIson, at Sydney, who has taken steps for the distribution of the seed among the farmers. More than fifty settlers have been supplied with seed, and one gentleman of large property has disposed of a quantity of seed among the tenants on his estates, to whom, aided by the women and children of their families, it is expected the cultivation will be profitable. Several bales of Sea Island cotton have been received from Australia by the committee during the past year, which have sold from 1s. 8d. to 2s. per lb. One settler at Port Curtis, writing to an Australian paper, says: "I think I shall have this year cotton enough to plant 1,000 to 1,500 acres." A sample of his cotton has been

valued in Manchester at 3s. per lb.

Accompanying a copy of a despatch just received from Sir GEORGE BOWEN, on the subject of cotton cultivation, the committee have received a copy of a prospectus of a company now formed for the growth of cotton in Queensland. This company will commence operations upon one hun-

dred acres of land.

A landed proprietor from Australia is now in this country endeavoring to form a company to commence with the cultivation of 1,000 acres of land. He is prepared to place 1,000 acres of his own estates at the disposal of such a company, and to become a large shareholder in the undertaking. He has already sufficient labor upon his land for the cultivation of 1,000 acres, together with suitable buildings and steam power. The rent he proposes to take out of the profits of the company. tralia where he proposes to commence operations. He has already grown both Sea Island and New-Orleans cotton upon his estates; and the land, scheme prove successful, and only one third of our Java. Cotton seed has been supplied by the emigration be annually diverted to the Australian wards the irreligious, how much more by the committee for planting on an estate in this island, cotton fields, England would soon be placed in Feejee Islands .- The committee have received safety as to her sources of supply of cotton. The

H. Bonar.

THERE BE THOSE. There be those who sow beside The waters that in silence glide, Trusting no echo will declare Whose footsteps ever wandered there.

The noiseless footsteps pass away, The stream flows on as yesterday; Nor can it for a time be seen A benefactor there had been

Yet think not that the seed is dead, Which in the lonely place is spread; It lives, it lives-the spring is nigh, And soon its life shall testify.

That silent stream, that desert ground, No more unlovely shall be found; But scattered flowers of simplest grace Shall spread their beauty round the place.

And soon or late a time will come When witnesses, that now are dumb, With grateful eloquence shall tell From whom the seed, there scattered, fell.

Bernard Barton. For "The Friend."

Meicerelegy. (Continued from page 366,

"The greatest heat and the greatest cold which have ever been experienced by man, though not at the same place, are also worthy of being mentioned. By guarding the heat, received from the vertical rays of the sun, as when a thermometer is placed inside of a blackened box, covered with glass, and surrounded by sand, the mercury in it sometimes rises so as to indicate 240°. Such an experiment was made by Sir John Herschel, while at the Cape of Good Hope in 1837. He remarks: 'As these temperatures far surpass that of boiling water, some amusing experiments were made by exposing eggs, fruit, meat, &c., in the same manner, all of which, after a moderate length of exposure, were found perfectly cooked,-the eggs being rendered hard and powdery to the centre; and on one occasion a very respectable stew of meat and vegetables was prepared, and eaten with no small relish by the entertained by-standers.' Capt. James C. Ross cooked eggs in New Zealand by putting them in holes dug in the ground.' Captain Sturt in the description of his experiences in Australia, says: 'The thermometer, in the shade of a tree, rose to 127°, after which the bulb burst from the expansion. The ground was almost a molten surface with the heat, and if a match accidentally fell upon it, it was immediately ignited.' Griffith's has observed the thermometer in the desert, near the Euphrates, rise to 132° Fahr. in the shade, and to 156° in the sun. On the other hand, Capt. Back observed the thermometer at Port Reliance, January 17th, 1834, as low as -70°. Gmelin the elder recorded the temperature in Siberia, at the foot of Kiringa, in December, 1838, at -120°. Capt. Lyon observed one singular effect of these extremes of temperature. He says: 'There were two or three others, equally insensible to the cold as myself; but the change of climate had an effect on me, which, I believe, was not experienced by the rest, and which was, that the hair from my head regularly moulted, if I may be excused the expression, and was renewed two or three times; even in the summer following, and this second winter, the process still continued, although in a slighter degree.' He describes the degree of cold thus: 'Our stovefunnels collected a quantity of ice within them, notwithstanding fires kept up night and day, so that it was frequently requisite to take them down, in order to break and melt out the ice, as it collected in the same form as the pulp of a cocoanut lies within the shell.' Erman lost the skin of his finger by touching the screw of an instrument. The sailors in Arctic expeditions, where the mercury is frozen for weeks, amuse themselves by firiog mercurial bullets."

HAS THE CLIMATE OF THE EARTH OR OF ANY PART OF IT CHANGED?

"The question is often asked, whether from any cause, local or cosmical the climate of the same place has undergone, or is likely to undergo, material changes with the lapse of time. We may look at this question, first, under the light of facts, and then under the light of theory. Individual experience is not adequate to settle the inquiry, because the cycle of the weather is too large to be embraced by the longest life of man, much less to repeat itself within the memory of the same person. Extraordinary degrees of heat or cold, extraordinary storms, or any other extraordinary phase of the climate, occur at long intervals, and produce a deep impression on the observer, especially in carly life. If the same thing does not occur again for a century, it is natural to conclude that nature has degenerated, without remembering that such events

of the whole earth has undergone, within historical prehensive, yet what innocent boldness in his re-times, a gradual amelioration. It has been thought ply, "I am a Christian, and cannot fight." that in America the climate has grown milder,

A few other Friends thought it was under by deem them worthy, (for the faithful cannot elders, appeared equally desirable. Accordingly, sirable that important works on christian doctrine n them,) then it sometimes happens that these on being informed that the question was now before and practice should be published, without Friends into birst out into open variance with the body; the meeting, the measure was advocated at con-being able to say that such works had the saction of the society. There, was, however, a much ose eyes the Lord opens to see and discern the clearness, by John T. Grace. He asked the at-lose of the society of controlled the saction of the meeting to the mode of appointment of the society of controlled the transfer of the conference of the confer one, if he is ever favoured to see the error of for the station of elder, which, being for life, did ence committee. One Friend was especially strong way, and to turn from it, will have to acknow- not, he considered, operate to promote the best in- in his condemnation of a system which Friends

Friends" have already been, and probably will vineyard, where he "hath need of us." Then, as service as elders at one period of life, were less nue to be pressed to aid in the military pre- we able in Him, from whom we derive one eligible or altogether disqualified at another; intions which are going on around them, and in strength and vigour, we shall bring forth much stancing the entanglement of the world, and the h they cannot consistently take part directly fruit, not only to his praise and our own peace, absorption of mind in business pursuits, as well as directly; but should we, in time of weakness but to the edification of the church and to the personal reasons of advancing age, and mental or bodily infirmity, which might occur.

"The tendency, too, of the present system to raise up and perpetuate an order amongst us, was, he considered, objectionable, and calculated to discourage the services of these serious and judicious Friends not under appointment, to whom the Yearly Meeting had just adopted advice on the care and

admonition of ministers.

"Whilst disclaiming any intentions to reflect on the services of the present elders, whose faithful labours he highly appreciated, he entreated these and other Friends seriously to ponder this question in its various aspects; and expressed the opinion that the periodical revision would strengthen the hand of the elders, by assuring them, from time to time, of the continued unity of their friends, by securing to the church a greater variety of gift, and by deepening the authority and place which their services ought to have with all those in the ministry.

"His arguments appeared to meet with a favourable reception. The question, however, appearing to have a variety of bearings, and the time of the meeting being much pre-engaged, the discussion

was postponed for the present.

"The proposal of the conference with respect to the chapter entitled, 'the Morning Meeting,' occupied the attention of the chief part of the sitting. This proposal was to abrogate that meeting entirely, and to provide for part of the functions which it had heretofore exercised, in another way. This was followed by a minute from the Yearly Meeting of Ministers and Elders, introducing a proposition submitted to that body by the Morning Meeting, to the effect that, instead of coming together monthly, it should be quarterly, viz: in the Second, Fifth, Eighth, and Eleventh months; also, of ministers and elders within the compass of Lon-don and Middlesex Quarterly Meeting, those Friends in the same stations resident within the six adjacent Quarterly Meetings, should be added to

strongly on the evils which he had long deplored, springing from the bierarchical element in our So-dange was, however, made under the last of them, sovereign States. Others, he says, would have unit eity. He rejoiced that the recent course of our legislation had tended to weaken that element, and principles of Truth." After some remarks on the proportionately to restore to the structure of our proportionately to restore to the structure of our speciety its beautiful simplicity, by clearing away [Comparison of the continued]. (To be continued.) which had gathered about it. He strongly disapproved of obliging a minister who had already the consent and unity of his Monthly and Quarterly Meetings, to obtain that of a select and unrepresentative body, whether it were the Morning Meeting, or that proposed by the conference.* He thought with E. Smith, (who had given his own opinion when explaining the subject,) that the Meeting for Sufferings would be the proper body encountered, and one of the advancing columns was reto determine on the religious concerns in ques-

Fifth-day afternoon .- The British Friend says, "After the reading again of the propositions from the conference, and from the Morning Meeting, the first Friend who spoke, said that the proposition of the Morning Meeting should be adopted. Another followed at some length, recommending another course, which he thought more constitutional, and that was to confide the matter to which the proposition of the conference referred-viz., the granting of certificates to ministers going abroad, to the Meeting for Sufferings. The view which a Friend in the forenoon took of the Morning Meeting as being a 'hierarchy,' found no favour at this sitting from any one who spoke on the subject; indeed, quite a number of Friends were satisfied that there was no ground whatever for the imputation. So far from the members of that meeting considering themselves as lords over God's heritage, it was rather the fault, or weakness, of those to whom they ministered, to look too much up to them, and business on hand to the Meeting for Sufferings, was favourably received by a few Friends, but the proposal of the Morning Meeting, as already described, met with a greatly larger share of approbation, and was agreed to. Some were of the judgment that it was to the Yearly Meeting itself for the threefold sanction deemed necessary, rather than to the Yearly Meeting of Ministers and the less in Virginia has been greatly under-rated, and that ing this opinion were, of course, prepared to refer their main army is not only under able command, but the granting of certificates to the Meeting for Suf. It seems for the granting of certificates to the Meeting for Suf. It is very formidable in numbers, and especially strong in ferings when the Yearly Meeting is not in session, gavalry and artillery. Gen. Scott, it is stated, had missing a broad and a state of the recent advance into Virginia was oron religious service, now stands thus; beside a certificate from their Monthly and Quarterly Meet.

Congress.—The Committee of Ware and Meet to Congress.**—The Congress and Meet to Congress.**—The Congress and Meet to Congress ings, they are to have the concurrence of the Yearly Meeting of Ministers and Elders, if it can conveniently be obtained; otherwise the Morning Meeting, as it will now assemble only quarterly, is to be convened at the instance of any three members, and consisting of its enlarged constituency-viz.,

of manuscripts. With the exception of W. Brown the ministers and elders of London and Middlesex lag for the confiscation of the property of rebels for and G. Dawson, and J. F. Forster, (who had, how Quarterly Meeting, and of the six adjacent course over, no strong feeling on the question,) the expression of opinion was clearly in favour of doing away. The proposition from the Morning Meeting, with forfeited to his master.

Binns spoke then agreed too of little moment, and the London message of Jefferson Davis congratulates the Congress. strongly on the evils which he had long deplored, Friend states, "A small but not unimportant

SUMMARY OF EVENTS.

The First Great Battle, between the Federal forces and those of the "Confederate States," took place on Firstday, the 21st instant, near Manassas Junction. The troops, under the command of Gen. M'Dowell, to the eet number of about 50,000, had been advanced in that He direction during several of the preceding days, meeting without no serious opposition until they arrived at a small stream called Bull's Run, about five miles from the Junction. Here formidable masked batteries were pulsed on the 18th inst., with a loss of perhaps 150 men. On the morning of the 21st, an attempt was made to carry the batteries, and drive the rebels back toward Manassas Junction. A terrible conflict ensued attended with tearful slaughter on both sides, but resulting finally in the complete defeat of the Federal army, which was compelled to retreat towards Washington. It is said that only 25,000 of the federal troops were actually engaged in the battle, and of these not more than 15,000 at any one time. The contest, which continued during most of the day, was decided towards evening; proba-bly, by the arrival on the ground of a large body of fresh rebel troops, threatening the flank and rear of the assailants. Portions of the army were seized with sud-den panic, and commenced a disorderly retreat, which soon became general, thousands of the men throwing away their arms in the baste to escape. The field covered with dead and wounded men, was abandoned to the rebels, together with many pieces of artillery, baggage wagons and supplies of various kinds. At the time of making up this summary on the 23d inst, the loss sustained by the Federal army, was not known with any certainty. It was vaguely reported at 3000 in kill-ed, wounded and missing.

Army Movements .- Gen. Johnson commenced moving toward Manassas Junction on the 18th inst., with 30,thus to constitute them, in some degree, a superior the Federal forces. Gen. Patterson's army which was and separate order. The suggestion to transfer the intended to hold Johnson's force in check, entirely failed in its object. Gen. Patterson has been relieved from his command, and Gen. Banks, of Massachusetts, has been appointed to succeed him. Gen. M'Clellan has been appointed to succeed him. Gen. at delta has been summoned to Washington to take command of the army on the Potomac. Gen. Rosencranz takes his place in Western Virginia. After the disastrous events of the 21st, the Federal forces returned to the entrenched posithat ministers going on foreign service should come tions which they occupied previous to their advance. Many additional regiments have been ordered to Washington, and no serious fears were felt for its safety.

prepared a bill providing for a direct tax and internal duties. The bill imposes a tax of \$30,000,000 on real estate and slaves distributed through the States and territories, the proportion of New York being \$3,905.878. The bill also proposes a tax on spirituous liquors of ten cents a gallon, and on fermented and malt liquors five the school. Apply to cents a gallon. Luke saith, Most Excellent Theophilus; and dosius and Valentinianus, where he useth these So hath the pride of men placed God and the begforms of speaking, Vestra Æternitas, Your Eter- gar in the same category. I think I need not use nity; Vestrum Numen, Your Godhead; Vestra arguments to prove to such as know congruous lan-Scientias, Your Serenity; Vestra Clementia, Your grage, that we ought to use the singular number Clemency. So that the word [You] in the plural speaking to one; which is the common dialect of number, together with the other titles and compellations of honour, seem to have taken their rise do translate it. Seeing therefore it is manifest to from monarchical governments; which afterwards, lus, that this form of speaking to men in the plural by degrees, came to be derived to private persons, number doth proceed from pride, as well as that it. The same is witnessed by John Maresius, of the is in itself a lie, we found a necessity upon us to French academy, in the preface of his Clovis: Let testify against this corruption, by using the singunone wonder, saith he, that the word [Thou] is used lar equally unto all. And although no reason can in this work to Princes and Princesses; for we use be given why we should be persecuted upon this acnot a testimony of humility to give those honours, in this work to Frinces and Frincesses, in we used occur, especially by Christians, who profess to follow, which are only due to the One Lord, Master, and to Alexanders, Casars, Queens, and Empresses. low the rule of scripture, whose dialect this is; yet

it would perhaps seem incredible if I should relate how much we have suffered for this thing, and how these proud ones have fumed, fretted, gnashed their teeth, frequently beating and striking us, when we have spoken to them thus in the singular number: whereby we are the more confirmed in our judgment, as seeing that this testimony of truth, which God hath given us to bear in all things, doth so vex the serpentine nature in the children of dark- surely is it the allotment of man, that it is recorded,

§ VI. Secondly, Next unto this of titles, the other part of honour used among Christians is the kneeling, bowing, and uncovering of the head to one another. I know nothing our adversaries have to plead for them in this matter, save some few in- by telling them "they have seen trouble." stances of the Old Testament, and the custom of the country.

self to the children of Heth, and Lot to the two

angels, &c.

But the practice of these patriarchs, related as matter of fact, are not to be a rule to Christians pline of trouble is a good discipline; for the ill cerns the promised land. "That Promised La now: neither are we to imitate them in every practice, which has not a particular reproof added to it : for we find not Abraham reproved for taking Hagar, &c. And indeed to say all things were lawful for us which they practised, would produce great inconveniencies obvious enough to all. And as to the customs of the nations, it is a very ill argument for a Christian's practice; we should have a better rule to walk by than the custom of the Gentiles; the apostles desire us not to be conformed to this world, &c. We see how little they have to say for themselves in this stokes who stand off in prosperity—who live without them as the chastening of the Father. Such is matter. Let it be observed then, whether our Him in ease, when humbled by trial, should find wrong doing of the near and dear, the wicked reasons for laying aside these things be not con-Him near unto their call; yet in his infinite, incom- of evil men, the falsity of friends, the frailty reasons for laying aside these things be not considerable and weighty enough to uphold us in so

man, and he to whom he oweth the dedication both of soul and body, is over all to be worshipped and adored, and that not only by the spirit, but also with the prostration of the body. Now kneeling, believer, to look toward the peace and rest of into the most tangled intricacies of life, and it is bowing, and uncovering of the head, is the alone heaven, instead of dwelling, as our nature is prone sun of Faith. If we humbly trust "our Fath outward signification of our adoration towards to do, on the corroding tribulations of the earth. God, and therefore it is not lawful to give it unto man. He that kneeleth or prostrates himself to man, what doth he more to God? He that boweth, fully blessed, can scarcely think, may turn to Him may be, we may be sure it is just what we me and uncovereth his head to the creature, what hath who is riches in poverty, feeling by that faith which and being so, however, bitter its lessons, they he reserved to the Creator? Now the apostle is the beginning and the fulfilment of all knowledge, be sweet to us, however others may err, in His cr shows us, that the uncovering of the head is that shows us, that the uncovering of the head is that shows us, that the uncovering of us in our worshipping of too, that their very poverty makes them peculiarly formed into good to us.

conclude by giving Commander Forbes' opinion on the subject, at the same time expressing our obligations to him for his lively and interesting work. It is sketchy in character, and scarcely fulfils the expectations which its title and appearance excite. Nor is the language at all eminent for its polish; but taking it as a sailor's narrative, purposely written with a free-and-easy pen, the reader will find much in its pages to entertain and instruct.

"The manifest advantages of a North Atlantic telegraph would be, that four electrical circuits would be obtained, none of greater length than six hundred miles; and as submarine telegraphs now working at greater lengths demonstrate the possibility of complete insulation and retardation up to that distance, whereas, when we get beyond the thousand miles, all is doubt and conjecture, to say nothing of the hazard attendant on the enterprise. dred miles; and in winter it may be requisite and the advantage of having to relay a portion inopen a road, and pioneer for the doctor with stead of the whole length of the line, in the event wels and pick-axes. If a man wishes to attend of a fracture, the superiority of this route cannot the worship, he may have to ride many niles to fail to command attention. The honour of original to command attention. hurch, twenty or thirty feet in length, which is nating the North Atlantic line belongs wholly to l as a lumber house by the incumbent, and as Colonel Schaffner, of the United States, who, in hotel by travellers, the latter spreading their 1854, obtained a cession from the Danish governs on the floor, and sometimes taking their meals ment of exclusive telegraphic rights in the Faroes, n the altar; and when service is performed, it Iceland, and Greenland. His proposed route is as be by a well-educated clergyman, who con- follows: From Scotland to the Faroes, two hundred rs himself passing rich on ten to two hundred and fifty miles; from Farces to Iceland, three hungrace was the great end and sum of the christian's ins a year, and who shoes horses or makes hay, dred and fifty miles; from Iceland to Greenland, five hundred and fifty miles; from Greenland to coast of Labrador, six hundred miles. Now with regard to the objections that may be advanced against this line there are only two worthy of notice; namely, the icebergs of these northern coasts, and the submarine volcanic line of the south-western extreme of Iceland. The latter may be easily avoided by landing the cable on any of the many eligible spots between Portland and Cape Reykiances, and thence carrying the line across the country to any part of Faxe Fiord. All this portion of the coast is free from icebergs, and the shore-ice occasionally formed in the winter is inconsiderable; and besides it has been already demonstrated in the Baltic and American lakes that shoreice does not interfere with the workings of submarine lines. With regard to any local electrical difficulties to be surmounted, it must be remembered that, as far as our present knowledge goes, they are only conjectural; and when it is added that ks on a nest of earthquakes and sleeps amongst the bottom in these regions is, for the most part, composed of sand and mud, and nowhere of a

> Speed of the Reindeer .- Cassell relates that, at the Palace of Drothingholm, in Sweden, there is a portrait of a reindeer, which is represented to have drawn an officer, on an occasion of emergency, with important despatches, the incredible distance of 800 Engligh miles in forty-eight hours. The event is stated to have happened in 1669, and tradition adds that the deer dropped down lifeless on its arrival. M. Pictel a French astronomer, made some experiments in the year 1769, in order to ascertain the speed of the reindeer when exerted to the full, for a short distance. Of three deer yoked to light sledges, the first performed three thousand and eighty-nine feet eight inches in two minutes—that is at the rate of nearly nineteen miles an hour; the second did the same distance in three minutes, and

Musings and Memories.

SUSTAINING GRACE.

I have been led into some pleasant musings on the goodness and mercy of God, and that grace through which he brings salvation to his humble, trusting disciples, by reading a portion of a letter received about nine years ago. The letter described the severe illness of a faithful servant of the Lord Jesus Christ, who, in her household, in the community in which she dwelt, and in her station in the church militant, had been a useful labourer for the truth, by precept much, but more by example, pleading the cause of righteousness on the earth. The writer then speaks thus of the husband of the sick Friend, who was a minister of the gospel, and in many ways a sufferer for the testimony of Jesus. "Her dear husband is sustained by Him whom he has long endeavoured to serve. First-day he gave us a very sweet discourse, concluding with, 'I have so felt the love of God in my heart, to flow towards you this morning, that I feel ready to adopt the language of the apostle, "The grace of our Lord Jesus Christ, the love of God, and the communion of the Holy Ghost be with you all."' He had adverted to this passage at the commencement of his sermon, and said, this attainment. He dwelt on the effectual change wrought by it on the character of Paul, who from a hater and persecutor, came thus to breathe the language of good will to men. He spoke of the sufficiency of this grace to all those who received it, and added, 'though affliction may befall them, for that is the common lot of all men,-though temptations may assail, and weakness oppress, yet they have a place of safety.' After meeting, mother said, the discourse reminded her of a circumstance which she had heard related by Dr. Robinson, our old family physician. He said, at one time his father awaking in the night, saw a sea-captain, a near neighbour of his, walking backward and forward across his apartment. Surprised at his appearance there, he inquired why he visited him at such an unseasonable time. He replied, 'the grace of God in the soul, at such an hour as this, is worth millions of worlds,' and immediately vanished from sight. It then occurred to Robinson, that his neighbour was at sea, and feeling much impressed at the occurrence, he rose and noted down the time. He afterwards learned that, at greater depth than two thousand fathoms,* the the very hour this appearance took place, his friend only wonder is that this North-about route was not was knocked overboard from his vessel, and was drowned."

Ah! when death stares the christian in the face, when he sees there is no escape, but that for him, a few more swiftly passing moments only are allotted in this world, how sweetly comforting to feel the grace of God sustaining the soul. To him, it is worth indeed millions of worlds. The deathbed of that ancient labourer in the gospel of Christ, Richard Hubberthorn, now comes to my remembrance as a fitting illustration. His natural disposition was meek and lowly, and he loved peace amongst men; but when through the tender mercy of the Lord, he experienced the converting visitations of heavenly love, we are told, "he went through great afflictions, through the dispensation of the grace and spirit of Christ Jesus, until such time as the same power that killed did make alive, that wounded, also healed." Being raised up by the holy spirit of the Lord, he was made a minister of the everlasting gospel, and accordingly went forth in the name and power of the Lord Jesus Christ,

power and verity of his ministry, and of his faithfulness among the churches of Christ. "He was very wise, and knew his season when to speak and when to be silcnt. When he spoke, it was with such discretion and plainness of words, that reached Mela, Petronius, Pliny, Justin, Statius, Herodian, perfectly the matter intended; and his speech being with grace, and his ministry savoury, God made him and his service a blessing to many. He was not easily moved into grief by adversity, or into joy by prosperity; a faithful contender for the liv-ing faith once delivered to the saints, which stands unsuitable now to Norway and Sweden. As if in the power of God, and worketh by love."

So he lived faithful to God; and being imprisened for attending a religious meeting, he sealed his testimony with his blood, dying in the thronged and foul prison-house of Newgate. God, whom he America. Plutarch asserts that the pressure of of many houses could not bear the weight, had served, was with him through the valley and shadow of death; and that grace which he had the sides of vessels, crushes them to pieces. Both preached unto others, gave great comfort and sweet Virgil and Ovid mention the fact that the inhabi-support, as the end of his earthly course drew near, tauts of Thrace, and near the Danube, cut their He told his friends, "There is no need to dispute matters. I know the ground of my salvation, and am satisfied forever in peace with the Lord." The longing after immortality in him seemed to increase, and on the day of his departure he said to a Friend, covered with frost :-"Do not seek to hold me! It is too strait for me! Out of this straitness I must go." And so trusting to the grace of God, and supported by the God of Grace, he went to his heavenly home rejoicing in a sense of acceptance.

How does the power of divine grace pour into the souls of some, rich streams of consolation when the hour of death and the pains of a dissolving tabernacle is upon them. Thomas Loe, an able gospel minister in his day, very powerful in confull of kind sympathy for those in affliction, to inhabitants lived under ground part of the year, as ary, 1717, when the inhabitants entered the str whom be was qualified to speak encouragingly from the Laplanders now do; and that they wrapped experience, closed a life of dedication to the Truth, and suffering for its support, by a death of unusual and eyes exposed. An argument, used by Buffon, twenty-eight days, is as wonderful, though pro comfort, yea, glory! In an outburst of heartfelt is, that the deer, which cannot live now south of bly no less unusual, than that which Livy descri adoration and praise he exclaimed, "Glory to thee, the Baltic, and is found in Spitzbergen, was, in the as occurring near Barcelona in the second Pu O God, for thy power is known. God is the Lord," time of Caesar, a native of the Hercynian Forests, war. On the contrary, in January and Februa Then addressing William Penn, who had been which then overshadowed a great part of Germany 1755-56, troops were transported by water ff convinced of the Truth through his ministry, he and Poland.

Friends have been burdened with the space devoted think a pretty detailed statement necessary. Our aim has been so to select from the two descriptions, one in the British and the other in the London what has been done as we could. We shall have some remarks hereafter to offer on the changes already made, the present position of the body, and the further alterations which some plainly indicate they intend the Yearly Meeting to make.

SUMMARY OF EVENTS.

The Late Battle .- The facts which have come to light within the last week make it obvious that the attack upon the Rebel entrenchments near Manassas Junction would not have been hazarded had the Federal commanders known the actual condition of affairs. U. S. troops took eighteen large pieces of artillery into action, but the Rebels are said to have about two hundred guns, of various calibre, in position at the several entrenchments, while their superiority in numerical strength is so great that they would probably have repulsed even a more formidable and better directed assault.

The Southern newspapers carefully refrain from giving publicity to any information regarding their military preparations which might be prejudicial to the rebel canse; while every item of intelligence respecting the northern army and even the movements of each regiment is published in the newspapers of the northern cities, and soon reaches Richmond and the rebel camps. The Loss of Life.—No clear and reliable statement of the losses on either side has yet appeared. On comparing the various reports it seems probable that at least 2,000 of the Federal troops, and nearly an equal number of the Confederates were killed and wounded in the action. Confederates were killed and wounded in the action. The Prisoners, e.e.—According to the accounts forwarded to Richmond from the battle field, more than 1000 prisoners including 70 officers, and a member of Congress, remained in the hands of the rebels, who had also captured 7000 muskets, all the artillery, 200 horses, 150 wargons, 5000 blankets, &c. The reports state that the wounded prisoners were receiving the same attention that was given to their own wounded.

Warlike Measures.—Vigorous measures are being

Wartike Measures.—vigorous measures are being adopted by the War Department for a thorough and complete re-organization of the army, and the providing of reliable officers. To this end the Secretary of War, has issued a general order, that all officers of regiments nas issued a general order, that all officers of regiments will be subjected to examination by a board of military officers, to be appointed by the Department, with the concurrence of the Commander-in-Chief, as to their fitness for the positions assigned to them. Those found incompetent will be rejected, and their positions will be filled by competent officers, that may have passed an ex-amination of the Military Board. The services of 80 additional regiments to serve for three years, have been accepted, many of these have already arrived at Washington and others are on the route. The three months volunteer are being discharged as fast us their time expires; they generally return to their homes, though it is expected most of them will re-enlist for the three years term. The Navy Department has been making great exertions to get enough armed vessels affort to constitute an effective blockade and suppress privateering. It is said that probably fifty vessels of various sizes will be ready to sail within two weeks, provided men can be obtained for them. Four regiments have been withdrawn from Gen. Butler's command, and ordered to Washing-ton. No offensive operations in that part of Virginia, aeem to be contemplated. An order has been issued by Gen. Butler to the inhabitants of Hampton to remove, it being his determination to withdraw the troops and burn the town, in the event of its being attacked by the rebel

want of time, among where the Backhouse's recent visit to Norway, and another of Backhouse's recent visit to Norway and Sarah Lindsey's religious services in large enrolled force not yet equipped. Figure 1 large enrolled force not yet expenses a large enrolled force not yet en portion of their crops of cotton to that city, or to remove to it, yet in view of the great importance of the it from their plantations, until the blockade is fully and changes that hody has made in its discipline, we entirely abandoned. The Legislature of Tennessee has passed an act " for the relief of volunteers," which authorizes the governor to impress into the army all the free egroes of that State, between the ages of fifteen and one in the British and the other in the London affry years, being sound in mind and body. These ne-Friend, as to give our readers as clear a view of groes are to perform such menial services in the camp as may be required, and to receive therefor regular rations, with eight dollars per month as wages. It is isfactory state. Symptoms of discontent with the go stated that large bodies of the Confederate troops will erament were manifesting themselves in different qua shortly occupy north western Virginia.

Missouri.—The Union Convention in session at Jeffer-

son have various important measures under consideration.

One of these proposes to declare the offices of Gover-Orders had been given for the issue of small silver at nor, Lieut. Governor and Secretary of State vacant, and provides that those vacancies shall be filled by the convention, and that the officers so appointed shall hold their positions until the 8th mo. 1862, at which time rains had fallen. it provides for a special election by the people. It is The sales of c also proposed to abolish the present State Legislature. Major General Fremont to whom the command of militarys operation in the Mississippi Valleyhas been assigned, has taken up his residence in St. Louis. The rebels appear to be gathering in great strength in southern Missouri. The secessionists were also disarming the Union men in the north-eastern portion of the State

Congress.—The Senate has passed a bill to indemnify the States for expenses incurred to defend the Government, another, to define and punish conspiracies, and also, a bill to provide for the suppression of the rebellion. A bill has also been passed appropriating \$2,000,000, to furnish arms and munitions of war to the loyal citizens of the rebel states, and to provide for organizing them into regiments. Another bill has been passed to refund the regiments. Another oil has been passed to retund the duties on arms imported by the loyal states. The joint resolutions approving the acts of the President, have been under debate. They were opposed by Breckenridge of Kentucky, and supported by Johnson of Tennessee, in an earnest and able speech. A bill was reported by the Committee on Finance, and passed, which provides for a board of commissioners to examine into the compensation of all officers of the Government, with a view to equalize and regulate the compensation of the goverument employees. Both Houses have agreed that the regular army shall be increased to 40,000 men, to be reduced to 25,000 men, at the end of the war. The direct tax bill has met with strong opposition. It finally passed the House of Representatives by a vote of 77 to 60, after being reduced in amount and modified in several respects. By the act to authorize a national loan of \$250,000,000. it is made optional with the Secretary of the Treasury either to issue coupon or registered bonds, or Treasury notes, in such proportions of each, as he may deem advisable. The Treasury notes may be issued from \$10 upwards, and paid out for salaries and supplies.

The Rich Mountain Prisoners .- The seven hundred orisoners captured at Rich Mountain, and those taken by General Morris, all,-excepting Lieut. Col. Pegramgave their parole not to bear arms against the government, nor to give aid or information to the rebels during the war, and were then released.

New York.—Mortality last week, 530; of the deaths,

363 were under ten years of age.

Philadelphia .- Mortality last week, 389; of Cholera infantum, 71; of debility, 25; marasmus, 27; scarlet fever, 30; adults, 95; children, 294. The Sumter's Prizes .- All the vessels captured by the

rebel privateer Sumter, and sent into Cienfuegos have receip producer Sumirer, and sent into Cremnegos Bave been released by order of the Captain General of Cubat. The Grain Markets.—The following were the quotations, on the 20th ult. New York.—Sales of 170,000 bushels of wheat a 8° a 94 for Chicago Spring, and \$1.11 a \$1.14; for red winter; western oats, 32 a 33½, sales of 129,000 bushels of corn a 42 a 45, for mixed. Philadthyla.—Bed wheat \$112 a \$110. ** white \$117.** and \$17.** and \$17

\$1.20; oats, 29\frac{1}{2}a 30; prime yellow corn, 52.

Foreign.—Liverpool dates to the 21st ult. The

for Sufferings were approved, among which was a memorial to the Emperor of Russia, expressing the 10,000 men, in consequence of the three months volunteers commented on by the press. The Times says, that

of the possible cession of the Island of Sardinia to Fran Lord John Russell said that such a scheme could not permitted, and would terminate the alliance of Englar and France. He did not believe that the Italian Go ernment contemplated such an act. The King of Prussia was fired at on the 14th, at Bade

by a young atudent, named Becken, who was arreste The ball slightly grazed the king's neck.

Lord John Russell is to be created a peer.

The Steamer Great Eastern is to be employed regular between Liverpool and New York.

The Irish census shows a decrease of 12 per cent. the population in the last ten years.

Political matters in Russia, appear to be in an unse isfactory state. Symptoms of discontent with the go ters. There was also a severe commercial pressur The national bank at St. Petersburg, has raised the ra copper money for a large amount.

Accounts from India are more favourable respective the districts which have suffered from famine. Copior

The sales of cotton in the Liverpool market, for th previous week, were 113,000 bales. Fair Orleaus 8 middlings, 83. These prices are a small advance on pr vious quotations. Stock in port, 1,053,000 bales, include ing 795,000 bales of American.

The Manchester advices were favourable, holders de manding an advance in prices.

The weather in England was favourable for the crop Breadstuffs dull, and previous quotations barely main tained. American securities were unchanged. Cor sols, $89\frac{7}{8}$ a 90.

FRIENDS' SELECT SCHOOLS.

Those Seminaries will, it is expected, be re-opened after the summer vacation, on or near the 1st of Niut month next, the Boys' school being situated on Cherr street, west of Eighth, and the Girls' school on Sevent street, between Cherry and Race streets.

The Course of Instruction now adopted in the Boy school, embraces, besides the ordinary branches, a selection of more advanced mathematical, scientific an classical studies, on the satisfactory completion of whic the pupil will be entitled to a diploma, or certificate of

During the winter months, lectures on scientific subjects are regularly delivered, illustrated by appropriat

apparatus and experiments.

The Course of Study at the Girls' school embraces, i addition to the elementary branches-Algebra, Geome addition to the elementary brunches—Algebra, tecome try, History, Autural Philosophy, Chemistry, Astronomy Physiology, Natural History, Botany, Physical Gegraphy, Mental Philosophy, Etymology, Rhetoric, an Composition. Instruction is also given in Trigonome try, Mensuration, and the French and Latin language. As the proper classification of the scholars, early in the service of the service of

the session, is important, it is desirable that those who intend to enter pupils for the coming term, should do s as early in the session as possible. Application may be made on the opening of the schools, to Joseph W. Ald RICH, the Principal of the Boys' school, and to MARGARE LIGHTFOOT, the Principal of the Girls' school.

With the present arrangements, it is believed that these schools offer unusual advantages to Friends, fo the liberal education of their children, and at a very mo derate cost. Their attention is also invited to the primary schools in the Northern and Western Districts where provision is made for the careful elementary in struction of children too young to enter the principa schools. On behalf of the Committee,

If it be said, John intended here a religious orship, and not a civil:

might not as well accuse Mordecai of incivility who the creation is for the use of man. So where silk was no less singular than we in this matter. And abounds, it may be worn as well as wool; and were forasmuch as they accuse us herein of rudeness we in those countries, or near unto them, where and pride, though the testimony of our consciences gold or silver were as common as iron or brass, in the sight of God be a guard against such calum- the one might be used as well as the other. The nics, yet there are of us known to be men of such iniquity lies then here, First, When from a lust of education, as forbear not these things for want of vanity, and a desire to adorn themselves, men and that they call good breeding; and we should be women, not content with what their condition can very void of reason, to purchase that pride at so bear, or their country easily affords, do stretch to dear a rate, as many have done the exercise of have things, that from their rarity, and the price their conscience in this matter; many of us having that is put upon them, seem to be precious, and so been sorely beaten and buffeted, yea, and several feed their lust the more; and this all sober men any part of the United States, for three months, if months imprisoned, for no other reason but because of all sorts will readily grant to be evil. we could not so satisfy the proud unreasonable hu- Secondly, When men are not content to make a mors of proud men, as to uncover our heads, and true use of the creation, whether the things be fine bow our bodies. Nor doth our innocent practice, or coarse, and do not satisfy themselves with what in standing still, though upright, not putting off our need and conveniency call for, but add thereunto hats, any more than our shoes, the one being the things merely superfluous, such as is the use of Secondly, Men being alike by creation, (though covering of our heads, as well as the other of our ribbons and lace, and much more of that kind of eir being stated under their several relations re- feet, show so much rudeness, as their beating stuff, as painting the face, and plaiting the hair, the form them mutual services according to and knocking us, &c., because we cannot bow which are the fruits of the fallen, lustral, and correspondences: which cerrupt nature, and not of the new creation, as all other, but all equally are to return it to God: tainly shows less meckness and humility upon their will acknowledge. And though sober men among cause it is to him, and his name alone, that part, than it doth of rudeness or pride upon ours, all sorts will say, that it were better these things ery knee must bow, and before whose throne the Now suppose it were our weakness, and we really were not, yet will they not reckon them unlawful, ar and twenty elders prostrate themselves, under a mistake in this thing, since it is not alleged and therefore do admit the use of them among their to rob God of his glory: since all the duties of not to be indulged, as the apostle commanded gether unlawful, and unsuitable to Christians, and lation may be performed one to another without should be done to such as scrupled to cat flesh? that for these reasons: ese kind of bowings, which therefore are no es. And do not persecuting and reviling us upon this First, The use of clothes came originally from ntial part of our duty to man, but to God. All account show them to be more like unto proud Ha- the fall. If man had not fallen, it appears he en, by an inward instinct, in all nations have man, than the disciples or followers of the mek, would not have needed them; but this miserable sen led to prostrate and bow themselves to God. self-denying Jesus? And this I can say boldly, in state made them necessary in two respects: 1. To not it is plain that this bowing to men took place; the sight of God, from my own experience, and cover his nakedness; 2. To keep him from the om a slavish fear possessing some, which led that of many thousands more, that however small cold; which are both the proper and principal use em to set up others as gods; when also an am- or foolish this may seem, yet we behoved to choose of them. Now for man to delight himself in that tions proud spirit got up in those others, to usurp death rather than do it, and that for conscience which is the fruit of his iniquity, and the conscience. sake; and that in its being so contrary to our na- quence of his sin, can be no ways lawful for him: Thirdly, We see that Peter refused it from Cor- tural spirits, there are many of us, to whom the so to extend things beyond their real use, or to clius, saying, he was a man. Are then the popes forsaking of these bowings and ceremonies was as superadd things wholly superfluous, is a manifest ore, or more excellent than Peter, who suffer death itself; which we could never have left, if we abuse of the creation, and therefore not lawful to en daily to fall down at their feet and kiss them? could have enjoyed our peace with God in the use Christians.

Secondly, Those that will needs so adorn themow, that such manners were not to be admitted those to whom God hath not shown the evil of selves in the use of their clothes, as to beset them nong Christians. Yea, we see, that the angel them, under the like hazard; yet nevertheless we with things having no real use or necessity, but rice refused this kind of bowing from John, Rev. doubt not but to such as would prove faithful witnesses to Christ's divine light in their consciences, the end of it is either to please their lusts, (for

rvants thus to prostrate themselves one to an vanity and superfluity of apparel. In which, first, and ostentations mind; and it is obvious these are there: and in this respect all men are fellow-ser-two things are to be considered, the condition of their general ends in so doing. Yea, we see how the person, and the country he lives in. We shall easily men are puffed up with their garments, and not say that all persons are to be clothed alike, because it will perhaps neither suit their bodies their mind. Now how far these things are below I answer; This is to say, not to prove: neither nor their estates. And if a man be clothed so a true Christian, and how unsuitable, needs very in we suppose John, at that time of the day, so berly, and without superfluity, though they may little proof. Hereby those who love to be gaudy instructed as not to know it was unlawful to be finer than that which his servant is clothed with, and superfluous in their clothes, show they concern orship angels; only it should seem, because of we shall not blame him for it; the abstaining from themselves little with mortification and self-denial, ose great and mysterious things revealed to him superfluities, which his condition and education and that they study to beautify their bodies more y that angel, he was willing to signify some more have accustomed him to, may be in him a greater than their souls; which proves they think little as reproved. These things being thus considered, clothes in the servant, who never was accustomed than real Christians. It is remitted to the judgment of such as are desito be found Christians indeed, whether we are produces may be no vanity to the inhabitants to practices, both commending and commanding the

" READY TO BE OFFERED."-PAUL.

What a blessed condition the apostle had attained bowever, in the application of the process in questo. He felt that his sins had gone beforehand to judgment, and that through the mercy of God in Christ Jesus, they had all been blotted out and a or supplement to cotton and wool, that it is, at free pardon granted him. In this assurance, he knew that there was laid up for him a crown of N process, at once simple and economical, and righteousness. Yea, he already felt in the inward omfort of the Holy Ghost, a foretaste of the joy which should afterward in its fullness be revealed. To him, to depart and to be with Christ, was far better than to remain toiling in his earth work, yet for the love which he bore his Divine Master, he was tines it to fill a highly important function in the willing to continue in his prison-house of flesh, just nomy of one of the most valuable and essential solong as that All wise, and all loving One should see it was best. Yet he was ready to be offered. He had nothing further to do, but in holy trust and ich now agitate this country, and of their dis- confidence, whilst performing present duty, to wait the moment of his dismissal from time. How different his condition from that of the fearful, doubtr-estimate the importance of the application of ing ones, who know not whether they are accepted of God, yea or nay! How still more widely different from those, who feel they have not the love in mercy, and ready to forgive the contrite in spirit, aty of the duration of the impending civil war of God in them, that it is not, and has not been as will surely punish the rebellious and backsliding, ich already carries dismay to many a humble their meat and drink, to do his will? Such often- and every son and daughter of Adam, who do not ne on the other as well as on this side of the At- times have a vague hope, that through the mercy of God in Christ Jesus, they shall somehow or other, find a rest with the righteous, although they such prime necessity as cotton, furnish the most have not whilst on earth, followed the dear Saviour as cross bearing disciples. No cross no crown, is plainly inscribed over the portal, which admits the true christian into the narrow way, which leadeth unto life. I have stood by the dying bed of a humunto life. I have stood by the dying bed of a hum- was a professed minister of the gospel of Christ, but ble christian, who looking at the close of his carthly his heart, his affections, were all fast wedded to pilgrimage as imminent, could say, in sweet trust- the earth. He might from time to time, turn away to the peculiar retainty of Boundaria soils. College State in the state of the control of the cotton ing faith in his long loved Redeemer, "though I his thoughts from consideration of the sins he was enter the valley of the shadow of death with awe, living in the indulgence of, but there was One who I can truly say, it is not with dread." He believed did not forget them. His iniquities were ever rethat his sins had been blotted out, and he lay per- corded against him, and whilst turning away from feetly resigned, let the parting moment come when the secret convictions of the Lord's Holy Spirit, almost every soil and climate, to adapt it to all it might. Nay, he could have exclaimed, had he which would have administered some present punamost every son and chimac, to adapt it to all practical utilities of the cotton plant. This practical utilities of the cotton plant. This not deemed quiet, patient waiting, was his duty, ishment in mercy, to awaken in him a fervent deidentity in a holioge to be substantially sumplied "Come, Lord Jesus! come quickly! thy servant is sire to escape through repetitance and amendment

I have read an anecdote related by an attorney, to this import. He had a case, iu which the whole isite supplementary appliances will be forthcom- estate of a client was at stake; on the result of g in the progress of this new and most interesting which his future affluence or poverty depended. On the morning of the day in which the lord chancellor was to deliver the judgment, he called on his In a meeting for discipline my mind was op- attorney in a state of great excitement. His case kingdom, yet at last he pays all his true followers was to come up, was every thing ready! The deep with the riches of his glory and grace. teeming the sufferings of Christ without the gates feeling evident in the client, struck the attorney Jerusalem, nor having fellowship with Him in with fear for the result. Learned counsel had given em: also of a dark libertine spirit, that would a favourable opinion of his cause, but the attorney ample upon those precious testimonics of the cross, it appears had doubts, and the chancellor decided on our, the heathenish appellations of days and "never shall I forget the agony of despair depicted". onths, the unchristian language of You to a sin- in his countenauce at that moment, as, rushing

r, even Christ." Some well disposed Friends comparing it to that of those who are about closing ay, perhaps, have strengthened these libertines their earthly accounts, and know that their case is laying too great stress on externals; for "in to be called up that day, or at least in a very short nrist Jesus, neither circumcision availeth, nor period. As death leaves us, judgment will find us. lice uncertainty, but a new creature; "Dut if those like Quakers, walked according to this rule, they ould neither wear gay clothing, nor give flattering les to men. Much expense in dress, sumptuous the grave trusting in any thing short of being born ouses, and costly furniture, comport not with the again, renewed in Christ Jesus, through the cleanscample of a crucified Saviour, who was the most ing baptisms of his spirit, and a free pardon through erfect pattern of plainness, and had not whereon his grace, their doom is fixed forever, where the worm dieth not, and the fire is not quenched. In suffers himself to be caught in a passion.

vain may friends, like the learned counsel in the poor man's ease referred to, give favourable opinions. God, who seeth the heart, giveth a final deerec, according to the blessed counsel of his immutable justice, in accordance with the precepts and declarations he has given unto men, through the gospel revelations of his dear Son. Sympathizing and loving ones, may bid them confide in the mercy of God in Christ Jesus, priests may undertako to make good any defect in their heavenly title, but the fond wishes of the one sort, and the pretended absolution of the other, are equally unavailing. To the unrenewed soul, the issue of the case will be, "Depart ve cursed, into everlasting fire prepared for the Devil and his angels."

How soon death may call our case up for final decision, we none of us know, but it must be in a little while, to the longest liver; it may be very soon to some of us. We cannot tell but our case may come ou this day, nay, we know not but that before the hour we have now entered on shall be finished, our condemnation shall have been forever settled. It behooves us, dear reader, to be in earnest in our iuward aspirations after a clean heart and a right spirit. Our God, though he be rich come unto him, through Jesus Christ, out of whom there is no salvation, must expect no mercy.

Anuie of Astria, is reported to have said to Richelicu, that wicked ecclesiastic, "My Lord Cardinal, God does not pay at the end of every week, but at the last he pays." What a lesson this language ought to have been to the proud priest. He sire to escape through repentance and amendment of life the wrath to come, he was but increasing that payment, awfully sure at last. "God does not pay at the end of every week, but at the last he pays." How consolatory this thought to the hum-ble tribulated christian. Trials may be his portion on the earth, his heavenly Father may see meet to lead him through many sorrows on his way to the

Sifety in humility and stillness .- Sat with a young woman to whom tender counsel was given, with sincere desire that she might be preserved from the strange notions of liberty, and of alienation from the cross of Christ, which seem to abound. Our safety is in humility and in stillnes; that we may be taught to know ourselves, and often to resort to the place where secret prayer is wout to be made, where the simple-hearted wait for an increase of understanding, to know and to keep in the paths of uprightness, that they may be at peace. read the holy Scriptures with reverence and lowliness of mind, that they may come unto the Light, the Life, and the Way, whereof the Scriptures do testify, even Christ the Lord.—Mary Capper.

The idle should not be classed among the living; they are a sort of dead men not fit to be buried.

He submits to be seen through a microscope who

The of uniformity in principles and practice, and in the establishment of order and rules. From time to time regulations, which the Spirit of Truth opened in the minds of the faithful standard bearers, and to which in the hearts of others there was a concurrent testimony, when they were promulgated, Greatnumbers of persons were daily arriving in Missouri, were adopted by the society. Very different indeed would the state of our religious society be. from its condition in the beginning, if all the rules were now in its own will abrogated. In the nature of things, rules were not adopted by the church until been once made under the same Divine influence which called that church into being, they cannot be set aside without calling in question the very ground of its first gathering, and the doctrines and testimonies it then suffered in the support of.

We have received a notice of the death of J. Kansas, aged about 60 years, but no information of the time of his decease.

SUMMARY OF EVENTS.

Proceedings of Congress -lt is impossible in our limited space, to give a clear outline of all the important measures discussed and acted upon at the extra session, These include a new tariff, the various modes of borrowing money on loan, the imposition of a direct tax, a tax on incomes, &c., the whole being intended to supply the Treasury with the funds required to meet the enormous expenditure of the year. The tariff, as finally adjusted between the two Houses, imposes a duty of 2 to 4 cents per pound on sugar, according to grade, of 4 cents per pound on coffee, 15 cents a pound on tea, and 5 cents a gallon on molasses. The personal income tax is fixed at year. three per cent on all incomes over \$800, whether arising from salary, rents, dividends, interest, or profits of business. The income derived from Government securities, will be taxed only 12 per cent. Incomes on property held in the United States by citizens residing abroad, are taxed 5 per cent. The tax collectors are authorized to examine tax payers under oath, as to the amount of their incomes, and to commit to prison for refusal to answer. An important change in relation to the custody of the public funds has been made, virtually repealing the Sub-Trea-sury law, which had been in operation for more than twenty years. According to one of the provisions of the Loan hill, the proceeds of the loan of \$250,000,000, instead of being immediately paid into the Treasury in gold and silver, as now required, the money derived from the loan may remain in solvent banks until it shall be drawn loan may remain in solvent oanks until it shall be drawn out in pursuance of law. It appears, by an examination of the two volunteer bills, (one being supplemental to the other,) that the President has the power to call one million of men into the field, although that extent of aumillion of men into the field, although that extent of our pecture counters without using, in thority was not, it its believed, designed. It is not thought, into the army of the Confederacy, therefore, that more than 500,000 will be accepted.

**Tracs.—It is reported that Fort Fillmore, Texas, has Among the bills passed, was one prohibiting the punish been reinforced by ten companies of Federal troops, and Among the bilis passed, was one probibiting the punishment of soldiers by flogging, and one totally prohibiting the sale of intoxicating liquors to them, any where within the District of Columbia.

command at Washington, rigorous measures have been taken to introduce more efficient discipline, and put the men under proper control of the officers. All civilians and strangers have been excluded from the encampments. and strangers have ocen excluded from the encampments, and men and officers allies, are required to keep within the lines. It is designed as quickly as possible to in-crease the artillery arm of the service until, at least, two hundred rifled cannon are in the field. The three months volunteers are generally going home, and being replaced by regiments enlisted for the war.

Missouri .- On the 30th ult., the State convention, in session at Jefferson City, declared vacant the offices of Governor, Lieutenant Governor, and Secretary of State, on the 23d, the Pope announced a short allocation, in by a vote of 56 to 25, and the seats of the members of the present General Assembly were vacated by a vote continued occupation by the French troof 52 to 28. On the next day the convention elected

gate as a religious community, they had no rules Missouri, by 68 votes, Willard P. Hall, Lieutenant Insurance Company, a new and weak affair, has stop and regulations, but, the precents of Holy Serin. Governor, and Mordecai Oliver, Secretary of State, all payment, with a deficiency of £300,000. This susp Union men. The convention then adjourned until the Twelfth month next, unless sooner called together. Gen. Federal troops consisted mainly of the three months voluntcers, who have nearly all returned home. The rebels have large bodies of men under arms on the borders of Arkansas, and Gen. Pillow has invaded the State from Tennessee. He had, it was supposed, about 5,000 men at Bird's Point, opposite Cairo, and 12,000 at New Madrid. who have been driven out of Texas and Arkansas by the rebels.

New York .- Mortality last week, 585. The week was a disastrous one among the merchants and commission given it to bear by the great Head of the Church, houses, the failures having been very numerous, and some of them for heavy amounts, including one firm with reputed liabilities of two millions of dollars. During the year 1860, the number of new buildings erected in circumstances arose calling for them, but having this city, was 1653. For the first six months of the present year, the number was 597.

sent year, the number was 551.

Philadelphia.—Mortality last week, 414; adults, 118; children, 296; under one year, 167. The mean temperature of the Seventh month, according to the record kept at the Penna. Hospital, was 75.63 deg., the highest being 93.50, and the lowest, 58. The rain of the month measured 2.56 inches. The average of the mean temperatures of the Seventh month, for the past seventy-two We have received a notice of the death of J. years, is stated at 75.55 deg. The highest during that WHITALL REEVE, at his residence near Americus, entire period, (1793 and 1838,) was 81°, the lowest (in

1816,) was 680 Money Cost of the Revolutionary War .- The entire expenses of the Revolutionary War were stated in the report of Alexander Hamilton, Secretary of the Treasury, in 1790, to be \$135,000,000. The debt which was left for posterity to pay was \$75,000,000. The cost of the present rebellion has already far exceeded that of the entire war of the Revolution.

Cotton Statement .- According to the Charleston Courier's weekly cotton statement, the total receipts at all the ports for the present season are 3,487,783 bales. against 4,431,509 bales the same time last year; decrease 943,726 bales. The total exports to foreign ports are 3,101,458 bales, against 3,680,298 bales last year; decrease 578,680 bales, and the total stock on hand and on shipboard is 71,875 bales, against 234,954 bales last

The California Steamer Northern Light, from Aspinwall, with \$2,128,000 in specie, has reached New York. having escaped the rebel privateers which were on the look out for her.

Minnesota and Wisconsin .- The St. Louis Democrat. states that there is a great deficiency of farm labourers the present season, in both of these States. An increased breadth of land had been put in grain, and when the crops were ready for gathering, many thousands of the active men, who usually assisted at harvest, were absent with the army.

Virginia.—The rebel army under Gen. Wise, which

was designed to occupy the valley of the Kanawha, fled on the approach of the Federal troops, leaving behind them about a thousand muskets, and a few kegs of powder. The western part of the State is now nearly free from the secession forces. Gen. Wise has demanded reinforcements. In Eastern Virginia, the militia have been ordered to repair to the Court Houses of their respective counties without delay, in order to be drafted

that measures have been taken to capture Fort Bliss, now held by the Texans.

South Coroling .- Marshall Parks, agent of South Caro-The U. S. Army .- Since Gen. M'Clellan assumed the lina at Portsmouth, has transferred to the Confederacy a fleet of five steamers, already manned and armed. Kentucky .- At the recent election for members of the

State Legislature, the candidates of the Union party were generally elec.ed, in some instances by large ma-FOREIGN .- Liverpool dates to the 27th ult. Lord John

An abstract of the Irish census for 1861 has b published. The total population coumerated on the of Fourth mo. last, amounts to 5,764,543, being 2,804 males, and 2,959,582 females. The census of 1 showed a population of 8,175,124, and that of 1 6,552,385, being a decrease in the last ten years, of 842, and in twenty years, of 2,410,581. With the population of the island, the misery and wretched which once abounded, have been greatly diminist Thus the number of poor-house and work-house p pers, is found to be only one-fifth that of 1851. Enqui were made as to the "religious profession," of the ple, from which it was found that 4,490,593, Roman Catholics, and 1,273,960, were Protestants, be about 22 per cent of the whole. The members of Established Church, numbered 678,661; Presbyteri 523,992; Methodists, 44,532; Independents, 5,062; B tists, 4,165, Friends, 3,812; Jews, 421. The numbe inhabited houses in Ireland, is 993,233, and the decre since 1851, is 52,990. By the report of the emigrat commissioners, it appears that 1,230,986 emigrants h left Ireland within the last ten years.

RECEIPTS.

Received from Amy C. Hoopes, Pa., \$2, vol, 34; fi J. P. Edge, Pa., \$2, vol. 34.

WEST-TOWN BOARDING SCHOOL,-VISITING COMMITTEE.

The committee to superintend this Institution, at stated meeting in the Fourth mo. last, adopted the lowing proposition contained in a Report of a sub-co mittee, on the mode of conducting the examinations the course of study, &c., viz: "That there be three aminations in each session, two of them to commence 2nd day following the third First day, in the 2 6th, 8th, and 12th months, the committee as now, tending the meeting on First day, and proceeding in examinations on 2nd day and 3d day, devoting one examinations on 2nd day and 3d day, devoting one to each side of the house, and hearing the recitation the respective school rooms. Those in the 12th 6th months, to embrace the studies gone over si the opening of the session, and those in the 2nd and months, to be upon those learned subsequently to previous examination. One week previous to these aminations, to be devoted by the pupils to review their lessons. The other two examinations to be I at the same time as they now are, and to embrace the studies pursued during the session, three weeks] vious, being allowed the pupils to review them.
these occasions the scholars will assemble in the coll ing room (except the primary school,) under the car the writing teachers, or any other, if more conveniwho are to remain there during the school hours, have the oversight of the scholars, sending out the claas they are wanted in the respective school rooms. writing books to be examined as now. The pupil the primary school to be examined in their own ro and when not so engaged to pursue their studies usual. Arrangements to be made by the visiting c mittee, so that some of their number shall attend meeting for worship on First or Fifth day, once a me if practicable."

In accordance with the above arrangement, the V ing Committee now under appointment, will meet at school on Seventh day the 17th of this month.

JOEL EVANS, Clerk Eighth mo, 6th, 1861.

DIED, suddenly at Shelby, Orleans County, New Y on the 9th of Seventh mo., 1861, Ann E. Thist THWAITE, wife of James M. Thistlethwaite, aged 34 ye Although comparatively young, her attachment to the doctrines and testimonies of Friends, was firm unwavering; having a cultivated mind, her reac was confined to works of an instructive and subst tial character, and she was in the frequent prac of retirement and the private perusal of the Scriptu of an obliging and cheerful disposition, she was m endeared to her family and friends, who in her sud removal, have the consolation of helieving, that it long been her concern in health as in sickness, to found daily living agreeably to the injunction, "Let y loins be girded about and your lights burning."

Robert Barclay's Proposition XV. (Continued from page 386.)

to be seen but lightness and vanity, wantonness omitted. and obscenity, contrived to draw men from fear or VIII. Fourthly, Let us consider the use of being serious, and therefore no doubt calculated not subsist, if they were always intent upon serious nt and recreation, and see whether these things stand in awe before him, to walk as in his pre- greater vigour to apply itself to these things consist with the seriousness, gravity, and Gody sence; but if such as use these games and sports I answer; Though all this were granted, it, which the gospel calls for. Let us but view will speak from their consciences, they can, I doubt would no ways militate against us, neither plead include the discrete sports and games tool is continue. And it cannot be defined, if any, should so say, they would declare of the sould proved and framed y neither knew God nor his glory. And expected abundantly proves, that in the practice of these occupations, and are most detected by the continue of the practice of the sould be then, if they be not open Atheists and the strings men mind nothing less than the glory profligates, are such at best as make religion or as are so minded to teed one another therein, and God, and nothing more than the satisfaction of the care of their souls their least business. Now to propagate their wickedness, to the impoisoning

their own carnal lusts, wills, and appetites. The if these things were discountenanced by Christians, apostle desires us, 1 Cor. vii. 29, 31, Because the as inconsistent with their profession, it would retime is short, that they that buy should be as move these things; for these wretches would be though they possessed not; and they that use this necessitated then to betake themselves to some world, as not abusing it, &c. But how can they honest livelihood, if they were not fed and up-he found in the obedience of this precept that plead holden by these. And as hereby a great scandal for the use of these games and sports, who, it and stumbling-block would be removed from off seems, think the time so long, that they cannot the Christian name, so also would that in part be find occasion enough to employ it, neither in taking taken out of the way which provokes the Lord to care for their souls, nor yet in the necessary care withhold his blessing, and by occasion of which for their bodies; but invent these games and sports things the minds of many remain chained in darkto pass it away, as if, they wanted other work to ness, and drowned in lust, sensuality, and worldly serve God in, or be useful to the creation? The pleasures, without any sense of God's fear, or their apostle Peter desires us, To pass the time of our own soul's salvation. Many of those called fathers sojourning here in fear, 1 Pet. i. 17. But will any of the church, and other serious persons, have sigsay, That such as use dancing and comedies, card- nified their regret for these things, and their desires ing and dicing, do so much as mind this precept in they might be remedied; of whom many citations the use of these things? Where there is nothing might be alleged, which for brevity's sake I bave

mes, sports, comedies, and other such things, for the service of the devil. There is no duty and spiritual matters, and that therefore there is umonly and indifferently used by all the several more frequently commanded, nor more incumbent need of some divertisement to recreate the mind a ts of Christians, under the notion of divertise-upon Christians, than the fear of the Lord, to little, whereby it being refreshed, is able with

I look over the notions of them that call them not, experimentally declare, that this fear is for- the use of these things, which we would have see Christians, whether Papists or Protestants, gotten in their gaming: and if God by his light wholly laid ask.). For that men should be all see if generally there be any difference, save secretly touch them, or mind them of the vanity of ways in the same intentiveness of mind, we do not mere name and profession, from the heathen? their way, they strive to shut it out, and use their plead, knowing how impossible it is, so long as we th not the same folly, the same vanity, the same gaming as an engine to put away from them that are clothed with this tabernacle of clay. But this ise of precious and irrevocable time abound? troublesome guest; and thus make merry over the will not allow us any time so to recede from the ree same gaming, sporting, playing, and from Just One, whom they have slain and crucified in membrance of God, and of our soul's chief connee quarrelling, fighting, swearing, ranting, theuselves. But further, if Christ's reasoning be cern, as not still to retain a certain sense of his elling! Now how can these things be remedied, to be heeded, who saith, Mat. zii. 35, 36, That ong as the preachers and professors, and those the good man, out of the good treasure of the posed to be in the use of these things which we page, and account them not inconsistent with the man, out of the evil treasure, bringeth forth evil all are involved, in order to the care and sustentafession of Christianity? And it is strange to things, and that of every idle word we shall give tion of the outward man, are a relaxation of the that these things are tolerated every where; an account in the day of judgment, it may be mind from the more serious duties; and those are inquisition lays no hold on them, neither at easily gathered from what treasure these inventions performed in the blessing, as the mind is so leavne, nor in Spain, where in their masquerades come; and it may be easily proved, that it is from ened with the love of God, and the sense of his manner of obscenity, folly, yea, and Atheism the evil, and not the good. How many idle words presence, that even in doing these things the soul enerally practised in the face of the world, to do they necessarily produce? Yea, what are come-great scandal of the Christian name: but if dies but a studied complex of idle and lying words? habit, whereby though these acts, as of cating, man reprove them in these things, and forsake Let men that believe their souls are immortal, and drinking, sleeping, working, be upon the matter reproves the superstitions, and come seriously to serve that there will be a day of judgment, in which one with what the wicked do, yet they are done in and worship him in the Spirit, he becomes these words of Christ will be accomplished, answer another Spirit; and in doing of them we please r prey, and is immediately exposed to cruel me, how all these will make account in that great the Lord, serve him, and answer our end in the reprey, and is immediately exposed to cruci me, now all these will make account in that great the Lord, serve min, and answer out that the erings. Doth this bear any relation to Christon during the control of the primitive Christians? Surely not carding, and comedies acting? And yet how is it come to this place, are in whatsoever they do ull. I shall first cite some few scripture testibies, being very positive precepts to Christians, but allowing of them, many that are accounted the state of the property then see whether such as obey them can admit Christians take up their whole time in them, yea, mind, there may be a liberty allowed beyond these bees forementioned things. The apostle commake it their trade and employment? Such as things, which are of absolute need to the sustemads us, That whether we eat or drink, or what-the dancing-masters and comedians, &c., whose anec of the outward man, I shall not much contend twee do, we do it all to the glory of God. But hellish conversations do sufficiently declare what udge none will be so impudent as to affirm, master they serve, and to what end these things are wholly superfluous, or in their proper nature thin the use of these sports and games God is contribute. And it cannot be denied, as being ob- and tendency lead the mind into lust, vanity, and

of others: seeing there are other innocent divertisements which may sufficiently serve for relaxation of the mind, such as for friends to visit one another: to hear or read history; to speak soberly of the present or past transactions; to follow after sented to the French Academy in 1841, to prove Hale gives the result of his careful discussion gardening; to use geometrical and mathematical that the climate of China had not altered between the Meteorological Journal of Dr. Holyoke, kept experiments, and such other things of this nature. ancient and modern times. Biot inferred this fact Salem from 1786 to 1821, as follows: 'It thus a In all which things we are not so to forget God, in from the plants cultivated there, from the times of pears that this Journal does not support the op whom we both live, and are moved, Acts xvii. 28, arrival and departure of birds, and the time of ion that there has been a progressive increase as not to have always some secret reserve to him, emergence of silkworms. "The mean annual temperature of Salem London in 1822, and smallest in 1814, the rai being 5°.9, but without any progressive increase "In the United States, and perhaps in the whole decrease. From the observations made at Paris Observatory from 1804 to 1853, it is s there has been a great alteration in the prevalent or the coldest. Moreover, the single days or use the form sinners.

there has been a great alteration in the prevalent or the coldest. Moreover, the single days or use winds. The force of the west wind has abated, of excessive heat or cold are almost entirely while the east winds are increasing in frequency guised, when they are neutralized by the gen s the late distinguished meteorologist, Daniells, ence on the value of the temperature. e cold was so unusually severe that the Thames s passable on the ice, and yet the mean temperas passage on the real was 50°6, within a small fraction of the tyen was 50°6, within a small fraction a degree of the standard. In 1796, when, it is affords us an opportunity to learn if we will, somered, the mean annual temperature was 50°.1. the severe winter of 1813-14, when the Thames l other large rivers of England were completely zen over, the mean temperature of the two years s 49°, being little more than a degree below the ndard. And in the year 1808, when the sumr was so hot that the temperature in London s as high as 93°.5, the mean temperature of the r was 50°.5

Dr. Hugh Williamson attributes the change of nate, which he thinks has taken place in the ited States, at least in the neighbourhood of iladelphia, to the settlement upon the soil and cultivation. When the settler enters the new ntry, the trees disappear, the sun strikes down he surface and penetrates the upturned soil, the inage is perfected, and evaporation and cold inish in the winter. The land becomes more ted than the water, and the sea-breeze, which ore searcely passed the edge of the coast inland. makes farther and farther inroads. The sumrs will be less overheated, and the winters will tivation.

Arago would explain the change in the climate France in a similar way. He says: 'Ancient nce, as compared with the existing France, prets an extent of forests incomparably greater; untains almost entirely wooded; interior lakes, ds, marshes, innumerable; rivers, the overflowof which is not restrained by any artificial es; immense fields, which no plough had ever owed. Thus, the cutting down of large areas ong the forests, the almost disappearance of stagt waters, the clearing away of vast plains which ar but little from the steppes of Asia or America, uch are the principal modifications which the face of France has undergone in the lapse of

Those who think that facts warrant the belief t the climate of Southern Europe has become excessive, during the last one or two thousand rs, find an easy explanation of it upon similar ciples. They say that, in the time of Julius ar, the whole of Germany and Sarmatia was ered with forests. The Hercynian forest was y days' journey in length, from Belgic Gaul, ough Germany and Poland. It has also been gested that the falling of the innumerable leaves ild form a thick covering to the ground, which ld be impervious to the internal heats. By the iking and softening of the earth's surface, the mer rays enter deeper, and escape more freely k into the atmosphere, to alleviate the cold of ter. But the beneficial effect is not limited to spot. The fierce winds from the north are no waters in Gaul, and the felling of the trees in aria, will explain the alleged change in the cliivated in the Augustan age than it is now. rier remarks: 'The establishment and progress ain co-efficients which refer to the superficial for the peaceful fruits.

"Every extraordinary occurrence in our lives thing more of our own hearts and tempers than we were before aware of. It is easy to promise ourselves beforehand, that our conduct shall be wise, or moderate, or resolute on any given occasion. But when that occasion occurs, we do not always find it easy to make good the promise: such a difference there is between theory and practice. Perhaps this is no new remark; but it is not a whit the worse for being old, if it be true. A sensible man's true glory should be, to do his business well, and say little about it; but he disgraces himself when he puffs his prowess as if he had finished his task, when he has just begun it."

Thee and thou to one person; or obedience in little things .- Parents should train their children up in the way of truth, and keep them out of the beggarly rudiments of this world, that they may grow up in plainness, and keep to the plain language, both you and they, which is become a very indifferent thing amongst many of the professors of truth. In the beginning we went through great be so excessively cold as before man began his beson. For my part, I had a concern upon my spirit, because I shifted many times from that word. I would have said any word, rather than thee or thou, that would have answered the matter was concerned in, but still I was condemned. guilt following me, I was not clear in the sight of God, my way was hedged up with thorns, I could go no further, until I had yielded obedience unto the little things.

> The working women of Paris.—The census of 1851 made known the fact that among the 112,000 who apply themselves to various kinds of sewing, which is the state of class, and it is also the most unhappy. What do they earn? how do they live? The income of the 112,000, according to the estimates of 1851, was 44,146,640 francs, yielding for each one 391 francs books he had handled. As it proved, the man per annum, or 1 franc and 7 centimes per day for had marked down on a piece of coarse paper, the twelve hours of labour.

Christianity in Practice.-Some thirty years ago, there was a drygoods firm who made thousands of doilars every year by selling a certain kind of fine cloth used only for covering billiard-tables. After a time, one of the firm said to the other-

"How do you feel about telling goods for such purpose ?"

"I am not satisfied about it," was the reply, "and I think we had better give it up."

"Agreed," said the first; and from that day, notwithstanding the large and certain profits made

The Peaceful Fruits of Pain .- There are lese in Italy, although itself may have been better sons of patience and submission, yea, and of gratitude, which are best learned when the head is low. There is a mellowing of the man which is the cloudy ations, after the lapse of many ages, in the the meetness for glory. If you cannot be thankful duce then, be for the sick and the poor." in temperature; for the analytical expressions for the pain, the sickness, the restraint, be thankful "What did the little girl give thee, Ann!" "Oh,

For "The Friend,"

Musings and Memories.

KINDNESS REWARDED.

Kind acts are often recompensed, even in this life, yet the Christian is to do good, hoping for nothing again. Doing his works of charity for the dear Master's sake, and out of Christian love for his fellow creatures, his reward is in the Master's favour, and in feeling that his own heart does not condenin him. He has not turned a deaf car to the sorrow of those around him, and he knows that the dear Master, not because he has had compassion on others, but of his own mercy, will show every kindness to him.

I remember to have read an ancedote of the late George Whiting of New York, a worthy, consistent, tender hearted Christian. About thirty years since, he received the agency in this country for the Edinburgh Encyclopedia, and had at times large numbers of those costly volumes in an attic over his office. One day a poor man applied to him for work, and looked so distressed when informed that he had none for him, that George was satisfied he was in great destitution. Remembering that he had at that time a large number of the Encyclopedia's lying loosely, he took the poor man into the attic, and told him if he would pile them up neatly he would pay him for his labour. The man gladly undertook it, and George rejoiced that for the work. which really seemed unnecessary, he could pay him that which would send him home comfortable

In the course of a few weeks after this, the build. ing was destroyed by fire, and these volumes were all swept away. There was an insurance on them. but as George was unable to specify the number of the volumes and the amount consumed, the company refused to pay, and in the prospect of a loss of the whole insurance, he was dispirited and perplexed.

Still he endeavoured to fill up his duty towards the poor man who had piled up his books. The sick man made himself known, and George then told him of the disastrous fire, and enquired of him if he could remember distinctly the number of number of books he had piled, and the number of volumes in each pile, and he had still the paper in his possession. By the aid of the sick man's testimony and the list he had preserved, George Whiting's evidence of his loss was completed, and his insurance was paid to him.

WANT OF PROPER THOUGHT.

"Why, Charles, how many vegetables have gone to waste in thy garden which would have been a great comfort to thy poor neighbours over the road?" "True enough, cousin, and they would spot. The fierce winds from the north are no notwithstanding the large and certain profits made have been very welcome to them, but I never the large and certain profits made have been very welcome to them, but I never or the article, not another yard was sold by them. if we only had thoughtfulness enough, we might relieve many a one with things which we permit to go to waste. Remember the surplus produce of thy garden next year. A sick neighbour might be benefitted by a few of the fine Lawton Blackberries, numan societies, and also the action of natural autumn weather of weakness or decline - a softening beside being comforted and cheered, by thinking es, may change considerably, and in vast coun- of the spirit, an enlargement of experience, a meeker that thou had a kindly feeling for him. A few of s, the condition of the surface of the ground, the waiting on God, a weaning from the world, and a the spare bunches from those long trellises, might, ribution of the waters, and the great movements ripening of faith; in short, the whole of that main their season, be messengers of pleasure to others. he air. Such effects are adapted to producing turing process which, in believing men, constitutes Thou dost not need to sell it, let thy surplus pro-

nothing but this bunch of common field flowers?"

"Didst thou tell her thou felt obliged to her for the kind thought which prompted her to gather them for thee?"" Why no, to confess the truth, I never thought ofit!" "I supposed it was so, for I saw a tear in her eye, which showed that her feelings had been hurt. The poor little thing felt love for thee, and as she loved flowers, she thought that which pleased her, must please thee, and therefore gathered these. She had no hot house to go to for a fine bouquet. She could but give those her own toil could gather. Remember, my dear friend, never receive any intended kindness from the young or poor, without an acknowledgment. This is often neglected for want of thought, and want of true kindly thought often occasions great sorrow, and is the source of much of the distress with which this world abounds." "John, I understand that our old friend and

school-mate after a long illness, has been released from his sufferings. He was very much resigned to his situation, yet he often felt lonely, having no he may have seen at the time mentioned, for a near relatives about him, and he did very much half past one on the morning of the 30th, the tail enjoy the visits of his friends, didst thou often call would extend very nearly vertically from the horiupon him." "I am sorry to say, I never thought zon towards the zenith almost due N. N. E. pay for the necessary nursing, and although I at upon us, the answer is, that owing chiefly to the called away from us so early in life, some how I did not think of visiting him." "Well, it is a pity. He would have been existed that such a valuable man should be have been existed that such a valuable man should be talled away from us so early in life, some how I have of the cellptic (85½°), it swept across the comet, are different from those of any comet latter plane at a high angle, and therefore passed He would have been rejoiced to have seen thee, rapidly from south to north in its apparent position that it is a new one, or at least one whose or and thou, might have derived both comfort and instruction from his quiet, resigned state of mind, and our nights were the shortest; at its perihelion the the cheerful piety which seemed the constant clothing of his spirit. Ah, John, I sometimes fear this was 23° north of it; hence the comet was then but pected for several years. want of Christian thoughtfulness, is one of the greatest causes of hardness of heart. Our friends fifteen, and the comet's position was such that it are sick and in trouble, we sometimes amid the was above the horizon in the daytime only. This are sick and in trouble, we sometimes amin the state of things gradually changed as will be seen bustle of business give them a passing thought, but is the few think of what they can do to alleviate their by the following statement, which, it is bould be suffering or sorrow, by a visit of love, a letter of premised, is a rough approximation, hastily obviz: "The extent of Dr. Fothergill's application of the professional pursuits, to physical and philosp call correspondence, and to benevolent communication."

USE OF AFFLICTION.

Bow to the grief which breaks thy will, Good shall spring forth from thy distress, We crush the apples in the mill, Before the cider thence we press, From trodden grapes alone, we know The sweet clear juice doth freely flow.

So many leaves may crowd the tree, The sunbeams cannot reach the fruit, Then the keen pruning knife must be, Laid freely upon leaf and shoot, The close-clipped wounded vines produce, The purest grapes of sweetest juice.

Frequent waiting in stillness on the Lord for the proper place and duty, and out of all unprofitable of direction being almost horizontal. association and converse, whether amongst those of our own, or other professions. Much hurt may conversations on temporal matters, especially by interesting ourselves unnecessarily in them, for there is a leaven in that propensity, which being suffered to prevail, indisposes and benumbs the soul, and prevents its frequent ascendings in living as-

earth which we have at the first, into the character its period of revolution. of heaven which we must acquire afterwards, else haven we shall never reach. The distance, great such subjects, we append the following table, his view, yet with true christian magnanimity, as it is, between the two states, must be traversed abridged from the article in Silliman's Journal, is steadily adhered to the simple habits, the plot on this side of death, or we shall never ratian a The right ascension and declination, will enable language and dress, and the sinceret though unn state of blessedness on the other side of death.

The Great Comet of 1861. (Concluded from page 390.)

On Second-day morning, 7th mouth 1st, the comet rose some three hours before the sun, nearly in the north, and has not been below the horizon since, as its north declination on that day became greater than 50°, the complement of our latitude. The article in Silliman's Journal, from which we have chiefly compiled this paper, states that the comet was seen between one and two o'clock on the morning of the 30th, by Dr. Brünnow, at the Observatory of Ann Arbor, Michigan. If this is correct, and if he saw the head of the comet, then the ephemeris given in the same article, (from which we have deduced the foregoing statement, must be erroneous. Probably it was on the night of the 30th, early in the morning of 7th mouth 1st, that Dr. Brünnow saw it. The tail, however

Flax Cotton .- The Fibrilia Felting Company, grass, silk, wool, cotton and like fibrous substances \$10,000, which has been paid in, and has been Treasurer; and they with S. P. White, are the Directors .- Hunt's Magazine.

It has long been my judgment, that circulating reports, which in anywise have a tendency to depreciate others, is inconsistent with our christian duty. To mortify our natural propensity in that respect, is certainly a branch of the cross of Christ, and consonant with his spirit and precepts. Great indeed, even in this particular, is the prevalence of "the law in the members," against the divine law in the mind, and of corrupt propensity over a more rightly informed judgment. 1781 .- S. Scott,

"We may compare the soul to a linen cloth: it must be first washed to take off its native hue and color, and to make it white; and afterwards it must be ever and anon washed to preserve and keep it white."

No man is so happy as a real Christian, none so inspiration like this. To feel that we have excellence and intelligence of character, as well as rational, so virtuous, so amiable. How little vanity tted no task and left no obligation unfilled, by wealth. In the alternations and reverses of the docs he feel, though he believes himself united to fills the heart with satisfaction and the soul times, her property was entirely lost; her husband God! How far is be from abjectness when he ranks lowered the requisitions of the law, and exonerated some far distant period of time. his followers from the necessity of that strictness of life which they view as a burdensome part of religion. From this burthen they flatter themselves it was the chief object of the gospel to deliver them; and from this supposed deliverance it is, that they chiefly consider it is a merciful dispensation. A cheap Christianity, of which we can acquit ourselves by a general recognition, and a few stated observances, which require no sacrifices of the will, nor rectification of the life, is, I assure you, the prevailing system; the religion of that numcrous class who like to save appearances, and to decline realities; who expect everything hereafter while they resolve to give up nothing here; but who keep heaven in view as a snug reversion, after they shall have squeezed out of this world, to the very last dregs and droppings, all it has to give .-Hannah More.

the prophets is subject to the prophets. Here is position of Virginia lying west of a line running from the the government, here is the law of rule and sub-northeast corner of Tennessee, along the top of the jection in the life. Every one feeling a measure of Alleghenies to Maryland. The division is strongly opjection in the life. Every one feeling a measure of the Spirit in himself, is thereby taught to own and be subject to greater measure of the same Spirit in another. He that hath no measure of the Spirit Fortress Monroe, has been burned by the rebel forces, to of God, he is not of God, he is none of Christ's: and he that hath received a measure of the Spirit, in the same Spirit feeleth another's measure, and owneth it in its place and service, and knoweth its moving, and cannot quench it, but giveth way to it with joy and delight. When the Spirit moves in any one to speak, the same Spirit moves in the other to be subject and give way: and so every one keeping to his own measure in the Spirit, here can be no disorder, but true subjection of every spirit; and when this is wanting, it cannot be supplied by any outward rule or order set up in the church by tion.- Isaac Penington.

Clouds .- We often live under a cloud, and it is well for us that we should do so. Uninterrupted necessary by the Government to instruct its agents to sunshine would parch our hearts; we want shade withhold from transmission by telegraph, any despatches and rain to cool and refresh them. Only it be that may allude to army movements, or the contemplated hooves us to take care that whatever cloud may spread over us, it should be a cloud of witnessess. And every cloud may be such, if we can only look less of the consequences. at the sunshine that broods behind it,

The market for breadstuffs was quiet as tem .- There are too many Christians, who while come to some definite judgment respecting its orbit, they speak with reverence of Christ as the Saviour the probability of its ever having visited this porof sinners do not enough consider him as a deliv-tion of creation before, and whether it is likely cent. erer from sin. They regard him rather as having again to enlighten the inhabitants of this earth, in

SUMMARY OF EVENTS.

Congress.-The resolutions endorsing and approving all the acts of the President in relation to the rel were debated earnestly in the Senate before the final adjournment, and rejected by a close vote. His suspension of the Habcas Corpus Act was condemned by many of the Senators. Nearly all the civil appointments received the sanction of the Senate. It appears from the data of the committee of Ways and Means, that the total amount of the appropriations at the recent session was about \$275,000,000. Of this, \$197,000,000 are for the army, \$35,000,000 for the navy, and the remainder for other purposes.

The Battle at Manassas .- According to the official reports, the loss of the Federal army in killed, wounded, and missing was 2708. That of the rebel army is stated by the Richmond Despatch to have been 3100, in killed and wounded.

Virginia.—The State Convention re-assembled at Wheeling on the 7th. The principal subject before the Convention is that relating to the division of the State. True government in the church.—The spirit of It is proposed that the new State shall consist of that posed by a part of the Convention, but the majority appears to be in its favour. The limits proposed will in-clude thirty-four counties. The town of Hampton, near prevent the Federal troops occupying it for their winter quarters. The town consisted of 500 houses, the greater part of them built of wood.

Missouri .- At the latest dates, Gen. Lyon was at Springfield, in the southwestern part of the State, with 3,500 Federal troops. In a partial engagement on the 1st inst., the rebels lost 40, and the U.S. troops, 10 men. 1st inst, the repeis iost 40, and the U.S. troops, 10 men. The Confederate army near Springfield was said to number more than 20,000, and Gen. Lyon was in daily expectation of an attack. A collision took place on the 5th at Athens, in the northeastern part of the State, between the rebels and the Union troops, in which the former were defeated with considerable loss. Governor Gamble has ordered an election to be held in the Eleventh month for Governor, Lieutenant Governor, Secrecommon consent: for that is fleshly, and lets in the lary of State, and members of the Legislature, and for after the summer vacation, on or near the 1st of Nin flesh, and destroys the true order, rule and subjective. Large Personal Constitution of the people upon the recent action of month next, the Boys' school being situated on Chertier. the State Convention.

Army Movements .- So much embarrassment and incon venience has been caused by the injudicious publication of matters relating to the army, that it has been found plans for the prosecution of the war. The correspondents of the press will, however, doubtless continue to collect such information and forward it by mail, regard-

The Southern Privateers .- In consequence of the inefficiency of the blockade, a considerable number of rebel privateers have succeeded in getting to sea. In a late coast where ships of war cannot follow them. These piratical crafts are known to have captured upwards of fifty vessels, and have probably plundered and destroyed any others. Of the privateers only two have yet been taken or destroyed Recently, one of them named the Petrel came out of the harbor of Charleston and boddly attacked the U. S. frigate St. Lawrence, mistaking her for a merchantman. The privateer was sunk by a few shots from the frigate, and thirty-six men out of the crew of forty-four, were rescued by the boats of the St. Lawrence. The prisoners have been sent to Philadelphia

The weather in England has been very fine. The Times announces that Lord Elgin succeeds Ca-

ning as Governor General of India It is said that the British Government is in correspon dence with that of France, in order that united actic

may be observed towards the United States by sea a land during the present conflict.

The London Journals are speculating on the probab countenance the negociation of it in England.

In the House of Commons on the 25th, Sir C. Woo

made some financial explanations relative to India, a asked for discretionary power to borrow five million sterling for railway purposes. He believed, at the earth of the present year, the Indian expenditures and inco would be balanced. He said the Government had evinc great anxiety to develope the resources of India as a co too-producing country. He believed the result wou be that, ultimately, England would be rendered indepe dent of America for cotton. This year the supply cotton from India would be about 300,000 bales, mo than ever before.

In the House of Commons, on the 26th, Buxton calle attention to the increase of the Cuba slave trade, a the importance of supplementing the exertions of t naval force on the African coast by other measures, e pecially by the re-appointment of a Consul at Mozan hiane.

A general debate ensued, in which the Emperor poleon's free emigration schemes were denounce some of the members contending that the introduction of coolies into the French Colonies might become won than the slave trade.

A protest by the people against the French occupation of Rome, was receiving a vast number of signatur throughout Italy.

The Sultan of Turkey continues to effect reforms. has reduced his own salary from \$5,000,000 to \$2,000,00 He has an American Secretary.

Mexico.—The advices received by the Government

from Mexico are most unsatisfactory. Rebellion anarchy are again rampant in nearly every State in th republic

The Juarez government is entirely powerless, and liable to be overthrown at any moment.

FRIENDS' SELECT SCHOOLS.

These Seminaries will, it is expected, be re-openstreet, west of Eighth, and the Girls' school on Seven street, between Cherry and Race streets. The Course of Instruction now adopted in the Bo

school, embraces, besides the ordinary branches, a setion of more advanced mathematical, scientific lassical studies, on the satisfactory completion of wh the pupil will be entitled to a diploma, or certificate scholarship.

During the winter months, lectures on scientific s jects are regularly delivered, illustrated by appropri apparatus and experiments.

The Course of Study at the Girls' school embraces addition to the elementary branches-Algebra, Geon addition to the elementary branches—Algebra, Ocean try, History, Natural Philosophy, Chemistry, Astronon Physiology, Natural History, Botany, Physical G graphy, Mental Philosophy, Etymology, Rhetoric, a Composition. Instruction is also given in Trigonon try, Mensuration, and the French and Latin languag

As the proper classification of the scholars, early the session, is important, it is desirable that those intend to enter pupils for the coming term, should do as early in the session as possible. Application may made on the opening of the schools, to Joseph W. Al Rich, the Principal of the Boys' school, and to Margan Lightfoot, the Principal of the Girls' school.

With the present arrangements, it is believed these schools offer unusual advantages to Friends, the liberal education of their children, and at a very derate cost. Their attention is also invited to the mary schools in the Northern and Western District. where provision is made for the careful elementary struction of children too young to enter the princi schools. On behalf of the Committee,

in, Swear not by heaven, nor by earth, nor by James, I think it needful to make manifest the name of God is a moral precept of continual duvain foundation upon which that presumption in ration, because it is marked with his essential and moral worship, Deut. vi. 13 and x. 20. Thou § XI. First, They object, That Christ only for | shalt fear the Lord thy God, and serve him alone;

> I answer, This proves not that it is a moral and eternal precept; for Moses adds that to all the

precepts and ceremonies in several places; as Deut. x. 12, 13, saying, And now, Israel, what doth the Lord thy God require of thee, but to fear the Lord thy God, to walk in all his ways, and to love him, and to serve the Lord thy God with all thy heart, and with all thy soul; to keep the commandments of the Lord, and his statutes, which I command thee this day? And chap. xiv. 23, the fear of the Lord is mentioned together with the tithes. And so also Levit. xix. 2, 3, 6, the sabbaths and regard to parents are mentioned with swearing.

Fifthly, They object, That solemn oaths, which God commanded, cannot be here forbidden by Christ; for he saith, that they come from evil: but these did not come from evil; for God never

I answer, There are things which are good because commanded, and evil because forbidden; other things are commanded because good, and forbidden because evil. As circumcision and oaths, which were good, when and because they were commanded, and in no other respect; and again, when and because prohibited under the gospel, they are evil. And in all these Jewish constitutions, however

ceremonial, there was something of good, to wit, in their season, as prefiguring some good: as by circumcision, the purifications, and other things, the holiness of God was typified, and that the Israelites ought to be holy, as their God was holy. In the like manner oaths, under the shadows and ceremonies, signified the verity of God, his faithfulness and certainty; and therefore that we ought in all things to speak and witness the truth. But the witness of truth was before all oaths, and remains when all oaths are abolished; and this is the morality of all oaths; and so long as men abide therein, there is no necessity nor place for oaths, as Polybius witnessed, who said, The use of oaths in judgment was rare among the ancients; but by the growing of perfidiousness, so grew also the use of oaths. To which agreeth Grotius, saying, An oath is only to be used as a medicine, in case of necessity: a solemn oath is not used but to supply defect. The lightness of men, and their inconstancy, begot diffidence; for which swearing was sought out as a remedy. Basil the Great saith, That swearing is the effect of sin. And Ambrose, That oaths are only a condescendency for defect. Chrysostom saith, That an oath entered when evil grew, when men exercised their frauds, when all foundations were overturned; that oaths took their beginning from the want of truth. These and the like are witnessed by many others with the fore-mentioned authors. But what need of testimonies, where the evidence of things speaks itself? For who will force another to swear, of whom he is certainly persuaded that he abhors to lie in his words? And again, as Chrysostom and others say, For what end wilt thou force him to swear, whom thou believest not that he will speak the truth?

(To be continued.)

people, never be substituted instead of the thing phere receives as much heat in its long summer as itself; it being as possible to adopt a roaded use of the southern hemisphere in its short one, though such a mode of expression, as of any other; but the latter is more closely exposed. And again, may it be really the crown and covering of our the southern hemisphere receives as much heat in assemblies at all times and our glory forever .- S. its prolonged winter as the northern hemisphere in Scott. 1781.

never to find time to set about it, is as if a man received was retained. But radiation from the should put off eating and drinking from one day to earth is always wasting the heat received from another, till he is starved and destroyed.

Meteorology.

(Continued from page 395.) ARE THERE ASTRONOMICAL CAUSES IN OPERATION TO PRODUCE A CHANGE IN THE EARTH'S TEM-

"The uniformity of the mean temperature (except so far as it can be explained by local causes) for twenty-three centuries is important, as showing that the radiating power of the sun is to all appearance unimpaired. Arago says, that the demonstration of this proposition could not be sustained by too much evidence, since astronomers have observed that stars, which are in fact remote suns, have waxed and waned, and in some instances disapcommanded any thing that was evil, or came from peared utterly. Still, it is an interesting inquiry, to ascertain to what extent any slight changes of mean temperature which have been observed, or any difference between the mean or extreme temperatures of the northern and southern hemispheres, may be referred to an astronomical origin.

"We may consider, first, whether the position, and, secondly, whether the form, of the earth's orbit are exposed to changes which would influence

the climate.

"The seasons are caused by the inclination of the earth's equator to the plane of the ecliptic; in other words, to the want of parallelism between its motions of rotation and revolution. The effect of this inclination is to make the sun run higher, and keep above the horizon longer, in the summer half of the year than in the winter half. If this inclination increased or diminished, the seasons would become to a corresponding degree more excessive or more moderate. This angle has one of those magnificent oscillations known in physical astronomy as secular variations, but the limits of it are very circumscribed, and its influence, within the historieal period, must have been inappreciable. Poisson estimates the change in this angle too small, and too slow, to produce that increase in the descending strata of the earth's crust, the explanation of which he seeks in the changing temperature of the space traversed by the solar system.

"The earth, when in the perihelion of its orbit, is nearer to the sun, by 1-30 of the mean distance, than when in the aphelion. Hence the heat received at the former point is 1.15 greater than at the latter point. The perihelion is reached by the sun about the first of January, and the aphelion about the first of July. The effect would seem to be a diminution of the summer heat and the winter cold in the northern hemisphere, and an increase of both in the southern hemisphere, so that the seasons of the latter would be more excessive than those of the former. But Sir John Herschel remarks, in his Outlines of Astronomy, [although his argument is open to objection as will be seen presently, | that 'the elliptic form of the earth's orbit has but a very trifling share in producing the variation of temperature corresponding to the difference of seasons, on account of the greater velocity of the earth in the January balf of the orbit, which shortens the time required for its passage by eight May a frequent and customary speaking of the days, when compared with the period of describing Divine life and power which gathered us to be a the other half. Therefore, the northern hemisits short winter, though the momentary effect of To be always intending to live a new life, but This reasoning would be satisfactory if all the heat

the nights are longer than the days, and the earth loses more heat by night than it receives by day: and the southern hemisphere has eight more of these disadvantageous days than the northern hemisphere. Humboldt pointed out this defect in the argument of Mairan to prove the equal advantage belonging to the two hemispheres; an argument adopted, as we have seen, by Herschel, if we under-stand by his expression of 'very trifling,' that the distance of the earth from the sun is wholly balanced by the duration of the exposure. Humbold says, in his Memoir on the Isothermal Lines. 'The southern hemisphere receives the same quantity of light [?]; but the accumulation of heat in it is less, on account of the emission of the radian heat, which takes place during a long winter.' He might have added, that the summer heat would be greater, because, though no more heat was received it was received in a shorter time, during which les would be lost."

This subject is more involved than might at first thought be supposed. It is manifest, however, that so long as the sun is north of the equator, the northern hemisphere, taken as a whole, re ceives, during every twenty-four hours, more heat from the sun than the southern hemisphere does. and loses less, and this for two reasons: 1st, be eause the days in the north are then longer than they are in the south, while the nights are shorter: 2nd, because a larger portion of the northern than the southern hemisphere is exposed, at any one time, to the blaze of the sun, the north pole and its vicinity being for a long while in continual sunshine, while the neighbourhood of the south pole is in shadow. It may be questioned, however, whether these two reasons are not essentially one. being merely two methods of viewing the same effect. Of course the contrary of the above takes place while the sun is south of the equator.

Now, inasmuch as the sun is north of the equator about eight days longer in every year than it is south of it, " it is evident that so far as this circumstance is concerned, the northern hemisphere derives more heat and light from the sun than the southern. The illuminated half of our globe includes the north pole, during 1861 days of every 365; while the south pole is included only during the remaining 1781 days. Now, in the norther hemisphere, the greater nearness of the sun in winter co-operates with the effect of the shortness of this season, (as compared with the southern winter, in rendering it milder; but in summer the greater remoteness of the suu counterbalances, or probably more than counterbalances, the effect of the greater length of our summer. In the southern hemisphere, however, the greater remoteness of the sun in their winter, co-operates with the greater length of that winter in increasing its severity; but the shortness of their summer counter balances, in part at least, the greater nearness of the sun in that season. We conclude then, that the effect on the seasons occasioned by the ellip ticity of the earth's orbit, acting in this twofold manner, is, in some small degree to mitigate the winters of the northern hemisphere and to ren der those of the southern more severe; while on the summers of both hemispheres the effect is inconsiderable either way, being very nearly neutral ized; if there is any excess, it is probably to lesset the heat of the northern and increase that of the southern summers. The reasoning of Herschel a its short winter, though the momentary effect of the effect of the greater velocity of the earth if the sun's rays is greatest for the northern winter.

^{*} This year, (1861,) the sun is north of the equator earth is always wasting the heat received from the sun; from the autumnal to the vernal equinox, 22d, 8h. 40 m., P. M., making 186 days 11 hours.

We will now return to our extracts from Pro-

ssor Lovering's article. recoling of Dulong and Petit, he first proves, by in 10,000 years it would barely become percepti-athematical analysis, that the mean temperature ble, and in historical times it is wholly insignificant. alls, if the daily increase of temperature becomes rent places, the limit of trade-winds on each such discussions may be in the study of the meteoride of the equator, and the relations of terrestrial ology of geological eras, it does not concern hisents and seas is incontestably the most active; into the future." evertheless, we should not set aside the former. for, before the appearance of the land above the vater, that alone survived to produce differences in he superficial temperature, and the increase of the

"Although there may be a residual effect deocnding on the shape of the earth's orbit, it will be certainly less than would result from the reasoning of Æpiuus upon the subject in 1761. He gave 'ull weight to the influence of the longer summer and the shorter winter in the northern hemisphere, as compared with the longer winter and the shorter summer in the southern hemisphere, without allowing any force to the partial compensation which the southern hemisphere would receive from he shorter distance of the sun during its summer.

rust over different points of the earth's surface.

Buffon makes a similar mistake.

" If the position of the perihelion of the earth's orbit is of any importance, then the shifting of this point, by which it is gradually carried forward from one month into another, becomes of some moment in the explanation of the changes of climate. If this consideration is of any value in the study of the carth's climate during the vast periods con-templated by geology, it has none in relation to the alleged changes which have been assumed in the temperature of certain spots of the carth, within historical times, because the perihelion has moved within these times only by about 36°, and the time of the earth's arriving at it has only shifted that would understand the falsehood and deceit of from about the 24th of November to the 1st of sin, must compare its promises and its payments

January. "Is the form of the earth's orbit subject to any variation which would influence the climate? Asmean distance will not secure the permanence of my taste."

ous. It would answer for a body completely the amount of heat received from the sun; that this eveloped in the solar influence, or for one that amount will increase as the shorter axis of the as always the same side turned towards the sun : earth's orbit becomes less, and decrease as the ut to the case under discussion it appears inap-shorter axis of the orbit becomes greater, and the orbit approaches more nearly to the form of a circle. Now astronomers have demonstrated that the planetary disturbances are bringing the earth's lobe,' in which he discusses the sun's action in earth receives from the sun. This influence, howe distribution of temperature. Adopting the law ever, Arago declares to be a pure abstraction. For

"Herschel contemplates the possibility of the rger. Hence, the mean temperatures diminish carth's orbit, after becoming a circle, relapsing ith an increase of latitude, beyond what might be again into an eccentricity as great as that of Pallas, xpected morely from the change in the inclination or 4 of the semi-transverse axis of the ellipse, or of the sun's rays; because the farther north the having been of this shape formerly. But such a solition on the earth, the greater the difference of the two hemispheres. In fact, the temperature would not sensibly alter, the summer otion, the northern summer corresponds to the the perihelion would (other things being equal) exphelion, and the northern winter to the perihelion. ceed that at the aphelion, in the ratio of 3 to 1. Musings and Memories. RE FAITHFUL TO THE IMPRESSIONS OF DUTY.

Richard Williams the surgeon, who is noted as the devoted missionary in Patagonia, had a very severe struggle to encounter in giving up the use "In 1835, Prof. Ladame published a memoir orbit nearer and nearer to the circular form, and of tobacco, which sacrifice he believed was required the 'Formation of the Aetual Surface of the hence diminishing the amount of heat which the of him. He knew that a profession of religion, without so dwelling under its power as to be willing to give up for the sake of peace of mind, all gratifications which he felt to be wrong for him to indulge in, would be unavailing. Yet he found it no easy thing to give up one practice which had enslaved him, and he thus describes in his journal his strucgles in the conflict and the final breaking of the fet-

"This has been a day ever to be remembered. The light of the Lord's countenance has broken upon me, after having severely felt that clouds of darkness were around me. For more than a month before leaving England, I had given up the practhe present condition of the elements of the carth's and winter temperatures might. For the heat at tice of smoking and taking souff. The former habit I had practised for seven or eight years, the latter only occasionally. In fact, it was in consehus the burning heats of summer and the rigor- would then be of vast importance whether the peri- queuce of leaving off smoking that I had recourse us colds of winter, are moderated, and this cir- helion corresponded with the summer solstice or the to a pinch as an oceasional substitute. At various umstance elevates, other things being equal, the winter solstice. In the former case, the midsummer times I have been under strong impressions that I nean temperature of the northern hemisphere, heat and midwinter cold would be as intensified to ought to leave it off, and have felt dissatisfied with myself for the self-indulgence. But the cravings after it were become so strong, and the will of the flesh so urgently demanded it, that it was no easy task to overcome the propensity. There is a charm in tobacco powerfully beguiling to the senses. Whether this arises from its soothing and sedative quality, or from its being generally associated with self-indulgence, serving as a plea for idleness, and for a general relaxation of the whole man,-body and mind-certain it is, that tobacco has the power of enslaving its votaries to a remarkable degree. Are we Scholars in Christ's School .- The school No one has ever been more enslaved than I have been; of Christ and his teachings are within, as saith the yet many times has my conscience smitten me apostle, "That which may be known of God, is and frequently whilst in the act of smoking, I manifest in man;" there it is, that he teaches his have been obliged to lay the pipe aside. At times people himself. The more we keep inward to this I thought I would leave it off altogether; accordschool, the more we learn of Christ, and the less ingly I have given away or burnt the stock of to-we keep inward, even when about lawful things, bacco I had in hand, broken my pipes, and for can read in the mystery of life: there is no safety, what a sense of bereavement have I felt! None no prescryation, no growing in the Truth, but in but an old smoker can have any idea of my miseratrue humility, keeping inward to the gift of the ble longings. I have envied the hodman and the Holy Spirit of Christ, continually watching in the meanest person with his short black pipe. The light, against the temptations of the enemy. There- very perfume was a treat,-to inhale it a respite. fore the earnest breathing of my soul to the Lord Paintul were the efforts thus made, a toothache, is, that he may be graciously pleased to preserve some bodily disease, or the persuasion of others, me in watchfulness to the last moment of my life, induced a renewal of the habit, and its bond befor I well know I cannot preserve myself, nor think
came stronger than ever. But the fiat had gone a good thought, nor do the least good thing, as our forth, 'crucify' the flesh with its affections and blessed Lord said, "Without me, ye can do noth- lusts, and blessed be God, there was One in me ing." But the Holy One of Israel gives strength greater than all that were against me. Conscience to the poor and needy in spirit, by whom alone became more and more severe upon me. At length they stand, and not of themselves: all might, I resolved to leave it off, and happily succeeded, majesty, power, and dominion, be ascribed unto without experiencing any uncomfortable effects. This was six weeks before leaving England. Duriug that time I kept my firm resolution, though, in lieu of smoking, I had recourse to snuff. Some of my friends, who thought I was going to unnecessary lengths of self-denial, would put up for me, that would understand the falsehood and deceit of amongst the equipments for my voyage, tobacco, eigars, and a canister of snuff, and they made me promise to purchase a meerschaum. Well, I thought, circumstances may possibly be such as to render it desirable to have them; so I yielded to their wish. On board, I could not resist the temptation of taking a cigar, such was my weakness; giving them freely away, and smoking them daily, my stock was soon exhausted; but all the cravings for to-

bacco were re-acquired. I took to the meerschaum, passed without having recourse to him for it, but gentle rain, drop by drop, to the tiny grain of life also of Jesus might be made manifest in on never did I suffer such cravings after it, my stom- wheat. ach became affected, and my spirits so depressed, that I was compelled to ask for it again. With a sense of bodily relief and comfort, I smoked it; life shocts out from the very heart of the thing rain, must be emptied, before they can be cleaned from the very heart of the thing gain, must be emptied, before they can be cleaned from Having sought mercy and forgiveness with the Lord, and his grace to help me, I gave away, in suff box, and I threw overboard the sufficient and in the sought and in the sough souff bex, and I threw overboard the small quantity souff bex, and I threw overboard the small quantity souff bex, and I threw overboard the small quantity of snuff I had reserved. Thus a clear riddance stocking to knit, stitch by stitch! It will never be

Richard Williams was comforted in thus giving up to what he believed was required of him, and well will it be for all, who, whenever they are conscious that any of their ways are not well pleasing in the Divine sight, do turn therefrom, and stand firmly in their duty, humbly relying on the Lord's sustaining strength.

INFLUENCE OF TRIFLES. Oft in God's providence below, Great change from trifling causes flow, From smallest seed great growth takes place,
And when Christ's blessings on them rest, Our words and actions may be blest. A warning word in meekness spoken. A sinner's peace has sometimes broken; Urging his soul, whilst Jesus drew. With cords of love and mercy true Through humble penitence to know. The peace He only can bestow. The blessed Saviour deigns to take, The humblest means the soul to wake, A word of childhood, or a thought, From passing crowds at random caught; Yea, sometimes, truths by sinners said, Through Christ, the soul has comforted; Whilst those who spoke them never knew, The peace which others from them drew. Thus ice, in cold transparence bright May so condense the solar light, "Twill kindle up a fury flame,

SUMMARY OF EVENTS.

The National Loan .- The U.S. Secretary of the Treasury has made an arrangement with the hanks of Boston. sury nas made an arrangement whit the names of Doston, New York and Philadelphia, for the immediate purchase of \$50,000,000 of the 7 3-10 Treasury notes, at par. The banks stipulated for the privilege of taking a like sum on the 15th of Tenth mo., and another on the 15th of Twelfth mo. next. The subscriptions are to be divided among the banks in proportion to their respec-tive capitals. Books of subscription to the loan will soon be opened in all the principal cities and towns.

During the negotiations with the select committee of the banks the Secretary of the Treasury stated that the expenditures of the Government now averaged about \$1,000,000 a day.

Non-intercourse .- The President has issued his proclamation declaring a complete non-intercourse with all the rebel States, by land and sea, the forfeiture of the goods, wares, merchandize or vessels passing into any intercourse with these States, and ordering the speedy arrest

and punishment of all persons engaged in it.

The Indian Territory.—There is no longer any doubt of the fact that the Confederates have made treaties of alliance, offensive and detensive, with the tribes of the Indian Territory, excepting the Cherokees, which tribe has so far been kept out of the alliance by the prudence has so har been kept out of the animace by the producted of Texan troops were on their way to seize rort stanton of their Chief, John Ross. The Choctaws, Creeks, Semi- and any Government property they can find. Fort noles, and Chickasaws, who have thus been induced to Fillmore was garrisoned by thirteen companies of reguion the rebellion, will doubtless be treated as traitors lars. by the U. S. Government, and their annuities and allewances of all kinds be stopped.

Kentucky .- The secession party is not strong enough in this State to give serious trouble at present. At the late legislative election there were chosen, for the Senate twenty-two Union and two secession candidates, and for the House of Representatives, 59 union and 14 seces-

sion members

Missouri -Claihorne F. Jackson, who was deposed from the office of Governor by the late State Convention, has issued a "Declaration of the Independence of the State of Missouri," in which he declares the connection of the State with the Union sundered in virtue of the discretionary authority conferred upon him by the Legislature. The Federal forces having been temporarily reduced by the return of the three months volunteers, before the arrival of others to succeed them, this circumstance has enabled the rebels to present an overwhelming force in the southern part of the State. On the 10th ing lore in the southern part of the clark. On the total inst, the expected engagement between the Federal forces under Gen. Lyon and the Confederate army commanded by Gen. M'Collough and Gen. Price, took place near Springfield. The Union troops numbered place near Springfield. The Union troops numbered 5,200 meo, and the rebels from Tennessee, Arkansas and other States, more than 15,000. The battle raged fercely for six hours, when the Federal army remained masters of the field, but having had upwards of 800 men killed and wounded, and lost their commander, Gen. Lyon, who fell early in the action, it was found necessary to retreat fell early in the action, it was found necessary to retreat next day, in the direction of St. Louis, to reach some point at which they could safely await reinforcements. Gen. M'Cullough claims a victory, but gained at a heavy loss. He says the Confederate loss is from 200 to 300 loss. He says the confederate loss is from 200 to 500 killed, and 400 to 500 wounded, but these figures are probably much below the truth. In southeastern Missouri, also, there is a large rebel force threatening Cairo

under martial law.

Affairs at Washington.—The rebel forces in Virginia having for some time past been gradually advancing tow-nrds the line of the Potomac, it is believed to be their design to invade Maryland with a view of supporting the revolutionary spirit in that State, and finally getting possession of Washington, In order to meet the appre-hended danger, an order was issued from the War Department on the 18th inst., addressed to the Governors of Pennsylvania, New Jersey, New York, and seven other States, urgently requesting them to forward immediately to the City of Washington, all volunteer regiments or parts of regiments, whose services have been accepted, whether such volunteers are armed, equipped, uniformed, or not. Arms and equipments, it is stated, will be further at Washington, to these who are unprovided. nished at Washington, to those who are unprovided.

Ex-Minister Faulkner, of Virginia, who recently re-turned from France, has been arrested and placed under confinement. It is said he is held, rather as a hostage, is gone. for the security of our Congressmen now in prison at

The State Department has issued the following order -Until further notice, no person will be allowed to go abroad from a port of the United States without a passport, either from this Department or countersigned by the Secretary of State; nor will any person he allowed to land in the United States, without a passport from a Minister or Consul of the United States—or, if a foreigner, in year, so that one are the state of the foreigner in year, so that one are the state of the state o Minister or Consul of the United States-or, if a foreigner,

have been sent to sea by the Navy Department within the last ninety days, yet this large force has not yet been able to suppress privateering or render the blockade absolutely complete.

Virginia.—Bodies of the Confederate troops are again appearing in the western part of the State. It is rumored that preparations were making at Norfolk for an early

attack upon Fortress Monroe. Southern Items .- A late number of the New Orleans Price Current states the total number of vessels in port to be twenty-eight, twelve of which were under seizure.

to be twenty-eight, tweive of which were under settaire. The number of bales of cotton on hand, was 9,804. More of the new crop was coming forward. The crops of cotton and corn are said to be heavy, and the corn promising. The new Custom House at New Orleans has been converted into a cannon foundry.

Late dates from New Mexico state that a large number of Texan troops were on their way to seize Fort Stanton

Col. Van Dorn of the Confederate army, was recently at El Paso with 1300 men en route to subjugate Lower California,

The Indianola Courier says saltenough can be gathered on the Texas coast and marshes to supply the whole Confederacy.

The Houston Telegraph says Texas has made wheat and corn enough in this year for two years, enough wool to clothe half the Confederacy, and will make half a million bales of cotton.

The Attakapas Register says her sugar crop is better than ever before.

The Confederate Congress has passed an act ordering the expulsion from the South of all sympathizers with the Union, under penalty of imprisonment.

New York.—Mortality last week, 548.
Philadelphia.—Mortality last week, 377.

The Grain Market .- The following were the quotations

on the 19th inst. New York .- White wheat, \$1,33a \$1,40: on the 19th mst. Accordance—White wheat, \$1.50 a \$1.10; red western, \$1.24 a \$1.28; spring wheat, \$8 a \$1.15; yellow corn, 52 a 53; oats, 33 a 34. Philadelphia.—Red wheat, \$1.22 a \$1.25; white, \$1.32 a \$1.35; yellow corn, 52 a 54; oats, 29 a 30, for new Delaware.

The Privateers.—The Jeff Davis has made several more captures in the West India seas. The Sumpter, it is be-lieved, has been taken by the U. S. Frigate Niagara, near Curaçoa.

FOREIGN.-Liverpool dates to the 8th inst. The news of the defeat of the Federal forces at Manassas Junction was received on the 4th inst., and caused a profound

A Paris letter says that the success of the Southerners has powerfully operated on the opinions of the Parisians in favour of the secessionists.

Parliament was prorogued on the 6th inst., and the probably much below the truth. In sontheastern also count, also, there is a large rebel force threatening Cairo Queen's speech was read by a commission. It states and St. Louis; Gen. Fremont has declared St. Louis that the foreign relations are friendly and satisfactory, and trusts that there is no danger of disturbances to the peace of Europe. It notices the consummation of the kingdom of Italy, and hopes for the happiest results.

In relation to American affairs, it says :- The dissen sions which arose some months ago in the United States have unfortunately assumed a character of open war. Her Majesty, deeply regretting this result, has determined in common with the other powers of Europe, to observe, a strict neutrality between the contending parties. It refers to a settlement of affairs in Syria, and hopes the arrangements will secure henceforth internal tranquillity. It rejoices at the prosperity of India.

On the last day of the session of Parliament, Lord Palmerston stated his views on the blockading question. He said in effect that if the blockading force should allow one ship to enter a blockaded port by payment of duties, from that moment the blockade is raised. A belligerent may seal up a port, but if he lets one vessel in, his right

It follows, therefore, that when a Federal cruiser wil-Richmond, than heating of his complicity with the rebels. Ilingly nllows a ship to pass into the blockaded port, upon ments of France and Great Britain, upon the question of The comments of the English press upon the blockade,

the repairer of breaches and the restorer of paths blockade, with a view of inducing them fully to respect show that it is regarded as a very important measure the rights of the United States.

In the late great fire in London the loss of the ins rance offices was estimated at £1,000,000, besides sever hundreds of thousands of pounds' worth of uninsur property that was destroyed. The whole amount of t premiums received by all the London and country offic for risks incurred within the metropolis was only £350,0

cession, extending the time until 1874, and returning the caution money.

It is rumored that a conspiracy has been discovered

at St. Petersburgh, to put aside the Emperor and famil and to give a constitution to Russia. A further advance of \(\frac{1}{6}d \), in cotton had taken place.

The Manchester advices were favourable. Breadstuffs were also advancing. Flour is quoted 25s. a 28s. 6d.; red wheat, 9s. 4d. a 11s. 6d.; whi wheat, 12s. a 14s. 6d.; corn, mixed, 30s. a 31s.; whi

The work on the Suez Canal was progressing. Mar of the labourers employed were brought to the spot b

of the moourers employed were brought to the spot to force, but their labour was paid for. A new law, now enforced in Cuba, requires all Cool labourers, at the expiration of the seven years' appret ticeship for which they are imported, to choose betwee an immediate return to their native country or apprentic Fort ship for life.

RECEIPTS.

Omitted, Seventh mo. 17th. Received from Job Hue:

Omitted, Seventh mo. 17th. Received from Job Huetis, O., \$2, vol. 34.
Received from Edward Healey, N. Y., \$2, vol. 32, vol. 34; from Jesse Hall, agt., O., for Peter Thomas, Sen \$2.33, to 52, vol. 34; from Jebu Fawcett, agt., O for Saml. Hollingsworth, Wn. Leach, M. Ashton, Tho Heald, and Benj. Harrison, \$2 each for vol. 34, for 1 Warrington, and C. Allen, \$2, vol. 33, for E. Fogg., an N. Armstrong, \$4, each, vols., 33 and 34, for Elvir Hall, \$2, to 35, vol. 35, for Ruth Stanley, \$2, to 1: vol. 34, for Christopher Allen, Jr., \$2, vol. 35.

FRIENDS' SELECT SCHOOLS.

The Primary Department of these schools, for th Western District, will be re-opened on the 2nd of Niat mo., by Rachel E. Balderston, in the commodiou rooms adjoining Friend's meeting house on Twelft street, entrance on Clover street. In this school your children of both sexes are instructed, and well grounded in the elementary branches of education, so as to prepar them for the higher departments of study: while thei moral and religious welfare is carefully regarded.

Phila., Eighth mo., 1861.

FRIENDS' SCHOOL, GERMANTOWN.

Since the opening of this School, in Ninth Month, 1858 the buildings have been enlarged and improved, for the accommodation of Friends' children, and others whe conform to the regulations of the School. The situation is pleasant and healthful, adjoining and communicating with Friends' Meeting-House premises, on Germantows avenue. The course of study embraces the usual branch es of a good English Education; also, the French and Latin Languages

Terms for Tuition .- From \$8 to \$20 per Session of five months, according to the ages of the pupils, and the branches taught, French and Latin, \$8 each per Term -Application may be made to Alfred Cope, EZR. Comfort, John S. Haines, Lloyd Mifflin, Samuel Mos-RIS, GEORGE JONES, ELLISTON P. MORRIS, OF to AMY and SARAH H. ALDERTSON, at the School. Eighth mo., 1861

N. B.—A limited number of scholars can be accommodated with board in the dwelling on the premises Access may also be had by the Scholars to a valuable library, belonging to the Preparative Meeting.

Died, at Key Port, New Jersey, Seventh mo. 31st 1861, of a lingering illness, which he bore with Christian patience and resignation, EDWARD HEALY, in the sixty-second year of his age. His family and friends have the consoling evidence that their loss is his eternagain.

, near Americus, Kansas, on the 18th of Seventh mo. last, J. WHITALL REEVE, a member of Cottonwood Monthly Meeting of Friends, aged about sixty years.

| xxxi. 38, 39, 40. | Ezek. xxxvi. 25, and 40, and what means shall we infallibly know them? It will so we shall plainly imitate God.

xxxi. 38, 39, 40. Ezek. xxxvi. 25, and 40, and what means shall we infallibly know them! It will Seventhly, They object, Christ did swear, and Isa. xlv. 23. I have sworn by myself, that unto follow then that oaths are at present needful, and ought to imitate him.

I answer, That Christ did not swear; and allowed as the parity of the gospel, with its spiritual worship, ledge this and the other man to be a Christian to be under or a concerning which Hierom saith, All things

Lank ANY. 20. Lhave sworn by mysel, that who look lower are at present nectual, and me every knee shall bow, every tongue shall swaem, that it is lawful for Christians to swear; to with the parity of the gospel, with its spiritual worship, ledge this and the other man to be a Christian to be reiroumeision, or the celebration of the passhal be. Concerning which Hierom saith, All things

agree not unto us, who are servants, that agreed the names of ceremonies, the temple services, can be ignorant but these words which the pro-Eighthly, They object, That Paul swore, and phet writes under the law, when the ceremonial

remain.

I answer; The apostle tells indeed in this place d, but from the work of the devil, occasioned such forms of speaking is neither swearing, nor so what men at that time did, who lived in controverm evil, to wit, from unfaithfulness, lying, deeeit; esteemed by our adversaries. For when upon occasioned is a discretized in the place when the saint is did, who lived in controverm evil, to wit, from unfaithfulness, lying, deeeit; esteemed by our adversaries. For when upon occasions and incredulity; not what they ought to have I which was at first only invented by man, as a casion, in matters of great moment, we have said, done, nor what the saints did, who were redeemed tual remedy of this evil, in which they called We speak the truth in the fear of God, and before from strife and incredulity and had come to Christ, on the names of their idols; yea, that which, as him, who is our witness, and the searcher of the truth and Amen of God. Moreover, be only erom, Chrysostom, and others testify, was given hearts, adding such kind of scrious attestations, the laracities by God, as unto children, that which we never refused in matters of consequence; he might express the firmness of the divine promise y might abstain from the idolatrous caths of the nevertheless an cath hath moreover been required in order to excite in the saints so much the more athens, Jer. xii. 16, whatsoever is so, is far of us, with the ceremony of putting our hands confidence in God promising to them; not that he m being a moral and eternal precept. And upon the book, the kissing of it, the lifting up of might instigate them to swear against the law of tly, whatsoever by its profanation and abuse is the hand or fingers, together with this common God, or confirm them in that; no, not at all: for luted with sin, such as are abundantly the form of imprecation, So help me God; or so truly neither doth 1 Cor. ix. 24, teach Christians the hs of these times, by so often swearing and for-let the Lord God Almighty help me. Secondly, vain races, whereby men oftentimes, even to the caring, far differs from any necessary and per. This contradicts the opinion of our adversaries, be-destruction of their bodies, are wearied to obtain tual duty of a Christian: but oaths are so; cause that Paul was neither before a magistrate a corruptible prize; so neither doth Christ, who is that was requiring an oath of him, nor did he him- the Prince of Peace, teach his disciples to fight, Sixthly, They object, That God swore, therefore self administer the office of a magistrate, as offer- albeit he takes notice, Luke xiv. 31, what it beswear is good. I answer with Athanasius; Seeing it is certain it is not what Paul or Peter did, but what their and fight, as prudent warriors therein. Secondly, as proper in swearing to swear by another, thence our Master taught to be done; and if Paul did to what pertains to contests, perfidies, and dif-appears, that God, to speak properly, did never swear, (which we believe not,) he had sinued fidences among men, which our adversaries affirm suppears, that God, to speak properly, did never swear, (which we believe not.) he had sinued lidences among men, which our adversaries affirm ear but only improperly: whence, speaking to against the command of Christ, even according to to have grown to such a height, that swearing is at me, he is said to swear, because those things their own opinion, because he swore not before a present as necessary as ever, that we deny not at all: for we see, and daily experience teacheth us, majestrate, but in an episte to his brethren.

Nithly, They object, Isa. Ixv. 16, where, speak-that all manner of deceit and malice doth increase in the command of th the cast need by myself: and this is not an iself in the cord of truth; and ne that swearten in trust one another, and therefore require sails one the, for he did not swear by another, which is the carth, shall swear by the God of truth; because do another, it will not therefore follow that true property of an oath, but by himself. Therefore the former troubles are forgotten, and because they consider the form there of a read of the form there of the form nine eyes. For behold I create new to faithfulness and honesty, as well towards God heavens, and a new earth. Therefore in these time as one towards another, it will not therefore for the results of a read of the form there of the form nine eyes. For behold I create new to faithfulness and honesty, as well towards God heavens, and a new earth. Therefore in these time as one towards another, it will not do so, whom Christ has brought to wards another, and therefore has delivered. I answer, It is ordinary for the prophets to extinct the grant that among the form of the control of the form of the f

Quietness in the Storm.

"Be still, and know that I am God: I will h exalted among the heathen, I will be exalte among the nations of the earth." The forty-sixt Psalm evidently assumes tribulation and warfare in the midst of the world; and points the Christia to his refuge, his safe and blessed retreat, amida the war storms gathering from the distant horizon We want a religion that goes into the family, God is not only our refuge, but he is also with u

and darken till the whole sky is overcast; where

ritness of the fall of an aerolite of, I believe, recedented size. As I was driving my wife ch still seem to ring in my ears, a flaming mass oged itself into the road at the distance of a few ds from my pony's head. My wife and two dren were naturally much alarmed, so I directed e by. The pony broke out into a profuse peration, trembled all over, and showed every sign the greatest terror. On my return to the spot er an absence of about twenty minutes, I found at proved a most magnificent aerolite, of such a and weight as I do not believe to be on record. ght is 831 pounds. The men who dug it up ormed me that it had buried itself nearly 6 feet he ground, and was red-hot when they reached Indeed, when I returned, it was too hot to be ehed with impunity by the naked hand, While ling, the crystals assumed, while constantly inging, the most beautiful prismatic hues. Its eific gravity I have satisfactorily ascertained to greater than that of iron, but from the imperfect ans of testing at my command, I am unable to ermine the exact ratio. At the moment of its the sky was perfectly cloudless. A strong smell sulphur was diffused immediately after the dent, and I have found several crystals of that eleut in the cavities on the upper surface, which ve escaped abrasion from the soil. Perhaps some your numerous scientific correspondents will be e to state whether I am right in my opinion as to being the largest on record, in which case I will esent it to whatever museum may be deemed the st appropriate; otherwise I shall deposit it in library of the Mechanics' Institute at Lancas-. I remain, your obedient servant,

Augustus H. Denham. Chorley Rector, near Lancaster, Aug. 1.

> another, because one opens its cup and takes it in, while the other closes itself and the drop runs off. God rains his goodness and mercy as wide-spread as the dew, and if we lack them, it is because we will not open our hearts to receive them.

THE FRIEND.

EIGHTH MONTH 31, 1861.

This number of The Friend closes the volume. starting the publication in 1827, expected it to coney had received by faith a gospel which brought that it may yet be a welcome visitant at many a with faithfulness and integrity. m glad tidings of great joy, and their daily fire-side for a long time to come. Great changes favour of the dear Saviour, his love and grace, give lk was in the fear of the Lord and in the combave taken place amidst the band who first assobirghtness and sweetness to their way, and the ts of the Holy Ghost. A natural, and with ciated to contribute for its pages. Death has taken light of many dedicated sons and daughters will, to deprive us of the aid and assistance of most of church militant. The day of redemption from its d carried up to heaven, than they returned to those who are yet alive. But from time to time, declension will then come, and the time beheld in usalem with great joy, and "were continually in our ranks have received addition of such as were prospective vision by holy men and women, of the bemple praising and blessing God." Praise willing to lend efficient aid, so that at no time since building the walls of Zion, and the enlargement of a part of the daily expression of that pente-the establishment of the paper, has the editor been her borders, will open upon us, and spiritually

Great care has been exercised in endeavouring of the Spirit. "And they did out their meat to prevent the admission of aught into its pages, he ladness and singleness of heart, praising God," which would tend to corrupt good morals, or to midnight, in the inner prison at Philippi, two conflict with any of the doctrines of Truth, which oners with their feet fast in the stocks, were the Society of Friends have received from the

strue either the principles he lays down, or the judgment he gives, into an intended attack on his Death as a Regulator .- As we once walked the sentiments, or his actions, or on doctrines he holds

For the future, we may express the hope that The religious community is in agitation, the country souls in patience, remembering that "the Lord a suggestion to their minus.—Law paper,

Dew.—There is dew in one flower and not in there, because one onens its cun and takes it in word, as of old, his children shall have tribulation. but He has overcome the world, and in him they shall have peace.

The departure of many who hold conspicuous stations in the religious Society of Friends, from some of the principles and testimonies which, from its first rise have been most surely believed in and confessed by it, is cause of deep affliction and sorrow of heart to all, who loving the truth, have observed and understood the signs of the times. But the Great Head of the Church will take care of his own; and if those who are favoured to see things as they are, in the light which he gives, will only Probably very few, if any of those who assisted in be obedient to him, and devoted to do his will, a better day will come, and perhaps sooner than our tinue long after the trials which then assailed the faint-hearted faith can believe possible. Let every Society of Friends should have subsided. But now, one abide in humility and the obedience of faith, in completing its thirty-fourth year, we know not but doing his allotted work as the Lord gives ability, Then will the some from us, and various causes have combined to the Lord's praise, give lustre and glory to his throughout her courts joy and gladness will be beard, thanksgiving and the voice of melody.

SUMMARY OF EVENTS.

Affairs at Washington .- The number of Government troops in and about Washington has been largely in-creased, and stricter discipline is enforced. There is said to be very fittle sickness among them. The line of the upper Potomac is now well guarded, and there is less nee which passeth all understanding kept their conversation, and to uphold and promote, as he had been according to the source of the source o

and sent to Fort Lafayette near New York, for safe keep- and that this fact is significant of the future purposes of ing, in which place a number of suspected individuals the French Government. are confined. Several women, of high social position, in Washington, who have been communicating with the rebel leaders have been placed under arrest. The transrebei leaders have been piaced unuer arrest. Ine traus-mission by mail of newspapers of secession tendencies has been absolutely prohibited, and all communication by letters or papers, heretofore carried on with the rebel States, is henceforth prohibited. The excuse for these rigorous measures is to be found in the formidable character of the rebellion

Missouri .- This State is now the field of an arduons and doubtful struggle. Its great importance in a mili-tary point of view has induced the rebels to make strenuous efforts to secure it for the South, and the southern portions of the State are overrun by large bodies of armed men from Tennessee, Arkansas, Louisiana, and Texas, with some of their Indian allies. In the southeastern part of the State the secession forces are comeastern part of the State the secession forces are com-manded by Col. Hardee, and are said to be numerous, well armed, and disciplined. His advance is opposed by Gen. Prentiss, with the volunteers from Ohio, Indiana, and other States. The main body of the rebels under Gen. M'Cullough was moving towards Jefferson City, to which point strong reinfurcements have been sent from St. Louis. Gen. Fremont has telegraphed to Indiana for all the available troops in that State that can be spared, to be sent to St. Louis as speedily as possible. Governor Gamble has issued his proclamation calling into the active service of the State, for six months, 42,000 of the militia, viz., 10,000 cavalry, and 32,000 infantry, to act against the rebels. The battle near Springfield was even more sanguinary than at first reported. The Federal loss is officially stated at 223 killed, 721 wounded, and 291 missing. Many of the wounded have since died. The rebel loss, according to their own statement, was 265 killed, 800 wounded, and 30 missing. In a late engagement between 450 U.S. troops and 700 rehels, in the northern part of the State, the latter were routed with the loss of 52 killed, 90 wounded, and 50 prisoners, and in another near Charleston, 40 rehels were killed and 17 taken prisoners. In both these engagements the loss of the Federal troops was very small. These are some of the horrors of civil war.

Virginia.—The convention recently in session at Wheeling passed the ordinance for the division of the State by a vote of 50 to 28. The new State, which is to be named Kanawha, will include 39 of the western counties, and the ordinance has a provision permitting certain adjoining counties to come in, if they should desire by an expression of a majority, to do so. An election is to be held on the twenty-ninth of 10th month next, at which the people will vote for or against the establishment of a new State. Some of the ablest and firmest friends of the Union opposed this measure as contrary to the express letter of the Federal Constitution. and as being calculated seriously to embarrass the U. S. Government in its efforts to put down the rebellion. The proposed formation of a new State is not approved at Washington. The U. S. forces in Western Virginia, are under the command of Gen. Rosencrans, and those of the Confederates are commanded by Gen. Lec. According to rebel reports the latter had an army of 40,000 men. At the latest dates he was advancing slowly and cantiously into the region from which the rebels were recently compelled to retire.

Southern Items .- Information from the rebel States has been very meagre of late. It is reported that there is a great deal of sickness in the rebel camps in Virginia. and that at least 5,000 of Beauregard's army are in the bile, 87. The prevalent diseases are small-pox, mea-ver. The Memphis Appeal calls earnestly for hospitals. sels, and fever. contributions of flour and blankets for the rehel army. Every family is urged to give up a part of their blankets for the troops, because the supply from the north is cut off, and blankets in their dwellings are not so indispensable as they are to soldiers in camp. Tea and coffee have already become scarce. The Raleigh (N. C.) Standard recommends the use of the leaves and twigs of the Yopon as a substitute for the former. The Yopon is an evergreen which grows spontaneously on the coast of North Carolina. The Charleston Mercury says, the following prices were obtained at a sale of slaves in that city, on the 2nd inst. "Tenah, an elderly woman, a child's nurse, sold for \$240, cash; Binkey, aged woman for \$365, cash; Celia, a woman about 27 years old, lame, for \$605, cash; Grace, about 30 years old, with her child years old, for \$1170, half cash, balance in one year; Eliza, 28 years old, with five children, oldest 8 years, youngest 10 months, at \$2600, half cash, balance in one

year."
The Richmond correspondent of the Memphis Appeal

The Southern Privateers .- The reported capture of the Sumpter was incorrect. When last heard from she was off Laguyra, where she had captured two American ves-She was forbidden to enter that port by the Venezuelan authorities.

The Charleston papers advertise shares for sale in the privateer Beauregard. There is no want of materials for privateers in the southern ports. In Charleston alone there are three large steamships and five sailing ves-

The Division of Virginia .- The whole population of the State by the census of 1860, was 1,593,199, including 495,826 slaves. Not more than 10,000 of the slaves were in the counties now embraced in the proposed State of Kanawha, the total population of which is 281,786, so that the new State will include more than one fourth of the white inhabitants of Virginia

The Blockade .- The mouth of the Mississippi is block ded by four vessels of war, with 88 guns, the ports of Charleston and Savanah by five, with 80 guns ; Key West by two vessels; Fort Pickens by six, with an armament of 102 guns; Mobile by three; Hampton Road by eighteen ships of war, with 232 guns; Potomac river by six vessels, and several were cruising along the coast. In all, forty-six vessels, with an aggregate of 595 guns, are stated to be engaged in the blockade service. New York .- Mortality last week, 552.

The banks of this city according to the last report, had \$46,119,481 in specie on hand. There has been a partial revival in business, and rather more activity in the money market. Cotton goods are advancing in con-sequence of the high price and scarcity of cotton. The demand for army cloth has put a number of mills into operation. Large shipments of breadstuffs and provisions to Europe continue weekly. The exports from New York between First mo. 1st, and Eighth mo. 24th, amounted to \$81,716,273. In 1859, for the same period. they were \$41,650,344.

Brooklyn .- Mortality last week, 171. Philadelphia .- Mortality last week, 343. Adults. 96:

children, 247. FOREIGN.-Liverpool dates to the 16th inst.

The London Times, in an editorial, shows the finan-cial difficulties which the Washington Government will have to encounter.

The Times also publishes another letter from Russell, thich is generally discouraging for the North. The King of Sweden has arrived in England, on a

isit to the Queen. The English papers are daily engaged with the Ameri-

an question.

The London Globe, denies, by anthority, the statement that Admiral Milne has reported the blockade of the Southern ports ineffective, and says that no general report on the subject has been officially received The weather in England had been warm and the harves

as progressing rapidly. The harvest in France was progressing satisfactorily

but the wheat crop will be deficient. The position of Austria and Hungary was daily becoming more alarming.

There was a renewal of the troubles at Warsaw, and

affairs wore a threatening aspect. The Liverpool market for breadstuffs was declining.

American flour was quoted, a 24s. a 27s. 6d. The stock of cotton had been reduced to 944,000 bales

including 500,000 American. New Orleans fair 91; Mo-The troubles in the United States have injuriously

affected the trade of France more than that of England, as the demand for a great many articles of luxury formerly supplied to the United States by France, has been greatly reduced. The French circulars all state that trade is dull throughout the country. There is no demand except for articles wanted for immediate use, and there is, consequently, very much uneasiness pre-vailing among the manufacturing population.

RECEIPTS

Received from Chas. Cooper, Pa., \$2, vol. 34; from Jas. Austin, Agt., Mass., for E. F. Gardner, and Ed. Mitchell, \$2 each, vol. 35; from Elisha Hollingsworth, Agt., O., \$1, and for Jesse Deweese, and Richard Pen-Agt., 0., 31, and 107 Jesse Deweese, and remark Pen-rose, \$2 each, vol. 34; from James Bowman, 0., 34, vols. 34 and 35, for C. Fowler, \$3, 10.52, vol. 34; from Ann Sheppard, Pa., for N. K., \$2, vol. 34; from Jesse Hall, Agt., 0., Eleventh month 1st, 1860, for Samuel Smith, \$4, vols. 33 and 34, for John M. Smith, \$2, vol. The Richmond correspondent of the Memphis Appeal month 26th, for Jos. W. 21 900 2 and of vol. 33, as mentioned in No. 22 900 2 and of vol. 34, for Jos. Wilson, \$2, vol. 33, and of A. G., Seventh

FRIENDS' SELECT SCHOOLS.

These Seminaries will, it is expected, be re-oper after the summer vacation, on or near the 1st of month next, the Boys' school being situated on Cherr street, west of Eighth, and the Girls' school on Sevent street, between Cherry and Race streets.

The Course of Instruction now adopted in the Bon school, embraces, hesides the ordinary branches, a sel-tion of more advanced mathematical, scientific a classical studies, on the satisfactory completion of white the pupil will be entitled to a diploma, or certificate scholarship.

During the winter months, lectures on scientific suljects are regularly delivered, illustrated by appropria apparatus and experiments.

The Course of Study at the Girls' school embraces. addition to the elementary branches-Algebra, Geom try, History, Natural Philosophy, Chemistry, Astronom try, History, Aatural Finiosophy, Chemistry, Astronous Physiology, Natural History, Botany, Physical Gegraphy, Mental Philosophy, Etymology, Rhetoric, an Composition. Instruction is also given in Trigonous try, Mensuration, and the French and Latin language

As the proper classification of the scholars, early the session, is important, it is desirable that those intend to enter pupils for the coming term, should do as early in the session as possible. Application may made on the opening of the schools, to Joseph W. At RICH, the Principal of the Boys' school, and to MARGARY LIGHTFOOT, the Principal of the Girls' school. With the present arrangements, it is believed

these schools offer unusual advantages to Friends, I these schools oner unusual advantages to Friends, it the liberal education of their children, and at a very med derate cost. Their attention is also invited to the pr mary schools in the Northern and Western District where provision is made for the careful elementary in struction of children too young to enter the princip schools. On behalf of the Committee, JOHN CARTER, Clerk,

Philad., Seventh mo., 1861.

FRIENDS' SELECT SCHOOLS.

The Primary Department of these schools, for th The Frimary Department of uses sensors, for a Western District, will be re-opened on the 2nd of Nightmo., by Rachel E. Balderston, in the commodious nooms adjoining Friend's meeting house on Twelfib street, entrance on Clover street. In this school young children of both sexes are instructed, and well grounded. in the elementary branches of education, so as to prep them for the higher departments of study: while the moral and religious welfare is carefully regarded. Phila., Eighth mo., 1861.

FRIENDS' SCHOOL, GERMANTOWN.

Since the opening of this School, in Ninth Month, 1858. the buildings have been enlarged and improved, for th accommodation of Friends' children, and others wh conform to the regulations of the School. The situation is pleasant and healthful, adjoining and communicating with Friends' Meeting-House premises, on Germantow avenue. The course of study embraces the usual branch es of a good English Education; also, the French and Latin Languages. Terms for Tuition .- From \$8 to \$20 per Session of five

months, according to the ages of the pupils, and the branches taught,—French and Latin, S8 each per Term.

Application may be made to Alfred Cope, Ezra Comfort, John S. Haines, Lloyd Mifflin, Samuel Mon-RIS, GEORGE JONES, ELLISTON P. MORRIS, or to AMY and SARAH H. ALBERTSON, at the School. Eighth mo., 1861.

N. B .- A limited number of scholars can be accommodated with board in the dwelling on the premises. Access may also be had by the Scholars to a valuable library, belonging to the Preparative Meeting.

DIED, on the 7th of Eighth month, 1861, at her residence in Rahway, N. J., MARGARET H. PARKER, widow of Jacob Parker, in the eighty-sixth year of her age, a beloved minister and member of Rahway and Plainfield Monthly Meeting. Her circumspect walk, and the innocent cheerfulness and humility of her spirit, had long endeared her to a large circle of relatives and friend A living exercise for her own preservation in the truth as well as that of others, was a marked trait in her re-ligious character. It is believed that it may be truly said of her, that her lamp was trimmed and burning ready to meet the Bridegroom of souls, and to receithe salutation given to such, "Come ye blessed of m Father, lnherit the Kingdom prepared for you from th foundation of the world.

PILE & M'ELROY, PRINTERS, Lodge street, opposite the Pennsylvania Bank.
